MATERIAL SAFETY DATA SHEET

For Chemicals, Coatings and related materials "Essentially similar" to form OSHA-20

MANUFACTURER

Revised 7/09/01

NAME:

UNITED COLOR MANUFACTURING, INC.

ADDRESS: 660 Newtown-Yardley Road

Newtown PA 18940

EMERGENCY TELEPHONE NUMBERS: MEDICAL OR

CHEMTREC (24 HRS)

TRANSPORTATION: (800)424-9300

INFORMATION: (215)860-2165

SECTION 1 - PRODUCT INFORMATION

PRODUCT NAME: UNISOL® Liquid Red BK-50

DESCRIPTION:

Red Dve Concentrate

CLASS:

Liquid

HMIS HAZARD CODES

Health: 2 (Moderate) Flammability: 3 (Serious) Reactivity: 0 (Minimal)

Personal Protective Equipment: B

SECTION IIA - HAZARDOUS INGREDIENTS

INGREDIENT	PERCENT*	C.A.S.	VA	POR PRESSURE
MATERIAL DESCRIPTION	BY WEIGHT	REGISTRY NO.	LEL	mmHg @ 68EF
Kerosene	50.0	8008-20-6	0.7	N/A
†Dimethylbenzenes	13.4	1330-20-7	N/A	5.1
†Ethylbenzenes	2.6	100-41-4	N/A	N/A

^{*} These figures are typical properties, they do not constitute a specification. †Spillages of dye containing these materials may be notifiable under SARA Title 3, Section 313. For details, see SECTION XII of this MSDS.

SECTION IIB - NON HAZARDOUS INGREDIENTS

INGREDIENT **PERCENT*** C.A.S. **VAPOR PRESSURE MATERIAL DESCRIPTION** BY WEIGHT REGISTRY NO. LEL mmHg @ 68EF

C.I. Solvent Red 164**

34.0

See Below

N/A

N/A

^{*} These figures are typical properties, they do not constitute a specification.

^{** 2-}Nephthalenol (Phenylazo) Phenyl Azo Alkyl Derivatives. TSCA Accession #35371.

UNISOL® LIQUID RED BK-50

SECTION III - PHYSICAL DATA

BOILING RANGE:

279-302EF

FREEZING POINT: < -20EF

VAPOR PRESSURE:

5.1mm @ 68EF

VAPOR DENSITY: Heavier than air

SPECIFIC GRAVITY:

0.89

H₂O SOLUBILITY: Insoluble

EVAPORATION RATE: Slower (relative to n-butyl acetate)

% VOLATILE BY VOLUME: 16

N-OCTANOL/WATER PARTITION COEFFICIENT:

Log Pow expected to be greater than 100

APPEARANCE AND ODOR: Dark Red Aromatic Liquid

SECTION IV - FIRE AND EXPLOSION DATA

FLASH POINT:

> 100EF

EXPLOSIVE LIMITS:

LEL

UEL(% V IN AIR)

METHOD USED: TAG

1.0%

6.6%

NA

FLAMMABILITY CLASSIFICATION:

OSHA:

Flammable liquid-Class 1B

DOT:

A STATE OF

Flammable liquid if shipped in bulk containers, by air, by ship, or by rail. Exempt

from all DOT regulations governing the transportation of Hazardous Materials when

shipped in containers of 60 gallons or less and transported by truck.

EXTINGUISHING MEDIA:

Alcohol Foam, Carbon Dioxide(CO2), Dry Chemical, Water Spray: May be fumes, protecting exposed material or on overheated containers. Be sure spread fire.

used for controlling water does not

SPECIAL FIRE FIGHTING PROCEDURES:

Wear NIOSH-MSHA approved self-contained breathing apparatus. Wear impervious clothing. Use water spray to cool and protect exposed material or overheated containers. Take care not to spread fire with water.

UNUSUAL FIRE AND EXPLOSION HAZARDS:

Solvent vapors are an explosion hazard. Keep material away from all sources of ignition: extreme heat, open flame and any situation which may produce static or electric discharge, sparks or sparks resulting from frictional contact. Closed containers may explode from vapor pressure increases when exposed to extreme heat. Cool overheated containers with water spray, but do not spread the fire with cooling water. Vapors may travel great distances and ignite and flashback to source. See Section VIII for possible hazardous decomposition materials.

SECTION V - TOXICOLOGICAL INFORMATION

DEFINITIONS:

N/A - Not Available and/or Not Applicable

Tag - Tag Closed Cup (TCC)

PEL - Units of mg/cubic meter

(*) - SARA Section 313 listed. IF CHEMICAL SYMBOL * IN () MATERIAL IS A COMPOUND.

Example: (*Cu) - report as copper compound

NOTE:

Please refer to the end of Section IX for Regulatory Information pertaining to the determination for the listing of ingredients, CAS numbers, percentages and other information.

INGREDIENT		TLV (twa)	(rat)	LD50 (g/kg) (rabbit)	LC50 (ppm) (rat)
MATERIAL DESCRIPTION	PEL	mg/m³	ORAL	DERMAL	<u>INHAL.</u>
Kerosene	100	N/A	N/A	N/A	N/A
Colorant	N/A	N/A	N/A	N/A	N/A
Dimethylbenzenes (Xylene)*	100	100	4.3	3.16	5,000
Ethylbenzenes*	N/A	N/A	N/A	N/A	N/A

SECTION VI - HEALTH HAZARD DATA

EFFECTS OF OVEREXPOSURE:

PRIMARY ROUTE(S) OF EXPOSURE/ENTRY: Eye contact, skin contact, inhalation, ingestion.

EYES Vapors may irritate the eyes. Liquid is irritating and potentially

damaging to the eyes.

SKIN Liquid may irritate and dry the skin. Prolonged contact may lead to

burns and blisters and may aggravate dermatitis.

INHALATION Vapors may irritate the respiratory tract. May lead to headache,

dizziness, nausea, vomiting and unconsciousness. High vapor concentrations are anesthetic and may have other central nervous

system effects including death.

INGESTION May lead to headache, dizziness, nausea and abdominal pain.

ECOLOGICAL INFORMATION Ecotoxicological data have not been determined specifically for this

product. Information given is based on a knowledge of the

components and the ecotoxicology of similar products.

MOBILITY Liquid under most environmental conditions. Floats on water. If it

enters soil, it will absorb to soil particles and will not be mobile.

SECTION VI - HEALTH HAZARD DATA (cont.)

DEGRADABILITY

Not established

BIOACCUMULATION

Has the potential to bioaccumulate

ECOTOXICITY

Not established. Insoluble in water.

SECTION VII - EMERGENCY AND FIRST AIR PROCEDURES

EYE CONTACT:

Immediately flush with large amounts of water for 10-15 minutes. SEEK

PROMPT MEDICAL ATTENTION !!!

SKIN CONTACT: Promptly remove all contaminated clothing, shower if necessary. Remove from

skin with proprietary water less hand cleaner or cold cream. Discard

contaminated clothing and shoes.

INHALATION:

If dizzy, drowsy or overcome, remove to fresh air. If breathing has

stopped, apply artificial respiration. GET MEDICAL ATTENTION AS SOON AS

POSSIBLE !!!

INGESTION:

DO NOT INDUCE VOMITING!! GET MEDICAL ATTENTION IMMEDIATELY!!

SECTION VIII - REACTIVITY DATA

STABILITY:

Stable

CONDITIONS TO AVOID:

Extreme heat, open flames or sparks

INCOMPATIBILITY (MATERIALS TO AVOID)

Strong oxidizing agents, strong reducing

agents, Acids

HAZARDOUS DECOMPOSITION PRODUCTS:

Oxides of Carbon, Oxides of Nitrogen

HAZARDOUS POLYMERIZATION:

Will not occur

POLYMERIZATION CONDITIONS TO AVOID

Material not known to polymerize

SECTION IX - REGULATORY INFORMATION

This MSDS is in compliance with the OSHA Hazard Communication Standard 29CFR1910.1200.

This MSDS has also been prepared to be in compliance with the Commonwealth of Pennsylvania's Right-to-Know regulations for chemical manufacturers and should satisfy many other state Right-to-Know laws.

The chemical ingredient reporting rules for Pennsylvania are more detailed than OSHA regulations and this MSDS lists the common chemical name and CAS number in Section II for:

Specifically hazardous ingredient	>0	.01%	(OSHA is >0.1%)
Hazardous ingredient	>1	.0%	(OSHA is the same)
Nonhazardous ingredient	>3	1.0%	(OSHA does not regulate)

SECTION IX - REGULATORY INFORMATION Cont...

PROPRIETARY entered in the CAS number column declares that the exact identity of the ingredient(s) listed is proprietary information to United Color Manufacturing, Inc. and/or to our suppliers. Percentages of ingredients are approximate values for the purpose of hazard and SARA determination by the product's uses and are not necessarily exact specifications.

TSCA INVENTORY STATUS:

EC CLASSIFICATION:

All ingredients in this product appear on the TSCA inventory.

Classified as flammable liquid under EC criteria as per DOT

Regulations in SECTION IV.

EINECS:

All components in compliance.

DEPARTMENT OF TRANSPORTATION (DOT):

DOT Shipping Description:

This material is exempt from all DOT regulations governing the transport of hazardous materials when shipped in containers of 60 gallons or less and transported by truck.

Otherwise:

Xylenes Solution

Hazard Class 3, (3.3 for sea shipments), UN1307, III

CERCLA: If this product is accidentally spilled, the incident maybe subject to the provisions of the Comprehensive Environmental Response Compensation and Liability Act (CERCLA) and must be reported to the National Response Center by calling 800-424-8802. This product contains Xylenes.

SARA TITLE III: Under the provisions of Title III, Sections 311/312 of the Superfund Amendments and Reauthorization Act, this product is classified into the following hazard categories: Delayed Health. This information may be subject to the provisions of the Community Right-To-Know Reporting Requirements (40 CFR 370) if threshold quantity criteria are met. This product contains the following Section 313 Reportable Ingredients:

Component

CAS NO.

Maximum %

Threshold Spillage (LBS)

Xylene & Ethylbenzenes 1330-20-7

16

624

SECTION X - SPILL OR LEAK PROCEDURES

STEPS FOR MATERIAL SPILLAGE:

Remove all sources of ignition (flame, hot surfaces and any producers of electrical, static or frictional sparks). Wear appropriate protective clothing (See Section X). Ventilate area and try to contain spill by diking with sand or other absorbent material. Collect spill for disposal be scooping up liquids (if a large spill) and absorbing with sand or other approved absorbent materials and dispose of in accordance with local, state and federal regulations.

WASTE DISPOSAL METHODS:

Dispose of in accordance with local, state and federal regulations.

UNISOL® LIQUID RED BK-50

SECTION XI - SPECIAL PROTECTION INFORMATION

RESPIRATORY PROTECTION:

OSHA/NIOSH approved self-contained breathing apparatus or

vapor cartridge respirator. (Must be worn if PEL & TLV

levels are exceeded)

VENTILATION:

Provide adequate cross air ventilation to keep dust and/or

vapor levels below the PEL & TLV values. (See: Section V)

PROTECTIVE GLOVES:

Impervious gloves (rubber or neoprene) to avoid direct skin

contact.

EYE PROTECTION:

Splashproof safety goggles

OTHER PROTECTIVE EQUIPMENT:

Eyewash station, emergency shower.

SECTION XII - SPECIAL PRECAUTIONS

HANDLING AND SPECIAL PRECAUTIONS:

Overheating may cause container to rupture. Use explosion-proof electrical equipment Container must be kept closed and ventilation provided to prevent vapor concentration buildup. Store in a cool, dry place. Do not breathe vapor of get liquid in eyes or on skin or clothing. Keep away from heat or sources of ignition.

OTHER PRECAUTIONS:

Check all containers for leaks. Wear protective clothing as in Section XI. Avoid prolonged breathing of vapors of contact with skin. Ensure that all equipment is grounded to prevent static discharge. Containers of this material may be hazardous when emptied due to solid or vapor residue. All hazard precautions given in this data sheet must be observed for empty containers.

SECTION XIII - CONTACT INFORMATION

~_____

HAZARDS IDENTIFICATION

Potential Health Effects

Skin contact with the waste may cause irritation with itching, burning, redness, swelling or rash. Dimethyl acetamide and methanol can permeate the skin in amounts capable of producing the effects of systemic toxicity.

Eye contact may cause irritation with tearing, pain or blurred vision.

DuPont Material Safety Data Sheet

(HAZARDS IDENTIFICATION - Continued)

Inhalation may cause irritation of the nose and throat with sneezing, sore throat or runny nose. Gross exposure to Sodium Chloride by inhalation may cause ulceration of mucous membranes.

Inhalation, ingestion or skin contact with methanol may cause temporary mild depression of the central nervous system iwth dizziness, confusion, incoordination or drowsiness followed by an asymptomatic period usually ranging from 12 to 24 hours. Metabolic acidosis develops followed by ocular toxicity (visual disturbance including blindness). Other effects include non-specific effects such as headache, nausea and weakness. Gross overexposure to methanol may cause pathological changes in the liver and kidneys; nerve damage with numbness, weakness or muscle rigidity; tremors, convulsions and fatality.

Inhalation, ingestion or skin contact with dimethyl acetamide may cause non-specific effects such as headache, nausea and weakness, dizziness and drowsiness. Repeated or excessive over-exposure may cause altered liver function or abdominal pain, vomiting or jaundice; or abnormal kidney function with altered results on blood tests.

The fatal dose of methanol by ingestion is 60-250 ml.

Gross ingestion of Sodium Chloride may cause severe irritation of the digestive tract with stomach pain, nausea, vomiting, diarrhea or internal bleeding; dehydration; and fatality.

If there is significant potential for skin contact with Dimethylacetamide (DMAC), biological monitoring should be done to measure the level of DMAC metabolites in urine specimens collected at the end of the shift. It is a DuPont practice to limit an individual's end-of-shift DMAC metabolites in urine to levels at or below 30 ppm expressed as N-methylacetamide (MMAC).

Carcinogenicity Information

None of the components present in this material at concentrations equal to or greater than 0.1% are listed by IARC, NTP, OSHA or ACGIH as a carcinogen.

Page 3

FIRST AID MEASURES

First Aid

INHALATION

If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Call a physician.

SKIN CONTACT

In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Call a physician. Wash contaminated clothing before reuse.

EYE CONTACT

In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Call a physician.

INGESTION

If swallowed, do not induce vomiting. Give large quantity of water. Call a physician immediately. Never give anything by mouth to an unconscious person.

If swallowed, immediately give 2 glasses of water and induce vomiting. Never give anything by mouth to an unconscious person. Call a physician.

Notes to Physicians

Activated charcoal mixture may be administered. To prepare activated charcoal mixture, suspend 50 grams activated charcoal in 400 mL water and mix thoroughly. Administer 5 mL/kg, or 350 mL for an average adult.

FIRE FIGHTING MEASURES

Flammable Properties

Flash Point

: 170 F (77 C)

Combustible liquid. Heating can release vapors which can be ignited.

Extinguishing Media

Water Spray, Foam, Dry Chemical.

L0002252

DuPont Material Safety Data Sheet

Page 4

(FIRE FIGHTING MEASURES - Continued)

Fire Fighting Instructions

Wear self-contained breathing apparatus. Wear full protective equipment.

ACCIDENTAL RELEASE MEASURES

Safeguards (Personnel)

NOTE: Review FIRE FIGHTING MEASURES and HANDLING (PERSONNEL) sections before proceeding with clean-up. Use appropriate PERSONAL PROTECTIVE EQUIPMENT during clean-up.

Evacuate personnel, thoroughly ventilate area, use self-contained breathing apparatus.

Initial Containment

Dike spill. Prevent material from entering sewers, waterways, or low areas.

Spill Clean Up

Soak up with sawdust, sand, oil dry or other absorbent material.

HANDLING AND STORAGE

W--31ing /B------1

Handling (Personnel)

Avoid breathing vapors or mist. Avoid contact with eyes, skin or clothing. Wash thoroughly after handling. Wash clothing after use.

EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Controls

Use only with adequate ventilation.

Personal Protective Equipment

Eye/Face

: Coverall chemical splash goggles.

Respirator

: NIOSH approved respirator if exposure

limits exceeded.

Protective Gloves

: Neoprene or butyl rubber

Exposure Guidelines

STABILITY AND REACTIVITY

Chemical Stability

Stable at normal temperatures and storage conditions.

Incompatibility with Other Materials

None reasonably foreseeable.

Polymerization

Polymerization will not occur.

TOXICOLOGICAL INFORMATION

Animal Data

SODIUM CHLORIDE

Oral LD50: 3000 mg/kg in rats

Animal testing indicates that Sodium Chloride is a moderate eye irritant and a mild skin irritant.

Single exposure by ingesiton to high doses of Sodium Chloride caused increased urination, excessive thirst, pathological changes of the stomach. Repeated exposure caused increased kidney weight.

Sodium Chloride has not produced genetic damage in bacterial cell cultures. In mammalian cell cultures and animals, Sodium Chloride has produced positive responses, however, these effects are considered to be caused by high osmolality and not genetic damage.

SODIUM ACETATE

Inhalation 1 hour ALC: > 30 mg/L in rats Skin absorption LD50: > 10,000 mg/kg in rabbits Oral LD50: 3530 mg/kg in rats

The compound is a slight skin and eye irritant. Toxic effects described in animals from single exposures to lethal levels by ingestion include labored breathing hyperactivity, hypothermia, anaesthetic effects, and nonspecific effects such as diarrhea, and sedation. Repeated and long term exposures to levels up to 10% in the diet demonstrated no adverse effects. Tests in animals demonstrate no developmental toxicity. The compound does not produce genetic damage in bacterial and mammalian cell cultures.

SODIUM SULFATE

Oral LD50: 5859 mg/kg in mice

A formulation containing 69.5% Sodium Sulfate was reported to be non-irritating to skin and eyes.

Animal testing indicates Sodium Sulfate does not have carcinogenic or developmental effects.

METHANOL

Oral LD50: 9,100 mg/kg in rats Dermal LD50: 15,840 mg/kg in rabbits
Inhalation 1 hour LC50: > 145,000 ppm in rats

DuPont Material Safety Data Sheet

(TOXICOLOGICAL INFORMATION - Continued)

Animal testing indicates that Methanol is an eye and skin irritant.

Eye contact with Methanol caused clouding of the eye (corneal opacity).

Repeated skin contact with higher concentrations of Methanol caused some mortality.

Single exposure by ingestion caused narcosis, liver effects and hypothermia. Repeated exposure caused pathological changes of the eye and acidosis.

Repeated exposure by inhalation caused irritation of the eyes and blindness.

Exposure to pregnant rats shows the following developmental effects: reduced birth weight, resorption and bone abnormalities. Tests have shown that Methanol does not cause genetic damage in bacterial or mammalian cell cultures or in animals.

DIMETHYL ACETAMIDE

Inhalation 1 hour LC50: 8.81 mg/L in female rats Skin absorption LD50: 2240 mg/kg in rabbits Oral LD50: 4930 mg/kg in rats

Animal testing indicates Dimethylacetamide is a slight to mild skin irritant, and a mild eye irritant, but not a skin sensitizer.

Repeated exposure by skin contact caused weakness, degeneration of the liver, central nervous system depression, incoordination, inflammation of the skin and dry skin.

Repeated exposure to high doses by ingestion caused pathological changes of the stomach and lungs. Repeated exposure to lower concentrations caused reduced weight gain, diarrhea, anemia, histopathological changes of the liver, kidneys, stomach and testes. Long term exposure by ingestion caused increased liver, kidney and adrenals weight, and altered clinical chemistry.

A near lethal inhalation exposure produced degeneration of the liver and kidneys. Repeated exposure caused liver injury, upper respiratory tract irritation, degeneration of the testes and pathological changes of the bone marrow. Long term exposure caused degeneration of the liver, and increased liver and kidney weights. Long term exposure at even higher concentrations caused degeneration of the kidneys and retinal atrophy in female mice.

DuPont Material Safety Data Sheet

(TOXICOLOGICAL INFORMATION - Continued)

In animal testing Dimethylacetamide has not caused carcinogenicity. Animal data show developmental effects only at exposure levels producing other toxic effects in the adult animal. Dimethylacetamide is not considered a unique developmental hazard to the conceptus. Some tests in adult animals have shown that this material may cause changes to the testes only at levels which produce other toxic effects in the adult animal. Reproductive data on adult animals show no change in reproductive performance. Dimethylacetamide is not considered to be a unique reproductive hazard. Dimethylacetamide has not produced genetic damage in tests on animals. In animal testing, Dimethylacetamide has not caused permanent genetic damage in reproductive cells of mammals (has not produced heritable genetic damage).

SODIUM NITRATE

Oral LD50: 4,242 mg/kg in rats.

In guinea pigs, a single dermal exposure to two grams caused inflammation of the small intestine and death within 12 hours.

In calves, a single oral dose increased methemoglobin. Repeated exposures (up to 14 months) increased methemoglobin and the incidence of pulmonary lesions.

Tests in animals demonstrate no carcinogenic activity.

This compound does not produce genetic damage in bacterial cell cultures. It has been reported to cause chromosome damage in mammalian cell cultures. It does not produce heritable genetic damage.

ECOLOGICAL INFORMATION

Ecotoxicological Information

Aquatic Toxicity

- 96 hour LC50, fathead minnow: 7341-7650 mg/L for sodium chloride
- 24 hour TLm, bluegill sunfish: 5000 mg/L for sodium acetate

HAZARDS IDENTIFICATION

Potential Health Effects

Skin contact with the waste may cause irritation with itching, burning, redness, swelling or rash. Dimethyl acetamide and methanol can permeate the skin in amounts capable of producing the effects of systemic toxicity.

Eye contact may cause irritation with tearing, pain or blurred vision.

DuPont Material Safety Data Sheet

(HAZARDS IDENTIFICATION - Continued)

Inhalation may cause irritation of the nose and throat with sneezing, sore throat or runny nose. Gross exposure to Sodium Chloride by inhalation may cause ulceration of mucous membranes.

Inhalation, ingestion or skin contact with methanol may cause temporary mild depression of the central nervous system iwth dizziness, confusion, incoordination or drowsiness followed by an asymptomatic period usually ranging from 12 to 24 hours. Metabolic acidosis develops followed by ocular toxicity (visual disturbance including blindness). Other effects include non-specific effects such as headache, nausea and weakness. Gross overexposure to methanol may cause pathological changes in the liver and kidneys; nerve damage with numbness, weakness or muscle rigidity; tremors, convulsions and fatality.

Inhalation, ingestion or skin contact with dimethyl acetamide may cause non-specific effects such as headache, nausea and weakness, dizziness and drowsiness. Repeated or excessive over-exposure may cause altered liver function or abdominal pain, vomiting or jaundice; or abnormal kidney function with altered results on blood tests.

The fatal dose of methanol by ingestion is 60-250 ml.

Gross ingestion of Sodium Chloride may cause severe irritation of the digestive tract with stomach pain, nausea, vomiting, diarrhea or internal bleeding; dehydration; and fatality.

If there is significant potential for skin contact with Dimethylacetamide (DMAC), biological monitoring should be done to measure the level of DMAC metabolites in urine specimens collected at the end of the shift. It is a DuPont practice to limit an individual's end-of-shift DMAC metabolites in urine to levels at or below 30 ppm expressed as N-methylacetamide (MMAC).

Carcinogenicity Information

None of the components present in this material at concentrations equal to or greater than 0.1% are listed by IARC, NTP, OSHA or ACGIH as a carcinogen.

FIRST AID MEASURES

First Aid

INHALATION

If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Call a physician.

SKIN CONTACT

In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Call a physician. Wash contaminated clothing before reuse.

EYE CONTACT

In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Call a physician.

INGESTION

If swallowed, do not induce vomiting. Give large quantity of water. Call a physician immediately. Never give anything by mouth to an unconscious person.

If swallowed, immediately give 2 glasses of water and induce vomiting. Never give anything by mouth to an unconscious person. Call a physician.

Notes to Physicians

Activated charcoal mixture may be administered. To prepare activated charcoal mixture, suspend 50 grams activated charcoal in 400 mL water and mix thoroughly. Administer 5 mL/kg, or 350 mL for an average adult.

FIRE FIGHTING MEASURES

Flammable Properties

Flash Point

: 170 F (77 C)

Combustible liquid. Heating can release vapors which can be ignited.

Extinguishing Media

Water Spray, Foam, Dry Chemical.

L0002252

DuPont Material Safety Data Sheet

Page 4

(FIRE FIGHTING MEASURES - Continued)

Fire Fighting Instructions

Wear self-contained breathing apparatus. Wear full protective equipment.

ACCIDENTAL RELEASE MEASURES

Safeguards (Personnel)

NOTE: Review FIRE FIGHTING MEASURES and HANDLING (PERSONNEL) sections before proceeding with clean-up. Use appropriate PERSONAL PROTECTIVE EQUIPMENT during clean-up.

Evacuate personnel, thoroughly ventilate area, use self-contained breathing apparatus.

Initial Containment

Dike spill. Prevent material from entering sewers, waterways, or low areas.

Spill Clean Up

Soak up with sawdust, sand, oil dry or other absorbent material.

HANDLING AND STORAGE

Handling (Personnel)

Avoid breathing vapors or mist. Avoid contact with eyes, skin or clothing. Wash thoroughly after handling. Wash clothing after use.

EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Controls

Use only with adequate ventilation.

Personal Protective Equipment

Eye/Face

: Coverall chemical splash goggles.

Respirator

: NIOSH approved respirator if exposure

Protective Gloves

: Neoprene or butyl rubber

limits exceeded.

Exposure Guidelines

TOXICOLOGICAL INFORMATION

Animal Data

SODIUM CHLORIDE

Oral LD50: 3000 mg/kg in rats

Animal testing indicates that Sodium Chloride is a moderate eye irritant and a mild skin irritant.

Single exposure by ingesiton to high doses of Sodium Chloride caused increased urination, excessive thirst, pathological changes of the stomach. Repeated exposure caused increased kidney weight.

Sodium Chloride has not produced genetic damage in bacterial cell cultures. In mammalian cell cultures and animals, Sodium Chloride has produced positive responses, however, these effects are considered to be caused by high osmolality and not genetic damage.

SODIUM ACETATE

Inhalation 1 hour ALC: > 30 mg/L in rats
Skin absorption LD50: > 10,000 mg/kg in rabbits Oral LD50: 3530 mg/kg in rats

The compound is a slight skin and eye irritant. Toxic effects described in animals from single exposures to lethal levels by ingestion include labored breathing hyperactivity, hypothermia, anaesthetic effects, and nonspecific effects such as diarrhea, and sedation. Repeated and long term exposures to levels up to 10% in the diet demonstrated no adverse effects. Tests in animals demonstrate no developmental toxicity. The compound does not produce genetic damage in bacterial and mammalian cell cultures.

SODIUM SULFATE

Oral LD50: 5859 mg/kg in mice

A formulation containing 69.5% Sodium Sulfate was reported to be non-irritating to skin and eyes.

Animal testing indicates Sodium Sulfate does not have carcinogenic or developmental effects.

METHANOL

Oral LD50: 9,100 mg/kg in rats Dermal LD50: 15,840 mg/kg in rabbits Inhalation 1 hour LC50: > 145,000 ppm in rats

DuPont Material Safety Data Sheet

(TOXICOLOGICAL INFORMATION - Continued)

Animal testing indicates that Methanol is an eye and skin irritant.

Eye contact with Methanol caused clouding of the eye (corneal opacity).

Repeated skin contact with higher concentrations of Methanol caused some mortality.

Single exposure by ingestion caused narcosis, liver effects and hypothermia. Repeated exposure caused pathological changes of the eye and acidosis.

Repeated exposure by inhalation caused irritation of the eyes and blindness.

Exposure to pregnant rats shows the following developmental effects: reduced birth weight, resorption and bone abnormalities. Tests have shown that Methanol does not cause genetic damage in bacterial or mammalian cell cultures or in animals.

DIMETHYL ACETAMIDE

Inhalation 1 hour LC50: 8.81 mg/L in female rats Skin absorption LD50: 2240 mg/kg in rabbits Oral LD50: 4930 mg/kg in rats

Animal testing indicates Dimethylacetamide is a slight to mild skin irritant, and a mild eye irritant, but not a skin sensitizer.

Repeated exposure by skin contact caused weakness, degeneration of the liver, central nervous system depression, incoordination, inflammation of the skin and dry skin.

Repeated exposure to high doses by ingestion caused pathological changes of the stomach and lungs. Repeated exposure to lower concentrations caused reduced weight gain, diarrhea, anemia, histopathological changes of the liver, kidneys, stomach and testes. Long term exposure by ingestion caused increased liver, kidney and adrenals weight, and altered clinical chemistry.

A near lethal inhalation exposure produced degeneration of the liver and kidneys. Repeated exposure caused liver injury, upper respiratory tract irritation, degeneration of the testes and pathological changes of the bone marrow. Long term exposure caused degeneration of the liver, and increased liver and kidney weights. Long term exposure at even higher concentrations caused degeneration of the kidneys and retinal atrophy in female mice.

DuPont Material Safety Data Sheet

(TOXICOLOGICAL INFORMATION - Continued)

In animal testing Dimethylacetamide has not caused carcinogenicity. Animal data show developmental effects only at exposure levels producing other toxic effects in the adult animal. Dimethylacetamide is not considered a unique developmental hazard to the conceptus. Some tests in adult animals have shown that this material may cause changes to the testes only at levels which produce other toxic effects in the adult animal. Reproductive data on adult animals show no change in reproductive performance. Dimethylacetamide is not considered to be a unique reproductive hazard. Dimethylacetamide has not produced genetic damage in bacterial cultures. It has not produced genetic damage in tests on animals. In animal testing, Dimethylacetamide has not caused permanent genetic damage in reproductive cells of mammals (has not produced heritable genetic damage).

SODIUM NITRATE

Oral LD50: 4,242 mg/kg in rats.

In guinea pigs, a single dermal exposure to two grams caused inflammation of the small intestine and death within 12 hours.

In calves, a single oral dose increased methemoglobin. Repeated exposures (up to 14 months) increased methemoglobin and the incidence of pulmonary lesions.

Tests in animals demonstrate no carcinogenic activity.

This compound does not produce genetic damage in bacterial cell cultures. It has been reported to cause chromosome damage in mammalian cell cultures. It does not produce heritable genetic damage.

ECOLOGICAL INFORMATION

HAZARDS IDENTIFICATION

Potential Health Effects

Skin contact with the waste may cause irritation with itching, burning, redness, swelling or rash. Dimethyl acetamide and methanol can permeate the skin in amounts capable of producing the effects of systemic toxicity.

Eye contact may cause irritation with tearing, pain or blurred vision.

(HAZARDS IDENTIFICATION - Continued)

Inhalation may cause irritation of the nose and throat with sneezing, sore throat or runny nose. Gross exposure to Sodium Chloride by inhalation may cause ulceration of mucous membranes.

Inhalation, ingestion or skin contact with methanol may cause temporary mild depression of the central nervous system iwth dizziness, confusion, incoordination or drowsiness followed by an asymptomatic period usually ranging from 12 to 24 hours. Metabolic acidosis develops followed by ocular toxicity (visual disturbance including blindness). Other effects include non-specific effects such as headache, nausea and weakness. Gross overexposure to methanol may cause pathological changes in the liver and kidneys; nerve damage with numbness, weakness or muscle rigidity; tremors, convulsions and fatality.

Inhalation, ingestion or skin contact with dimethyl acetamide may cause non-specific effects such as headache, nausea and weakness, dizziness and drowsiness. Repeated or excessive over-exposure may cause altered liver function or abdominal pain, vomiting or jaundice; or abnormal kidney function with altered results on blood tests.

The fatal dose of methanol by ingestion is 60-250 ml.

Gross ingestion of Sodium Chloride may cause severe irritation of the digestive tract with stomach pain, nausea, vomiting, diarrhea or internal bleeding; dehydration; and fatality.

If there is significant potential for skin contact with Dimethylacetamide (DMAC), biological monitoring should be done to measure the level of DMAC metabolites in urine specimens collected at the end of the shift. It is a DuPont practice to limit an individual's end-of-shift DMAC metabolites in urine to levels at or below 30 ppm expressed as N-methylacetamide (MMAC).

Carcinogenicity Information

None of the components present in this material at concentrations equal to or greater than 0.1% are listed by IARC, NTP, OSHA or ACGIH as a carcinogen.

Page 3

FIRST AID MEASURES

First Aid

INHALATION

If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Call a physician.

SKIN CONTACT

In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Call a physician. Wash contaminated clothing before reuse.

EYE CONTACT

In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Call a physician.

INGESTION

If swallowed, do not induce vomiting. Give large quantity of water. Call a physician immediately. Never give anything by mouth to an unconscious person.

If swallowed, immediately give 2 glasses of water and induce vomiting. Never give anything by mouth to an unconscious person. Call a physician.

Notes to Physicians

Activated charcoal mixture may be administered. To prepare activated charcoal mixture, suspend 50 grams activated charcoal in 400 mL water and mix thoroughly. Administer 5 mL/kg, or 350 mL for an average adult.

FIRE FIGHTING MEASURES

Flammable Properties

Flash Point

: 170 F (77 C)

Combustible liquid. Heating can release vapors which can be ignited.

Extinguishing Media

Water Spray, Foam, Dry Chemical.

L0002252

DuPont Material Safety Data Sheet

Page 4

(FIRE FIGHTING MEASURES - Continued)

Fire Fighting Instructions

Wear self-contained breathing apparatus. Wear full protective equipment.

ACCIDENTAL RELEASE MEASURES

Safeguards (Personnel)

NOTE: Review FIRE FIGHTING MEASURES and HANDLING (PERSONNEL) sections before proceeding with clean-up. Use appropriate PERSONAL PROTECTIVE EQUIPMENT during clean-up.

Evacuate personnel, thoroughly ventilate area, use self-contained breathing apparatus.

Initial Containment

Dike spill. Prevent material from entering sewers, waterways, or low areas.

Spill Clean Up

Soak up with sawdust, sand, oil dry or other absorbent material.

HANDLING AND STORAGE

Handling (Personnel)

Avoid breathing vapors or mist. Avoid contact with eyes, skin or clothing. Wash thoroughly after handling. Wash clothing after use.

EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Controls

Use only with adequate ventilation.

Personal Protective Equipment

Eye/Face Respirator : Coverall chemical splash goggles.

: NIOSH approved respirator if exposure

limits exceeded.

Protective Gloves

: Neoprene or butyl rubber

TOXICOLOGICAL INFORMATION

TOATCOMOGICAL INFORMATION

Animal Data

SODIUM CHLORIDE

Oral LD50: 3000 mg/kg in rats

Animal testing indicates that Sodium Chloride is a moderate eye irritant and a mild skin irritant.

Single exposure by ingesiton to high doses of Sodium Chloride caused increased urination, excessive thirst, pathological changes of the stomach. Repeated exposure caused increased kidney weight.

Sodium Chloride has not produced genetic damage in bacterial cell cultures. In mammalian cell cultures and animals, Sodium Chloride has produced positive responses, however, these effects are considered to be caused by high osmolality and not genetic damage.

SODIUM ACETATE

Inhalation 1 hour ALC: > 30 mg/L in rats
Skin absorption LD50: > 10,000 mg/kg in rabbits
Oral LD50: 3530 mg/kg in rats

The compound is a slight skin and eye irritant. Toxic effects described in animals from single exposures to lethal levels by ingestion include labored breathing hyperactivity, hypothermia, anaesthetic effects, and nonspecific effects such as diarrhea, and sedation. Repeated and long term exposures to levels up to 10% in the diet demonstrated no adverse effects. Tests in animals demonstrate no developmental toxicity. The compound does not produce genetic damage in bacterial and mammalian cell cultures.

SODIUM SULFATE

Oral LD50: 5859 mg/kg in mice

A formulation containing 69.5% Sodium Sulfate was reported to be non-irritating to skin and eyes.

Animal testing indicates Sodium Sulfate does not have carcinogenic or developmental effects.

METHANOL

Oral LD50: 9,100 mg/kg in rats
Dermal LD50: 15,840 mg/kg in rabbits
Inhalation 1 hour LC50: > 145,000 ppm in rats

DuPont Material Safety Data Sheet

(TOXICOLOGICAL INFORMATION - Continued)

Animal testing indicates that Methanol is an eye and skin irritant.

Eye contact with Methanol caused clouding of the eye (corneal opacity).

Repeated skin contact with higher concentrations of Methanol caused some mortality.

Single exposure by ingestion caused narcosis, liver effects and hypothermia. Repeated exposure caused pathological changes of the eye and acidosis.

Repeated exposure by inhalation caused irritation of the eyes and blindness.

Exposure to pregnant rats shows the following developmental effects: reduced birth weight, resorption and bone abnormalities. Tests have shown that Methanol does not cause genetic damage in bacterial or mammalian cell cultures or in animals.

DIMETHYL ACETAMIDE

Inhalation 1 hour LC50: 8.81 mg/L in female rats Skin absorption LD50: 2240 mg/kg in rabbits Oral LD50: 4930 mg/kg in rats

Animal testing indicates Dimethylacetamide is a slight to mild skin irritant, and a mild eye irritant, but not a skin sensitizer.

Repeated exposure by skin contact caused weakness, degeneration of the liver, central nervous system depression, incoordination, inflammation of the skin and dry skin.

Repeated exposure to high doses by ingestion caused pathological changes of the stomach and lungs. Repeated exposure to lower concentrations caused reduced weight gain, diarrhea, anemia, histopathological changes of the liver, kidneys, stomach and testes. Long term exposure by ingestion caused increased liver, kidney and adrenals weight, and altered clinical chemistry.

A near lethal inhalation exposure produced degeneration of the liver and kidneys. Repeated exposure caused liver injury, upper respiratory tract irritation, degeneration of the testes and pathological changes of the bone marrow. Long term exposure caused degeneration of the liver, and increased liver and kidney weights. Long term exposure at even higher concentrations caused degeneration of the kidneys and retinal atrophy in female mice.

DuPont Material Safety Data Sheet

(TOXICOLOGICAL INFORMATION - Continued)

In animal testing Dimethylacetamide has not caused carcinogenicity. Animal data show developmental effects only at exposure levels producing other toxic effects in the adult animal. Dimethylacetamide is not considered a unique developmental hazard to the conceptus. Some tests in adult animals have shown that this material may cause changes to the testes only at levels which produce other toxic effects in the adult animal. Reproductive data on adult animals show no change in reproductive performance. Dimethylacetamide is not considered to be a unique reproductive hazard. Dimethylacetamide has not produced genetic damage in bacterial cultures. It has not produced genetic damage in tests on animals. In animal testing, Dimethylacetamide has not caused permanent genetic damage in reproductive cells of mammals (has not produced heritable genetic damage).

SODIUM NITRATE

Oral LD50: 4,242 mg/kg in rats.

In guinea pigs, a single dermal exposure to two grams caused inflammation of the small intestine and death within 12 hours.

In calves, a single oral dose increased methemoglobin. Repeated exposures (up to 14 months) increased methemoglobin and the incidence of pulmonary lesions.

Tests in animals demonstrate no carcinogenic activity.

This compound does not produce genetic damage in bacterial cell cultures. It has been reported to cause chromosome damage in mammalian cell cultures. It does not produce heritable genetic damage.

ECOLOGICAL INFORMATION

Ecotoxicological Information

Aquatic Toxicity

- 96 hour LC50, fathead minnow: 7341-7650 mg/L for sodium chloride
- 24 hour TLm, bluegill sunfish: 5000 mg/L for sodium acetate
- 96 hour LC50, bluegill sunfish: 2000 mg/L for sodium nitrate
- 96 hour LC50, bluegill sunfish: 12,750 mg/L for sodium sulfate
- 96 hour LC50: fathead minnow: 28,100 mg/L for methanol
- 48 hour TLm, himedaka: 1000 mg/L for dimethyl acetamide

Section 3 - Hazards Identification

Potential Health Affects:

Acute Eye:

May irritate; will not damage eyes.

Acute Skin:

May irritate, may absorb into skin but toxic effects unlikely.

Acute Inhalation:

Product mist may be slightly irritating

Acute Ingestion:

May be harmful; large amounts may cause diarrhea.

Section 4 - First Aid Measures

First Aid Measures for Accidental:

Eye Exposure:

Wash eyes with plenty of water, holding eyelids open. Seek medical assistance promptly if there is any persistent irritation.

Skin Exposure:

Wash with soap and plenty of water. Remove contaminated clothing and do not reuse until thoroughly cleaned or laundered. Seek medical help promptly if there is persistent itching or redness in the affected area.

Inhalation:

Remove from contaminated area promptly. Seek medical help promptly if there is difficulty in breathing.

Ingestion:

Give plenty of water to dilute product. Do not induce vomiting (NOTE below). Keep victim quiet. If vomiting occurs, lower victim's head below the hips to prevent inhalation of vomited material. Seek medical help.

Green Earth Fuels, LLC

MATERIAL SAFETY DATA SHEET

CRUDE GLYCERINE

Section 5 - Fire Fighting Measures

Fire Hazard Data:

Flashpoint: 160°C (320°F)

Autoignition: 400°C (752°F)

Flammability Limits (% v/v): 0.9

Extinguishing Media:

Water spray, carbon dioxide, Dry chemical powder or appropriate foam.

Special Fire Fighting Procedures:

Wear self contained breathing apparatus and protective clothing to prevent contact with skin and eyes.

Unusual Fire and Explosion Hazards:

May emit toxic fumes (Acrolien) under fire conditions.

Section 6 - Accidental Release Measures

Cleanup and Disposal of Spill:

Wear respirator, chemical safety goggles, rubber boots and chemical gloves. Absorb with sand or vermiculite and place in closed containers for disposal. Ventilate spill area and wash after removal of material.

Section 7 - Handling and Storage

Handling and Storage:

Store in a cool, dry environment. Product is very hygroscopic and water content may increase when exposed to air (particularly at higher temperatures).

Section 8 - Exposure Controls/Personal Protection Equipment

Exposure Guidelines

Component	<u>ACGIH</u>	OSHA - PELs	<u>Other</u>
Glycerine	10 mg/m³ (mist)	10 mg/m³ (mist)	N/A
Water	Not Established	Not Established	N/A
Free Fatty Acids	Not Established	Not Established	N/A
Fatty Acid Methyl Esters	Not Established	Not Established	N/A
Sodium Chloride	Not Established	Not Established	N/A
Methanol	200ppm TWA	200ppm TWA	200ppm (NIOSH) TWA

Engineering Controls:

Provide exhaust ventilation when heated or exposed to mist conditions. Safety shower and eye bath, mechanical exhaust required.

Respiratory Protection:

Avoid inhalation, use NIOSH/OSHA approved respirator around airborne vapor or mist.

Eye/Face Protection:

Avoid contact with eyes; Safety glasses with eye shields should always be worn, chemical compatible safety goggles recommended.

GEFH-EHS-102 Crude Glycerine MSDS

Page 2 of 5

Revision Date: 01/29/07

Green Earth | Fuels, LLC | Integration | Statement

MATERIAL SAFETY DATA SHEET

CRUDE GLYCERINE

Skin Protection:

Avoid contact with skin and/or clothing; wear chemical compatible safety gloves when handling.

Section 9 - Physical and Chemical Properties

Physical Appearance: Light amber to dark brown translucent liquid.

Odor: Slight to moderate musty odor.

pH: 5.0 to 8.0

Specific Gravity: 1.205 (25°C)

Water Solubility: Miscible.

Melting Point: 17.9°C

Freezing Point: <10°C

Boiling Point: 190°C (374°F)

Vapor Pressure: <1 mm Hg

Vapor Density: 3.17 (air=1)

Percent Volatiles by Weight: 0.1 to 0.5

Viscosity: 1490 centipoise (20°C)

Section 10 - Stability and Reactivity

Chemical Stability:

Stable.

Conditions to Avoid:

Avoid excessive heat, open flame. Protect from moisture, strong bases and oxidizing agents.

Materials/Chemical Incompatibility:

Strong oxidizing agents.

Hazardous Decomposition Products:

Carbon monoxide and carbon dioxide.

Hazardous Polymerization:

Will not occur.

Section 11 - Toxicological Information

LD50 - LC50 Mixture:

LD50 (oral, rat) is 12,600 mg/kg.

Route of Entry:

Inhalation: No Skin: No Ingestion: No

Revision Date: 01/29/07

MATERIAL SAFETY DATA SHEET

CRUDE GLYCERINE

Acute/Chronic Effects:

May cause skin irritation, may be harmful if absorbed through skin.

May cause eye irritation.

May be harmful if inhaled.

Material may be irritating to respiratory system.

May be harmful if swallowed. Mildly toxic, may cause gastrointestinal discomfort.

Carcinogenicity:

NTP: No IARC: No OSHA: No

Signs/Symptoms of Overexposure:

Irritation, nausea, general malaise.

Section 12 - Ecological Information

Spill containment:

Create dyke to control spill and prevent/reduce environmental contamination.

Handling Spill:

Recover liquid with suitable pumps into holding vessel, absorb remaining with inert absorbent. Remove Absorbent to container for disposal.

Environmental Impact:

Product cannot accumulate in living tissue, this product is readily and rapidly biodegradable in the presence of oxygen.

Section 13 - Disposal Considerations

Waste Disposal Method:

Contact a licensed professional waste disposal service to dispose of this product. Product may be blended with suitable solvent and burned by chemical incineration at an approved facility. Observe all Federal, State and Local environmental reporting and regulations.

PROCESS STREAM

MATERIAL SAFETY DATA SHEET

Emergency Phone (Toll-Free) In Ohio: 800-362-8059 Outside Ohio: 800-321-8642

MANUFACTURER: BP Oil Company

ADDRESS: 200 Public Square, Cleveland, Ohio 44114-2375

MATERIAL IDENTIFICATION

MATERIAL NAME: PROCESS WATER

CAS NUMBER: 7732-18-5

SYNONYM(S): Steam; Cooling Water; Waste Water; Effluent; Process Water;

Recycle Water

CHEMICAL FAMILY: Water

PRODUCT CODE: ND

HIERARCHY: ND

ISDS NUMBER: AD9

HAZARD SUMMARY

HEALTH

CAUTION!

HEATED MATERIAL MAY CAUSE THERMAL BURNS

MAY BE UNFIT FOR HUMAN CONSUMPTION

FIRE

NON-COMBUSTIBLE*

REACTIVITY

STABLE

*NOTE--Pure water is non-combustible. Some process water streams may also contain flammable or combustible materials. See the "Unit Stream Report" for the specific flash point of the stream of interest.

HEALTH HAZARD INFORMATION

ROUTE OF EXPOSURE INGESTION:

EFFECTS OF OVEREXPOSURE

Liquid water process streams may contain impurities making the water unfit for human consumption. These impurities may be intentially or unintentially added. Intentional additives would include fungicides, bactericides, and corrosion inhibitors. Unintentional impurities would include product and catalyst carryover to process water streams. Consumption of contaminated water may cause gastrointestinal disturbances. Symptoms may include irritation, nausea, vomiting, diarrhea and other effects related to any contaminants.

SKIN.

Contaminated water may cause irritation. Contact with heated material may cause thermal burns.

EYE:

Contaminated water may cause irritation. Contact with heated material may cause thermal burns.

INHALATION:

AN

SPECIAL TOXIC EFFECTS:

Water, in and of itself, is not a hazardous material. However, for process water streams containing impurities it is important to review appropriate Material Safey Data Sheets on the known impurities to evaluate potential hazards.

FIRST AID

INGESTION:

Get medical attention for gastrointestinal symptoms.

SKIN CONTACT:

When burned from contact with hot water or steam, flush skin immediately with large amounts of cold water. If possible, submerge area in cold water. Pack with ice. Thermal burns require immediate medical attention.

EYE CONTACT:

Flush immediately with large amounts of (clean) water. Bye lids should be held away from the eyeball to ensure thorough rinsing. Thermal burns require immediate medical attention.

INHALATION:

NA

PERSONAL PROTECTION INFORMATION

EYE PROTECTION:

Wear safety glasses or chemical goggles to prevent eye contact.

SKIN PROTECTION

Wear impervious gloves and protective clothing to prevent skin contact.

RESPIRATORY PROTECTION:

NA

PHYSICAL PROPERTIES

See the "Unit Stream Report" for the physical properties of the specific stream of interest.

FIRE AND EXPLOSION DATA

FLASH POINT, C (F): See the "Unit Stream Report" for the flash point of the specific stream of interest.

BASIC FIREFIGHTING PROCEDURES: Follow facility firefighting procedures.
UNUSUAL FIRE AND EXPLOSION HAZARDS: Process water streams may contain
flammable or combustible materials. Check the "Unit Stream Report" for
identified impurities and review their respective Material Safety Data
Sheets for additional hazard information.

REACTIVITY DATA

STABILITY/INCOMPATIBILITY:

NΑ

HAZARDOUS REACTIONS/DECOMPOSITION PRODUCTS:

NA

ENVIRONMENTAL INFORMATION

SPILL OR RELEASE TO THE ENVIRONMENT:

WASTE DISPOSAL:

This substance, when discarded or disposed of, is not specifically listed as a hazardous waste in Federal Regulations; however it could be hazardous if it is considered toxic, corrosive, ignitable, or reactive according to Federal definitions. Additionally, it could be designated as hazardous according to state regulations. This substance could also become a hazardous waste if it is mixed with or comes in contact with a hazardous waste.

OTHER REGULATORY INFORMATION

There may be specific regulations at the local, regional or state level that pertain to this material.

INGREDIENT/HEALTH HAZARD INFORMATION

COMPONENT | CAS NO. | * | EXPOSURE LIMITS - REFERENCE

This stream may contain impurities not identified on this Process Stream Material Safety Data Sheet. Check the "Unit Stream Report" for identified impurities and review their respective Material Safety Data Sheets for additional hazard information.

Water 7732-18-5 Varies None established

EFFECTIVE DATE: 10/23/87 COMPLETED BY: George R. Krautter REPLACES SHEET DATED: 3/21/86 APPROVED BY: R. W. Mast

NOTICE: The information presented herein is based on data considered to be accurate as of the date of preparation of this Process Stream Material Safety Data Sheet. However, no warranty or representation, express or implied, is made as to the accuracy or completeness of the foregoing data and safety information, nor is any authorization given or implied to practice any patented invention without a license. In addition, no responsibility can be assumed by vendor for any damage or injury resulting from abnormal use, from any failure to adhere to recommended practices, or from any hazards inherent in the nature of this material.

MATERIAL SAFETY DATA SHEET

Page: 1

DATE PREPARED: 12/22/2000

MSDS No: M003 Soda Ash, light

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Product Identifier: Soda Ash, light

Product Code: M003

Product Name: Sodium Carbonate

Chemical Family: Alkaline Molecular Formula: Na₂CO₃ Generic Name: Soda Ash

MANUFACTURER:

HydroChem Industrial Services, Inc.

900 Georgia Ave. Deer Park, TX 77536

Customer Service: (800) 934-9376

24 HR. EMERGENCY TELEPHONE

NUMBERS:

Emergency Contact:

HydroChem ER

Emergency Phone (800) 569-4889

2. COMPOSITION/INFORMATION ON INGREDIENTS

wt.%

CAS Registry #

Sodium carbonate

100

497-19-8

COMMENTS:

Exposure limits for this product are not established. A TLV of 10 mg/m3 is recommended for dust.

3. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW

PHYSICAL APPEARANCE:

White powder

IMMEDIATE CONCERNS:

No hazard in normal industrial use.

Dust may be irritating to eyes and respiratory tracts.

MEDICAL CONDITIONS AGGRAVATED:

Persons with pre-existing skin disorders, eye problems or impaired pulmonary function may be at increased risk from exposure.

ROUTES OF ENTRY:

Inhalation

TARGET ORGANS:

No Data

DATE PREPARED: 12/22/2000

MSDS No: M003 Soda Ash, light

4. FIRST AID MEASURES

EYES:

Immediately flush eyes with water for 30 minutes while holding eyelids open. Seek medical attention.

SKIN:

Immediately wash with soap and water. Rinse thoroughly. Seek medical attention if effects occur. Launder contaminated shoes and clothing before reuse.

INGESTION:

If swallowed, give 2 glasses of milk (preferred) or water and consult physician.

INHALATION:

Remove to fresh air. See a doctor if effects occur.

5. FIRE FIGHTING MEASURES

Flashpoint and Method: Not Applicable Flammable Limits: Not Applicable

Autoignition Temperature: Not Determined

EXTINGUISHING MEDIA:

Use alcohol foam, carbon dioxide, dry chemical or water spray when fighting fires involving this material.

HAZARDOUS COMBUSTION PRODUCTS:

Sodium oxide, oxides of carbon

FIRE FIGHTING EQUIPMENT:

As in any fire, wear self-contained breathing apparatus pressure-demand, (MSHA/NIOSH approved or equivalent) and full protective clothing to prevent contact with skin and eyes.

6. ACCIDENTAL RELEASE MEASURES

GENERAL PROCEDURES:

Scoop into appropriate containers. Flush residual with plenty of water.

7. HANDLING AND STORAGE

GENERAL PROCEDURES:

Refer to Section 8.

DATE PREPARED: 12/22/2000

MSDS No: M003 Soda Ash, light

STORAGE:

No special precautions required. Avoid wetting.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROLS:

Ventilation - General and local ventilation are required.

PERSONAL PROTECTION

EYES AND FACE:

Chemical goggles required and an eye wash in work area.

RESPIRATORY:

None normally needed. For protection from dust, use NIOSH approved respirator with dust protection.

PROTECTIVE CLOTHING:

Clean body covering and chemical resistant gloves.

OTHER USE PRECAUTIONS:

Safety shower and eye wash in the work area.

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical State: Powder

Color: White pH: 10.3

Percent Volatile: None

Vapor Pressure: Not Determined Boiling Point: Decomposes Solubility in Water: 17 at 68°F Specific Gravity: 2.509 (water=1)

COMMENTS:

pH: for a 1% solution

Water Solubility: Solubility listed above is grams per 100 grams of water.

10. STABILITY AND REACTIVITY

STABLE: Yes

DATE PREPARED: 12/22/2000

MSDS No: M003 Soda Ash, light

HAZARDOUS POLYMERIZATION: No

HAZARDOUS DECOMPOSITION:

Sodium oxide

INCOMPATIBLE MATERIALS:

Strong acids

11. TOXICOLOGICAL INFORMATION

ACUTE

Eyes: Irritant. May cause pain, redness, discomfort.

Skin: No effect expected. Prolonged or repeated contact may cause mild irritation.

Ingestion: No effect expected. Swallowing large amounts may cause illness.

Inhalation: No effect expected. Prolonged or repeated exposure may cause mild irritation. Dust

is irritating.

GENERAL COMMENTS:

Carcinogens:

Not listed by IARC, USA NTP, or USA OSHA.

COMMENTS:

Only selected Registry of Toxic Effects of Chemical Substances (RTECS) data is presented in this document. See the actual entry in RTECS for complete information.

RTECS Number: VZ4050000 - sodium carbonate

LD50 (rats) = 4090 mg/kg (sodium carbonate)

12. ECOLOGICAL INFORMATION

GENERAL COMMENTS:

Degradability: Not biodegradable. Fish Toxicity: Low toxicity to fish.

COMMENTS:

LC50 (P. promelas) = 400 mg/L

13. DISPOSAL CONSIDERATIONS

PRODUCT DISPOSAL:

Dispose of in accordance with ALL applicable federal, state and local regulations.

DATE PREPARED: 12/22/2000

MSDS No: M003 Soda Ash, light

EMPTY CONTAINER:

Send empty bags to sanitary landfill. Render other types of containers unuseable by puncturing or crushing and sending to a sanitary landfill unless prohibited by local regulations.

RCRA/USEPA WASTE INFORMATION:

This material is not a RCRA regulated material.

14. TRANSPORT INFORMATION

DOT (DEPARTMENT OF TRANSPORTATION)

Proper Shipping Name: Sodium Carbonate - Not Regulated

Reportable Quantity (RQ) Under CERCLA: None

Placards: None Label: None

15. REGULATORY INFORMATION

UNITED STATES

SARA TITLE III (SUPERFUND AMENDMENTS AND REAUTHORIZATION ACT)

Fire: No Pressure Generating: No

Reactivity: No

Acute: Yes

Chronic: No

Title III Notes: This product contains no substances which are defined as toxic chemicals under the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 (40 CFR Part 372).

CERCLA (COMPREHENSIVE RESPONSE, COMPENSATION, AND LIABILITY ACT) Reportable Spill Quantity: Not established

TSCA (TOXIC SUBSTANCE CONTROL ACT)

TSCA Status: All components of this material are on the TSCA inventory.

STATE REGULATIONS

PROPOSITION 65 STATEMENT:

This product does not contain any substance(s) which are defined by the state of California to cause cancer, birth defects, or other reproductive effects.

Flash Point:

0 = 120 °F

60°F TO 100'F

Flammable Limits in Air % by Volume:

Lower: 0.9

Upper: 6.0

Extinguishing Media: Use dry chemical, carbon dioxide, water spray and alcohol-resistant foam.

Special Fire Fighting Procedures: Flammable and toxic vapors given off in a fire. Wear complete personal protection equipment.

SCBA required.

Unusual Fire and Explosion Hazard: None Known, Autoignition Temperature = 440 °F

Stability: Product is stable under normal storage conditions.

Conditions to Avoid: Extreme heat, sources of ignition, and strong oxidizers.

Incompatibility: Strong Oxidizers.

Hazardous Polymerization: Will not occur.

Hazardous Decomposition Products When Heated: Flammable vapors are emitted creating carbon dioxide and toxic fumes of carbon monoxide.

NFPA 704 Rating:

0 - Insignificant

1 - Slight

2 - Moderate

· 3 - High

4 - Extreme

Health: 1

Flammability: 3

Reactivity: 0

Special Hazard: None

Personal Protection: B

Symptoms Of Exposure:

Symptoms of exposure to this product may include irritation to the skin, eyes, mucous membranes and respiratory tract, dizziness, narcosis, suffocation, lower blood pressure; CNS depression, nausea and headache. Prolonged skin contact may result in dermatitis. Eye contact may result in temporary corneal damage.

Health Effects:

ACUTE -

Defatting of skin may occur due to the alcohol content and repeated skin contact.

CHRONIC -

Damage to the skin, liver, kidneys, and sense of hearing due to overexposure.

Ingestion: Do not take internally. Seek physician advice immediately.

Skin: Avoid prolonged or repeated skin contact.

Inhalation: Avoid inhalation of vapors. Use in well ventilated areas.

Eyes: Avoid eye contact, can cause long term damage due to alcohol defatting eye.

Special Medical Conditions Aggravated by Exposure: None known at the Additional Aggravated by Exposure:

Primary Route of Entry: Inhalation of vapors and skin contact.

Exposure Limits: None established for this product.

Petroleum solvent = OSHA PEL-500 ppm (2000mg/m3) TWA for 8-hour workday

constitution as all many a few ages.

Naphthalene

NIOSH TLV-500 ppm (2000mg/m3) TWA for 8-hour workday

= OSHA PEL- 10 ppm (50mg/m3) TWA for 8-hour workday

NIOSH TLV-10 ppm (50mg/m3) TWA for 8-hour workday

Benzene

= OSHA PEL-1 ppm (5mg/m3) TWA for 8-hour workday

NIOSH TLV-0.5 ppm (2.5mg/m3) TWA for 8-hour workday

Carcinogen Status: This product is not listed on (NTP) National Toxicology Program Annual Report on Carcinogens or (IARC) International Agency for Research on Cancer "Monographs", and is not classified by OSHA as a carcinogen.

This product does contain *Benzene*, which is classified by OSHA as a carcinogen. NTP studies TR-410 and TR-500 show evidence of increased tumor growth in rodents after inhalation of *Naphthalene*.

Toxicity:

NIOSH REGISTRY NUMBER:

Not listed

TOXICITY:

No Data Available for this mixture

CARCINOGENICITY: Benzene is a listed carcinogen.

Tumorigenic Data:

None Known

NTP Carcinogenesis Studies:

None Known for this product. NTP studies of Naphthalene: TR-410 on test two year inhalation studies of mice, January 1988 and TR-500 two-year inhalation study of rats.

January 2001

MUTATION DATA:

Test not available

TERATOGENICITY:

None Known

Ingestion: Do not induce vomiting. Contact physician.

Skin: Remove soiled clothing and wash with soap and water. Contact physician.

Inhalation: Remove to fresh air. If breathing irregular, administer oxygen.

Eyes: Flush eyes with water for at least 15 minutes. Contact physician.

In Case of a Transportation Accident, Contact CHEMTREC at 1-800/424-9300.

IN CASE OF SPILLS OR RELEASE: Refer to DOT NORTH AMERICAN EMERGENCY RESPONSE GUIDEBOOK for handling information. For small spill, use solid absorbent and shovel into disposal container. For large spills, dike the area to facilitate salvage or disposal. Shut off ignition sources and avoid breathing vapors. Avoid runoff into sewers and advise authorities.

and county be a Stranger of an amount NAP

Waste Disposal Method: Adhere to all local, state, and federal regulations. See regulatory information below. Disposal: If this product becomes a waste, it must be disposed of as required by applicable state and federal laws.

Respiratory Protection: Organic vapor cartridge respirator, or SCBA's.

Gloves: Nitrile rubber

Eyes: Chemical splash goggles or face shield.

Ventilation: Use local exhaust as required to control exposure. Electrical classification of equipment should be considered.

Storage and Handling: Product should be stored in closed containers located in a cool dry location, away from source of ignition and The second secon

oxidizing agents.

This product contains the following toxic chemicals subject to the reporting requirements of Section 313 of the Emergency Planning and Community Right-To-Know Act of 1986 and 40 CRF472.

CAS No.	Material or Component	% by Weight
64742-94-5	Heavy Aromatic Solvent, Naphtha (petroleum)	94 – 100%
91-20-3	Naphthalene	0 - 20%
71-43-2	Benzene	0 - 3%

THE FOLLOWING FEDERAL REGULATIONS APPLY TO THIS PRODUCT:

OSHA HAZARD COMMUNICATION STD:

29CFR 1910.1200, 29CFR 1910.1028, and 29 CFR 1910.1000 Table Z-1, Z-2, and/or Z-3

Petroleum solvent = OSHA PEL-500 ppm (2000mg/m3) TWA for 8-hour workday

NIOSH TLV-500 ppm (2000mg/m3) TWA for 8-hour workday

Naphthalene = OSHA PEL- 10 ppm (50mg/m3) TWA for 8-hour workday

NIOSH TLV-10 ppm (50mg/m3) TWA for 8-hour workday

= OSHA PEL- 10 ppm (50mg/m3) TWA for 8-hour workday

NIOSH TLV-0.5 ppm (50mg/m3) TWA for 8-hour workday

Based on a hazard evaluation, the following components in this product are hazardous for the reasons listed below.

CERCLA, 40 CFR 117,302:

This product contains naphthalene and benzene, a reportable quantity (RQ) substance. The RQ for naphthalene is 100 lbs. The RQ for benzene is 10 lbs. If a spill or release contains 100 or more pounds of naphthalene, or 10 pounds of benzene, it requires notification to the National Response Center, Washington D.C. (1-800-424-8802). There may also be state and local requirements to report spills.

SARA TITLE III

Benzene

Section 302 – This product does not contain any components regulated under SARA TITLE III, Section 302 (Extremely Hazardous Substance).

Section 311, 312 - (MSDS Information) 40 CFR 370, This product has been determined to be hazardous, and should be reported under the following EPA hazard categories:

----Immediate (acute) health hazard

-----Delayed (chronic) health hazard

--xx--Fire Hazard

----Sudden release of pressure hazard

----Reactive hazard

Under SARA Sections 311 and 312, the EPA has established threshold quantities for the reporting of hazardous chemicals. The current threshold are 500 pounds for the threshold planning quantity (TPQ), whichever is lower, for extremely hazardous substances and 10,000 pounds for all other hazardous chemicals.

Section 313 – This product contains the following component subject to regulation under SARA TITLE III, Section 313: Naphthalene, Benzene.

TOXIC SUBSTANCE CONTROL ACT (TSCA): The component(s) in this product are on the TSCA Inventory.

RESOURCE CONSERVATION and RECOVERY ACT (RCRA): 40 CFR 261 Subpart C & D

CLEAN WATER ACT (CWA): Naphthalene and Benzene are subject to regulation under sections 307 and 311 of the CWA.

CLEAN AIR ACT (CAA): Naphthalene and Benzene are listed as "Hazardous air pollutant (HAP)" under Section 112 of the CAA.

ALL INFORMATION ON THIS MSDS MUST BE INCLUDED IN ALL MSDS THAT ARE COPIED AND DISTRIBUTED FOR THIS MATERIAL.

This information is provided for the customers of Advanced Aromatics; however, it does not address in detail the use, storage or handling of the product. Users of the product, considering their use, storage or handling of the product, may need to develop additional procedures. The information should not be relied on to insure compliance by the customer with any federal, state or local legal requirements. Information provided herein, are not product specifications.

HAZARDS IDENTIFICATION Potential Health Effects Skin contact with the waste may cause irritation with

Skin contact with the waste may cause irritation with itching, burning, redness, swelling or rash. Dimethyl acetamide and methanol can permeate the skin in amounts capable of producing the effects of systemic toxicity.

Eye contact may cause irritation with tearing, pain or blurred vision.

Print Date: 5 - 6 - 2008

(HAZARDS IDENTIFICATION - Continued)

Inhalation may cause irritation of the nose and throat with sneezing, sore throat or runny nose. Gross exposure to Sodium Chloride by inhalation may cause ulceration of mucous membranes.

Inhalation, ingestion or skin contact with methanol may cause temporary mild depression of the central nervous system iwth dizziness, confusion, incoordination or drowsiness followed by an asymptomatic period usually ranging from 12 to 24 hours. Metabolic acidosis develops followed by ocular toxicity (visual disturbance including blindness). Other effects include non-specific effects such as headache, nausea and weakness. Gross overexposure to methanol may cause pathological changes in the liver and kidneys; nerve damage with numbness, weakness or muscle rigidity; tremors, convulsions and fatality.

Inhalation, ingestion or skin contact with dimethyl acetamide may cause non-specific effects such as headache, nausea and weakness, dizziness and drowsiness. Repeated or excessive over-exposure may cause altered liver function or abdominal pain, vomiting or jaundice; or abnormal kidney function with altered results on blood tests.

The fatal dose of methanol by ingestion is 60-250 ml.

Gross ingestion of Sodium Chloride may cause severe irritation of the digestive tract with stomach pain, nausea, vomiting, diarrhea or internal bleeding; dehydration; and fatality.

If there is significant potential for skin contact with Dimethylacetamide (DMAC), biological monitoring should be done to measure the level of DMAC metabolites in urine specimens collected at the end of the shift. It is a DuPont practice to limit an individual's end-of-shift DMAC metabolites in urine to levels at or below 30 ppm expressed as N-methylacetamide (MMAC).

Carcinogenicity Information

None of the components present in this material at concentrations equal to or greater than 0.1% are listed by IARC, NTP, OSHA or ACGIH as a carcinogen.

Page 3

FIRST AID MEASURES

First Aid

INHALATION

If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Call a physician.

SKIN CONTACT

In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Call a physician. Wash contaminated clothing before reuse.

EYE CONTACT

In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Call a physician.

INGESTION

If swallowed, do not induce vomiting. Give large quantity of water. Call a physician immediately. Never give anything by mouth to an unconscious person.

If swallowed, immediately give 2 glasses of water and induce vomiting. Never give anything by mouth to an unconscious person. Call a physician.

Notes to Physicians

Activated charcoal mixture may be administered. To prepare activated charcoal mixture, suspend 50 grams activated charcoal in 400 mL water and mix thoroughly. Administer 5 mL/kg, or 350 mL for an average adult.

FIRE FIGHTING MEASURES

Flammable Properties

Flash Point

: 170 F (77 C)

Combustible liquid. Heating can release vapors which can be ignited.

Extinguishing Media

Water Spray, Foam, Dry Chemical.

L0002252

DuPont Material Safety Data Sheet

Page 4

(FIRE FIGHTING MEASURES - Continued)

Fire Fighting Instructions

Wear self-contained breathing apparatus. Wear full protective equipment.

ACCIDENTAL RELEASE MEASURES

Safeguards (Personnel)

NOTE: Review FIRE FIGHTING MEASURES and HANDLING (PERSONNEL) sections before proceeding with clean-up. Use appropriate PERSONAL PROTECTIVE EQUIPMENT during clean-up.

Evacuate personnel, thoroughly ventilate area, use self-contained breathing apparatus.

Initial Containment

Dike spill. Prevent material from entering sewers, waterways, or low areas.

Spill Clean Up

Soak up with sawdust, sand, oil dry or other absorbent material.

_____ HANDLING AND STORAGE

Handling (Personnel)

Avoid breathing vapors or mist. Avoid contact with eyes, skin or clothing. Wash thoroughly after handling. Wash clothing after use.

EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Controls

Use only with adequate ventilation.

Personal Protective Equipment

Eye/Face Respirator : Coverall chemical splash goggles. : NIOSH approved respirator if exposure

limits exceeded.

Protective Gloves

: Neoprene or butyl rubber

Exposure Guidelines

Incompatibility with Other Materials None reasonably foreseeable. Polymerization

Polymerization will not occur.

Page 6

TOXICOLOGICAL INFORMATION

Animal Data

SODIUM CHLORIDE

Oral LD50: 3000 mg/kg in rats

Animal testing indicates that Sodium Chloride is a moderate eye irritant and a mild skin irritant.

Single exposure by ingesiton to high doses of Sodium Chloride caused increased urination, excessive thirst, pathological changes of the stomach. Repeated exposure caused increased kidney weight.

Sodium Chloride has not produced genetic damage in bacterial cell cultures. In mammalian cell cultures and animals, Sodium Chloride has produced positive responses, however, these effects are considered to be caused by high osmolality and not genetic damage.

SODIUM ACETATE

Inhalation 1 hour ALC: > 30 mg/L in rats Skin absorption LD50: > 10,000 mg/kg in rabbits Oral LD50: 3530 mg/kg in rats

The compound is a slight skin and eye irritant. Toxic effects described in animals from single exposures to lethal levels by ingestion include labored breathing hyperactivity, hypothermia, anaesthetic effects, and nonspecific effects such as diarrhea, and sedation. Repeated and long term exposures to levels up to 10% in the diet demonstrated no adverse effects. Tests in animals demonstrate no developmental toxicity. The compound does not produce genetic damage in bacterial and mammalian cell cultures.

SODIUM SULFATE

Oral LD50: 5859 mg/kg in mice

A formulation containing 69.5% Sodium Sulfate was reported to be non-irritating to skin and eyes.

Animal testing indicates Sodium Sulfate does not have carcinogenic or developmental effects.

METHANOL

Oral LD50: 9,100 mg/kg in rats Dermal LD50: 15,840 mg/kg in rabbits Inhalation 1 hour LC50: > 145,000 ppm in rats

(TOXICOLOGICAL INFORMATION - Continued)

Animal testing indicates that Methanol is an eye and skin irritant.

Eye contact with Methanol caused clouding of the eye (corneal opacity).

Repeated skin contact with higher concentrations of Methanol caused some mortality.

Single exposure by ingestion caused narcosis, liver effects and hypothermia. Repeated exposure caused pathological changes of the eye and acidosis.

Repeated exposure by inhalation caused irritation of the eyes and blindness.

Exposure to pregnant rats shows the following developmental effects: reduced birth weight, resorption and bone abnormalities. Tests have shown that Methanol does not cause genetic damage in bacterial or mammalian cell cultures or in animals.

DIMETHYL ACETAMIDE

Inhalation 1 hour LC50: 8.81 mg/L in female rats Skin absorption LD50: 2240 mg/kg in rabbits Oral LD50: 4930 mg/kg in rats

Animal testing indicates Dimethylacetamide is a slight to mild skin irritant, and a mild eye irritant, but not a skin sensitizer.

Repeated exposure by skin contact caused weakness, degeneration of the liver, central nervous system depression, incoordination, inflammation of the skin and dry skin.

Repeated exposure to high doses by ingestion caused pathological changes of the stomach and lungs. Repeated exposure to lower concentrations caused reduced weight gain, diarrhea, anemia, histopathological changes of the liver, kidneys, stomach and testes. Long term exposure by ingestion caused increased liver, kidney and adrenals weight, and altered clinical chemistry.

A near lethal inhalation exposure produced degeneration of the liver and kidneys. Repeated exposure caused liver injury, upper respiratory tract irritation, degeneration of the testes and pathological changes of the bone marrow. Long term exposure caused degeneration of the liver, and increased liver and kidney weights. Long term exposure at even higher concentrations caused degeneration of the kidneys and retinal atrophy in female mice.

DuPont Material Safety Data Sheet

(TOXICOLOGICAL INFORMATION - Continued)

In animal testing Dimethylacetamide has not caused carcinogenicity. Animal data show developmental effects only at exposure levels producing other toxic effects in the adult animal. Dimethylacetamide is not considered a unique developmental hazard to the conceptus. Some tests in adult animals have shown that this material may cause changes to the testes only at levels which produce other toxic effects in the adult animal. Reproductive data on adult animals show no change in reproductive performance. Dimethylacetamide is not considered to be a unique reproductive hazard. Dimethylacetamide has not produced genetic damage in bacterial cultures. It has not produced genetic damage in tests on animals. In animal testing, Dimethylacetamide has not caused permanent genetic damage in reproductive cells of mammals (has not produced heritable genetic damage).

SODIUM NITRATE

Oral LD50: 4,242 mg/kg in rats.

In guinea pigs, a single dermal exposure to two grams caused inflammation of the small intestine and death within 12 hours.

In calves, a single oral dose increased methemoglobin. Repeated exposures (up to 14 months) increased methemoglobin and the incidence of pulmonary lesions.

Tests in animals demonstrate no carcinogenic activity.

This compound does not produce genetic damage in bacterial cell cultures. It has been reported to cause chromosome damage in mammalian cell cultures. It does not produce heritable genetic damage.

COMPOSITION/INFORMATION ON INGREDIENTS

Components

CAS Number Material 2.5 *Methanol 67-56-1 30558-43-1 A-2213 (oxamohydroxamic acid, dimethyl-2-methylester) 7647-14-5 Sodium Chloride 127-09-3 2.6 Sodium Acetate 7732-18-5 83.2 Water

* Disclosure as a toxic chemical is required under Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR part 372.

HAZARDS IDENTIFICATION

Potential Health Effects

Skin contact may cause irritation with itching, burning, redness, swelling or rash. Methanol can permeate the skin in amounts capable of producing the effects of systemic toxicity.

Eye contact may cause eye irritation with tearing, pain or blurred vision.

Inhalation may cause irritation of the nose and throat with sneezing, sore throat or runny nose.

(HAZARDS IDENTIFICATION - Continued)

Inhalation, ingestion or skin contact with methanol may cause temporary mild depression of the central nervous system with dizziness, confusion, incoordination or drowsiness followed by an asymptomatic period usually ranging from 12 to 24 hours. Metabolic acidosis develops followed by occular toxicity (visual disturbances including blindness). Other effects include non-specific effects such as headache, nausea and weakness.

Ingestion of Methyl alcohol may cause irritation of the digestive tract with stomach pain, heartburn, nausea, vomiting or diarrhea; however, there may be no symptoms at all. The fatal dose of Methyl alcohol by ingestion is from 6 to 250 ml.

Gross overexposure to methanol may cause pathological changes in the liver and kidneys; nerve damage with numbness, weakness or muscle rigidity; tremors; convulsions; and fatality.

Carcinogenicity Information

None of the components present in this material at concentrations equal to or greater than 0.1% are listed by IARC, NTP, OSHA or ACGIH as a carcinogen.

FIRST AID MEASURES

First Aid

INHALATION

If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Call a physician.

SKIN CONTACT

Flush skin with water after contact. Wash contaminated clothing before reuse.

EYE CONTACT

In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Call a physician.

INGESTION

If swallowed, immediately give 2 glasses of water and induce vomiting. Never give anything by mouth to an unconscious person. Call a physician.

DuPont Material Safety Data Sheet

(FIRST AID MEASURES - Continued)

Notes to Physicians

Provide standard methanol treatment. Ethanol (ETOH) is antidotal and should be administered early in the treatment. Ethanol is a potent inhibitor of methanol metabolism because it is preferentially acted on by liver alcohol dehydrogenase, thus delaying or preventing toxic metabolites from Methanol.

Treatment is started after residual ingested substance is removed from the stomach. Ethanol is administered orally or IV with a goal of maintaining blood alcohol level of approximately 22 mmol/L or 1.0 mg/L.

To prepare antidote, make a solution using 100 mL of 100 proof ethyl alcohol and 1900 mL of water. Give 1.5 mL/kg or 100 mL for an average adult. This may be mixed with orange juice for oral use if necessary. More Ethanol is to be given at 2 hour intervals to achieve and maintain the desired blood alcohol levels. Treatment may be necessary for several days.

The patient should be monitored for metabolic acidosis. Use of appropriate buffering solutions, such as bicarbonate, may be indicated.

Hemodialysis may be required.

FIRE FIGHTING MEASURES

Flammable Properties

Material is not a fire or explosion hazard.

Extinguishing Media

Use media appropriate for surrounding material.

Fire Fighting Instructions

Keep personnel removed and upwind of fire. Wear self-contained breathing apparatus. Wear full protective equipment.

ACCIDENTAL DELEGE MESCHEE

ACCIDENTAL RELEASE MEASURES

Safeguards (Personnel)

NOTE: Review FIRE FIGHTING MEASURES and HANDLING (PERSONNEL) sections before proceeding with clean-up. Use appropriate PERSONAL PROTECTIVE EQUIPMENT during clean-up.

* AEL is DuPont's Acceptable Exposure Limit. Where governmentally imposed occupational exposure limits which are lower than the AEL are in effect, such limits shall take precedence.

PHYSICAL AND CHEMICAL PROPERTIES

Physical Data

Odor : Mercaptan-like

Form : Liquid

STABILITY AND REACTIVITY

Chemical Stability

Stable at normal temperatures and storage conditions.

Incompatibility with Other Materials

None reasonably foreseeable.

TOXICOLOGICAL INFORMATION

Animal Data

METHANOL

Oral LD50: 9,100 mg/kg in rats Dermal LD50: 15,840 mg/kg in rabbits Inhalation 1 hour LC50: >145,000 ppm in rats

Animal testing indicates Methyl Alcohol is an eye and skin irritant.

Eye contact with Methyl Alcohol caused clouding of the eye (corneal opacity).

Repeated skin contact with higher concentrations of Methyl Alcohol caused some mortality.

Single exposure by ingestion caused narcosis, liver effects, and hypothermia. Repeated exposure caused pathological changes of the eyes and acidosis.

Repeated exposure by inhalation caused irritation of the eyes, and blindness.

DuPont Material Safety Data Sheet

(TOXICOLOGICAL INFORMATION - Continued)

Exposure of pregnant rats resulted in reduced birth weight, bone abnormalities, and behavioral abnormalities. Exposure of pregnant mice resulted in reduced birth weight, resorption, and bone abnormalities. Tests have shown that Methyl Alcohol does not cause genetic damage in bacterial or mammalian cell cultures or in animals.

SODIUM CHLORIDE

Oral LD50: 3000 mg/kg in rats

Animal testing indicates that Sodium Chloride is a moderate eye irritant and a mild skin irritant.

Single exposure by ingesiton to high doses of Sodium Chloride caused increased urination, excessive thirst, pathological changes of the stomach. Repeated exposure caused increased kidney weight.

Sodium Chloride has not produced genetic damage in bacterial cell cultures. In mammalian cell cultures and animals, Sodium Chloride has produced positive responses, however, these effects are considered to be caused by high osmolality and not genetic damage.

SODIUM ACETATE

Inhalation 1 hour ALC: > 30 mg/L in rats Skin absorption LD50: > 10,000 mg/kg in rabbits Oral LD50: 3530 mg/kg in rats

The compound is a slight skin and eye irritant. Toxic effects described in animals from single exposures to lethal levels by ingestion include labored breathing hyperactivity, hypothermia, anaesthetic effects, and nonspecific effects such as diarrhea, and sedation. Repeated and long term exposures to levels up to 10% in the diet demonstrated no adverse effects. Tests in animals demonstrate no developmental toxicity. The compound does not produce genetic damage in bacterial and mammalian cell cultures.

HAZARDS IDENTIFIC	ATION		
Potential Health	Effects		
Skin contact w itching, burni	ith the waste may caus	e irritation wo	ith hyl

itching, burning, redness, swelling or rash. Dimethyl acetamide and methanol can permeate the skin in amounts capable of producing the effects of systemic toxicity.

Eye contact may cause irritation with tearing, pain or blurred vision.

DuPont Material Safety Data Sheet

(HAZARDS IDENTIFICATION - Continued)

Inhalation may cause irritation of the nose and throat with sneezing, sore throat or runny nose. Gross exposure to Sodium Chloride by inhalation may cause ulceration of mucous membranes.

Inhalation, ingestion or skin contact with methanol may cause temporary mild depression of the central nervous system iwth dizziness, confusion, incoordination or drowsiness followed by an asymptomatic period usually ranging from 12 to 24 hours. Metabolic acidosis develops followed by ocular toxicity (visual disturbance including blindness). Other effects include non-specific effects such as headache, nausea and weakness. Gross overexposure to methanol may cause pathological changes in the liver and kidneys; nerve damage with numbness, weakness or muscle rigidity; tremors, convulsions and fatality.

Inhalation, ingestion or skin contact with dimethyl acetamide may cause non-specific effects such as headache, nausea and weakness, dizziness and drowsiness. Repeated or excessive over-exposure may cause altered liver function or abdominal pain, vomiting or jaundice; or abnormal kidney function with altered results on blood tests.

The fatal dose of methanol by ingestion is 60-250 ml.

Gross ingestion of Sodium Chloride may cause severe irritation of the digestive tract with stomach pain, nausea, vomiting, diarrhea or internal bleeding; dehydration; and fatality.

If there is significant potential for skin contact with Dimethylacetamide (DMAC), biological monitoring should be done to measure the level of DMAC metabolites in urine specimens collected at the end of the shift. It is a DuPont practice to limit an individual's end-of-shift DMAC metabolites in urine to levels at or below 30 ppm expressed as N-methylacetamide (MMAC).

Carcinogenicity Information

None of the components present in this material at concentrations equal to or greater than 0.1% are listed by IARC, NTP, OSHA or ACGIH as a carcinogen.

FIRST AID MEASURES

First Aid

INHALATION

If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Call a physician.

SKIN CONTACT

In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Call a physician. Wash contaminated clothing before reuse.

EYE CONTACT

In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Call a physician.

INCESTION

If swallowed, do not induce vomiting. Give large quantity of water. Call a physician immediately. Never give anything by mouth to an unconscious person.

If swallowed, immediately give 2 glasses of water and induce vomiting. Never give anything by mouth to an unconscious person. Call a physician.

Notes to Physicians

Activated charcoal mixture may be administered. To prepare activated charcoal mixture, suspend 50 grams activated charcoal in 400 mL water and mix thoroughly. Administer 5 mL/kg, or 350 mL for an average adult.

TOXICOLOGICAL INFORMATION

Animal Data

SODIUM CHLORIDE

Oral LD50: 3000 mg/kg in rats

Animal testing indicates that Sodium Chloride is a moderate eye irritant and a mild skin irritant.

Single exposure by ingesiton to high doses of Sodium Chloride caused increased urination, excessive thirst, pathological changes of the stomach. Repeated exposure caused increased kidney weight.

Sodium Chloride has not produced genetic damage in bacterial cell cultures. In mammalian cell cultures and animals, Sodium Chloride has produced positive responses, however, these effects are considered to be caused by high osmolality and not genetic damage.

SODIUM ACETATE

Inhalation 1 hour ALC: > 30 mg/L in rats
Skin absorption LD50: > 10,000 mg/kg in rabbits
Oral LD50: 3530 mg/kg in rats

The compound is a slight skin and eye irritant. Toxic effects described in animals from single exposures to lethal levels by ingestion include labored breathing hyperactivity, hypothermia, anaesthetic effects, and nonspecific effects such as diarrhea, and sedation. Repeated and long term exposures to levels up to 10% in the diet demonstrated no adverse effects. Tests in animals demonstrate no developmental toxicity. The compound does not produce genetic damage in bacterial and mammalian cell cultures.

SODIUM SULFATE

Oral LD50: 5859 mg/kg in mice

A formulation containing 69.5% Sodium Sulfate was reported to be non-irritating to skin and eyes.

Animal testing indicates Sodium Sulfate does not have carcinogenic or developmental effects.

METHANOL

Oral LD50: 9,100 mg/kg in rats Dermal LD50: 15,840 mg/kg in rabbits Inhalation 1 hour LC50: > 145,000 ppm in rats

(TOXICOLOGICAL INFORMATION - Continued)

Animal testing indicates that Methanol is an eye and skin irritant.

Eye contact with Methanol caused clouding of the eye (corneal opacity).

Repeated skin contact with higher concentrations of Methanol caused some mortality.

Single exposure by ingestion caused narcosis, liver effects and hypothermia. Repeated exposure caused pathological changes of the eye and acidosis.

Repeated exposure by inhalation caused irritation of the eyes and blindness.

Exposure to pregnant rats shows the following developmental effects: reduced birth weight, resorption and bone abnormalities. Tests have shown that Methanol does not cause genetic damage in bacterial or mammalian cell cultures or in animals.

DIMETHYL ACETAMIDE

Inhalation 1 hour LC50: 8.81 mg/L in female rats Skin absorption LD50: 2240 mg/kg in rabbits Oral LD50: 4930 mg/kg in rats

Animal testing indicates Dimethylacetamide is a slight to mild skin irritant, and a mild eye irritant, but not a skin sensitizer.

Repeated exposure by skin contact caused weakness, degeneration of the liver, central nervous system depression, incoordination, inflammation of the skin and dry skin.

Repeated exposure to high doses by ingestion caused pathological changes of the stomach and lungs. Repeated exposure to lower concentrations caused reduced weight gain, diarrhea, anemia, histopathological changes of the liver, kidneys, stomach and testes. Long term exposure by ingestion caused increased liver, kidney and adrenals weight, and altered clinical chemistry.

A near lethal inhalation exposure produced degeneration of the liver and kidneys. Repeated exposure caused liver injury, upper respiratory tract irritation, degeneration of the testes and pathological changes of the bone marrow. Long term exposure caused degeneration of the liver, and increased liver and kidney weights. Long term exposure at even higher concentrations caused degeneration of the kidneys and retinal atrophy in female mice.

(TOXICOLOGICAL INFORMATION - Continued)

In animal testing Dimethylacetamide has not caused carcinogenicity. Animal data show developmental effects only at exposure levels producing other toxic effects in the adult animal. Dimethylacetamide is not considered a unique developmental hazard to the conceptus. Some tests in adult animals have shown that this material may cause changes to the testes only at levels which produce other toxic effects in the adult animal. Reproductive data on adult animals show no change in reproductive performance. Dimethylacetamide is not considered to be a unique reproductive hazard. Dimethylacetamide has not produced genetic damage in bacterial cultures. It has not produced genetic damage in tests on animals. In animal testing, Dimethylacetamide has not caused permanent genetic damage in reproductive cells of mammals (has not produced heritable genetic damage).

SODIUM NITRATE

Oral LD50: 4,242 mg/kg in rats.

In guinea pigs, a single dermal exposure to two grams caused inflammation of the small intestine and death within 12 hours.

In calves, a single oral dose increased methemoglobin. Repeated exposures (up to 14 months) increased methemoglobin and the incidence of pulmonary lesions.

Tests in animals demonstrate no carcinogenic activity.

This compound does not produce genetic damage in bacterial cell cultures. It has been reported to cause chromosome damage in mammalian cell cultures. It does not produce heritable genetic damage.

MATERIAL SAFETY DATA SHEET

PRODUCT TRADE NAME:

CST-6-1002

REVISION DATE:

4/25/08

TRANSPORTATION:

EMERGENCY PHONE NUMBER (CHEMTRAC):

CHEMICAL NAME:

Mixture of Surfactants and coupling agents

SECTION 1

INGREDIENTS/COMPOSITION

CHEMICAL

CONCENTRATION(WT%)

EFXPOSURE LIMITS

800 424 9300

Proprietary Blend

100

SECTION 2

FIRE & EXPLOSION HAZARDS

FLASH POINT, °F:

> 200 Pensky-Martin closed cup

FLAMMABLE LIMITS:

EXTINGUISHING MEDIA:

Dry chemical or waterspray or waterfog or CO2 or Foam or Sand/Earth

SPECIAL FIREFIGHTING PROCEDURES: **UNUSUAL FIRE & EXPLOSION HAZARDS:**

N/D N/D

SECTION 3

HEALTH HAZARD DATA

ORAL TOXICITY:

Irritation and respiratory discomfort.

EYE IRRITATION:

Moderate to severe irritation Moderate irritation.

SKIN IRRITATION:

PERMISSIBLE CONCENTRATIONS: CHRONIC EFFECTS OF OVEREXPOSURE:

No data available.

ACUTE TOXICOLOGICAL PROPERTIES:

Moderate irritation.

EMERGENCY FIRST AID PROCEDURES:

SKIN: EYE:

Immediately flush with large quantities of water for at least 15 minutes. Immediately flush with large quantities of water for at least 15 minutes.

INHALATION:

Remove to fresh air. If breathing is difficult, give oxygen and call a physician.

ORAL:

If swallowed, call a physician.

ADDITIONAL:

N/D

SECTION 4

SPECIAL PROTECTION INFORMATION

VENTILATION PROCEDURE:

Local, mechanical, special.

GLOVE PROTECTION:

Rubber or plastic, solvent resistant.

EYE PROTECTION:

Chemical safety goggles.

OTHER PROTECTION:

Neoprene protective type apron.

SECTION 5

PHYSICAL DATA

VAPOR PRESSURE:

No data available

VAPOR DENSITY:

N/D N/D

SPECIFIC GRAVITY:

@ 20°C 1.15 Soluble

EVAPORATION RATE: ODOR:

Fatty

WATER SOLUBILITY: PERCENT VOLATILE:

27

APPEARANCE:

Clear liquid

COLOR:

pН

6-7

FORM:

Liquid

N/D = No Data Available

SECTION 6

STABILITY

STABILITY:

Product is stable under normal conditions.

INCOMPATIBILITY:

Keep away from strong oxidizers such as hydrogen peroxide, bromine, and

chromic acid.

POLYMERIZATION:

Not applicable.

THERMAL DECOMPOSITION:

Carbon monoxide and carbon dioxide from burning.

SECTION 7 SPILL OR LEAK PROCEDURES

SPILL PROCEDURES:

Absorb with an inert material such as sand, soil or vermiculite; and sweep up and dispose in

accordance with federal, state and local regulations.

WASTE DISPOSAL:

Dispose of in accordance with all applicable federal, state and local regulations.

SECTION 8

SPECIAL PRECAUTIONS

SPECIAL PRECAUTIONS:

Precautions to be taken in handling and storage: Store between 40°F and 120°F.

SECTION 9

TRANSPORTATION AND LABELING

DOT PROPER SHIPPING NAME:

CST spreader, sticker

DOT HAZARD CLASS:

Not hazardous

SECTION 10

OTHER REGULATORY INFORMATION

SARA Section 311/312: Acute and Chronic Health Hazard.

3. Hazards identification

Physical state

Liquid.

Color

Brown to Black.

Emergency overview

Danger!

Extremely flammable liquid and vapor.

Vapor may cause fire.

Keep away from heat, sparks and flame. Avoid all possible sources of ignition (spark or flame).

Avoid contact with eyes, skin and clothing.

Causes eve irritation. Causes skin irritation.

Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes

Product code

headaches, drowsiness, and nausea, and may lead to unconsciousness or death.

Harmful or fatal if liquid is aspirated into lungs.

Can cause blood disorders

Risk of cancer depends on duration and level of exposure.

Danger! Contains Benzene. Cancer hazard. Harmful if absorbed through the skin.

Product Petroleum Crude Oil - Sweet name

Page: 1/10

Version 1

Date of issue 08/31/2007.

Format US-COMP

Language ENGLISH.

Build 5.3.5

(ENGLISH)

Contains n-hexane which may cause peripheral nerve damage.

Target Organ(s): Respiratory System, Central Nervous System, Peripheral Nervous System, Cardiovascular System, Blood, Liver, Kidney

If ingested do not induce vomiting. Harmful or fatal if liquid is aspirated into lungs. Avoid breathing vapor or mist. Do not puncture or incinerate. Keep container closed when not in use. Use only with adequate ventilation Wash contaminated skin with soap and water. Avoid exposure during pregnancy.

Routes of entry

Skin contact or absorption. Eye contact. Inhalation. Ingestion.

Potential health effects

Eyes

Causes eye irritation.

Skin

Causes skin irritation. Prolonged or repeated contact can defat the skin and lead to irritation and/or dermatitis. Cancer hazard. Can cause cancer. Can cause blood disorders. Harmful if absorbed through the skin. See toxicological Information (section 11).

Inhalation

Harmful or fatal if inhaled. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness, and nausea, and may lead to unconsciousness or death. May cause respiratory tract irritation. Contains n-hexane which may cause peripheral nerve damage. Contains benzene. Cancer hazard. Can cause cancer. Can cause blood disorders. See toxicological Information (section 11).

Ingestion

Harmful or fatal if liquid is aspirated into lungs. Adverse effects could include chemical pneumonitis. Ingestion may cause gastrointestinal irritation and diarrhea. Exposure can cause nausea, headache and vomiting. Harmful: may cause lung damage if swallowed. Cancer hazard. Can cause cancer. See toxicological Information (section 11).

Medical conditions aggravated by overexposure

None identified.

See toxicological Information (section 11).

4. First aid measures

Eye contact

In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical

attention immediately.

Skin contact

Wash contaminated skin with soap and water. Do not use hot water. Remove contaminated clothing and shoes. Wash clothing before reuse. Thoroughly clean shoes before reuse. Destroy contaminated leather items such as belts and shoes and other items that cannot be decontaminated.

Get medical attention immediately.

Inhalation

If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult,

give oxygen. Get medical attention immediately

Ingestion

If swallowed, do NOT induce vomiting. Never give anything by mouth to an unconscious person. Aspiration hazard if swallowed- can enter lungs and cause damage. Get medical attention immediately.

....

5. Fire-fighting measures

Flammability of the

product

Flammable.

Auto-ignition temperature

240 °C (464 °F) (Estimated. Based on n-Hexane)

Flash point

-18 °C (0 °F)

Explosion limits

Lower: 1.1 % Upper: 5.9 %

(Estimated. Based on Crude oil)

Products of combustion

These products are carbon oxides (CO, CO₂) (carbon monoxide, carbon dioxide) and nitrogen

oxides (NO, NO₂ etc.)

(ENGLISH)

Unusual fire/explosion hazards

Extremely flammable. Vapor may cause flash fire. Vapors may accumulate in low or confined areas, travel considerable distance to source of ignition and flash back. Runoff to sewer may create fire or explosion hazard.

Highly explosive in the presence of the following materials or conditions: heat, open flames, sparks and static discharge. Eliminate all ignition sources. Hot containers may explode.

Fire-fighting media and instructions

If involved in fire, shut off flow immediately if it can be done without risk. Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. First move people out of line-of-sight of the scene and away from windows. Keep personnel removed and upwind of fire. Withdraw from fire and let it burn.

In case of fire, use water fog, foam, dry chemicals, or carbon dioxide. For fires involving this material, do not enter any enclosed or confined fire space without proper protective equipment. This may include self-contained breathing apparatus to protect against the hazardous effects of combustion products and oxygen deficiencies. Cool tanks and containers exposed to fire with water. If firefighters cannot work upwind to the fire, respiratory protective equipment must be worn unless and until atmospheric monitoring indicates that such protection is not required. Improper use of water and extinguishing media containing water may cause frothing which can spread the fire over a larger area. Water fog or spray are of value for cooling tank shells and surfaces exposed to fire, but may not achieve extinguishment. Liquid will float and may reignite on surface of water. Use water spray to cool and disperse vapors and protect personnel. If this is impossible, withdraw from area and let fire burn.

Protective clothing (fire)

Fire-fighters should wear positive pressure self-contained breathing apparatus (SCBA) and full turnout gear. Be sure to use a MSHA/NIOSH approved respirator or equivalent.

Accidental release measures

Personal precautions

Immediately contact emergency personnel. Eliminate all ignition sources. Stop leak if without risk. Keep unnecessary personnel away. Move upwind and away from spill. Use suitable protective equipment (See Section: "Exposure controls/personal protection"). Follow all fire fighting procedures (See Section: "Fire-fighting measures"). Do not touch or walk through spilled material. Liquid leaks generate large volumes of extremely flammable gas.

Environmental precautions and clean-up methods

If emergency personnel are unavailable, contain spilled material. Stop leak if without risk. For small spills add absorbent (soil may be used in the absence of other suitable materials) scoop up material and place in a sealed, liquid-proof container for disposal. For large spills dike spilled material or otherwise contain material to ensure runoff does not reach a waterway. Place spilled material in an appropriate container for disposal. Avoid contact of spilled material with soil and prevent runoff entering surface waterways. Exclude sources of ignition and ventilate the area. See Section 13 for Waste Disposal Information.

Personal protection in case of a large spill

Chemical splash goggles. Chemical resistant protective suit. Chemicals resistant boots. Chemical resistant gloves (nitrile or viton). Wear MSHA/NIOSH approved self-contained breathing apparatus or equivalent and full protective gear. Suggested protective clothing might not be sufficient; consult a specialist BEFORE handling this product.

7. Handling and storage

Handling

Aspiration hazard if swallowed- can enter lungs and cause damage. Do not ingest. If ingested do not induce vomiting. Do not get in eyes, on skin or on clothing. Wash thoroughly after handling. Do not breathe vapor or mist. Use only with adequate ventilation Keep away from heat, sparks and flame. Exercise caution when opening to allow pressure release. Use appropriate respiratory protection if there is the potential to exceed the exposure limit(s). To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Electrical equipment should not be used unless it is intrinsically safe (i.e. will not produce sparks).

Storage

Store in a segregated and approved area. Keep container tightly closed and sealed until ready for use. Empty containers may contain harmful, flammable/combustible or explosive residue or vapors. Do not cut, grind, drill, weld, reuse or dispose of containers unless adequate precautions are taken against these hazards. Do not smoke.

Do not enter storage areas and confined spaces unless adequately ventilated. Use appropriate respiratory protection if there is the potential to exceed the exposure limit(s).

Light hydrocarbon vapors can build up in the headspace of tanks. These can cause

Product Petroleum Crude Oil - Sweet

Language ENGLISH.

Build 5.3.5

flammability/explosion hazards even at temperatures below the normal flash point (note: flash point must not be regarded as a reliable indicator of the potential flammability of vapor in tank headspaces). Tank headspaces should always be regarded as potentially flammable and care should be taken to avoid static electrical discharge and all ignition sources during filling, ullaging and sampling from storage tanks. When the product is pumped (e.g. during filling, discharge or ullaging) and when sampling, there is a risk of static discharge. Ensure equipment used is properly earthed or bonded to the tank structure.

This material may also contain benzene vapor, a known human carcinogen. Vapors containing benzene may accumulate in the headspace of storage tanks and during storage or transport. Where there is potential for exposure to benzene vapor in excess of the short-term or 8-hr permissible exposure limits, a NIOSH-approved respirator should be worn.

OSHA PEL Z2 (United States, 11/2006).

AMP: 50 ppm 10 minute(s).

CEIL: 20 ppm

Some states may enforce more stringent exposure limits.

Control Measures

Provide exhaust ventilation or other engineering controls to keep the relevant airborne concentrations below their respective occupational exposure limits. In accordance with good industrial hygiene and safety work practices, airborne exposures should be controlled to the lowest extent practicable. Use explosion-proof ventilation equipment. Keep away from sources of ignition.

Hygiene measures

Wash hands, forearms and face thoroughly after handling chemical products, before eating,

smoking and using the lavatory and at the end of the working period.

Personal protection

Eyes

Avoid contact with eyes. Use goggles, face shield, or other full-face protection if potential exists for direct exposure to aerosols or splashes (chemical splash goggles).

Skin and body

Wear appropriate protective clothing to prevent skin contact. Remove contaminated clothing, including shoes, and thoroughly clean and dry before reuse. Thoroughly decontaminate clothing and discard contaminated leather goods and other items which cannot be decontaminated.

Respiratory

Do not breathe vapor or mist. A respirator is not needed under normal and intended conditions of product use. If operating conditions cause high vapor concentrations or TLV is exceeded, use NIOSH certified supplied-air respirator.

Hands

Avoid contact with skin. Wear chemical resistant gloves.

Recommended: Nitrile gloves or Viton Gloves.

The correct choice of protective gloves depends upon the chemicals being handled, the conditions of work and use, and the condition of the gloves (even the best chemically resistant glove will break down after repeated chemical exposures). Most gloves provide only a short time of protection before they must be discarded and replaced. Because specific work environments and material handling practices vary, safety procedures should be developed for each intended application. Gloves should therefore be chosen in consultation with the supplier/manufacturer and with a full assessment of the working conditions.

Consult your supervisor or S.O.P. for special handling directions

Consult local authorities for acceptable exposure limits.

9. Physical and chemical properties

Physical state

Liquid.

Odor

Petroleum Hydrocarbon, Rotten eggs. [Slight]

Color

Brown to Black.
Not available.

Heat of combustion

-17.778 to 537.78°C (-0.0004 to 1000°F)

Boiling point / Range Melting point / Range

-60 to -20°C (-76 to -4°F)

Build 5.3.5

Vapor pressure

>0.359 kPa (>2.7 mm Hg) at 20°Q (68 °F),

Vapor Density (Air = 1)

>1

Solubility

Insoluble in cold water.

Viscosity

SUS: 31 to 9000 SUS at 20°C (68 °F)

10. Stability and reactivity

Stability and reactivity

Stable under recommended storage and handling conditions (See Section: "Handling and

storage"). Extremely flammable liquid and vapor. Vapor may cause flash fire.

Conditions to avoid

Avoid all possible sources of ignition (spark or flame). Avoid excessive heat.

Incompatibility with various substances

Reactive or incompatible with the following materials: oxidizing materials.

Hazardous decomposition

products

These products are carbon oxides (CO, CO₂) (carbon monoxide, carbon dioxide) and nitrogen

oxides (NO, NO2 etc.)

Hazardous polymerization

Will not occur.

11. Toxicological information

Acute toxicity

Aspiration of this product into the lungs can cause chemical pneumonia and can be fatal. Aspiration into the lungs can occur while vomiting after ingestion of this product. Do not siphon by mouth.

Chronic toxicity

Carcinogenic effects

CANCER HAZARD

CONTAINS MATERIAL WHICH CAN CAUSE CANCER Risk of cancer depends on duration and level of exposure. Classified A1 (Confirmed for human.) by ACGIH: [Benzene] Classified 1 (Proven for human.) by IARC: [Benzene]

can occur while vomiting after ingestion of this material.

Classified 2B (Possible for human.) by IARC: [Naphthalene; Ethylbenzene] Classified 1 (Known To Be Human Carcinogens.) by NTP: [Benzene]

Classified 2 (Reasonably Anticipated To Be Human Carcinogens.) by NTP: [Naphthalene]

Classified + (Proven) by OSHA: [Benzene]

Other information

Benzene: Acute toxicity of benzene results primarily from depression of the central nervous system (CNS). Inhalation of concentrations over 50 ppm can produce headache, lassitude, weariness, dizziness, drowsiness, or excitation. Exposure to very high levels can result in unconsciousness and death.

Benzene: Long-term overexposure to benzene has been associated with certain types of leukemia in humans. In addition, the International Agency for Research on Cancer (IARC), the National Toxicology Program, and OSHA consider benzene to be a human carcinogen. Chronic exposures to high levels of benzene have been reported to cause adverse blood effects including anemia. Benzene exposure can occur by inhalation and absorption through the skin. Inhalation and forced feeding studies of benzene in laboratory animals have produced a carcinogenic response in a variety of organs, including possibly leukemia, other adverse effects on the blood, chromosomal changes and some effects on the immune system. Exposure to benzene at levels up to 300 ppm did not produce birth defects in animal studies; however, exposure to higher dosage levels resulted in a reduction of body weight of the rat pups (fetotoxicity). Changes in the testes have been observed in mice exposed to benzene at 300 ppm, but reproductive performance was not altered in rats exposed to benzene at the same level. Aspiration of this material into the lungs can cause chemical pneumonia and can be fatal. Aspiration into the lungs

Benzene vapor may accumulate in the headspace of storage tanks and bulk transport compartments containing this material.

Toluene: Aspiration of this material into the lungs can cause chemical pneumonia and can be fatal. Aspiration into the lungs can occur while vomiting after ingestion of this material. Deliberate inhalation of high concentrations of toluene has been linked to damage of the brain, liver and kidney. Inhalation of very high concentrations of toluene, such as in cases of solvent abuse, has resulted in sudden death which may be a result of cardiac arrhythmia or central nervous system depression. Mental and/or growth retardation has been reported in children of women who

Language ENGLISH.

Build 5.3.5

deliberately inhale toluene during pregnancy (usually at thousands of ppm). Fetal developmental toxicity was observed when pregnant rats were exposed to toluene at levels of 1500 ppm. Maternal toxicity was also observed at this concentration. Prolonged, high level exposure to toluene in laboratory animals has resulted in hearing loss. Exposure studies in rats have resulted in adverse effects on the kidney, liver and central nervous system. Studies in occupationally exposed individuals indicate that toluene exposure has been associated with impaired color vision and decreased performance in some neurobehavioral tests. There are occupational studies which report an association between inhalation exposure to toluene and adverse effects on reproduction including spontaneous abortion. The methodology of these studies and the reliability of the results have been questioned. In a two-generation study in rats, inhalation of toluene at levels up to 2000 ppm did not produce adverse effects on fertility or reproductive performance.

Studies in occupationally exposed individuals indicate that toluene exposure has been associated with impaired color vision and decreased performance in some neurobehavioral tests.

Xylenes: Xylene has been reported to cause central nervous system effects at concentrations above the recommended exposure limit. Xylene vapor becomes irritating at relatively high levels. In one study, eye irritation was reported at exposures of 460 ppm and in one person at 230 ppm after 15 minutes. In another study, no one reported eyes, nose and throat irritation at mixed xylene exposures up to 230 ppm for 30 minutes. Dermal LD50 is expected to be greater than 10g/kg in rabbits, based on test results from similar materials.

Mixed xylenes caused slight hearing loss in rats exposed to 800 ppm in the air for 14 hours/day for six weeks. There is no information available for lower concentrations; however, similar chemicals that have caused these hearing effects at similar concentrations have not caused effects at lower concentrations.

Pregnant animals exposed to xylene or its isomers have been reported to cause development toxicity in rodents when exposed by inhalation. The developmental effects observed consisted of delayed development and minor skeletal variations, but no malformations. Because of the high exposure levels used in these studies, we do not believe that these results imply an increased risk of reproductive toxicity to workers exposed to xylene levels at or below the exposure limits.

Xylene and its isomers are not genotoxic.

Technical grade xylene has been tested in a National Toxicology Program carcinogenicity study in rats and mice dosed orally for two years. There was no evidence of carcinogenicity.

Ethylbenzene: The National Toxicology Program (NTP) conducted a 13-week inhalation study with male and female rats and mice at exposure concentrations ranging from 100 to 1000 ppm ethylbenzene. No rats or mice died during the study. Kidney, liver, and lung weights were increased in the exposed rats, while weight increases were observed only in the livers of exposed mice. Treatment-related histopathologic changes were not observed in any tissues of rats and mice.

NTP also exposed male and female rats and mice by inhalation to 0, 75, 250, or 750 ppm ethylbenzene for 2 years. There was a statistically significant increase in the number of kidney tumors in male and female rats at 750 ppm. There were also increased incidences of lung tumors in male mice and liver tumors in female mice that were statistically significant at 750 ppm. Except for the male rat kidney tumors, the incidence of the tumors were within the range observed for non-exposed animals from other studies conducted by NTP. The significance of these findings to humans is unknown. Ethylbenzene produced mixed results in in vitro genotoxicity studies, which were not confirmed when tested in vivo. The International Agency for Research on Cancer (IARC) has evaluated ethylbenzene and found it to be possibly carcinogenic to humans (Group 2B).

Ethylbenzene is not genotoxic.

This product contains n-hexane. Overexposure to n-hexane may cause progressive and potentially irreversible damage to the peripheral nervous system, particularly in the arms and legs. Animal studies have also shown that n-hexane overexposure may cause testicular injury. However, animal studies conducted with commercial hexane, containing 53% n-hexane, showed neither peripheral nervous system damage nor testicular injury at inhalation exposures up to 9000 ppm.

Naphthalene has been reported to cause developmental toxicity in mice after oral exposure to relatively high dose levels, but developmental toxicity was not observed in NTP (National Toxicology Program) sponsored studies in rats and rabbits. Ingestion or inhalation of naphthalene can result in hemolysis and other blood abnormalities, and individuals (and infants) deficient in

glucose-6-phosphate dehydrogenase may be especially susceptible to these effects. Inhalation of naphthalene may cause headache and nausea. Airborne exposure can result in eye irritation. Naphthalene exposure has been associated with cataracts in animals and humans.

12. Ecological information

Ecotoxicity

No testing has been performed by the manufacturer.

13. Disposal considerations

Waste information

Avoid contact of spilled material and runoff with soil and surface waterways. Consult an environmental professional to determine if local, regional or national regulations would classify spilled or contaminated materials as hazardous waste. Use only approved transporters, recyclers, treatment, storage or disposal facilities. Dispose of in accordance with local, state and federal regulations.

Consult your local or regional authorities.

Label requirements

Danger!

Extremely flammable liquid and vapor.

Vapor may cause fire.

Keep away from heat, sparks and flame. Avoid all possible sources of ignition (spark or flame).

Avoid contact with eyes, skin and clothing.

Causes eve irritation. Causes skin irritation.

Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes

headaches, drowsiness, and nausea, and may lead to unconsciousness or death.

Harmful or fatal if liquid is aspirated into lungs.

Can cause blood disorders

Risk of cancer depends on duration and level of exposure.

Danger! Contains Benzene. Cancer hazard. Harmful if absorbed through the skin.

3. Hazards identification

Physical state

Liquid.

Color

Brown to Black.

Emergency overview

Danger!

Extremely flammable liquid and vapor.

Vapor may cause fire.

Keep away from heat, sparks and flame. Avoid all possible sources of ignition (spark or flame).

Avoid contact with eyes, skin and clothing.

Causes eve irritation. Causes skin irritation.

Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes

headaches, drowsiness, and nausea, and may lead to unconsciousness or death.

Harmful or fatal if liquid is aspirated into lungs.

Can cause blood disorders

Risk of cancer depends on duration and level of exposure.

Danger! Contains Benzene. Cancer hazard.

Harmful if absorbed through the skin.

Product Petroleum Crude Oil - Sweet

name

Version 1

Date of issue 08/31/2007.

Product code

0000002895

Page: 1/10

Format US-COMP

Language ENGLISH.

Build 5.3.5

Contains n-hexane which may cause peripheral nerve damage.

Target Organ(s): Respiratory System, Central Nervous System, Peripheral Nervous System, Cardiovascular System, Blood, Liver, Kidney

If ingested do not induce vomiting. Harmful or fatal if liquid is aspirated into lungs. Avoid breathing vapor or mist. Do not puncture or incinerate. Keep container closed when not in use. Use only with adequate ventilation Wash contaminated skin with soap and water. Avoid exposure during pregnancy.

Routes of entry

Skin contact or absorption. Eye contact. Inhalation. Ingestion.

Potential health effects

Eyes

Causes eve irritation.

Skin

Causes skin irritation. Prolonged or repeated contact can defat the skin and lead to irritation and/or dermatitis. Cancer hazard. Can cause cancer. Can cause blood disorders. Harmful if absorbed through the skin. See toxicological Information (section 11).

Inhalation

Harmful or fatal if inhaled. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness, and nausea, and may lead to unconsciousness or death. May cause respiratory tract irritation. Contains n-hexane which may cause peripheral nerve damage. Contains benzene. Cancer hazard. Can cause cancer. Can cause blood disorders. See toxicological Information (section 11).

Ingestion

Harmful or fatal if liquid is aspirated into lungs. Adverse effects could include chemical pneumonitis. Ingestion may cause gastrointestinal irritation and diarrhea. Exposure can cause nausea, headache and vomiting. Harmful: may cause lung damage if swallowed. Cancer hazard. Can cause cancer. See toxicological Information (section 11).

Medical conditions aggravated by overexposure

None identified.

See toxicological Information (section 11).

4. First aid measures

Eye contact In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical

attention immediately.

Skin contact Wash contaminated skin with soap and water. Do not use hot water. Remove contaminated

clothing and shoes. Wash clothing before reuse. Thoroughly clean shoes before reuse. Destroy contaminated leather items such as belts and shoes and other items that cannot be

decontaminated.

Get medical attention immediately.

Inhalation If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult,

give oxygen. Get medical attention immediately.

Ingestion If swallowed, do NOT induce vomiting. Never give anything by mouth to an unconscious person.

Aspiration hazard if swallowed- can enter lungs and cause damage. Get medical attention

immediately.

5. Fire-fighting measures

Flammability of the

product

Flammable.

Auto-ignition temperature

240 °C (464 °F) (Estimated. Based on n-Hexane)

Flash point

-18 °C (0 °F)

Explosion limits

Lower: 1.1 % Upper: 5.9 %

(Estimated. Based on Crude oil)

Products of combustion

These products are carbon oxides (CO, CO₂) (carbon monoxide, carbon dioxide) and nitrogen oxides (NO, NO₂ etc.)

Language ENGLISH.

Build 5.3.5

Unusual fire/explosion hazards

Extremely flammable. Vapor may cause flash fire. Vapors may accumulate in low or confined areas, travel considerable distance to source of ignition and flash back. Runoff to sewer may create fire or explosion hazard.

Highly explosive in the presence of the following materials or conditions: heat, open flames, sparks and static discharge. Eliminate all ignition sources. Hot containers may explode.

Fire-fighting media and instructions

If involved in fire, shut off flow immediately if it can be done without risk. Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. First move people out of line-of-sight of the scene and away from windows. Keep personnel removed and upwind of fire. Withdraw from fire and let it burn.

In case of fire, use water fog, foam, dry chemicals, or carbon dioxide. For fires involving this material, do not enter any enclosed or confined fire space without proper protective equipment. This may include self-contained breathing apparatus to protect against the hazardous effects of combustion products and oxygen deficiencies. Cool tanks and containers exposed to fire with water. If firefighters cannot work upwind to the fire, respiratory protective equipment must be worn unless and until atmospheric monitoring indicates that such protection is not required. Improper use of water and extinguishing media containing water may cause frothing which can spread the fire over a larger area. Water fog or spray are of value for cooling tank shells and surfaces exposed to fire, but may not achieve extinguishment. Liquid will float and may reignite on surface of water. Use water spray to cool and disperse vapors and protect personnel. If this is impossible, withdraw from area and let fire burn.

Protective clothing (fire)

Fire-fighters should wear positive pressure self-contained breathing apparatus (SCBA) and full turnout gear. Be sure to use a MSHA/NIOSH approved respirator or equivalent.

6. Accidental release measures

Personal precautions

Immediately contact emergency personnel. Eliminate all ignition sources. Stop leak if without risk. Keep unnecessary personnel away. Move upwind and away from spill. Use suitable protective equipment (See Section: "Exposure controls/personal protection"). Follow all fire fighting procedures (See Section: "Fire-fighting measures"). Do not touch or walk through spilled material. Liquid leaks generate large volumes of extremely flammable gas.

Environmental precautions and clean-up methods

If emergency personnel are unavailable, contain spilled material. Stop leak if without risk. For small spills add absorbent (soil may be used in the absence of other suitable materials) scoop up material and place in a sealed, liquid-proof container for disposal. For large spills dike spilled material or otherwise contain material to ensure runoff does not reach a waterway. Place spilled material in an appropriate container for disposal. Avoid contact of spilled material with soil and prevent runoff entering surface waterways. Exclude sources of ignition and ventilate the area. See Section 13 for Waste Disposal Information.

Personal protection in case of a large spill

Chemical splash goggles. Chemical resistant protective suit. Chemicals resistant boots. Chemical resistant gloves (nitrile or viton). Wear MSHA/NIOSH approved self-contained breathing apparatus or equivalent and full protective gear. Suggested protective clothing might not be sufficient; consult a specialist BEFORE handling this product.

7. Handling and storage

Handling

Aspiration hazard if swallowed- can enter lungs and cause damage. Do not ingest. If ingested do not induce vomiting. Do not get in eyes, on skin or on clothing. Wash thoroughly after handling. Do not breathe vapor or mist. Use only with adequate ventilation. Keep away from heat, sparks and flame. Exercise caution when opening to allow pressure release. Use appropriate respiratory protection if there is the potential to exceed the exposure limit(s). To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Electrical equipment should not be used unless it is intrinsically safe (i.e. will not produce sparks).

Storage

Store in a segregated and approved area. Keep container tightly closed and sealed until ready for use. Empty containers may contain harmful, flammable/combustible or explosive residue or vapors. Do not cut, grind, drill, weld, reuse or dispose of containers unless adequate precautions are taken against these hazards. Do not smoke.

Do not enter storage areas and confined spaces unless adequately ventilated. Use appropriate respiratory protection if there is the potential to exceed the exposure limit(s).

Light hydrocarbon vapors can build up in the headspace of tanks. These can cause

Product Petroleum Crude Oil - Sweet Product code 0000002895 Page: 3/10 name

Version 1 Date of issue 08/31/2007. Format US-COMP Language ENGLISH.

Build 5.3.5 (ENGLISH)

flammability/explosion hazards even at temperatures below the normal flash point (note: flash point must not be regarded as a reliable indicator of the potential flammability of vapor in tank headspaces). Tank headspaces should always be regarded as potentially flammable and care should be taken to avoid static electrical discharge and all ignition sources during filling, ullaging and sampling from storage tanks. When the product is pumped (e.g. during filling, discharge or ullaging) and when sampling, there is a risk of static discharge. Ensure equipment used is properly earthed or bonded to the tank structure.

This material may also contain benzene vapor, a known human carcinogen. Vapors containing benzene may accumulate in the headspace of storage tanks and during storage or transport. Where there is potential for exposure to benzene vapor in excess of the short-term or 8-hr permissible exposure limits, a NIOSH-approved respirator should be worn.

Some states may enforce more stringent exposure limits.

Control Measures Provide exhaust ventilation or other engineering controls to keep the relevant airborne

concentrations below their respective occupational exposure limits. In accordance with good industrial hygiene and safety work practices, airborne exposures should be controlled to the lowest extent practicable. Use explosion-proof ventilation equipment. Keep away from sources of ignition.

Hygiene measures Wash hands, forearms and face thoroughly after handling chemical products, before eating,

smoking and using the lavatory and at the end of the working period.

Personal protection

Eyes Avoid contact with eyes. Use goggles, face shield, or other full-face protection if potential exists for

direct exposure to aerosols or splashes (chemical splash goggles).

Skin and body Wear appropriate protective clothing to prevent skin contact. Remove contaminated clothing,

including shoes, and thoroughly clean and dry before reuse. Thoroughly decontaminate clothing and discard contaminated leather goods and other items which cannot be decontaminated.

Respiratory Do not breathe vapor or mist. A respirator is not needed under normal and intended conditions of

product use. If operating conditions cause high vapor concentrations or TLV is exceeded, use

NIOSH certified supplied-air respirator.

Hands Avoid contact with skin. Wear chemical resistant gloves.

Recommended: Nitrile gloves or Viton Gloves.

The correct choice of protective gloves depends upon the chemicals being handled, the conditions of work and use, and the condition of the gloves (even the best chemically resistant glove will break down after repeated chemical exposures). Most gloves provide only a short time of protection before they must be discarded and replaced. Because specific work environments and material handling practices vary, safety procedures should be developed for each intended application. Gloves should therefore be chosen in consultation with the supplier/manufacturer and

with a full assessment of the working conditions.

Consult your supervisor or S.O.P. for special handling directions

Consult local authorities for acceptable exposure limits.

10. Stability and reactivity

Stability and reactivity

Stable under recommended storage and handling conditions (See Section: "Handling and

storage"). Extremely flammable liquid and vapor. Vapor may cause flash fire.

Conditions to avoid

Avoid all possible sources of ignition (spark or flame). Avoid excessive heat.

Incompatibility with various substances

Reactive or incompatible with the following materials: oxidizing materials.

Hazardous decomposition

products

These products are carbon oxides (CO, CO₂) (carbon monoxide, carbon dioxide) and nitrogen

oxides (NO, NO2 etc.)

Hazardous polymerization

Will not occur.

11. Toxicological information

Acute toxicity

Aspiration of this product into the lungs can cause chemical pneumonia and can be fatal. Aspiration into the lungs can occur while vomiting after ingestion of this product. Do not siphon by mouth.

Chronic toxicity

Carcinogenic effects

CANCER HAZARD

CONTAINS MATERIAL WHICH CAN CAUSE CANCER Risk of cancer depends on duration and level of exposure. Classified A1 (Confirmed for human.) by ACGIH: [Benzene] Classified 1 (Proven for human.) by IARC: [Benzene]

Classified 2B (Possible for human.) by IARC: [Naphthalene; Ethylbenzene] Classified 1 (Known To Be Human Carcinogens.) by NTP: [Benzene]

Classified 2 (Reasonably Anticipated To Be Human Carcinogens.) by NTP: [Naphthalene]

Classified + (Proven) by OSHA: [Benzene]

Other information

Benzene: Acute toxicity of benzene results primarily from depression of the central nervous system (CNS). Inhalation of concentrations over 50 ppm can produce headache, lassitude, weariness, dizziness, drowsiness, or excitation. Exposure to very high levels can result in unconsciousness and death.

Benzene: Long-term overexposure to benzene has been associated with certain types of leukemia in humans. In addition, the International Agency for Research on Cancer (IARC), the National Toxicology Program, and OSHA consider benzene to be a human carcinogen. Chronic exposures to high levels of benzene have been reported to cause adverse blood effects including anemia. Benzene exposure can occur by inhalation and absorption through the skin. Inhalation and forced feeding studies of benzene in laboratory animals have produced a

Inhalation and forced feeding studies of benzene in laboratory animals have produced a carcinogenic response in a variety of organs, including possibly leukemia, other adverse effects on the blood, chromosomal changes and some effects on the immune system. Exposure to benzene at levels up to 300 ppm did not produce birth defects in animal studies; however, exposure to higher dosage levels resulted in a reduction of body weight of the rat pups (fetotoxicity). Changes in the testes have been observed in mice exposed to benzene at 300 ppm, but reproductive performance was not altered in rats exposed to benzene at the same level. Aspiration of this material into the lungs can cause chemical pneumonia and can be fatal. Aspiration into the lungs can occur while vomiting after ingestion of this material.

Benzene vapor may accumulate in the headspace of storage tanks and bulk transport compartments containing this material.

Format US-COMP

Toluene: Aspiration of this material into the lungs can cause chemical pneumonia and can be fatal. Aspiration into the lungs can occur while vomiting after ingestion of this material. Deliberate inhalation of high concentrations of toluene has been linked to damage of the brain, liver and kidney. Inhalation of very high concentrations of toluene, such as in cases of solvent abuse, has resulted in sudden death which may be a result of cardiac arrhythmia or central nervous system depression. Mental and/or growth retardation has been reported in children of women who

Language ENGLISH.

Build 5.3.5

deliberately inhale toluene during pregnancy (usually at thousands of ppm). Fetal developmental toxicity was observed when pregnant rats were exposed to toluene at levels of 1500 ppm. Maternal toxicity was also observed at this concentration. Prolonged, high level exposure to toluene in laboratory animals has resulted in hearing loss. Exposure studies in rats have resulted in adverse effects on the kidney, liver and central nervous system. Studies in occupationally exposed individuals indicate that toluene exposure has been associated with impaired color vision and decreased performance in some neurobehavioral tests. There are occupational studies which report an association between inhalation exposure to toluene and adverse effects on reproduction including spontaneous abortion. The methodology of these studies and the reliability of the results have been questioned. In a two-generation study in rats, inhalation of toluene at levels up to 2000 ppm did not produce adverse effects on fertility or reproductive performance.

Studies in occupationally exposed individuals indicate that toluene exposure has been associated with impaired color vision and decreased performance in some neurobehavioral tests.

Xylenes: Xylene has been reported to cause central nervous system effects at concentrations above the recommended exposure limit. Xylene vapor becomes irritating at relatively high levels. In one study, eye irritation was reported at exposures of 460 ppm and in one person at 230 ppm after 15 minutes. In another study, no one reported eyes, nose and throat irritation at mixed xylene exposures up to 230 ppm for 30 minutes. Dermal LD50 is expected to be greater than 10g/kg in rabbits, based on test results from similar materials.

Mixed xylenes caused slight hearing loss in rats exposed to 800 ppm in the air for 14 hours/day for six weeks. There is no information available for lower concentrations; however, similar chemicals that have caused these hearing effects at similar concentrations have not caused effects at lower concentrations.

Pregnant animals exposed to xylene or its isomers have been reported to cause development toxicity in rodents when exposed by inhalation. The developmental effects observed consisted of delayed development and minor skeletal variations, but no malformations. Because of the high exposure levels used in these studies, we do not believe that these results imply an increased risk of reproductive toxicity to workers exposed to xylene levels at or below the exposure limits.

Xylene and its isomers are not genotoxic.

Technical grade xylene has been tested in a National Toxicology Program carcinogenicity study in rats and mice dosed orally for two years. There was no evidence of carcinogenicity.

Ethylbenzene: The National Toxicology Program (NTP) conducted a 13-week inhalation study with male and female rats and mice at exposure concentrations ranging from 100 to 1000 ppm ethylbenzene. No rats or mice died during the study. Kidney, liver, and lung weights were increased in the exposed rats, while weight increases were observed only in the livers of exposed mice. Treatment-related histopathologic changes were not observed in any tissues of rats and mice.

NTP also exposed male and female rats and mice by inhalation to 0, 75, 250, or 750 ppm ethylbenzene for 2 years. There was a statistically significant increase in the number of kidney tumors in male and female rats at 750 ppm. There were also increased incidences of lung tumors in male mice and liver tumors in female mice that were statistically significant at 750 ppm. Except for the male rat kidney tumors, the incidence of the tumors were within the range observed for non-exposed animals from other studies conducted by NTP. The significance of these findings to humans is unknown. Ethylbenzene produced mixed results in in vitro genotoxicity studies, which were not confirmed when tested in vivo. The International Agency for Research on Cancer (IARC) has evaluated ethylbenzene and found it to be possibly carcinogenic to humans (Group 2B).

Ethylbenzene is not genotoxic.

This product contains n-hexane. Overexposure to n-hexane may cause progressive and potentially irreversible damage to the peripheral nervous system, particularly in the arms and legs. Animal studies have also shown that n-hexane overexposure may cause testicular injury. However, animal studies conducted with commercial hexane, containing 53% n-hexane, showed neither peripheral nervous system damage nor testicular injury at inhalation exposures up to 9000 ppm.

Naphthalene has been reported to cause developmental toxicity in mice after oral exposure to relatively high dose levels, but developmental toxicity was not observed in NTP (National Toxicology Program) sponsored studies in rats and rabbits. Ingestion or inhalation of naphthalene can result in hemolysis and other blood abnormalities, and individuals (and infants) deficient in

glucose-6-phosphate dehydrogenase may be especially susceptible to these effects. Inhalation of naphthalene may cause headache and nausea. Airborne exposure can result in eye irritation. Naphthalene exposure has been associated with cataracts in animals and humans.

12. Ecological information

Ecotoxicity

No testing has been performed by the manufacturer.

13. Disposal considerations

Waste information

Avoid contact of spilled material and runoff with soil and surface waterways. Consult an environmental professional to determine if local, regional or national regulations would classify spilled or contaminated materials as hazardous waste. Use only approved transporters, recyclers, treatment, storage or disposal facilities. Dispose of in accordance with local, state and federal regulations.

Consult your local or regional authorities.

16. Other information

Label requirements

Danger!

Extremely flammable liquid and vapor.

Vapor may cause fire.

Keep away from heat, sparks and flame. Avoid all possible sources of ignition (spark or flame).

Avoid contact with eyes, skin and clothing.

Causes eye irritation. Causes skin irritation.

Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes

headaches, drowsiness, and nausea, and may lead to unconsciousness or death.

Harmful or fatal if liquid is aspirated into lungs.

Can cause blood disorders

Risk of cancer depends on duration and level of exposure.

Danger! Contains Benzene. Cancer hazard. Harmful if absorbed through the skin.

Emergency overview

WARNING!

COMBUSTIBLE LIQUID AND VAPOR.

VAPOR MAY CAUSE FIRE. HARMFUL IF SWALLOWED

HARMFUL OR FATAL IF LIQUID IS ASPIRATED INTO LUNGS.

CAUSES SKIN IRRITATION.

POSSIBLE CANCER HAZARD BASED ON SKIN PAINTING STUDIES IN LABORATORY

ANIMALS

MAY CAUSE EYE IRRITATION.

MAY CAUSE RESPIRATORY TRACT IRRITATION.

INHALATION OF VAPOR/AEROSOL CONCENTRATIONS ABOVE THE RECOMMENDED EXPOSURE LIMITS CAUSES HEADACHES, DIZZINESS, DROWSINESS, AND NAUSEA, AND

MAY LEAD TO UNCONSCIOUSNESS OR DEATH.

Combustible liquid. Harmful if swallowed. Prolonged or repeated contact can defat the skin and lead to irritation and/or dermatitis. Aspiration hazard if swallowed- can enter lungs and cause damage. Keep away from heat, sparks and flame. Avoid exposure - obtain special instructions before use. Do not breathe vapor or mist. Do not ingest. If ingested do not induce vomiting. Avoid contact with eyes, skin and clothing. Contains material which may cause cancer Risk of cancer depends on duration and level of exposure. Use only with adequate ventilation Keep

container tightly closed and sealed until ready for use. Wash thoroughly after handling.

Routes of entry

Dermal contact. Eye contact. Inhalation. Ingestion.

Potential health effects

Eyes

May cause eye irritation.

Product name LIGHT CYCLE OIL-FCCU

Product code

RS205

Page: 1/7

Version 2

Date of issue 09/27/2007.

Format US-COMP

Language ENGLISH.

Build 6.3.2 (US-COMP)

Skin

Causes skin irritation. Prolonged or repeated contact can defat the skin and lead to irritation

and/or dermatitis. Exposure to sunlight may increase the degree of skin irritation.

Inhalation

May cause respiratory tract irritation. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness, and nausea, and may lead to

unconsciousness or death. See toxicological Information (section 11).

Ingestion

Harmful if swallowed. Aspiration hazard if swallowed- can enter lungs and cause damage. Ingestion may cause gastrointestinal irritation and diarrhea. See toxicological Information (section

See toxicological Information (section 11).

Composition/information on ingredients

Ingredient name CAS# % Distillates, petroleum, light catalytic cracked 64741-59-9 100

Contains:

sulfur 7704-34-9 ~ 0.5

First aid measures

Eve contact In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical

attention if symptoms occur.

Skin contact Immediately wash exposed skin with soap and water. Remove contaminated clothing and shoes,

Wash clothing before reuse. Thoroughly clean shoes before reuse. Get medical attention.

Inhalation If inhaled, remove to fresh air. If fumes are still suspected to be present, the rescuer should wear

an appropriate mask or a self-contained breathing apparatus. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention immediately.

Ingestion Aspiration hazard if swallowed- can enter lungs and cause damage. Do not induce vomiting.

Never give anything by mouth to an unconscious person. Get medical attention immediately.

5. Fire-fighting measures

Flammability of the

product

Combustible liquid.

Auto-ignition temperature

256.67°C (494°F) (Estimated. Based on Fuel Oil No. 2)

Flash point

Open cup: 90.556°C (195°F) [Cleveland.]

Explosion limits

Lower: 0.7% Upper: 5%

(Estimated, Based on NFPA Fuel Oil No. 1)

Fire/explosion hazards

In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. The vapor/gas is heavier than air and will spread along the ground. Vapors may accumulate in low or confined areas, travel considerable distance to source of ignition

and flash back.

Unusual fire/explosion

hazards

Explosive in the presence of the following materials or conditions: open flames, sparks and static discharge and heat.

Extinguishing media

Suitable

Use DRY chemicals, CO2, water spray or foam.

Not suitable

Do not use water jet.

Fire-fighting procedures

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containing vessels from fire area if without risk. Use water spray to keep fire-exposed containers cool.

Hazardous combustion

products

carbon oxides (CO, CO₂) (carbon monoxide, carbon dioxide)

sulfur oxides (SO₂, SO₃ etc.)

Protective clothing (fire)

Fire fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full facepiece operated in positive pressure mode.

Product name LIGHT CYCLE OIL-FCCU

Product code

RS205

Page: 2/7

Version 2

Date of issue 09/27/2007.

Format US-COMP

Language ENGLISH.

Build 6.3.2 (US-COMP)

6. Accidental release measures

Environmental precautions

Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers,

waterways, soil or air).

Personal protection in case of a large spill

Chemical splash goggles. Chemical resistant protective suit. Boots. Chemical resistant gloves. Vapor respirator or a self-contained breathing apparatus. Suggested protective clothing might not be sufficient; consult a specialist BEFORE handling this product.

CAUTION: The protection provided by air-purifying respirators is limited. Use a positive pressure air-supplied respirator if there is any potential for an uncontrolled release, if exposure levels are not known, or if concentrations exceed the protection limits of air-purifying respirator.

Methods and materials for containment and clean-up

Large spill

Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible absorbent materials, e.g. sand, earth, vermiculite, diatomaceous earth, and place in container for disposal according to local regulations (see section 13). Use spark-proof tools and explosion-proof equipment. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see section 1 for emergency contact information and section 13 for waste disposal.

Small spill

Stop leak if without risk. Move containers from spill area. Dilute with water and mop up, or absorb with an inert dry material and place in an appropriate waste disposal container. Use spark-proof tools and explosion-proof equipment. Dispose of via a licensed waste disposal contractor.

7. Handling and storage

Handling

Put on appropriate personal protective equipment (see Section 8). Workers should wash hands and face before eating, drinking and smoking. Do not get in eyes, on skin or clothing. Do not breathe vapor or mist. Do not ingest. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Store and use away from heat, sparks, open flame, or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use non-sparking tools. Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material.

Storage

Store in accordance with local regulations. Store in a segregated and approved area. Store away from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see section 10). Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that are opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

8. Exposure controls/personal protection

Occupational exposure limits

Ingredient name

Occupational exposure limits

Distillates, petroleum, light catalytic cracked

ACGIH TLV (United States).

TWA: 525 mg/m³ 8 hour(s). Form: Stoddard Solvent (Recommended) TWA: 100 ppm 8 hour(s). Form: Stoddard Solvent (Recommended)

OSHA PEL (United States).

TWA: 2900 mg/m³ 8 hour(s). Form: Stoddard Solvent (Recommended) TWA: 500 ppm 8 hour(s). Form: Stoddard Solvent (Recommended)

While specific OELs for certain components may be shown in this section, other components may be present in any mist, vapor or dust produced. Therefore, the specific OELs may not be applicable to the product as a whole and are provided for guidance only.

Some states may enforce more stringent exposure limits.

Product name LIGHT CYCLE OIL-FCCU

Product code

RS205

Page: 3/7

Version 2

Date of issue 09/27/2007.

Format US-COMP

Language ENGLISH.

Build 6.3.2 (US-COMP)

Control Measures

Use only with adequate ventilation Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits. The engineering controls also need to keep gas, vapor or dust concentrations below any explosive limits. Use explosion-proof ventilation equipment.

Hygiene measures

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing.

Personal protection

Eyes

Avoid contact with eyes. Chemical splash goggles.

Skin and body

Do not get on skin or clothing. Wear clothing and footwear that cannot be penetrated by chemicals

or oil.

Respiratory

Use adequate ventilation. Do not breathe vapor or mist. If ventilation is inadequate, use a NIOSH certified respirator with an organic vapor cartridge and P95 particulate filter. If operating conditions cause high vapor concentrations or TLV is exceeded, use NIOSH certified supplied-air respirator.

Hands

Wear gloves that cannot be penetrated by chemicals or oil.

Recommended: Gloves made from Viton or comparable material resistant to hydrocarbons.

The correct choice of protective gloves depends upon the chemicals being handled, the conditions of work and use, and the condition of the gloves (even the best chemically resistant glove will break down after repeated chemical exposures). Most gloves provide only a short time of protection before they must be discarded and replaced. Because specific work environments and material handling practices vary, safety procedures should be developed for each intended application. Gloves should therefore be chosen in consultation with the supplier/manufacturer and with a full assessment of the working conditions.

Consult your supervisor or S.O.P. for special handling directions

9. Physical and chemical properties

Physical state

Liquid.

Color

Hazardous decomposition

products

carbon oxides (CO, CO₂) (carbon monoxide, carbon dioxide), sulfur oxides (SO₂, SO₃ etc.)

Hazardous polymerization

Will not occur.

11. Toxicological information

Acute toxicity

Other Toxicity Data

Possible cancer hazard based on skin-painting studies in laboratory animals involving continuous, long-term contact. Avoid contact with skin.

Prolonged or repeated skin exposure, inhalation or ingestion of this material may produce adverse systemic effects.

Materials of this type (thermally or catalytically cracked gas oils or distillates containing polycyclic aromatic compounds) have been show to produce adverse developmental effects after dermal exposures in laboratory studies in pregnant rats. Effects observed have included one or more of the following: decreases in the number of dams producing litters, decreased number of pups per litter, decreased pup weights, or other developmental effects. Increased developmental toxicity appears to be associated with increased content of 3 or more ring polycyclic aromatic compounds in this group of materials.

Other information

Exposure to sunlight may increase the degree of skin irritation.

Aspiration of this product into the lungs can cause chemical pneumonia and can be fatal. Aspiration into the lungs can occur while vomiting after ingestion of this product. Do not siphon by mouth.

Potential chronic health effects

Carcinogenicity

Materials of this type have produced a carcinogenic response on the skin in laboratory animals after repeated applications. Skin contact should be avoided to prevent a potential risk of cancer.

Medical conditions aggravated by overexposure Pre-existing digestive disorders may be aggravated by over-exposure to this product.

12. Ecological information

No testing has been performed by the manufacturer.

13. Disposal considerations

Waste Information

The generation of waste should be avoided or minimised wherever possible. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

NOTE: The generator of waste has the responsibility for proper waste identification (based on characteristic(s) or listing), transportation and disposal

Emergency overview

Danger!

Extremely flammable liquid and vapor.

Vapor may cause fire.

Keep away from heat, sparks and flame. Avoid all possible sources of ignition (spark or flame).

Avoid contact with eyes, skin and clothing.

Causes eye irritation. Causes skin irritation.

Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes

headaches, drowsiness, and nausea, and may lead to unconsciousness or death.

Harmful or fatal if liquid is aspirated into lungs.

Can cause blood disorders

Risk of cancer depends on duration and level of exposure.

Danger! Contains Benzene. Cancer hazard. Harmful if absorbed through the skin.

Causes eye irritation.

Skin

Causes skin irritation. Prolonged or repeated contact can defat the skin and lead to irritation and/or dermatitis. Cancer hazard. Can cause cancer. Can cause blood disorders. Harmful if

absorbed through the skin. See toxicological Information (section 11).

Inhalation

Harmful or fatal if inhaled. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness, and nausea, and may lead to unconsciousness or death. May cause respiratory tract irritation. Contains n-hexane which may cause peripheral nerve damage. Contains benzene. Cancer hazard. Can cause cancer. Can cause blood disorders. See toxicological Information (section 11).

Ingestion

Harmful or fatal if liquid is aspirated into lungs. Adverse effects could include chemical pneumonitis. Ingestion may cause gastrointestinal irritation and diarrhea. Exposure can cause nausea, headache and vomiting. Harmful: may cause lung damage if swallowed. Cancer hazard. Can cause cancer. See toxicological Information (section 11).

Medical conditions aggravated by overexposure None identified.

See toxicological Information (section 11).

4. First aid measures

Eye contact In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical

attention immediately.

Skin contact Wash contaminated skin with soap and water. Do not use hot water. Remove contaminated

clothing and shoes. Wash clothing before reuse. Thoroughly clean shoes before reuse. Destroy contaminated leather items such as belts and shoes and other items that cannot be

decontaminated.

Get medical attention immediately.

Inhalation If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult,

give oxygen. Get medical attention immediately.

If swallowed, do NOT induce vomiting. Never give anything by mouth to an unconscious person.

Aspiration hazard if swallowed- can enter lungs and cause damage. Get medical attention

immediately.

Build 5.3.5

Unusual fire/explosion hazards

Extremely flammable. Vapor may cause flash fire. Vapors may accumulate in low or confined areas, travel considerable distance to source of ignition and flash back. Runoff to sewer may create fire or explosion hazard.

Highly explosive in the presence of the following materials or conditions: heat, open flames, sparks and static discharge. Eliminate all ignition sources. Hot containers may explode.

Fire-fighting media and instructions

If involved in fire, shut off flow immediately if it can be done without risk. Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. First move people out of line-of-sight of the scene and away from windows. Keep personnel removed and upwind of fire. Withdraw from fire and let it burn.

In case of fire, use water fog, foam, dry chemicals, or carbon dioxide. For fires involving this material, do not enter any enclosed or confined fire space without proper protective equipment. This may include self-contained breathing apparatus to protect against the hazardous effects of combustion products and oxygen deficiencies. Cool tanks and containers exposed to fire with water. If firefighters cannot work upwind to the fire, respiratory protective equipment must be worn unless and until atmospheric monitoring indicates that such protection is not required. Improper use of water and extinguishing media containing water may cause frothing which can spread the fire over a larger area. Water fog or spray are of value for cooling tank shells and surfaces exposed to fire, but may not achieve extinguishment. Liquid will float and may reignite on surface of water. Use water spray to cool and disperse vapors and protect personnel. If this is impossible, withdraw from area and let fire burn.

Protective clothing (fire)

Fire-fighters should wear positive pressure self-contained breathing apparatus (SCBA) and full turnout gear. Be sure to use a MSHA/NIOSH approved respirator or equivalent.

6. Accidental release measures

Personal precautions

Immediately contact emergency personnel. Eliminate all ignition sources. Stop leak if without risk. Keep unnecessary personnel away. Move upwind and away from spill. Use suitable protective equipment (See Section: "Exposure controls/personal protection"). Follow all fire fighting procedures (See Section: "Fire-fighting measures"). Do not touch or walk through spilled material. Liquid leaks generate large volumes of extremely flammable gas.

Environmental precautions and clean-up methods

If emergency personnel are unavailable, contain spilled material. Stop leak if without risk. For small spills add absorbent (soil may be used in the absence of other suitable materials) scoop up material and place in a sealed, liquid-proof container for disposal. For large spills dike spilled material or otherwise contain material to ensure runoff does not reach a waterway. Place spilled material in an appropriate container for disposal. Avoid contact of spilled material with soil and prevent runoff entering surface waterways. Exclude sources of ignition and ventilate the area. See Section 13 for Waste Disposal Information.

Personal protection in case of a large spill

Chemical splash goggles. Chemical resistant protective suit. Chemicals resistant boots. Chemical resistant gloves (nitrile or viton). Wear MSHA/NIOSH approved self-contained breathing apparatus or equivalent and full protective gear. Suggested protective clothing might not be sufficient; consult a specialist BEFORE handling this product.

7. Handling and storage

Handling

Aspiration hazard if swallowed- can enter lungs and cause damage. Do not ingest. If ingested do not induce vomiting. Do not get in eyes, on skin or on clothing. Wash thoroughly after handling. Do not breathe vapor or mist. Use only with adequate ventilation Keep away from heat, sparks and flame. Exercise caution when opening to allow pressure release. Use appropriate respiratory protection if there is the potential to exceed the exposure limit(s). To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Electrical equipment should not be used unless it is intrinsically safe (i.e. will not produce sparks).

Storage

Store in a segregated and approved area. Keep container tightly closed and sealed until ready for use. Empty containers may contain harmful, flammable/combustible or explosive residue or vapors. Do not cut, grind, drill, weld, reuse or dispose of containers unless adequate precautions are taken against these hazards. Do not smoke.

Do not enter storage areas and confined spaces unless adequately ventilated. Use appropriate respiratory protection if there is the potential to exceed the exposure limit(s).

Light hydrocarbon vapors can build up in the headspace of tanks. These can cause

Page: 3/10

Version 1

Date of Issue 08/31/2007.

Format US-COMP

Language ENGLISH.

Build 5.3.5

flammability/explosion hazards even at temperatures below the normal flash point (note: flash point must not be regarded as a reliable indicator of the potential flammability of vapor in tank headspaces). Tank headspaces should always be regarded as potentially flammable and care should be taken to avoid static electrical discharge and all ignition sources during filling, ullaging and sampling from storage tanks. When the product is pumped (e.g. during filling, discharge or ullaging) and when sampling, there is a risk of static discharge. Ensure equipment used is properly earthed or bonded to the tank structure.

This material may also contain benzene vapor, a known human carcinogen. Vapors containing benzene may accumulate in the headspace of storage tanks and during storage or transport. Where there is potential for exposure to benzene vapor in excess of the short-term or 8-hr permissible exposure limits, a NIOSH-approved respirator should be worn.

Some states may enforce more stringent exposure limits.

Control Measures

Provide exhaust ventilation or other engineering controls to keep the relevant airborne concentrations below their respective occupational exposure limits. In accordance with good industrial hygiene and safety work practices, airborne exposures should be controlled to the lowest extent practicable. Use explosion-proof ventilation equipment. Keep away from sources of ignition.

Hygiene measures

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period.

Personal protection

Eyes

Avoid contact with eyes. Use goggles, face shield, or other full-face protection if potential exists for

direct exposure to aerosols or splashes (chemical splash goggles).

Skin and body

Wear appropriate protective clothing to prevent skin contact. Remove contaminated clothing, including shoes, and thoroughly clean and dry before reuse. Thoroughly decontaminate clothing and discard contaminated leather goods and other items which cannot be decontaminated.

Respiratory

Do not breathe vapor or mist. A respirator is not needed under normal and intended conditions of product use. If operating conditions cause high vapor concentrations or TLV is exceeded, use NIOSH certified supplied-air respirator.

Hands

Avoid contact with skin. Wear chemical resistant gloves.

Recommended: Nitrile gloves or Viton Gloves.

The correct choice of protective gloves depends upon the chemicals being handled, the conditions of work and use, and the condition of the gloves (even the best chemically resistant glove will break down after repeated chemical exposures). Most gloves provide only a short time of protection before they must be discarded and replaced. Because specific work environments and material handling practices vary, safety procedures should be developed for each intended application. Gloves should therefore be chosen in consultation with the supplier/manufacturer and with a full assessment of the working conditions.

Consult your supervisor or S.O.P. for special handling directions

Consult local authorities for acceptable exposure limits.

products

These products are carbon oxides (CO, CO₂) (carbon monoxide, carbon dioxide) and nitrogen

oxides (NO, NO₂ etc.)

Hazardous polymerization

Will not occur.

11. Toxicological information

Acute toxicity

Aspiration of this product into the lungs can cause chemical pneumonia and can be fatal. Aspiration into the lungs can occur while vomiting after ingestion of this product. Do not siphon by mouth.

Chronic toxicity

Carcinogenic effects

CANCER HAZARD

CONTAINS MATERIAL WHICH CAN CAUSE CANCER Risk of cancer depends on duration and level of exposure. Classified A1 (Confirmed for human.) by ACGIH: [Benzene] Classified 1 (Proven for human.) by IARC: [Benzene]

can occur while vomiting after ingestion of this material.

Classified 2B (Possible for human.) by IARC: [Naphthalene; Ethylbenzene] Classified 1 (Known To Be Human Carcinogens.) by NTP: [Benzene]

Classified 2 (Reasonably Anticipated To Be Human Carcinogens.) by NTP: [Naphthalene]

Classified + (Proven) by OSHA: [Benzene]

Other information

Benzene: Acute toxicity of benzene results primarily from depression of the central nervous system (CNS). Inhalation of concentrations over 50 ppm can produce headache, lassitude, weariness, dizziness, drowsiness, or excitation. Exposure to very high levels can result in unconsciousness and death.

Benzene: Long-term overexposure to benzene has been associated with certain types of leukemia in humans. In addition, the International Agency for Research on Cancer (IARC), the National Toxicology Program, and OSHA consider benzene to be a human carcinogen. Chronic exposures to high levels of benzene have been reported to cause adverse blood effects including anemia. Benzene exposure can occur by inhalation and absorption through the skin. Inhalation and forced feeding studies of benzene in laboratory animals have produced a carcinogenic response in a variety of organs, including possibly leukemia, other adverse effects on the blood, chromosomal changes and some effects on the immune system. Exposure to benzene at levels up to 300 ppm did not produce birth defects in animal studies; however, exposure to higher dosage levels resulted in a reduction of body weight of the rat pups (fetotoxicity). Changes in the testes have been observed in mice exposed to benzene at 300 ppm, but reproductive performance was not altered in rats exposed to benzene at the same level. Aspiration of this material into the lungs can cause chemical pneumonia and can be fatal. Aspiration into the lungs

Benzene vapor may accumulate in the headspace of storage tanks and bulk transport compartments containing this material.

Toluene: Aspiration of this material into the lungs can cause chemical pneumonia and can be fatal. Aspiration into the lungs can occur while vomiting after ingestion of this material. Deliberate inhalation of high concentrations of toluene has been linked to damage of the brain, liver and kidney. Inhalation of very high concentrations of toluene, such as in cases of solvent abuse, has resulted in sudden death which may be a result of cardiac arrhythmia or central nervous system depression. Mental and/or growth retardation has been reported in children of women who

Language ENGLISH.

Build 5.3.5

deliberately inhale toluene during pregnancy (usually at thousands of ppm). Fetal developmental toxicity was observed when pregnant rats were exposed to toluene at levels of 1500 ppm. Maternal toxicity was also observed at this concentration. Prolonged, high level exposure to toluene in laboratory animals has resulted in hearing loss. Exposure studies in rats have resulted in adverse effects on the kidney, liver and central nervous system. Studies in occupationally exposed individuals indicate that toluene exposure has been associated with impaired color vision and decreased performance in some neurobehavioral tests. There are occupational studies which report an association between inhalation exposure to toluene and adverse effects on reproduction including spontaneous abortion. The methodology of these studies and the reliability of the results have been questioned. In a two-generation study in rats, inhalation of toluene at levels up to 2000 ppm did not produce adverse effects on fertility or reproductive performance.

Studies in occupationally exposed individuals indicate that toluene exposure has been associated with impaired color vision and decreased performance in some neurobehavioral tests.

Xylenes: Xylene has been reported to cause central nervous system effects at concentrations above the recommended exposure limit. Xylene vapor becomes irritating at relatively high levels. In one study, eye irritation was reported at exposures of 460 ppm and in one person at 230 ppm after 15 minutes. In another study, no one reported eyes, nose and throat irritation at mixed xylene exposures up to 230 ppm for 30 minutes. Dermal LD50 is expected to be greater than 10g/kg in rabbits, based on test results from similar materials.

Mixed xylenes caused slight hearing loss in rats exposed to 800 ppm in the air for 14 hours/day for six weeks. There is no information available for lower concentrations; however, similar chemicals that have caused these hearing effects at similar concentrations have not caused effects at lower concentrations.

Pregnant animals exposed to xylene or its isomers have been reported to cause development toxicity in rodents when exposed by inhalation. The developmental effects observed consisted of delayed development and minor skeletal variations, but no malformations. Because of the high exposure levels used in these studies, we do not believe that these results imply an increased risk of reproductive toxicity to workers exposed to xylene levels at or below the exposure limits.

Xylene and its isomers are not genotoxic.

Technical grade xylene has been tested in a National Toxicology Program carcinogenicity study in rats and mice dosed orally for two years. There was no evidence of carcinogenicity.

Ethylbenzene: The National Toxicology Program (NTP) conducted a 13-week inhalation study with male and female rats and mice at exposure concentrations ranging from 100 to 1000 ppm ethylbenzene. No rats or mice died during the study. Kidney, liver, and lung weights were increased in the exposed rats, while weight increases were observed only in the livers of exposed mice. Treatment-related histopathologic changes were not observed in any tissues of rats and mice.

NTP also exposed male and female rats and mice by inhalation to 0, 75, 250, or 750 ppm ethylbenzene for 2 years. There was a statistically significant increase in the number of kidney tumors in male and female rats at 750 ppm. There were also increased incidences of lung tumors in male mice and liver tumors in female mice that were statistically significant at 750 ppm. Except for the male rat kidney tumors, the incidence of the tumors were within the range observed for non-exposed animals from other studies conducted by NTP. The significance of these findings to humans is unknown. Ethylbenzene produced mixed results in in vitro genotoxicity studies, which were not confirmed when tested in vivo. The International Agency for Research on Cancer (IARC) has evaluated ethylbenzene and found it to be possibly carcinogenic to humans (Group 2B).

Ethylbenzene is not genotoxic.

This product contains n-hexane. Overexposure to n-hexane may cause progressive and potentially irreversible damage to the peripheral nervous system, particularly in the arms and legs. Animal studies have also shown that n-hexane overexposure may cause testicular injury. However, animal studies conducted with commercial hexane, containing 53% n-hexane, showed neither peripheral nervous system damage nor testicular injury at inhalation exposures up to 9000 ppm.

Naphthalene has been reported to cause developmental toxicity in mice after oral exposure to relatively high dose levels, but developmental toxicity was not observed in NTP (National Toxicology Program) sponsored studies in rats and rabbits. Ingestion or inhalation of naphthalene can result in hemolysis and other blood abnormalities, and individuals (and infants) deficient in

glucose-6-phosphate dehydrogenase may be especially susceptible to these effects. Inhalation of naphthalene may cause headache and nausea. Airborne exposure can result in eye irritation. Naphthalene exposure has been associated with cataracts in animals and humans.

12. Ecological information

Ecotoxicity

No testing has been performed by the manufacturer.

13. Disposal considerations

Waste information

Avoid contact of spilled material and runoff with soil and surface waterways. Consult an environmental professional to determine if local, regional or national regulations would classify spilled or contaminated materials as hazardous waste. Use only approved transporters, recyclers, treatment, storage or disposal facilities. Dispose of in accordance with local, state and federal regulations.

Consult your local or regional authorities.

and/or dermatitis. Exposure to sunlight may increase the degree of skin irritation.

Inhalation

May cause respiratory tract irritation. Inhalation of vapor/aerosol concentrations above the

recommended exposure limits causes headaches, drowsiness, and nausea, and may lead to

unconsciousness or death. See toxicological Information (section 11).

ingestion

Harmful if swallowed. Aspiration hazard if swallowed- can enter lungs and cause damage.

Ingestion may cause gastrointestinal irritation and diarrhea. See toxicological Information (section

See toxicological Information (section 11).

Composition/information on ingredients

Ingredient name CAS# % Distillates, petroleum, light catalytic cracked 64741-59-9

100

Contains: sulfur

7704-34-9

~ 0.5

First aid measures

Eve contact

In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical

attention if symptoms occur.

Skin contact

Immediately wash exposed skin with soap and water. Remove contaminated clothing and shoes.

Wash clothing before reuse. Thoroughly clean shoes before reuse. Get medical attention.

Inhalation

If inhaled, remove to fresh air. If fumes are still suspected to be present, the rescuer should wear

an appropriate mask or a self-contained breathing apparatus. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention immediately.

Ingestion

Aspiration hazard if swallowed- can enter lungs and cause damage. Do not induce vomiting.

Never give anything by mouth to an unconscious person. Get medical attention immediately.

5. Fire-fighting measures

Flammability of the

product

Combustible liquid.

Auto-ignition temperature

256.67°C (494°F) (Estimated. Based on Fuel Oil No. 2)

Flash point

Open cup: 90.556°C (195°F) [Cleveland.]

Explosion limits

Lower: 0.7%

Upper: 5% (Estimated. Based on NFPA Fuel Oil No. 1)

Fire/explosion hazards

In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. The vapor/gas is heavier than air and will spread along the ground. Vapors may accumulate in low or confined areas, travel considerable distance to source of ignition

Unusual fire/explosion

hazards

Explosive in the presence of the following materials or conditions: open flames, sparks and static

discharge and heat.

and flash back.

Extinguishing media

Suitable

Use DRY chemicals, CO₂, water spray or foam.

Not suitable

Do not use water iet.

Fire-fighting procedures

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containing vessels from fire area if without risk. Use water spray to keep fire-exposed containers cool.

Hazardous combustion

products

carbon oxides (CO, CO2) (carbon monoxide, carbon dioxide)

sulfur oxides (SO₂, SO₃ etc.)

Protective clothing (fire)

Fire fighters should wear appropriate protective equipment and self-contained breathing apparatus

(SCBA) with a full facepiece operated in positive pressure mode.

Product name LIGHT CYCLE OIL-FCCU

Product code

RS205

Page: 2/7

Version 2

Date of issue 09/27/2007.

Format US-COMP

Language ENGLISH.

Build 6.3.2 (US-COMP)

6. Accidental release measures

Environmental precautions

Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers,

waterways, soil or air).

Personal protection in case of a large spill

Chemical splash goggles. Chemical resistant protective suit. Boots. Chemical resistant gloves. Vapor respirator or a self-contained breathing apparatus. Suggested protective clothing might not be sufficient; consult a specialist BEFORE handling this product.

CAUTION: The protection provided by air-purifying respirators is limited. Use a positive pressure air-supplied respirator if there is any potential for an uncontrolled release, if exposure levels are not known, or if concentrations exceed the protection limits of air-purifying respirator.

Methods and materials for containment and clean-up

Large spill

Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible absorbent materials, e.g. sand, earth, vermiculite, diatomaceous earth, and place in container for disposal according to local regulations (see section 13). Use spark-proof tools and explosion-proof equipment. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see section 1 for emergency contact information and section 13 for waste disposal.

Small spill

Stop leak if without risk. Move containers from spill area. Dilute with water and mop up, or absorb with an inert dry material and place in an appropriate waste disposal container. Use spark-proof tools and explosion-proof equipment. Dispose of via a licensed waste disposal contractor.

7. Handling and storage

Handling

Put on appropriate personal protective equipment (see Section 8). Workers should wash hands and face before eating, drinking and smoking. Do not get in eyes, on skin or clothing. Do not breathe vapor or mist. Do not ingest. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Store and use away from heat, sparks, open flame, or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use non-sparking tools. Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material.

Storage

Store in accordance with local regulations. Store in a segregated and approved area. Store away from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see section 10). Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that are opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

8. Exposure controls/personal protection

Occupational exposure limits

Ingredient name

Occupational exposure limits

Distillates, petroleum, light catalytic cracked

ACGIH TLV (United States).

TWA: 525 mg/m³ 8 hour(s). Form: Stoddard Solvent (Recommended)
TWA: 100 ppm 8 hour(s). Form: Stoddard Solvent (Recommended)

OSHA PEL (United States).

TWA: 2900 mg/m³ 8 hour(s). Form: Stoddard Solvent (Recommended) TWA: 500 ppm 8 hour(s). Form: Stoddard Solvent (Recommended)

While specific OELs for certain components may be shown in this section, other components may be present in any mist, vapor or dust produced. Therefore, the specific OELs may not be applicable to the product as a whole and are provided for guidance only.

Some states may enforce more stringent exposure limits.

Product name LIGHT CYCLE OIL-FCCU

Product code

Version 2

Date of issue 09/27/2007.

Format US-COMP

Language ENGLISH.

Build 6.3.2 (**US-COMP**)

Control Measures

Use only with adequate ventilation Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits. The engineering controls also need to keep gas, vapor or dust concentrations below any explosive limits. Use explosion-proof ventilation equipment.

Hygiene measures

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing.

Personal protection

Eyes

Avoid contact with eyes. Chemical splash goggles.

Skin and body

Do not get on skin or clothing. Wear clothing and footwear that cannot be penetrated by chemicals

or oil

Respiratory

Use adequate ventilation. Do not breathe vapor or mist. If ventilation is inadequate, use a NIOSH certified respirator with an organic vapor cartridge and P95 particulate filter. If operating conditions cause high vapor concentrations or TLV is exceeded, use NIOSH certified supplied-air respirator.

Hands

Wear gloves that cannot be penetrated by chemicals or oil.

Recommended: Gloves made from Viton or comparable material resistant to hydrocarbons.

The correct choice of protective gloves depends upon the chemicals being handled, the conditions of work and use, and the condition of the gloves (even the best chemically resistant glove will break down after repeated chemical exposures). Most gloves provide only a short time of protection before they must be discarded and replaced. Because specific work environments and material handling practices vary, safety procedures should be developed for each intended application. Gloves should therefore be chosen in consultation with the supplier/manufacturer and with a full assessment of the working conditions.

Consult your supervisor or S.O.P. for special handling directions

9. Physical and chemical properties

Physical state

Liquid.

Color

Yellow. to Amber.

10. Stability and reactivity

Stability and reactivity

The product is stable. Under normal conditions of storage and use, hazardous polymerization will not occur.

Conditions to avoid

Keep away from heat, sparks and flame. Avoid all possible sources of ignition (spark or flame).

Incompatibility with various substances

Reactive or incompatible with the following materials: oxidizing materials, acids and alkalis.

Product name LIGHT CYCLE OIL-FCCU

Hazardous decomposition products

carbon oxides (CO, CO₂) (carbon monoxide, carbon dioxide), sulfur oxides (SO₂, SO₃ etc.)

Hazardous polymerization

Will not occur.

11. Toxicological information

Acute toxicity

Other Toxicity Data

Possible cancer hazard based on skin-painting studies in laboratory animals involving continuous, long-term contact. Avoid contact with skin.

Prolonged or repeated skin exposure, inhalation or ingestion of this material may produce adverse systemic effects.

Materials of this type (thermally or catalytically cracked gas oils or distillates containing polycyclic aromatic compounds) have been show to produce adverse developmental effects after dermal exposures in laboratory studies in pregnant rats. Effects observed have included one or more of the following: decreases in the number of dams producing litters, decreased number of pups per litter, decreased pup weights, or other developmental effects. Increased developmental toxicity appears to be associated with increased content of 3 or more ring polycyclic aromatic compounds in this group of materials.

Other information

Exposure to sunlight may increase the degree of skin irritation.

Aspiration of this product into the lungs can cause chemical pneumonia and can be fatal. Aspiration into the lungs can occur while vomiting after ingestion of this product. Do not siphon by mouth.

Potential chronic health effects

Carcinogenicity

Materials of this type have produced a carcinogenic response on the skin in laboratory animals after repeated applications. Skin contact should be avoided to prevent a potential risk of cancer.

Medical conditions aggravated by overexposure Pre-existing digestive disorders may be aggravated by over-exposure to this product.

12. Ecological information

No testing has been performed by the manufacturer.

13. Disposal considerations

Waste information

The generation of waste should be avoided or minimised wherever possible. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

NOTE: The generator of waste has the responsibility for proper waste identification (based on characteristic(s) or listing), transportation and disposal

MATERIAL SAFETY DATA SHEET

MSDS No. 01521000 ANSI/ENGLISH

1.0 CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

PRODUCT NAME: 2-K KEROSENE

MANUFACTURER/SUPPLIER:

Amoco Oil Company 200 East Randolph Drive Chicago, Illinois 60601 U.S.A. **EMERGENCY HEALTH INFORMATION:**

1 (800) 447-8735

EMERGENCY SPILL INFORMATION:

1 (800) 424-9300 CHEMTREC (USA)

OTHER PRODUCT SAFETY INFORMATION: (312) 856-3907

2.0 COMPOSITION/INFORMATION ON INGREDIENTS

Component	CAS#	Range % by Wt.
Kerosene	8008-20-6	100
Naphthalene	91-20-3	<1
Xylene	1330-20-7	<1

(See Section 8.0, "Exposure Controls/Personal Protection", for exposure guidelines)

3.0 HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW: Warning! Combustible. Harmful or fatal if liquid is aspirated into lungs. Causes skin irritation on prolonged or repeated contact.

POTENTIAL HEALTH EFFECTS:

1 of 8

EYE CONTACT: No significant health hazards identified.

SKIN CONTACT: Causes skin irritation on prolonged or repeated contact. See "Toxicological Information" section (Section 11.0).

INHALATION: No significant health hazards identified. See "Toxicological Information" section (Section 11.0).

INGESTION: Harmful or fatal if liquid is aspirated into lungs. See "Toxicological Information" section (Section 11.0).

HMIS CODE: (Health:1) (Flammability:2) (Reactivity:0)

NFPA CODE: (Health:1) (Flammability:2) (Reactivity:0)

4.0 FIRST AID MEASURES

EYE: Flush eyes with plenty of water. Get medical attention if irritation persists.

SKIN: Wash exposed skin with soap and water. Remove contaminated clothing, including shoes, and thoroughly clean and dry before reuse. Get medical attention if irritation develops.

INHALATION: If adverse effects occur, remove to uncontaminated area. Give artificial respiration if not breathing. Get medical attention.

INGESTION: If swallowed, do NOT induce vomiting. Get immediate medical attention.

5.0 FIRE FIGHTING MEASURES

FLASHPOINT: 122-150°F(50-66°C) (range) (Tag closed cup)

UEL: Not determined.

LEL: Not determined.

AUTOIGNITION TEMPERATURE: Not determined.

FLAMMABILITY CLASSIFICATION: Combustible Liquid.

EXTINGUISHING MEDIA: Agents approved for Class B hazards (e.g., dry chemical, carbon dioxide, foam, steam) or water fog.

UNUSUAL FIRE AND EXPLOSION HAZARDS: Combustible liquid.

FIRE-FIGHTING EQUIPMENT: Firefighters should wear full bunker gear, including a positive

2 of 8

pressure self-contained breathing apparatus.

PRECAUTIONS: Keep away from sources of ignition (e.g., heat and open flames). Keep container closed. Use with adequate ventilation.

HAZARDOUS COMBUSTION PRODUCTS: Burning can produce carbon monoxide and/or carbon dioxide and other harmful products.

6.0 ACCIDENTAL RELEASE MEASURES

Remove or shut off all sources of ignition. Prevent spreading by diking, ditching, or absorbing on inert materials. Increase ventilation if possible. Keep out of sewers and waterways.

7.0 HANDLING AND STORAGE

HANDLING: Use with adequate ventilation. Ground and bond containers when transferring materials. Wash thoroughly after handling. After this container has been emptied, it may contain flammable vapors; observe all warnings and precautions listed for this product.

STORAGE: Store in combustible liquids storage area. Store away from heat, ignition sources, and open flame in accordance with applicable regulations.

SPECIAL PRECAUTIONS: Avoid strong oxidizers.

8.0 EXPOSURE CONTROLS / PERSONAL PROTECTION

EYE: None required; however, use of eye protection is good industrial practice.

SKIN: Avoid prolonged or repeated skin contact. Wear protective clothing and gloves if prolonged or repeated contact is likely.

INHALATION: Avoid breathing vapor and/or mist. Use with adequate ventilation. If ventilation is inadequate, use NIOSH/MSHA certified respirator that will protect against organic vapor and dust/mist.

ENGINEERING CONTROLS: Control airborne concentrations below the exposure guidelines.

EXPOSURE GUIDELINES:

3 of 8

Component	CAS#	Exposure Limits	
Kerosene	8008-20 -6	No exposure limit established	
Naphthalene	91-20-3	OSHA PEL: 10 ppm (1989)(1971) OSHA STEL: 15 ppm (1989); Not established. (1971) ACGIH TLV-TWA: 10 ppm ACGIH TLV-STEL: 15 ppm	
Xyl e ne	1330-20-7	OSHA PEL: 100 ppm (1989)(1971) OSHA STEL: 150 ppm (1989); Not established. (1971) ACGIH TLV-TWA: 100 ppm ACGIH TLV-STEL: 150 ppm	

9.0 CHEMICAL AND PHYSICAL PROPERTIES

APPEARANCE AND ODOR: Liquid. Clear. Red. Petroleum odor.

pH: Not determined.

VAPOR PRESSURE: Not determined.

VAPOR DENSITY: Not determined.

BOILING POINT: 340-550°F(171-288°C) (approximate range)

MELTING POINT: Not determined.

SOLUBILITY IN WATER: Negligible, below 0.1%.

SPECIFIC GRAVITY (WATER=1): 0.83

VISCOSITY: 1.0-1.9cSt at 104°F

10.0 STABILITY AND REACTIVITY

STABILITY: Stable.

CONDITIONS TO AVOID: Keep away from ignition sources (e.g. heat, sparks, and open flames).

MATERIALS TO AVOID: Avoid chlorine, fluorine, and other strong oxidizers.

HAZARDOUS DECOMPOSITION: None identified.

HAZARDOUS POLYMERIZATION: Will not occur.

4 of 8

11.0 TOXICOLOGICAL INFORMATION

ACUTE TOXICITY DATA:

EYE IRRITATION: Primary eye irritation score for similar materials have ranged from 0.0 to 3.3/110 (rabbits).

SKIN IRRITATION: Similar products have produced skin irritation scores ranging from 1.96 to 6.30/8.0 (rabbits). Dermal LD50 for similar products was greater than 2 g/kg (rabbits).

DERMAL LD50: Testing not conducted. See Other Toxicity Data.

ORAL LD50: Oral LD50 for similar products was greater than 10 g/kg (rats).

INHALATION LC50: Inhalation LC50 for a similar material was greater than 6.4 g/m3 (rats).

OTHER TOXICITY DATA: From skin-painting studies of petroleum distillates of similar composition and distillate range, it has been shown that these types of materials often possess weak carcinogenic activity in laboratory animals. In these tests, the material is painted on the shaved backs of mice twice a week for their lifetime. The material is not washed off between applications. Therefore, there may be a potential risk of skin cancer from prolonged or repeated skin contact with this product in the absence of good personal hygiene. This particular product has not been tested for carcinogenic activity, but we have chosen to be cautious in light of the findings with other distillate streams.

Occasional skin contact with this product is not expected to have serious effects, but good personal hygiene should be practiced and repeated skin contact avoided. This product can also be expected to produce skin irritation upon prolonged or repeated skin contact. Personal hygiene measures taken to prevent skin irritation are expected to be adequate to prevent risk of skin cancer.

This product has a sufficiently low vapor pressure to prevent a hazardous buildup of vapors unless the product is heated, used in a confined space with inadequate ventilation or misted. Inhalation of mist or high concentrations of vapors can produce dizziness, headache, and nausea and possibly irritation of the eye, nose and throat.

Aspiration of this product into the lungs can cause chemical pneumonia and can be fatal. Aspiration into the lungs can occur while vomiting after ingestion of this product. Do not siphon by mouth.

Materials of this type have been shown to produce kidney damage in male rats following prolonged inhalation exposures. Following extensive research, this effect appears to be unique to the male rat and is considered to be of little or no relevance in terms of human health risk.

No component of this product present at levels greater than 0.1% is identified as a carcinogen by NTP, IARC or OSHA.

12.0 ECOLOGICAL INFORMATION

5 of 8

Ecological testing has not been conducted on this product.

13.0 DISPOSAL INFORMATION

Disposal must be in accordance with applicable federal, state, or local regulations. Enclosed-controlled incineration is recommended unless directed otherwise by applicable ordinances.

14.0 TRANSPORTATION INFORMATION

U.S. DEPT OF TRANSPORTATION

Shipping Name

15.0 REGULATORY INFORMATION

CERCLA SECTIONS 102a/103 HAZARDOUS SUBSTANCES (40 CFR Part 302.4): This product is exempt from the CERCLA reporting requirements under 40 CFR Part 302.4. However, if spilled into waters of the United States, it may be reportable under 33 CFR Part 153 if it produces a sheen.

SARA TITLE III SECTION 302 EXTREMELY HAZARDOUS SUBSTANCES (40 CFR Part 355): This product is not regulated under Section 302 of SARA and 40 CFR Part 355.

6 of 8

SARA TITLE III SECTIONS 311/312 HAZARDOUS CATEGORIZATION (40 CFR Part 370): This product is defined as hazardous by OSHA under 29 CFR Part 1910.1200(d).

SARA TITLE III SECTION 313 (40 CFR Part 372): This product contains the following substance(s), which is on the Toxic Chemicals List in 40 CFR Part 372:

Component/CAS Number	Weight Percent
Xylene 1330-20-7	1
Naphthalene 91-20-3	1

U.S. INVENTORY (TSCA): Listed on inventory.

OSHA HAZARD COMMUNICATION STANDARD: Combustible liquid. Irritant.

EC INVENTORY (EINECS/ELINCS): Not determined.

JAPAN INVENTORY (MITI): Not determined.

AUSTRALIA INVENTORY (AICS): Not determined.

KOREA INVENTORY (ECL): Not determined.

CANADA INVENTORY (DSL): Not determined.

PHILIPPINE INVENTORY (PICCS): Not determined.

16.0 OTHER INFORMATION

Prepared by:

Environment, Health and Safety Department

Issued: September 14, 1995

Supersedes: September 24, 1993

This material Safety Data Sheet conforms to the requirements of ANSI Z400. 1.

This material safety data sheet and the information it contains is offered to you in good faith as accurate. We have reviewed any information contained in this data sheet which we received from sources outside our company. We believe that information to be correct but cannot guarantee its accuracy or completeness. Health and safety precautions in this data sheet may not be adequate for all individuals and/or situations. It is the user's obligation to evaluate and use this product safety and to comply with all applicable laws and regulations. No statement made in this data sheet shall be

MATERIAL SAFETY DATA SHEET

SECTION 1

PRODUCTAND COMPANY IDENTIFICATION

PRODUCT

Product Name: ESTEREX A51 Product Description: Synthetic Ester

Product Code: 6011217-02 Intended Use: Base oil

COMPANY IDENTIFICATION

Supplier:

EXXONMOBIL OIL CORPORATION

SYNTHETICS BUSINESS UNIT

13501 KATY FREEWAY HOUSTON, TX 77079 USA

24 Hour Health Emergency

609-737-4411

Transportation Emergency Phone

800-424-9300 202-483-7616

Product Technical Information

732-321-6048

SECTION 2. COMPOSITION / INFORMATION ON INGREDIENTS

No Reportable Hazardous Substance(s) or Complex Substance(s).

SECTION 3 HAZARDS DENTIFICATION

This material is not considered to be hazardous according to regulatory guidelines (see (M)SDS Section 15).

POTENTIAL HEALTH EFFECTS

Low order of toxicity. High-pressure injection under skin may cause serious damage.

NFPA Hazard ID:

Health: 0

Flammability: 1

Reactivity: 0

HMIS Hazard ID:

Health: 0

Flammability: 1

Reactivity: 0

NOTE: This material should not be used for any other purpose than the intended use in Section 1 without expert advice. Health studies have shown that chemical exposure may cause potential human health risks which may vary from person to person.

SECTION 4 FIRST AID MEASURES.

INHALATION

Remove from further exposure. For those providing assistance, avoid exposure to yourself or others. Use adequate respiratory protection. If respiratory irritation, dizziness, nausea, or unconsciousness occurs, seek immediate medical assistance. If breathing has stopped, assist ventilation with a mechanical device or use mouth-to-mouth resuscitation.

Revision Date: 30Mar2006

Page 2 of 8

SKIN CONTACT

Wash contact areas with soap and water. If product is injected into or under the skin, or into any part of the body, regardless of the appearance of the wound or its size, the individual should be evaluated immediately by a physician as a surgical emergency. Even though initial symptoms from high pressure injection may be minimal or absent, early surgical treatment within the first few hours may significantly reduce the ultimate extent of injury.

EYE CONTACT

Flush thoroughly with water. If irritation occurs, get medical assistance.

INGESTION

First aid is normally not required. Seek medical attention if discomfort occurs.

SECTION 5 FIRE FIGHTING MEASURES

EXTINGUISHING MEDIA

Appropriate Extinguishing Media: Use water fog, foam, dry chemical or carbon dioxide (CO2) to extinguish flames.

Inappropriate Extinguishing Media: Straight Streams of Water

FIRE FIGHTING

Fire Fighting Instructions: Evacuate area. Prevent runoff from fire control or dilution from entering streams, sewers, or drinking water supply. Firefighters should use standard protective equipment and in enclosed spaces, self-contained breathing apparatus (SCBA). Use water spray to cool fire exposed surfaces and to protect personnel.

Hazardous Combustion Products: Oxides of carbon, Incomplete combustion products, Smoke, Fume

FLAMMABILITY PROPERTIES

Flash Point [Method]: 220C (428F) [ASTM D-93]

Flammable Limits (Approximate volume % in air): LEL: N/D

Autoignition Temperature: N/D

SECTION 6 ACCIDENTAL RELEASE MEASURES

NOTIFICATION PROCEDURES

In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations. U.S. regulations require reporting releases of this material to the environment which exceed the reportable quantity or oil spills which could reach any waterway including intermittent dry creeks. The National Response Center can be reached at (800)424-8802.

SPILL MANAGEMENT

Land Spill: Stop leak if you can do it without risk. Absorb or cover with dry earth, sand or other noncombustible material and transfer to containers. Recover by pumping or with suitable absorbent.

Water Spill: Stop leak if you can do it without risk. Confine the spill immediately with booms. Warn other

Revision Date: 30Mar2006

Page 3 of 8

shipping. Remove from the surface by skimming or with suitable absorbents. Seek the advice of a specialist before using dispersants.

Water spill and land spill recommendations are based on the most likely spill scenario for this material: however, geographic conditions, wind, temperature, (and in the case of a water spill) wave and current direction and speed may greatly influence the appropriate action to be taken. For this reason, local experts should be consulted. Note: Local regulations may prescribe or limit action to be taken.

ENVIRONMENTAL PRECAUTIONS

Large Spills: Dike far ahead of liquid spill for later recovery and disposal. Prevent entry into waterways. sewers, basements or confined areas.

SECTION 7 HANDLING AND STORAGE

HANDLING

Prevent small spills and leakage to avoid slip hazard.

Static Accumulator: This material is a static accumulator.

STORAGE

Do not store in open or unlabelled containers.

SECTION 8 EXPOSURE CONTROLS PERSONAL PROTECTION SECTION 8

EXPOSURE LIMIT VALUES

Exposure limits/standards (Note: Exposure limits are not additive)

Source	Form	Limit / Standard	Note	Source
DITRIDECYL ADIPATE		TWA 5 mg/m3	N/A	ExxonMobil

NOTE: Limits/standards shown for guidance only. Follow applicable regulations.

ENGINEERING CONTROLS

The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Control measures to consider:

No special requirements under ordinary conditions of use and with adequate ventilation.

PERSONAL PROTECTION

Personal protective equipment selections vary based on potential exposure conditions such as applications. handling practices, concentration and ventilation. Information on the selection of protective equipment for use with this material, as provided below, is based upon intended, normal usage.

Respiratory Protection: If engineering controls do not maintain airborne contaminant concentrations at a level which is adequate to protect worker health, an approved respirator may be appropriate. Respirator

Revision Date: 30Mar2006

Page 4 of 8

selection, use, and maintenance must be in accordance with regulatory requirements, if applicable. Types of respirators to be considered for this material include:

No protection is ordinarily required under normal conditions of use and with adequate ventilation.

For high airborne concentrations, use an approved supplied-air respirator, operated in positive pressure mode. Supplied air respirators with an escape bottle may be appropriate when oxygen levels are inadequate. gas/vapor warning properties are poor, or if air purifying filter capacity/rating may be exceeded.

Hand Protection: Any specific glove information provided is based on published literature and glove manufacturer data. Work conditions can greatly effect glove durability; inspect and replace worn or damaged gloves. The types of gloves to be considered for this material include:

No protection is ordinarily required under normal conditions of use.

Eve Protection: If contact is likely, safety glasses with side shields are recommended.

Skin and Body Protection: Any specific clothing information provided is based on published literature or manufacturer data. The types of clothing to be considered for this material include:

No skin protection is ordinarily required under normal conditions of use. In accordance with good industrial hygiene practices, precautions should be taken to avoid skin contact.

Specific Hygiene Measures: Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.

ENVIRONMENTAL CONTROLS

See Sections 6, 7, 12, 13.

SECTION 9

Typical physical and chemical properties are given below. Consult the Supplier in Section 1 for additional data.

GENERAL INFORMATION

Physical State: Liquid

Color: Yellow Odor: Mild

Odor Threshold: N/D

IMPORTANT HEALTH, SAFETY, AND ENVIRONMENTAL INFORMATION

Relative Density (at 15 C): 0.91

Flash Point [Method]: 220C (428F) [ASTM D-93]

Flammable Limits (Approximate volume % in air): LEL: N/D UEL: N/D

Autoignition Temperature: N/D

Boiling Point / Range: > 316C (600F) Vapor Density (Air = 1): > 2 at 101 kPa

Vapor Pressure: N/D

Evaporation Rate (n-butyl acetate = 1): N/D

pH: N/A

Log Pow (n-Octanol/Water Partition Coefficient): N/D

Solubility in Water: Negligible

Revision Date: 30Mar2006

Page 5 of 8

Viscosity: 26.8 cSt (26.8 mm2/sec) at 40 C | 5.2 cSt (5.2 mm2/sec) at 100C

Oxidizing Properties: See Sections 3, 15, 16.

OTHER INFORMATION

Freezing Point: N/D Melting Point: N/A

Pour Point: -54°C (-65°F)

SECTION 10 STABILITY AND REACTIVITY

STABILITY: Material is stable under normal conditions.

CONDITIONS TO AVOID: Excessive heat. High energy sources of ignition.

MATERIALS TO AVOID: Strong oxidizers

HAZARDOUS DECOMPOSITION PRODUCTS: Material does not decompose at ambient temperatures.

HAZARDOUS POLYMERIZATION: Will not occur.

SECTION 11 TOXICOLOGICAL INFORMATION

ACUTE TOXICITY

Route of Exposure	Conclusion / Remarks
Inhalation	
Toxicity (Rat): LC50 > 5000 mg/m3	Minimally Toxic. Based on test data for the material.
Iπitation (Rat): No end point data.	Negligible hazard at ambient/normal handling temperatures. Based on test data for structurally similar materials.
Ingestion	
Toxicity (Rat): LD50 > 15000 mg/kg	Minimally Toxic. Based on test data for the material.
Skin	
Toxicity (Rabbit): LD50 > 2000 mg/kg	Minimally Toxic. Based on test data for the material.
Irritation (Rabbit): Data available.	Negligible irritation to skin at ambient temperatures. Based on test data for the material.
Eye	
Irritation (Rabbit): Data available.	May cause mild, short-lasting discomfort to eyes. Based on test data for the material.

CHRONIC/OTHER EFFECTS

For the product itself:

Synthetic base oils: Not expected to cause significant health effects under conditions of normal use, based on laboratory studies with the same or similar materials. Not mutagenic or genotoxic. Not sensitizing in test animals and humans.

Additional information is available by request.

The following ingredients are cited on the lists below: None.

Revision Date: 30Mar2006

Page 6 of 8

-- REGULATORY LISTS SEARCHED--

6 = OSHA CARC

SECTION 12 ECOLOGICAL INFORMATION

The information given is based on data available for the material, the components of the material, and similar materials.

ECOTOXICITY

Material -- Not expected to be harmful to aquatic organisms.

PERSISTENCE AND DEGRADABILITY

Biodegradation:

Material -- Expected to be inherently biodegradable

SECTION 13 DISPOSAL CONSIDERATIONS

Disposal recommendations based on material as supplied. Disposal must be in accordance with current applicable laws and regulations, and material characteristics at time of disposal.

DISPOSAL RECOMMENDATIONS

Product is suitable for burning in an enclosed controlled burner for fuel value or disposal by supervised incineration at very high temperatures to prevent formation of undesirable combustion products.

REGULATORY DISPOSAL INFORMATION

RCRA Information: The unused product, in our opinion, is not specifically listed by the EPA as a hazardous waste (40 CFR, Part 261D), nor is it formulated to contain materials which are listed as hazardous wastes. It does not exhibit the hazardous characteristics of ignitability, corrositivity or reactivity and is not formulated with contaminants as determined by the Toxicity Characteristic Leaching Procedure (TCLP). However, used product may be regulated.

Empty Container Warning PRECAUTIONARY LABEL TEXT: Empty containers may retain residue and can be dangerous. DO NOT PRESSURIZE, CUT, WELD, BRAZE, SOLDER, DRILL, GRIND OR EXPOSE SUCH CONTAINERS TO HEAT, FLAME, SPARKS, STATIC ELECTRICITY, OR OTHER SOURCES OF IGNITION: THEY MAY EXPLODE AND CAUSE INJURY OR DEATH. Do not attempt to refill or clean container since residue is difficult to remove. Empty drums should be completely drained, properly bunged and promptly returned to a drum reconditioner. All containers should be disposed of in an environmentally safe manner and in accordance with governmental regulations.

SECTION 14

TRANSPORT INFORMATION

LAND (DOT): Not Regulated for Land Transport

LAND (TDG): Not Regulated for Land Transport

Revision Date: 30Mar2006

Page 7 of 8

SEA (IMDG): Not Regulated for Sea Transport according to IMDG-Code

AIR (IATA): Not Regulated for Air Transport

SECTION 15 REGULATORY INFORMATION

OSHA HAZARD COMMUNICATION STANDARD: When used for its intended purposes, this material is not classified as hazardous in accordance with OSHA 29 CFR 1910.1200.

NATIONAL CHEMICAL INVENTORY LISTING: AICS, DSL, EINECS, ENCS, KECI, PICCS, TSCA

EPCRA: This material contains no extremely hazardous substances.

SARA (311/312) REPORTABLE HAZARD CATEGORIES: None.

SARA (313) TOXIC RELEASE INVENTORY: This material contains no chemicals subject to the supplier notification requirements of the SARA 313 Toxic Release Program.

The Following Ingredients are Cited on the Lists Below: None.

SECTION 16 OTHER INFORMATION A SECTION 16

N/D = Not determined, N/A = Not applicable

THIS SAFETY DATA SHEET CONTAINS THE FOLLOWING REVISIONS:

No revision information is available.

PRECAUTIONARY LABEL TEXT: Empty containers may retain residue and can be dangerous. DO NOT PRESSURIZE, CUT, WELD, BRAZE, SOLDER, DRILL, GRIND OR EXPOSE SUCH CONTAINERS TO HEAT, FLAME. SPARKS, STATIC ELECTRICITY, OR OTHER SOURCES OF IGNITION; THEY MAY EXPLODE AND CAUSE INJURY OR DEATH. Do not attempt to refill or clean container since residue is difficult to remove. Empty drums should be completely drained, properly bunged and promptly returned to a drum reconditioner. All containers should be disposed of in an environmentally safe manner and in accordance with governmental regulations.

The information and recommendations contained herein are, to the best of ExxonMobil's knowledge and belief, accurate and reliable as of the date issued. You can contact ExxonMobil to insure that this document is the most current available from ExxonMobil. The information and recommendations are offered for the user's consideration and

HAZARDS IDENTIFICATION 3.

EMERGENCY OVERVIEW"

CAUTION

May cause initiation with prolonged contact. Toxic to aquatic organisms.

Do not get in eyes, on skin, on clothing. Do not take internally. Wear suitable protective clothing. Keep container tightly closed. Water in contact with the product will cause alippery floor conditions. In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. After contact with skin, wash immediately with plenty of soap and water.

May evolve oxides of carbon (COx) under fire conditions. May evolve oxides of nitrogen (NOx) under fire conditions. Water in contact with the product will cause slippery floor conditions.

PRIMARY ROUTES OF EXPOSURE:

Eye, \$kin

HUMAN HEALTH HAZARDS - ACUTE :

EYE CONTACT:

May cause irritation with prolonged contact.

SKIN CONTACT:

May cause irritation with prolonged contact.

Nalco Company 1601 W. Diehl Road - Naperville, Illinois 60563-1198 (630)305-1000 1/9

MATERIAL SAFETY DATA SHEET

PRODUCT

OPTIMER® 7871

EMERGENCY TELEPHONE NUMBER(\$) (800) 424-9300 (24 Hours) CHEMTREC

INGESTION:

Not a likely route of exposure. No adverse effects expected,

INHALATION:

Not a likely route of exposure. No adverse effects expected.

SYMPTOMS OF EXPOSURE:

Acute:

A review of available data does not identify any symptoms from exposure not previously mentioned.

Chronic

Frequent or prolonged contact with product may defet and dry the skin, leading to discomfort and demattis.

AGGRAVATION OF EXISTING CONDITIONS:

A review of available data does not identify any worsening of existing conditions,

4. FIRST AID MEASURES

EYE CONTACT:

Flush affected area with water. If symptoms develop, seek medical advice.

SKIN CONTACT

Remove contaminated clothing. Wash off affected area immediately with soap and plenty of water. If symptoms develop, seek medical advice.

INGESTION:

Do not induce vomiting without medical advice, If conscious, washout mouth and give water to drink. If symptoms develop, seek medical advice.

INHALATION:

Remove to fresh air, treat symptomatically. If symptoms develop, seek medical advice.

NOTE TO PHYSICIAN:

Based on the individual reactions of the patient, the physician's judgement should be used to control symptoms and clinical condition.

5. FIRE FIGHTING MEASURES

FLASH POINT:

> 200 °F / > 93 °C (PMCC)

EXTINGUISHING MEDIA:

Foam, Dry powder, Carbon dioxide, Other extinguishing agent suitable for Class B fires

UNSUITABLE EXTINGUISHING MEDIA:

Do not use water unless flooding amounts are available.

Nalco Company 1501 W. Diehl Road - Naperville, Illinois 60563-1198 (630)305-1000 2 / 9

PRODUCT

OPTIMER® 7871

EMERGENCY TELEPHONE NUMBER(S) (800) 424-9300 (24 Hours) CHEMTREC

FIRE AND EXPLOSION HAZARD:

May evolve oxides of carbon (COx) under fire conditions. May evolve oxides of nitrogen (NOx) under fire conditions. Water in contact with the product will cause slippery floor conditions.

SPECIAL PROTECTIVE EQUIPMENT FOR FIRE FIGHTING:

In case of fire, wear a full face positive-pressure self contained breathing apparatus and protective suit.

6. ACCIDENTAL RELEASE MEASURES

PERSONAL PRECAUTIONS:

Notify appropriate government, occupational health and safety and environmental authorities. Do not touch spilled material. Stop or reduce any leaks if it is safe to do so. Use personal protective equipment recommended in Section 8 (Exposure Controls/Personal Protection).

METHODS FOR CLEANING UP:

SMALL SPILLS: Sock up spill with absorbent material. Place residues in a suitable, covered, properly labeled container. Wash affected area. LARGE SPILLS: Contain liquid using absorbent material, by digging trenches or by diking. Reclaim into recovery or salvage drums or tank truck for proper disposal. Contact an approved waste hauter for disposal of contaminated recovered material. Dispose of material in compliance with regulations indicated in Section 13 (Disposal Considerations).

ENVIRONMENTAL PRECAUTIONS:

This product is toxic to fish. It should not be directly discharged into lakes, ponds, streams, waterways or public water supplies.

7. HANDLING AND STORAGE

HANDLING

Do not take internally. Have emergency equipment (for fires, spills, leaks, etc.) readily available. Ensure all containers are labelled. Avoid eye and skin contact.

STORAGE CONDITIONS:

Store separately from oxidizers. Store the containers tightly closed.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

OCCUPATIONAL EXPOSURE LIMITS:

Exposure guidelines have not been established for this product. Available exposure limits for the substance(s) are shown below.

ENGINEERING MEASURES:

General ventilation is recommended.

RESPIRATORY PROTECTION ;

Due to its low volatility and toxicity, the hazard potential associated with this material is relatively low. Respiratory protection is not normally needed.

Nalco Company 1601 W. Diehl Road • Naperville, Illinois 60563-1198 (630)305-1000 3 / 9

ENVIRONMENTAL HAZARD AND EXPOSURE CHARACTERIZATION

Based on our hazard characterization, the potential environmental hazard is: Moderate

Based on our recommended product application and the product's characteristics, the potential environmental exposure is: Low

If released into the environment, see CERCLA/SUPERFUND in Section 15.

13. DISPOSAL CONSIDERATIONS

If this product becomes a waste, it is not a hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA) 40 CFR 251, since it does not have the characteristics of Subpart C, nor is it listed under Subpart D.

As a non-hazardous waste, it is not subject to federal regulation. Consult state or local regulation for any additional handling, treatment or disposal requirements. For disposal, contact a properly licensed waste treatment, storage, disposal or recycling facility.

Do not reuse empty container.

14. TRANSPORT INFORMATION

The information in this section is for reference only and should not take the place of a shipping paper (bill of lading) specific to an order. Please note that the proper Shipping Name / Hazard Class may vary by packaging, properties, and mode of transportation. Typical Proper Shipping Names for this product are as follows.

LAND TRANSPORT:

Proper Shipping Name:

PRODUCT IS NOT REGULATED DURING

TRANSPORTATION

AIR TRANSPORT (ICAO/IATA):

Proper Shipping Name: . .

15. REGULATORY INFORMATION

NATIONAL REGULATIONS, USA:

OSHA HAZARD COMMUNICATION RULE, 29 CFR 1910,1200:

Based on our hazard evaluation, the following substance(s) in this product is/are hazardous and the reason(s) is/are shown below.

Hydrotreated Light Distillate: Non-Hazardous

CERCLA/SUPERFUND, 40 CFR 117, 302:

Notification of spills of this product is not required.

SARA/SUPERFUND AMENDMENTS AND REAUTHORIZATION ACT OF 1986 (TITLE III) - SECTIONS 302, 311, 312, AND 313:

SECTION 302 - EXTREMELY HAZARDOUS SUBSTANCES (40 CFR 355):

This product does not contain substances listed in Appendix A and 9 as an Extremely Hazardous Substance.

SECTIONS 311 AND 312 - MATERIAL SAFETY DATA SHEET REQUIREMENTS (40 CFR 370): Our hazard evaluation has found that this product is not hazardous under 29 CFR 1910.1200.

Under SARA 311 and 312, the EPA has established threshold quantities for the reporting of hazardous chemicals. The current thresholds are: 500 pounds or the threshold planning quantity (TPQ), whichever is lower, for extremely hazardous substances and 10,000 pounds for all other hazardous chemicals.

SECTION 313 - LIST OF TOXIC CHEMICALS (40 CFR 372):

. This product does not contain substances on the List of Toxic Chemicals.

TOXIC SUBSTANCES CONTROL ACT (TSCA):

The substances in this preparation are included on or exempted from the TSCA 8(b) Inventory (40 CFR 710)

FEDERAL WATER POLLUTION CONTROL ACT, CLEAN WATER ACT, 40 CFR 401.15 / formerly Sec. 307, 40 CFR 116.4 / formerly Sec. 311 :

None of the substances are specifically listed in the regulation.

CLEAN AIR ACT, Sec. 111 (40 CFR 60, Volatile Organic Compounds), Sec. 112 (40 CFR 61, Hazardous Air Pollutants), Sec. 602 (40 CFR 62, Class I and II Ozone Depleting Substances): None of the substances are specifically listed in the regulation.

CALIFORNIA PROPOSITION 65:

This product does not contain substances which require warning under California Proposition 65.

Naico Company 1601 W. Diehl Road • Naperville, Illinois 60563-1198 (630)305-1000 7 / 9

PRODUCT

OPTIMER® 7871

EMERGENCY TELEPHONE NUMBER(S) (800) 424-9300 (24 Hours) CHEMTREC

MICHIGAN CRITICAL MATERIALS:

None of the substances are specifically listed in the regulation.

STATE RIGHT TO KNOW LAWS:

None of the substances are specifically listed in the regulation.

NATIONAL REGULATIONS, CANADA:

WORKPLACE HAZARDOUS MATERIALS INFORMATION SYSTEM (WHMIS):

This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations (CPR) and the MSDS contains all the information required by the CPR.

WHMIS CLASSIFICATION:

Not considered a WHMIS controlled product.

CANADIAN ENVIRONMENTAL PROTECTION ACT (CEPA):

The substances in this preparation are listed on the Domestic Substances. List (DSL), are exempt, or have been reported in accordance with the New Substances Notification Regulations.

OTHER INFORMATION

Due to our commitment to Product Stewardship, we have evaluated the human and environmental hazards and exposures of this product. Based on our recommended use of this product, we have characterized the product's general risk. This information should provide assistance for your own risk management practices. We have evaluated our product's risk as follows:

- "The human risk is: Low
- * The environmental risk is: Low

Any use inconsistent with our recommendations may affect the risk characterization. Our sales representative will assist you to determine if your product application is consistent with our recommendations. Together we can implement an appropriate risk management process.

This product material safety data sheet provides health and safety information. The product is to be used in applications consistent with our product literature. Individuals handling this product should be informed of the recommended safety precautions and should have access to this information. For any other uses, exposures should be evaluated so that appropriate handling practices and training programs can be established to insure safe workplace operations. Please consult your local sales representative for any further information.

MATERIAL SAFETY DATA SHEET

SECTION 1

PRODUCT AND COMPANY IDENTIFICATION

PRODUCT

Product Name: JAYFLEX 77
Product Description: Phthalate

Product Code:

Intended Use: Carpet backing, moulding, coating etc.

COMPANY IDENTIFICATION

Supplier:

EXXONMOBIL CHEMICAL COMPANY

P.O. BOX 3272

HOUSTON, TX. 77253-3272 USA

24 Hour Health Emergency

(800) 726-2015

Transportation Emergency Phone

(800) 424-9300 or (703) 527-3887 CHEMTREC (281) 870-6000/Health & Medical (281) 870-6884

Product Technical Information Supplier General Contact

(281) 870-6000

SECTION 2

COMPOSITION / INFORMATION ON INGREDIENTS

No Reportable Hazardous Substance(s) or Complex Substance(s).

SECTION 3

HAZARDS IDENTIFICATION

This material is not considered to be hazardous according to regulatory guidelines (see (M)SDS Section 15).

POTENTIAL PHYSICAL / CHEMICAL EFFECTS

Material can accumulate static charges which may cause an incendiary electrical discharge.

POTENTIAL HEALTH EFFECTS

Low order of toxicity.

NFPA Hazard ID:

Health: 0

Flammability: 1

Reactivity: 0

HMIS Hazard ID:

Health: 1

Flammability: 1

Reactivity: 0

NOTE: This material should not be used for any other purpose than the intended use in Section 1 without expert advice. Health studies have shown that chemical exposure may cause potential human health risks which may vary from person to person.

SECTION 4

FIRST AID MEASURES

INHALATION

Remove from further exposure. For those providing assistance, avoid exposure to yourself or others. Use adequate respiratory protection. If respiratory irritation, dizziness, nausea, or unconsciousness occurs, seek

Revision Date: 02Oct2007

Page 2 of 8

immediate medical assistance. If breathing has stopped, assist ventilation with a mechanical device or use mouth-to-mouth resuscitation.

SKIN CONTACT

Wash contact areas with soap and water.

EYE CONTACT

Flush thoroughly with water. If irritation occurs, get medical assistance.

INGESTION

First aid is normally not required. Seek medical attention if discomfort occurs.

SECTION 5 FIRE FIGHTING MEASURES

EXTINGUISHING MEDIA

Appropriate Extinguishing Media: Use water fog, foam, dry chemical or carbon dioxide (CO2) to extinguish flames.

Inappropriate Extinguishing Media: Straight Streams of Water

FIRE FIGHTING

Fire Fighting Instructions: Evacuate area. Prevent runoff from fire control or dilution from entering streams, sewers, or drinking water supply. Firefighters should use standard protective equipment and in enclosed spaces, self-contained breathing apparatus (SCBA). Use water spray to cool fire exposed surfaces and to protect personnel.

Hazardous Combustion Products: Oxides of carbon, Smoke, Fume, Incomplete combustion products

FLAMMABILITY PROPERTIES

Flash Point [Method]: 229C (444F) [ASTM D-93]

Flammable Limits (Approximate volume % in air): LEL: N/D UEL: N/D

Autoignition Temperature: 380°C (716°F)

SECTION 6

ACCIDENTAL RELEASE MEASURES

NOTIFICATION PROCEDURES

In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations. In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations. US regulations require reporting releases of this material to the environment which exceed the applicable reportable quantity or oil spills which could reach any waterway including intermittent dry creeks. The National Response Center can be reached at (800)424-8802.

SPILL MANAGEMENT

Land Spill: Stop leak if you can do it without risk. Absorb or cover with dry earth, sand or other non-combustible material and transfer to containers. Recover by pumping or with suitable absorbent.

Revision Date: 02Oct2007

Page 3 of 8

Water Spill: Stop leak if you can do it without risk. Warn other shipping. Remove from the surface by skimming or with suitable absorbents. Seek the advice of a specialist before using dispersants.

Water spill and land spill recommendations are based on the most likely spill scenario for this material; however, geographic conditions, wind, temperature, (and in the case of a water spill) wave and current direction and speed may greatly influence the appropriate action to be taken. For this reason, local experts should be consulted. Note: Local regulations may prescribe or limit action to be taken.

ENVIRONMENTAL PRECAUTIONS

Large Spills: Dike far ahead of liquid spill for later recovery and disposal. Prevent entry into waterways, sewers, basements or confined areas.

SECTION 7

HANDLING AND STORAGE

HANDLING

Prevent small spills and leakage to avoid slip hazard. Material can accumulate static charges which may cause an electrical spark (ignition source).

Loading/Unloading Temperature: [Ambient]

Transport Temperature: [Ambient] **Transport Pressure:** [Ambient]

Static Accumulator: This material is a static accumulator.

STORAGE

Do not store in open or unlabelled containers.

Storage Temperature: [Ambient] **Storage Pressure:** [Ambient]

Suitable Containers/Packing: Barges; Tank Cars; Drums

Suitable Materials and Coatings: Carbon Steel; Stainless Steel; Aluminum; Polypropylene; Teflon; Nylon; Viton

Unsuitable Containers/Packing: Natural and butyl rubbers

Unsuitable Materials and Coatings: Natural Rubber; Vinyls; Butyl Rubber

SECTION 8

EXPOSURE CONTROLS / PERSONAL PROTECTION

EXPOSURE LIMIT VALUES

Exposure limits/standards (Note: Exposure limits are not additive)

Source	Form	Limit / Star	ndard	 Note	Source
ALKYL PHTHALATE (C6-C13)	Aerosol.	TWA	5 mg/m3	N/A	ExxonMobil

NOTE: Limits/standards shown for guidance only. Follow applicable regulations.

Revision Date: 02Oct2007

Page 4 of 8

ENGINEERING CONTROLS

The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Control measures to consider:

Adequate ventilation should be provided so that exposure limits are not exceeded.

PERSONAL PROTECTION

Personal protective equipment selections vary based on potential exposure conditions such as applications, handling practices, concentration and ventilation. Information on the selection of protective equipment for use with this material, as provided below, is based upon intended, normal usage.

Respiratory Protection: If engineering controls do not maintain airborne contaminant concentrations at a level which is adequate to protect worker health, an approved respirator may be appropriate. Respirator selection, use, and maintenance must be in accordance with regulatory requirements, if applicable. Types of respirators to be considered for this material include:

Half-face filter respirator

For high airborne concentrations, use an approved supplied-air respirator, operated in positive pressure mode. Supplied air respirators with an escape bottle may be appropriate when oxygen levels are inadequate, gas/vapor warning properties are poor, or if air purifying filter capacity/rating may be exceeded.

Hand Protection: Any specific glove information provided is based on published literature and glove manufacturer data. Work conditions can greatly affect glove durability; inspect and replace worn or damaged gloves. The types of gloves to be considered for this material include:

Chemical resistant gloves are recommended.

Eye Protection: If contact is likely, safety glasses with side shields are recommended.

Skin and Body Protection: Any specific clothing information provided is based on published literature or manufacturer data. The types of clothing to be considered for this material include:

Chemical / oil resistant clothing if contact with material is likely.

Specific Hygiene Measures: Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.

ENVIRONMENTAL CONTROLS

See Sections 6, 7, 12, 13.

SECTION 9 PHYSICAL AND CHEMICAL PROPERTIES

Typical physical and chemical properties are given below. Consult the Supplier in Section 1 for additional data.

GENERAL INFORMATION

Physical State: Liquid

Form: Clear Color: Colorless Odor: Mild

Odor Threshold: N/D

IMPORTANT HEALTH, SAFETY, AND ENVIRONMENTAL INFORMATION

Relative Density: N/D

Density (at 20 °C): 994 kg/m³ (8.29 lbs/gal, 0.99 kg/dm³)

Revision Date: 02Oct2007

Page 5 of 8

Flammable Limits (Approximate volume % in air): LEL: N/D UEL: N/D

Autoignition Temperature: 380°C (716°F)
Boiling Point / Range: > 300C (572F)
Vapor Density (Air = 1): > 1 at 101 kPa

Vapor Pressure: < 0.01 kPa (0.08 mm Hg) at 20 C Evaporation Rate (n-butyl acetate = 1): N/D

pH: N/A

Log Pow (n-Octanol/Water Partition Coefficient): N/D

Solubility in Water: Negligible

Viscosity: 19.5 cSt (19.5 mm2/sec) at 40 C | 53 cSt (53 mm2/sec) at 20C

Oxidizing Properties: See Sections 3, 15, 16.

OTHER INFORMATION

Freezing Point: -40°C (-40°F)

Melting Point: N/D
Molecular Weight: 362
Hygroscopic: No

Coefficient of Thermal Expansion: 0.00076 V/VDEGC

SECTION 10 STABILITY AND REACTIVITY

STABILITY: Material is stable under normal conditions.

CONDITIONS TO AVOID: Open flames and high energy ignition sources.

MATERIALS TO AVOID: Strong oxidizers, Nitric acid

HAZARDOUS DECOMPOSITION PRODUCTS: Material does not decompose at ambient temperatures.

HAZARDOUS POLYMERIZATION: Will not occur.

SECTION 11 TOXICOLOGICAL INFORMATION **ACUTE TOXICITY Route of Exposure Conclusion / Remarks** Inhalation Minimally Toxic. Based on test data for structurally similar Toxicity: Data available. materials. Irritation: Data available. Negligible hazard at ambient/normal handling temperatures. Based on test data for structurally similar materials. Ingestion Minimally Toxic. Based on test data for the material. Toxicity: Data available. Skin Toxicity: Data available. Minimally Toxic. Based on test data for the material. Irritation: Data available. Negligible irritation to skin at ambient temperatures. Based on test data for the material. May cause mild, short-lasting discomfort to eyes. Based on test Irritation: Data available. data for the material.

Revision Date: 02Oct2007

Page 6 of 8

CHRONIC/OTHER EFFECTS

For the product itself:

Diisoheptyl phthalate (DIHP): DIHP has been shown to cause developmental and fertility effects at high doses in rats when administered orally. The relevance of these findings to humans is uncertain. The risk from occupational and consumer exposure is very low.

Additional information is available by request.

The following ingredients are cited on the lists below: None.

-- REGULATORY LISTS SEARCHED--

3 = IARC 1

5 = IARC 2B

2 = NTP SUS

4 = IARC 2A

6 = OSHA CARC

Sheri on State of the second

SECTION 12 ECOLOGICAL INFORMATION

The information given is based on data available for the material, the components of the material, and similar materials.

ECOTOXICITY

Material -- Not expected to be harmful to aquatic organisms.

Material -- Not expected to demonstrate chronic toxicity to aquatic organisms.

MOBILITY

Material -- Expected to partition to sediment and wastewater solids. Minimally volatile.

PERSISTENCE AND DEGRADABILITY

Biodegradation:

Material - Expected to be readily biodegradable.

Material -- Transformation due to hydrolysis not expected to be significant.

Photolysis:

Material -- Transformation due to photolysis not expected to be significant.

Atmospheric Oxidation:

Material -- Expected to degrade rapidly in air

BIOACCUMULATION POTENTIAL

Material -- Potential to bioaccumulate is low.

SECTION 13 DISPOSAL CONSIDERATIONS

Disposal recommendations based on material as supplied. Disposal must be in accordance with current applicable laws and regulations, and material characteristics at time of disposal.

DISPOSAL RECOMMENDATIONS

Revision Date: 02Oct2007

Page 7 of 8

Product is suitable for burning in an enclosed controlled burner for fuel value or disposal by supervised incineration at very high temperatures to prevent formation of undesirable combustion products.

REGULATORY DISPOSAL INFORMATION

RCRA Information: The unused product, in our opinion, is not specifically listed by the EPA as a hazardous waste (40 CFR, Part 261D), nor is it formulated to contain materials which are listed as hazardous wastes. It does not exhibit the hazardous characteristics of ignitability, corrositivity or reactivity and is not formulated with contaminants as determined by the Toxicity Characteristic Leaching Procedure (TCLP). However, used product may be regulated.

Empty Container Warning Empty Container Warning (where applicable): Empty containers may contain residue and can be dangerous. Do not attempt to refill or clean containers without proper instructions. Empty drums should be completely drained and safely stored until appropriately reconditioned or disposed. Empty containers should be taken for recycling, recovery, or disposal through suitably qualified or licensed contractor and in accordance with governmental regulations. DO NOT PRESSURISE, CUT, WELD, BRAZE, SOLDER, DRILL, GRIND, OR EXPOSE SUCH CONTAINERS TO HEAT, FLAME, SPARKS, STATIC ELECTRICITY, OR OTHER SOURCES OF IGNITION. THEY MAY EXPLODE AND CAUSE INJURY OR DEATH.

SECTION 14 TRANSPORT INFORMATION

LAND (DOT): Not Regulated for Land Transport

LAND (TDG): Not Regulated for Land Transport

SEA (IMDG): Not Regulated for Sea Transport according to IMDG-Code

AIR (IATA): Not Regulated for Air Transport

SECTION 15 REGULATORY INFORMATION

OSHA HAZARD COMMUNICATION STANDARD: When used for its intended purposes, this material is not classified as hazardous in accordance with OSHA 29 CFR 1910.1200.

NATIONAL CHEMICAL INVENTORY LISTING: KECI, TSCA, EINECS, DSL, AICS, PICCS, IECSC

EPCRA: This material contains no extremely hazardous substances.

SARA (311/312) REPORTABLE HAZARD CATEGORIES: None.

SARA (313) TOXIC RELEASE INVENTORY: This material contains no chemicals subject to the supplier notification requirements of the SARA 313 Toxic Release Program.

The Following Ingredients are Cited on the Lists Below: None.

THIS SAFETY DATA SHEET CONTAINS THE FOLLOWING REVISIONS:

No revision information is available.

The information and recommendations contained herein are, to the best of ExxonMobil's knowledge and belief, accurate and reliable as of the date issued. You can contact ExxonMobil to insure that this document is the most current available from ExxonMobil. The information and recommendations are offered for the user's consideration and examination. It is the user's responsibility to satisfy itself that the product is suitable for the intended use. If buyer repackages this product, it is the user's responsibility to insure proper health, safety and other necessary information is included with and/or on the

container. Appropriate warnings and safe-handling procedures should be provided to handlers and users. Alteration of this document is strictly prohibited. Except to the extent required by law, re-publication or retransmission of this document, in whole or in part, is not permitted. The term, "ExxonMobil" is used for convenience, and may include any one or more of ExxonMobil Chemical Company, Exxon Mobil Corporation, or any affiliates in which they directly or indirectly hold any interest.

### SUBSTANCES - TOXIC AND/OR CORROSIVE (NON-COMBUSTIBLE/WATER-SENSITIVE)

SUBSTANCES - TOXIC AND/OR CORROSIVE GUID (NON-COMBUSTIBLE/WATER-SENSITIVE)

### POTENTIAL HAZARDS

#### **HEALTH**

- · TOXIC; inhalation, ingestion or contact (skin, eyes) with vapors, dusts or substance may cause severe injury, burns or death.
- · Reaction with water or moist air will release toxic, corrosive or flammable gases.
- · Reaction with water may generate much heat that will increase the concentration of fumes in the air.
- · Fire will produce irritating, corrosive and/or toxic gases.
- · Runoff from fire control or dilution water may be corrosive and/or toxic and cause pollution.

#### FIRE OR EXPLOSION

- · Non-combustible, substance itself does not burn but may decompose upon heating to produce corrosive and/or toxic fumes.
- Vapors may accumulate in confined areas (basement, tanks, hopper/tank cars etc.).
- · Substance will react with water (some violently), releasing corrosive and/or toxic
- · Contact with metals may evolve flammable hydrogen gas.
- · Containers may explode when heated or if contaminated with water.

#### **PUBLIC SAFETY**

- · CALL Emergency Response Telephone Number on Shipping Paper first. If Shipping Paper not available or no answer, refer to appropriate telephone number listed on the inside back cover.
- As an immediate precautionary measure, isolate spill or leak area in all directions for at least 50 meters (150 feet) for liquids and at least 25 meters (75 feet) for solids.
- · Keep unauthorized personnel away.
- · Stay upwind.
- . Keep out of low areas.
- · Ventilate enclosed areas.

#### PROTECTIVE CLOTHING

- · Wear positive pressure self-contained breathing apparatus (SCBA).
- · Wear chemical protective clothing that is specifically recommended by the manufacturer. It may provide little or no thermal protection.
- Structural firefighters' protective clothing provides limited protection in fire situations ONLY; it is not effective in spill situations where direct contact with the substance is possible.

#### EVACUATION

#### Spill

 See the Table of Initial Isolation and Protective Action Distances for highlighted substances. For non-highlighted substances, increase, in the downwind direction, as necessary, the isolation distance shown under "PUBLIC SAFETY".

#### Fire

· If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also, consider initial evacuation for 800 meters (1/2 mile) in all directions,

#### **EMERGENCY RESPONSE**

#### FIRE

- · Note: Most foams will react with the material and release corrosive/toxic gases. Small Fires . CO. (except for Cyanides), dry chemical, dry sand, alcohol-resistant foam. Large Fires
- · Water spray, fog or alcohol-resistant foam.
- · Move containers from fire area if you can do it without risk.
- · Use water spray or fog; do not use straight streams.
- Dike fire control water for later disposal; do not scatter the material.

#### Fire involving Tanks or Car/Trailer Loads

- Fight fire from maximum distance or use unmanned hose holders or monitor nozzles.
- · Do not get water inside containers.
- · Cool containers with flooding quantities of water until well after fire is out.
- · Withdraw immediately in case of rising sound from venting safety devices or discoloration of tank.
- ALWAYS stay away from tanks engulfed in fire.

#### SPILL OR LEAK

- ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area)
- · All equipment used when handling the product must be grounded.
- Do not touch damaged containers or spilled material unless wearing appropriate protective clothing.
- Stop leak if you can do it without risk.
- A vapor suppressing foam may be used to reduce vapors.
- · DO NOT GET WATER INSIDE CONTAINERS.
- Use water spray to reduce vapors or divert vapor cloud drift. Avoid allowing water runoff to contact spilled material.
- Prevent entry into waterways, sewers, basements or confined areas.

Small Spills . Cover with DRY earth, DRY sand or other non-combustible material followed with plastic sheet to minimize spreading or contact with rain.

· Use clean non-sparking tools to collect material and place it into loosely covered plastic containers for later disposal.

#### FIRST AID

- Move victim to fresh air.
   Call 911 or emergency medical service.
- · Give artificial respiration if victim is not breathing.
- Do not use mouth-to-mouth method if victim ingested or inhaled the substance; give artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device.
- Administer oxygen if breathing is difficult.
- · Remove and isolate contaminated clothing and shoes.
- · In case of contact with substance, immediately flush skin or eyes with running water for at least 20 minutes.
- · For minor skin contact, avoid spreading material on unaffected skin.
- · Keep victim warm and quiet.
- · Effects of exposure (inhalation, ingestion or skin contact) to substance may be delayed.
- Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves.

### **Material Safety Data Sheet**

This MSDS Sheet complies with the style format specified by ANSI Z400.1-1993

#### SECTION 1: CHEMICAL PRODUCT - COMPANY IDENTIFICATION

TETRA Technologies, Incorporated

(281) 367-1983

25025 I-45 North

(800) 327-7817

The Woodlands, Texas 77380

(800) 424-9300 - CHEMTREC (24 Hour Emergency Response)

SUBSTANCE:

Zinc-Calcium Bromide Solution

TRADE NAMES/SYNONYMS:

CHEMICAL FAMILY:

MSDS CREATION DATE:

Inorganic Salt Solution 15 JUN 94

MSDS REVISION DATE:

13 SEPT 01

#### SECTION 2: COMPOSITION, INFORMATION ON INGREDIENTS

COMPONENTS	CAS NUMBER	RTECS NUMBER	PERCENTAGE
Zinc Bromide	7699-45-8	ZH1150000	53-56%
Calcium Bromide	7789-41-5	EV9328000	18-21%
Water	7732-18-5	ZC0110000	29-23%

PROBABLE CONTAMINANT: Zinc hydroxide, zinc oxide, calcium hydroxide.

#### **SECTION 3: HAZARDS IDENTIFICATION**

NFPA RATINGS: (SCALE 0-4):

HEALTH=1, FIRE=0,

REACTIVITY=0

EMERGENCY OVERVIEW: Odorless liquid, light yellow amber color. May cause skin, eye and inhalation irritation.

Solutions containing zinc bromide are considered to be marine pollutants.

#### POTENTIAL HEALTH EFFECTS:

#### INHALATION:

Inhalation of mist may cause irritation. Additional effects may include coughing and breathing difficulties.

#### SKIN CONTACT:

May cause irritation.

#### **EYE CONTACT:**

May cause irritation and tearing. Additional effects may include blurred vision.

#### INGESTION:

May cause yellowing of the skin and eyes, nausea, vomiting, diarrhea, blood in the urine, inability to urinate, low blood pressure, blood disorders, kidney damage, liver damage, convulsions and unconsciousness.

CARCINOGEN STATUS: OSHA: No NTP: No

IARC: No

#### **SECTION 4: FIRST AID MEASURES**

INHALATION: If adverse effects occur, remove to fresh air. Get medical attention immediately.

SKIN CONTACT: Remove contaminated clothing and shoes and wash affected area with soap large amounts of water until no at least 15-20 minutes. Get medical attention if irritation persists. Clean clothing before reuse.

**EYE CONTACT:** Flush eyes with plenty of water at least 15 minutes). Get medical attention immediately.

INGESTION: Drink plenty of water. Do NOT induce vomiting. Get medical attention immediately.

NOTE TO PHYSICIAN: For ingestion, consider gastric lavage.

### **Material Safety Data Sheet**

This MSDS Sheet complies with the style format specified by ANSI Z400.1-1993

Antidote: The following antidote(s) have been recommended:

Calcium disodium edetate/dextrose, intravenous

Calcium disodium edetate/procaine, intramuscular

Sodium chloride, oral, intravenous

The decision as to whether the severity of poisoning requires administration of any antidote and actual dose required should be made by qualified medical personnel. Driesbach, Handbook of Poisoning, 12th Ed.

#### **SECTION 5: FIRE FIGHTING MEASURES**

FIRE AND EXPLOSION HAZARD: Negligible fire hazard when exposed to heat or flame.

**EXTINGUISHING MEDIA:** Dry chemical, carbon dioxide, water spray or regular foam. For larger fires, use water spray, fog or regular foam (1996 North American Emergency Response Guidebook, RSPA P 5800.7, Guide Number 171).

FIREFIGHTING: Move container(s) from fire area if you can without risk. Apply cooling water to sides of containers that are exposed to flames until well after fire is out. Stay away from ends of drums and/or ends of tanks. Extinguish fire using agent suitable for type of surrounding fire and/or chemicals. Do not use water directly on material. Avoid breathing corrosive vapors; keep upwind. Dike area to prevent runoff and contamination of water sources.

HAZARDOUS COMBUSTION PRODUCTS: Thermal decomposition products may include acrid smoke and fumes of zinc oxides and hydrogen bromide.

#### FOR FIREFIGHTING AND OTHER IMMEDIATELY DANGEROUS TO LIFE OR HEALTH

**CONDITIONS:** Any self-contained breathing apparatus that has a full facepiece Any supplied-air respirator that has a full facepiece and is operated in a pressure-demand or other positive-pressure mode in combination with a separate escape supply.

#### **SECTION 6: ACCIDENTAL RELEASE MEASURES**

OCCUPATIONAL SPILL: Do not touch spilled material. Stop leak if you can without risk. For small spills, take up with sand or other absorbent material and place in containers for disposal. Move containers from spill area. For larger spills, dike far ahead of spill for later disposal. Deny entry to nonessential personnel and isolate hazard.

**SOIL SPILL:** Dig holding area such as lagoon, pond or pit for containment. Dike flow of spilled material using soil or sandbags or formed barriers such as polyurethane or concrete. Use cement powder or fly ash to absorb liquid mass. Neutralize spill with slaked lime, sodium bicarbonate or crushed limestone.

WATER SPILL: Neutralize with lime, crushed limestone, or sodium bicarbonate. Use mechanical dredges or lifts to extract immobilized masses of pollution and precipitates. Add suitable agent to neutralize spilled material to pH-7.

#### **SECTION 7: HANDLING AND STORAGE**

Observe all federal, state and local regulations when storing this product. Store in a tightly closed container. Store away from incompatible materials.

#### **SECTION 8: EXPOSURE CONTROLS, PERSONAL PROTECTION**

**EXPOSURE LIMITS:** No occupational exposure limits established by OSHA/ACGIH/NIOSH.

**VENTILATION:** Provide local exhaust ventilation system.

EYE PROTECTION: Wear safety glasses with splash shields or safety goggles/shield. Provide an emergency eye wash

fountain and quick drench shower in the immediate work area.

**CLOTHING:** Wear appropriate chemical resistant clothing. **GLOVES:** Wear appropriate chemical resistant clothing.

#### **SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES**

### **Material Safety Data Sheet**

This MSDS Sheet complies with the style format specified by ANSI Z400.1-1993

DESCRIPTION:

Odorless, colorless to vellow liquid.

MOLECULAR FORMULA:

ZnBr₂ for zinc bromide, CaBr₂ for calcium bromide

**MOLECULAR WEIGHT:** 

225.19 for zinc bromide, 199.8 for calcium bromide

**MELTING POINT:** 

Not applicable

**BOILING POINT:** SPECIFIC GRAVITY:

313°F (156°C) for 55% solution ZnBr₂, 19% CaBr₂, and 26% water 2.3 for solution 55% ZnBr₂, 19% CaBr₂, and 26% water at 25 °C

nH:

5-6 (1:10 dilution)

WATER SOLUBILITY

Miscible with water in all proportions.

**SOLVENT SOLUBILITY:** 

Miscible with alcohol, ether, acetone, ammonium hydroxide

#### **SECTION 10: STABILITY AND REACTIVITY**

**REACTIVITY:** Stable under normal temperatures and pressures. Can evolve hydrogen bromide and/or bromine when strongly heated. Can evolve bromine under strongly oxidizing conditions.

CONDITIONS TO AVOID:

None known.

**INCOMPATIBILITIES:** 

Metals. Mixtures with potassium or sodium produce a strong explosion on impact.

**OXIDIZING AGENTS:** 

Yields bromine gas.

**HAZARDOUS DECOMPOSITION:** Products may include acrid smoke and fumes of zinc oxides and hydrogen bromide **POLYMERIZATION:** Hazardous polymerization has not been reported to occur under normal temperatures and pressures.

#### **SECTION 11: TOXICOLOGICAL INFORMATION**

**TOXICITY DATA:** None established for zinc-calcium bromide. The systemic effects of bromide ion are chiefly mental: drowsiness, irritability, vertigo, confusion, mania, hallucinations and coma. Other effects include skin rashes, neurological signs, sensory disturbances, and increased spinal fluid pressures.

CARCINOGEN STATUS: None.

LOCAL EFFECTS:

Zinc-calcium is an eye, mucous membrane and skin irritant.

ACUTE TOXICITY LEVEL: Moderately toxic by ingestion, slightly toxic by dermal absorption.

TARGET EFFECTS: Sensitizer - dermal. Poisoning may also affect the kidneys, and the respiratory and digestive systems.

INHALATION:

High concentrations of zinc bromide mists may produce irritation, labored breathing and coughing.

#### SKIN CONTACT:

Direct contact may cause irritation, redness and pain. Repeated or prolonged exposure to zinc salts may cause dermatitis with erythematous, papular, and granulomatous reactions in susceptible individuals.

#### **EYE CONTACT:**

Direct contact may cause redness, pain, blurred vision, and conjunctivitis.

#### **INGESTION:**

Ingestion of large amounts of astringent zinc salts may cause a burning sensation in the mouth and throat, nausea, vomiting, diarrhea, hemolysis, hematuria, kidney damage with anuria, liver damage with jaundice, and possibly hypotension, convulsions, and unconsciousness. Repeated or prolonged ingestion of zinc salts may cause digestive and/or renal disorders.

#### **SECTION 12: ECOLOGICAL INFORMATION**

No data available.

#### **SECTION 13: DISPOSAL INFORMATION**

### **Material Safety Data Sheet**

This MSDS Sheet complies with the style format specified by ANSI Z400.1-1993

Observe all federal, state and local regulations when disposing of this substance.

#### **SECTION 16: OTHER INFORMATION**

Individuals handling this product should be informed of the recommended safety precautions and should have access to this information.

This information relates to the specific product designated and may not be valid for such product used in combination with any other materials or in any other processes. Such information is to the best of our knowledge and belief, accurate and reliable as of the date compiled. However, no representation, warranty or guarantee is made as to its accuracy, reliability, or completeness. It is the user's responsibility to satisfy themselves as to the suitability and completeness of such information for their own particular use. We do not accept liability for any loss or damage that may occur from the use of this information nor do we offer warranty against patent infringement.

TETRA Technologies, Inc. reserves the right to refuse shipment of this product to any consumer who fails to demonstrate the ability to consistently handle and use it safely and in compliance with all applicable laws, rules and regulations. Such demonstration may require on-site inspection of any or all storage, processing, packaging and other handling systems that come in contact with it.

#### General

General

Take proper precautions to ensure your own health and safety before attempting rescue and providing first aid. For specific information refer to the Emergency Overview in Section 3 of this MSDS.

Skin

Immediately remove excess chemical and contaminated clothing thoroughly wash contaminated sign with mild soap and water. If irritation persists after washing, seek medical attention. Thoroughly clean contaminated clothing before reuse; discard contaminated leather goods (gloves, shoes, belts, wallets, etc.).

Immediately flush the eyes with large amounts of clean low-pressure water for at least 15 minutes, occasionally lifting the upper and lower lids. If pain or irritation persists, promptly obtain medical attention with the lower lide. If pain or irritation persists, promptly obtain medical attention.

Material Safety Data Sheet

MSDS No.: Variant: Version No: Validation Date:

3362 ·U.S:A.-EN

1.1.1

### TRIETHYLENE GLYCOL, INDUSTRIAL

#### Flammable Properties

Classification
OSHA/NFPA Class IIIB combustible liquid.

Flash Point: 157 °C (314.6 °F) Pensky-Martins Closed Cup

Auto-Ignition Temperature 375 °C (707 °F)

Lower Flammable Limit 0.9 vol%

Upper Flammable Limit 9.2 vol%

#### Extinguishing Media

Suitable: SMALL FIRE: Use dry chemicals, CO2, water spray or alcohol-resistant foam LARGE FIRE: Use water spray, water tog or foam. DO NOT use straight streams. Water may be ineffective, but should be used to keep fire-exposed containers cool.

#### Protection of Firefighters

Protective Equipment/Clothing: Wear an approved positive pressure self-contained breathing apparatus and firefighter turnout gear.

Fire Fighting Guidance: Airbome mists from this substance are a moderate fire and explosion hazard. Fine sprays/mists and per fine sprays/mists are a moderate fire and explosion hazard. Fine sprays/mists are may be combustible at temperatures below normal flash point. Avoid sparks, heat, and open flame. Vapors can travel to a source of ignition and flash back. Move containers from fire area if you can do it without risk. Fight/fire from maximum distance or use unmanned hose holders or monitor nozzles. Cool containers with flooding quantities of water until well after the is out. Withdraw immediately in case of rising sound from venting safety devices or discoloration of tank. Always stay away from tanks engulfed in fire. For massive fire, use unmanned hose holders or monitor nozzles; if this is impossible withdraw from area and let fire burn.

Hazardous Combustion Products: Carbon oxides (CO, CO2) Gives off irritating and/or toxic gases in a fire.

#### SECTION 6: ACCIDENTAL RELEASE MEASURES

#### Release Response

Contain spill with dike to prevent entry into sewers or waterways. For large spills, dike and pump into properly labeled containers for reclamation or disposal. For small spills, soak up with absorbent material and place in properly labeled containers for disposal. All recovered material should be packaged, labeled, transported and disposed of or reclaimed in conformance with good engineering practices. Reclaim where we possible.

#### SECTION 7: HANDLING AND STORAGE

#### Handling

Containers, even those that have been emptied, will retain product residue and vapor and should be handled as if they were full. Do not eat, drink or smoke in areas where this material is used. After handling, always wash hands thoroughly with soap and water. Do not handle near heat, sparks, or flame. Avoid contact with incompatible agents. Use only with adequate ventilation/personal protection. Avoid contact with eyes, skin and clothing. Do not enter storage area unless adequately ventilated. Metal containers involved in the transfer of this material should be grounded and bonded.

#### Storage

Store containers in a cool, dry, ventilated, fire resistant area away from sources of ignition and incompatible materials. Keep

TRIETHYLENE GLYCOL, INDUSTRIAL

container lightly closed and properly labeled.

#### SECTION 8: EXPOSURE CONTROLS AND PERSONAL PROTECTION

#### Engineering Controls

Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits.

#### Personal Protection

<u>Inhalation</u> A respiratory protection program that meets OSHA's 29 CFR 1910.194 or ANSI ZBB.2 requirements must be followed whenever workplace conditions warrant respirator use.

Skin Wear chemical resistant gloves such as rubber, neoprene or vinyl. Appropriate protective clothing should be worn to prevent skin contact.

Eye protection such as chemical splash goggles and/or face shield must be worn when possibility exists for eye contact one to splashing or spraying liquid, airborne particles, or vapor.

#### Additional Remarks

Selection of appropriate personal protective equipment should be based on an evaluation of the performance and characteristics of the protective equipment relative to the task(s) to be performed, conditions present, duration of use, and the hazards and/or potential hazards that may be encountered during use. Emergency eye wash fountains and safety the showers should be available in the immediate vicinity of any potential exposure. Use good personal hygiene practices, if wash hands before eating, drinking, smoking, or using toilet facilities. Promptly remove solled clothing/wash thoroughly the before reuse.

Validation Date:

### TRIETHYLENE GLYCOL, INDUSTRIAL

This substance appears to be of low toxicity, except for possible mild irritant effects in humans. A high dose may produce central nervous system depression, but there are no reports of adverse health effects from occupational exposure. (See Component Toxicity Information).

#### COMPONENT INFORMATION :

Triethylene glycol 112-27-6

Acute Toxicity - Lethal Doses

LD50 (Oral) Rat

17 GM/KG

LD50 (Skin)

Rabbit

> 20 ML/KG

Carcinogenicity

Not listed by IARC, NTP, or OSHA.

Diethylene glycol 111-46-6.

Acute Toxicity - Lethal Doses

LD50 (Oral)

Rate 12,600 MG/KG BWT. Fig. 12.

LD50 (Skin)

11,900 MG/KG

Acute Toxicity - Effects

Inhalation May produce symptons of central nervous system depression including headache, dizziness, nausea, loss of ..... sense of balance, drowsiness, visual disturbances, unconsciousness and sense of balance, drowsiness, visual ..... dissturbances, unconsciousness and death. To Martin Special Section 1

Repeated Dose Toxicity

Diethylene glycol given to rats in the diet for two years caused bladder stones, tumors, and kidney and liver damage. These effects were probably due to contaminating ethylene glycol, and the bladder stones were formed from oxalate crystals. Carland Lat. The Conference of the contract of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of the conference of t

Reproductive Effects

There are conflicting results in the literature about the reproductive effects of diethylene glycol in animals. It did not affect .... reproduction when given orally to rats, but another report stated that it may have affected either male or female fertility or both, because no pregnancies occurred when both sexes were exposed orally. Diethylene glycol had no effect on fertility at a level of 2.5% in the drinking water of mice. However, another preliminary study in mice concluded that it may be a suspect reproductive hazard. Acute Toxicity - Lethal Doses

LD50 (Oral)

5890 - 13,400 MG/KG BWT

NOAEL

Rabbit

> 3549 MG/KG BWT (SKIN)

Irritation

Skin May be initating to the skin. Not expected to be a sensitizer. No significant signs or symptoms indicative of any health hazard are expected to occur as a result of skin absorption exposure.

Eye May cause minor eye irritation. Effects of eye irritation are reversible.

Not expected to be a sensitizer.

Target Organ Effects

Central nervous system effects. Blood (metabolic acidosis). Respiratory system. Cardiovascullar system. Kidneys: 1997 1997

Repeated Dose Toxicity

If exposures are sufficiently high to cause accumulation of calcium oxalate crystals, kidney pathology may occur. In male 1912 to 1919 rats, crystal nephropathy has been seen after dietary administration of 500 mg/kg/day bwt for 16 weeks; whereas no effects were seen in rais that ingested 200 mg/kg/day bwf for 2 years or in several animal species that inhaled 12 mg/m3 for 3 months. Human exposures at occupational relevant concentrations are unlikely to cause crystal nephropathy.

Reproductive Effects

No evidence of adverse effects on reproductive organs or fertility in rats and rabbits have occurred from ethylene glycol and in exposure. Mice exposed to doses considerably higher than those associated with developmental effects or kidney effects in 

Developmental Effects

Doses of ethylene glycol that result in high levels of the metabolite glycolic acid induce developmental/teratogenic effects in " - 👬 🤄 rats and mice, although at doses greater than those associated with kidney effects in rats. Human exposure is not expected that are to generate sufficient levels of glycolic acid; therefore, no developmental effects are expected in humans.

Programme and the second

Ethylene glycol was not carcinogenic in two year studies in rats and mice. This material is not classified as a carcinogenic was Not listed by IARC, NTP, or OSHAL

.. . ...

Commence of the Commence of

Human acute toxicity has three recognized stages: Stage 1. (0.5 to 12 hours post ingestion) may include inebriation, nausea . . . . and vomiting, metabolic acidosis, and CNS depression. Stage 2. (12-24 hours) cardiopulmonary effects include : tachycardia, hypertension, severe metabolic acidosis with hyperventilation, hypoxia, congestive heart failure and adult respiratory distress syndrome. Stage 8, (24-72 hours) renal failure. Ethylene glycol may also produce a local irritation effecton the digestive system, and cause pain and bleeding.

### TRIETHYLENE GLYCOL. INDUSTRIAL ...

This material is not classified as harmful or toxic to fish.

#### Environmental Fate and Pathway

Expected to exist solely as a vapor in the ambient atmosphere. Vapor-phase is degraded in the atmosphere by reaction with photochemically produced hydroxyl radicals. Expected to have high mobility in soils. It is not expected to adsorb onto soils or sediments. Hydrolysis is not expected to be an important factor in the environmental fate process for this material.

Persistance and Degradability

Biodegradation: This material is expected to be readily biodegradable. Bioaccumulation: This material is not expected to bioaccumulate,

#### COMPONENT INFORMATION

Triethylene glycol 112-27-6

#### Ecotoxicity

This material is highly soluble in water. Laboratory toxicity tests indicate that is not significantly toxic to fish and aquatic invertebrates, although amphibians may be more sensitive. Wildlife species may be more susceptible since mammals and birds do not readily metabolize this material. The odor and flavor of this material may attract some wildlife and cause them to consume spilled material.

#### Environmental Fate and Pathway

No Data Available.

#### Other Adverse Effects

No Data Available.

Diethylene glycol 111-46-6

#### Ecotoxicity ·

Diethylene glycol (DEG) is highly soluble in water. Laboratory tests indicate that DEG is not significantly toxic to fish or aquatic invertebrates. While there is no wildlife toxicity data available on DEG, laboratory tests on rats would indicate that it should not be highly toxic to mammals.

#### Material Safety Data Sheet

MSDS No .: Variant: Version No:

3362 U.S.A.-EN

Validation Date:

### TRIETHYLENE GLYCOL. INDUSTRIAL

Mobile in soil. Not expected to volatilize from surface waters or solls. Not likely to adsorb to suspended solids and sediment in water. Environmental half-life of 0.35 to 24 days in soil, air, surface and ground water. Not expected to undergo hydrolysis. Undergoes photooxidation with hydroxyl radicals in air with a half-life of 8.8 to 83 hours,

Persistance and Degradability

Biodegradation: Reported biodegradation studies show ethylene glycol with 97% biodegradation after 20 days, and 96% biodegradation after 28 days. Biodegradable under aerobic conditions.

Bioaccumulation: BCF = 0.21 - 0.61 (crawfish) BCF = 10.0 (fish) This material is not expected to bioaccumulate.

SECTION 13: DISPOSAL CONSIDERATIONS

Dispose of all waste and contaminated equipment in accordance with all applicable federal, state and local health and environmental regulations. Recovery and reuse, rather than disposal, should be the ultimate goal of handling efforts: The materials resulting from clean-up operations may be hazardous wastes and therefore, subject to specific regulations.

#### SECTION 14: TRANSPORT INFORMATION

#### Special Requirements .

If you reformulate or further process this material, you should consider re-evaluation of the regulatory status of the components listed in the composition section of this sheet, based on final composition of your product.

SARA 311/312

Based upon available information, this material is classified as the following health and/or physical hazards according to Section 311 & 312:

Immediate (Acute) Health Hazard. Delayed (Chronic) Health Hazard.

**SARA 313** 

This material does not contain any chemical components with known DAS numbers that exceed the De Minimis reporting levels established by SARA Title III, Section 313 and 40 CFR 572.

Component

Reporting Threshold

#### State Reporting "

This material is not known to contain any chemicals currently listed as carcinogens or reproductive toxins under California.

Proposition 65 at levels which would be subject to the proposition.

#### SECTION 16: OTHER INFORMATION

Latest Revision(s)

Revised Section(s): 3 5 11 14 15 HMIS rating Conversion to SAP template. March 1 2004

#### DISCLAIMER OF RESPONSIBILITY

The information on this MSDS was obtained from sources which we believe are reliable. However, the information is provided without any warranty, expressed or implied, regarding its correctness. Some information presented and conclusions drawn herein are from sources other than direct test data on the substance itself. The conditions or methods of handling, storage, use and disposal of the product are beyond our control and may be beyond our knowledge. For this and other reasons, we do not assume responsibility and expressly disclaim liability for loss, damage, or expense arising out of or in any way connected with handling, storage, use, or disposal of this product. If the product is used as a component in another product, this MSDS information may not be applicable.

Numerical Data Presentation

The presentation of numerical data, such as that used for physical and chemical properties and toxicological values, is expressed using a comma (,) to separate digits into groups of three and a period (.) as the decimal marker. For example, 1,234.56 mg/kg = 1 234,56 mg/kg

Language Translations

The information presented in this document has been translated from English by a vendor Lyondell believes to be reliable.

Lyondell and its vendor have made a good-faith effort to verify the accuracy of the translation, but assume no responsibility for any errors that may have occurred. Please refer to our web sites (www.lyondell.com and www.equistarchem.com) for the original document written in English.

# **ExxonMobil Chemical Company A Division of Exxon Mobil Corporation**

DATE PREPARED: AUG 14, 2001 MSDS NO.: 91715000

**JAYFLEX-TINTM** 

#### SECTION 1 CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

**PRODUCT NAME: JAYFLEX-TINTM** 

CHEMICAL NAME:

1,2,4-Benzenetricarboxylic acid,tri-isononyl ester

53894-23-8

**CHEMICAL FAMILY:** 

Trimellitate Ester

PRODUCT DESCRIPTION:

Clear liquid with mild odor.

#### **CONTACT ADDRESS:**

ExxonMobil Chemical Company P.O. Box 3272, Houston, Texas 77253-3272

** EMERGENCY TELEPHONE NUMBERS: (24 Hours)

** CHEMTREC (800) 424-9300 **

** ExxonMobil Chemical Company (800) 726-2015 **

NON EMERGENCY TELEPHONE NUMBERS : (8am-5pm M-F)

FOR GENERAL PRODUCT INFORMATION CALL: (281) 870-6000 FOR HEALTH AND MEDICAL INFORMATION CALL: (281) 870-6884

#### SECTION 2 COMPOSITION/INFORMATION ON INGREDIENTS

This product is not hazardous as defined in 29 CFR1910.1200

#### **SECTION 3 HAZARDS IDENTIFICATION**

#### **POTENTIAL HEALTH EFFECTS**

#### **EYE CONTACT:**

Slightly irritating but does not injure eye tissue.

#### **SKIN CONTACT:**

Page: 1/7

# **ExxonMobil Chemical Company**A Division of Exxon Mobil Corporation

DATE PREPARED: AUG 14, 2001 MSDS NO.: 91715000

#### JAYFLEX-TINTM

Low order of toxicity.
Frequent or prolonged contact may irritate.

#### INHALATION:

Negligible hazard at ambient temperature (-18 to 38 Deg C; 0 to 100 Deg F)

#### INGESTION:

Minimal toxicity.

#### **SECTION 4 FIRST AID MEASURES**

#### **EYE CONTACT:**

Flush eyes with large amounts of water until irritation subsides. If irritation persists, get medical attention.

#### SKIN CONTACT:

Flush with large amounts of water; use soap if available.

#### INHALATION:

Using proper respiratory protection, immediately remove the affected victim from exposure. Administer artificial respiration if breathing is stopped. Keep at rest. Call for prompt medical attention.

#### INGESTION:

First aid is normally not required.

#### **SECTION 5 FIRE-FIGHTING MEASURES**

FLASH POINT:

> 200 Deg F.

FLAMMABLE LIMITS:

NOTE: Not Applicable

**AUTOIGNITION TEMP.:** NOTE: Not Applicable

#### **GENERAL HAZARD**

Low Hazard, liquid can burn upon heating to temperatures at or above the flashpoint.

Static Discharge, material can accumulate static charges which can cause an incendiary electrical discharge .

"Empty" containers retain product residue (liquid and/or vapor) and can be dangerous. DO NOT pressurize, cut, weld, braze, solder, drill, grind, or expose such containers to heat, flame, sparks, static electricity, or

Page: 2/7

# **ExxonMobil Chemical Company**A Division of Exxon Mobil Corporation

DATE PREPARED: AUG 14, 2001 MSDS NO.: 91715000

#### **JAYFLEX-TINTM**

other sources of ignition; THEY MAY EXPLODE AND CAUSE INJURY OR DEATH. Empty drums should be completely drained, properly bunged and promptly returned to a drum reconditioner, or properly disposed of.

#### FIRE FIGHTING

Use water spray to cool fire exposed surfaces and to protect personnel. Isolate "fuel" supply from fire.
Use foam, dry chemical, or water spray to extinguish fire.

#### **DECOMPOSITION PRODUCTS UNDER FIRE CONDITIONS**

No unusual

#### SECTION 6 ACCIDENTAL RELEASE MEASURES

conformity to local disposal regulations.

#### LAND SPILL

Eliminate sources of ignition. Prevent additional discharge of material, if possible to do so without hazard. For small spills implement cleanup procedures; for large spills implement cleanup procedures and, if in public area, keep public away and advise authorities. Also, if this product is subject to CERCLA reporting (see Section 15 REGULATORY INFORMATION) notify the National Response Center.

Prevent liquid from entering sewers, watercourses, or low areas. Contain spilled liquid with sand or earth.

Recover by pumping or with a suitable absorbent.

If liquid is too viscous for pumping, scrape up.

Consult an expert on disposal of recovered material and ensure

#### **WATER SPILL**

Remove from surface by skimming or with suitable adsorbents. If allowed by local authorities and environmental agencies, sinking and/or suitable dispersants may be used in non-confined waters. Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations.

#### SECTION 7 STORAGE AND HANDLING

#### **ELECTROSTATIC ACCUMULATION HAZARD**

Yes, use proper bonding and/or grounding procedure. Additional information regarding safe handling of products with static accumulation potential can be ordered by contacting the American Petroleum

Page: 3/7

Ambient

LOADING/UNLOADING TEMPERATURE

Ambient.

STORAGE/TRANSPORT PRESSURE

mmHg:

Deg F:

Atmospheric

LOADING/UNLOADING VISCOSITY

cSt:

489.0 at 68 Deg. F

#### STORAGE AND HANDLING:

Keep container closed. Handle and open containers with care. Store in a cool, well ventilated place away from incompatible materials.

Do NOT handle or store near an open flame, heat or other sources of ignition. Protect material from direct sunlight.

Material will accumulate static charges which may cause an electrical spark (ignition source). Use proper bonding and/or grounding procedures.

Do NOT pressurize, cut, heat, or weld containers. Empty product containers may contain product residue. Do NOT reuse empty containers without commercial cleaning or reconditioning.

#### SECTION 8 EXPOSURE CONTROLS/PERSONAL PROTECTION

#### **EXPOSURE CONTROLS**

Ventilation should be provided to control worker exposures and prevent health risk.

#### PERSONAL PROTECTION

For open systems where contact is likely, wear safety glasses with side shields, long sleeves, and chemical resistant gloves.

Where contact may occur, wear safety glasses with side shields.

Where overexposure by inhalation may occur and engineering, work practice or other means of exposure reduction are not adequate, approved respirators may be necessary.

o Natural rubber, butyl rubber and vinyl are not suitable protective materials; neoprene is recommended. EXPOSURE GUIDELINES:

No workplace exposure limits have been established for this product.

JAYFLEX-TINTM

## **SECTION 12 ECOLOGICAL INFORMATION**

No specific ecological data are available for this product. Please refer to Section 6 for information regarding accidental releases and Section 15 for regulatory reporting information.

#### **SECTION 13 DISPOSAL CONSIDERATIONS**

Please refer to Sections 5, 6 and 15 for disposal and regulatory information.

#### **SECTION 14 TRANSPORT INFORMATION**

#### **DEPARTMENT OF TRANSPORTATION (DOT):**

This product is not DOT regulated.

#### SECTION 15 REGULATORY INFORMATION

#### TSCA:

This product is listed on the TSCA Inventory at CAS Registry Number 53894-23-8

#### **CERCLA:**

If this product is accidentally spilled, it is not subject to any special reporting under the requirements of the Comprehensive Environmental Response, Compensation and Liability Act. We recommend you contact local authorities to determine if there may be other local reporting requirements.

#### **SARA TITLE III:**

Under the provisions of Title III, Sections 311/312 of the Superfund Amendments and Reauthorization Act, this product is classified into the following hazard categories:
Not Hazardous.

#### **SECTION 16 OTHER INFORMATION**

Page: 6/7

# **ExxonMobil Chemical Company**A Division of Exxon Mobil Corporation

DATE PREPARED: AUG 14, 2001 MSDS NO.: 91715000

**JAYFLEX-TINTM** 

#### HAZARD RATING SYSTEMS:

This information is for people trained in:
National Paint & Coatings Association's (NPCA)
Hazardous Materials Identification System (HMIS)
National Fire Protection Association (NFPA 704)
Identification of the Fire Hazards of Materials

•	NPCA-HMIS	NFPA 704	KEY
HEALTH	1	0	4 = Severe
FLAMMABILI	TY 1	1	3 = Serious
REACTIVITY	0	0	2 = Moderate
			1 = Slight
			0 = Minimal

CAUTION: HMIS ratings are based on a 0-4 rating scale with 1 representing minimal hazards or risks, and 4 representing significant hazards or risks. Recommended HMIS ratings should not be used in the absence of a fully implemented HMIS hazard communication program.

#### **REVISION SUMMARY:**

Since May 17, 2000 this MSDS has been revised in Section(s): 5, 6, 7, 9

REFERENCE NUMBER: HDHA-F-00055 SUPERSEDES ISSUE DATE: May 17, 2000

This information relates to the specific material designated and may not be valid for such material used in combination with any other materials or in any process. Such information is to the best of our knowledge and belief, accurate and reliable as of the date compiled. However, no representation, warranty or guarantee is made as to its accuracy, reliability or completeness. It is the users responsibility to satisfy himself as to the suitability and completeness of such information for his own particular use. We do not accept liability for any loss or damage that may occur from the use of this information nor do we offer warranty against patent infringement.

Safety Data Sheet Status: Released

Version: 1.1 Date: 08/03/2008

#### 1. PRODUCT AND COMPANY IDENTIFICATION

#### **DDSA**

**Product Information: DDSA** 

Company Identification:

Milliken Chemical P.O. Box P.O. Box 1926 Spartanburg, SC, 29303 USA 1-864-472-9041 msds@milliken.com

Chemtrec:

1-800-424-9300 (Chemtrec - US) 1-703-527-3887 (International)

#### 2. HAZARDS IDENTIFICATION

**Emergency Overview** 

The health hazards of this product should be low under normal industrial and commercial uses. May cause skin or eye irritation after repeated or prolonged

contact.

**HFRP Rating** 

Health 1 Flammability 1 Reactivity 0 Personal protection

Eye

May cause eye irritation.

Inhalation

Prolonged or excessive inhalation may cause coughing or sneezing. Prolonged

inhalation of high concentrations may damage respiratory system.

Skin

Prolonged or repeated skin contact may cause irritation. May cause skin irritation

with discomfort or rash.

Ingestion

Harmful if swallowed.

Remarks

The product contains a small amount of sensitizing substance which may

provoke an allergic reaction among sensitive individuals.

Material: 3000004305

Safety Data Sheet Status: Released

Version: 1.1 Date: 08/03/2008

#### 3. COMPOSITION / INFORMATION ON INGREDIENTS

Product name CAS Number Amount 2,5-Furandione 108-31-6 0.1 %

2,5-Furandione, dihydro-3-(tetrapropenyl)- 26544-38-7 > 98.0 %

4. FIRST AID MEASURES

Eye Flush thoroughly with water for at least 15 minutes. Get medical assistance.

Inhalation Under normal conditions of intended use, this material is not expected to be

an inhalation hazard. When breathing is difficult, properly trained personnel may assist affected person by administering 100% oxygen. Get medical

attention if any discomfort continues.

Skin Wash skin thoroughly with soap and water for several minutes. Immediately

remove contaminated clothing. Get medical attention if any discomfort

continues.

Ingestion Give one or two glasses or water if patient is alert and able to swallow. Seek

immediate medical attention. Do not induce vomiting.

5. FIRE-FIGHTING MEASURES

Flammable Properties

Flash Point 174 °C

Fire Fighting Media Use water fog, alcohol-resistant foam, dry chemical or carbon dioxide (CO2)

to extinguish flames.

involved materials. Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots.

and in enclosed spaces, SCBA.

Unusual Fire & Explosion

Hazards

No unusual fire or explosion hazards noted.

Decomposition may produce fumes, smoke, oxides of carbon and

hydrocarbons.

6. ACCIDENTAL RELEASE MEASURES

Safety Advice Wear appropriate personal protective equipment.

Spill Cleanup Methods Dam and absorb spillages with sand, earth or other non-combustible material.

Ensure that waste and contaminated materials are collected and removed from the work area as soon as possible in a suitably labeled container. In case of spills, beware of slippery floors and surfaces. All waste materials should be packaged, labeled and transported in accordance with all national,

state/provincial, and local requirements.

Material: 300004305

Safety Data Sheet Status: Released

Version: 1.1 Date: 08/03/2008

7. HANDLING AND STORAGE

Handling No specific hygiene procedures noted, but good personal hygiene practices

are always advisable, especially when working with chemicals. Wash promptly with soap and water if skin becomes contaminated. Practice good housekeeping. Provide adequate ventilation if fumes or vapors are

generated. Avoid prolonged contact with skin or eyes.

Handling / Physical Hazards Avoid extreme temperatures.

Storage Precautions Store in a cool, dry place with adequate ventilation. Keep away from

incompatible materials, open flames, and high temperatures. Keep containers

tightly closed.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Engineering Controls No special requirements under ordinary conditions of use and with adequate

ventilation. Provide eyewash station and safety shower.

Eye protection Wear necessary protective equipment. Avoid contact with eyes and

prolonged skin contact. Where contact with this material is likely, chemical

goggles are recommended.

Skin and Body Protection Wash promptly with soap and water if skin becomes contaminated. Wear

protective gloves to minimize skin contamination. When prolonged or frequently repeated contact could occur, use protective clothing impervious to

this material.

Personal protection Always observe good personal hygiene measures, such as washing after

handling the material and before eating, drinking, and/or smoking. Routinely

wash work clothing and protective equipment to remove contaminants.

Respiratory Protection No protection is ordinarily required under normal conditions of use and with

adequate ventilation. In case of inadequate ventilation and work of brief

duration, use suitable respiratory equipment.

9. PHYSICAL AND CHEMICAL PROPERTIES

State of Matter

Viscous

Form

Viscous Liquid

Color

Pale yellow

10. STABILITY AND REACTIVITY	
Stability	Material is stable under normal conditions.
Conditions to Avoid	Avoid contact with oxidizing agents. Water, moisture.
Hazardous Polymerization	Hazardous polymerization will not occur.
Hazardous decomposition products	Decomposition will not occur if handled and stored properly.
11. TOXICOLOGICAL INFORMATIO	N
No data available.	
12. ECOLOGICAL INFORMATION	
No data available.	
13. DISPOSAL CONSIDERATIONS	
Disposal Recommendations	Dispose of waste at an appropriate treatment and disposal facility in accordance with applicable laws and regulations, and product characteristics at time of disposal. Recycle empty drums at an appropriate facility in accordance with current applicable laws and regulations, and product characteristics at time of disposal. Ensure drums are tightly sealed.
14. TRANSPORT INFORMATION	
14. TRANSPORT INFORMATION	
Transport classifications may vary by oregulations.	container volume and may be influenced by regional or country variations in
15. REGULATORY INFORMATION

Cleaned By:	Date 8-5 - 08	release CES Environmental from any allegations the CES Environmental S	Services, Inc., Cleaning Divi t the equipment was imprope	esponsibility of the customer, and they hereby sion, from any responsibility for daims arising erly cleaned, resulting in damage or loss. on, is in no manner responsible for any or materials left in their yard.
Inspected By:	Date	Print Name:		Date
		Signature:		

- A. ALL DRIVERS MUST:
- 1. Follow consignee safety requirements.
- 2.Deliver only within the hours shown.
- 3. Not enter plants with children or pets.
- B. BULK AND PACKAGE TRANSFERS
- 1. Zero defect delivery card required for all deliveries. (Bulk only)
- 2.Do not accept shipment if discharge lines on all loaded trailer compartments are not tagged with product labels. (Bulk only)
- 3.bo not unload if consignee instructions are different from those onthis bill of lading. Call your dispatcher for instructions.
- 4. When breaking hose lines do not spill chemical on ground. Brain and clear all lines. Use bucket or other device to collect drippings. Plug and cap all hoses.
- 5.All chemical spills must be reported to consignee, dispatcher and shipper.
- 6. Obtain written authorization for hook up and unloading at consigners plant when required.
- 7. Minimum Personal Safety Requirements

Locate Eye Wash and Safety Shower

Hard Hat

Chemical Resistant Rubber Gloves

Appropriate Footwear

No Facial Hair

Chemical Goggles Safety Glasses

Long Sleeves Safety Glasses
Face Shield and Chemical Resistant clothing when Transferring Corrosive Chemicals

- 8. Truck to be equipped with at least 40 feet of hose for each product plus jumper hose if required. All hoses must be clean and dry.
- 9.Do not air unload flammables or combustibles. Other products may be air unloaded unless pump is specified on font of this bill of lading. (Bulk only)
- 10. Truck to be equipped with grounding cables as per DOT regulations. (Bulk only)

The Eight zero defect delivery elements are:

- 1. The right product.
- 2. The right quantity.
- 3.In the right tank.
- 4.At the right time.
- 5.0sing the right Safety Procedure.
- 6. Following the right security Procedure.
- 7. With no contamination.
- B. With no spills.

## **HEAVY METAL REMOVAL**

**WARNING!** Irritating to eyes and skin. Do not get in eyes, on skin, on clothing. Do not take internally. Use with adequate ventilation. In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. After contact with skin, wash immediately with plenty of water. Wear suitable protective clothing.

ATTENTION: For more information refer to the material safety data sheet. Empty containers may contain residual product. DO NOT reuse containers unless properly reconditioned.

#### SECTION 1 PRODUCT AND COMPANY IDENTIFICATION

#### **OGA 72308**

Company Identification
Chevron Oronite Company LLC
P. O. Box 2449
Houston, TX 77252-2449
United States of America

#### **Product Information**

MSDS Requests: (877) 512-7200 Technical Information: (877) 512-7200

#### SECTION 2 COMPOSITION/INFORMATION ON INGREDIENTS

COMPONENTS	CAS NUMBER	AMOUNT	
Solvent naphtha, light aromatic	64742-95-6	43 %weight	
1,2,4-trimethylbenzene	95-63-6	< 14 %weight	
Xylene	1330-20-7	< 2 %weight	

#### SECTION 3 HAZARDS IDENTIFICATION

#### **EMERGENCY OVERVIEW**

Clear to light yellow liquid with petroleum odor.

- COMBUSTIBLE LIQUID AND VAPOR
- CAUSES SKIN IRRITATION
- MAY CAUSE RESPIRATORY TRACT IRRITATION IF INHALED
- INHALATION MAY CAUSE NERVOUS SYSTEM EFFECTS
- TOXIC TO AQUATIC ORGANISMS

#### **IMMEDIATE HEALTH EFFECTS**

Eye: Not expected to cause prolonged or significant eye irritation.

**Skin:** Contact with the skin causes irritation. Skin contact may cause drying or defatting of the skin. Symptoms may include pain, itching, discoloration, swelling, and blistering. Contact with the skin is not expected to cause an allergic skin response. Not expected to be harmful to internal organs if absorbed through the skin.

Ingestion: May be irritating to mouth, throat, and stomach. Symptoms may include pain, nausea,

Revision Number: 3 Revision Date: 07/19/2002 1 of 8

vomiting, and diarrhea.

Inhalation: The vapor or fumes from this material may cause respiratory irritation. Symptoms of respiratory irritation may include coughing and difficulty breathing. Breathing this material at concentrations above the recommended exposure limits may cause central nervous system effects. Central nervous system effects may include headache, dizziness, nausea, vomiting, weakness, loss of coordination, blurred vision, drowsiness, confusion, or disorientation. At extreme exposures, central nervous system effects may include respiratory depression, tremors or convulsions, loss of consciousness, coma or death.

#### **DELAYED OR OTHER HEALTH EFFECTS:**

Cancer: None of the components in this material are listed as carcinogens by IARC, NTP, or OSHA.

#### SECTION 4 FIRST AID MEASURES

Eye: No specific first aid measures are required. As a precaution, remove contact lenses, if worn, and flush eyes with water.

**Skin:** Wash skin with water immediately and remove contaminated clothing and shoes. Get medical attention if any symptoms develop. To remove the material from skin, apply a waterless hand cleaner, mineral oil, or petroleum jelly. Then wash with soap and water. Discard contaminated clothing and shoes or thoroughly clean before reuse.

**Ingestion:** If swallowed, get immediate medical attention. Do not induce vomiting. Never give anything by mouth to an unconscious person.

**Inhalation:** Move the exposed person to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention if breathing difficulties continue.

#### SECTION 5 FIRE FIGHTING MEASURES

See Section 7 for proper handling and storage.

#### FIRE CLASSIFICATION:

OSHA Classification (29 CFR 1910.1200): Combustible liquid.

**NFPA RATINGS:** 

Health: 1

Flammability: 2

Reactivity: 0

#### FLAMMABLE PROPERTIES:

Flashpoint: (Pensky-Martens Closed Cup) 100 °F (38 °C) Minimum

Autoignition: NDA

Flammability (Explosive) Limits (% by volume in air): Lower: NDA Upper: NDA

**EXTINGUISHING MEDIA:** Use water fog, foam, dry chemical or carbon dioxide (CO2) to extinguish flames.

#### **PROTECTION OF FIRE FIGHTERS:**

Fire Fighting Instructions: For fires involving this material, do not enter any enclosed or confined fire space without proper protective equipment, including self-contained breathing apparatus.

Combustion Products: Highly dependent on combustion conditions. A complex mixture of airborne solids, liquids, and gases including carbon monoxide, carbon dioxide, and unidentified organic compounds will be evolved when this material undergoes combustion. Combustion may form oxides of: Nitrogen.

#### SECTION 6 ACCIDENTAL RELEASE MEASURES

Revision Number: 3 Revision Date: 07/19/2002 2 of 8

**Protective Measures:** Eliminate all sources of ignition in the vicinity of the spill or released vapor. If this material is released into the work area, evacuate the area immediately. Monitor area with combustible gas indicator.

**Spill Management:** Stop the source of the release if you can do it without risk. Contain release to prevent further contamination of soil, surface water or groundwater. Clean up spill as soon as possible, observing precautions in Exposure Controls/Personal Protection. Use appropriate techniques such as applying non-combustible absorbent materials or pumping. All equipment used when handling the product must be grounded. A vapor suppressing foam may be used to reduce vapors. Use clean non-sparking tools to collect absorbed material. Where feasible and appropriate, remove contaminated soil. Place contaminated materials in disposable containers and dispose of in a manner consistent with applicable regulations.

**Reporting:** Report spills to local authorities and/or the U.S. Coast Guard's National Response Center at (800) 424-8802 as appropriate or required.

#### SECTION 7 HANDLING AND STORAGE

Precautionary Measures: Liquid evaporates and forms vapor (fumes) which can catch fire and burn with explosive force. Invisible vapor spreads easily and can be set on fire by many sources such as pilot lights, welding equipment, and electrical motors and switches. Fire hazard is greater as liquid temperature rises above 85F. Do not get in eyes, on skin, or on clothing. Wash thoroughly after handling. Do not breathe vapor or fumes. Do not taste or swallow.

**General Handling Information:** Avoid contaminating soil or releasing this material into sewage and drainage systems and bodies of water.

Static Hazard: Electrostatic charge may accumulate and create a hazardous condition when handling this material. To minimize this hazard, bonding and grounding may be necessary but may not, by themselves, be sufficient. Review all operations which have the potential of generating an accumulation of electrostatic charge and/or a flammable atmosphere (including tank and container filling, splash filling, tank cleaning, sampling, gauging, switch loading, filtering, mixing, agitation, and vacuum truck operations) and use appropriate mitigating procedures. For more information, refer to OSHA Standard 29 CFR 1910.106, 'Flammable and Combustible Liquids', National Fire Protection Association (NFPA 77, 'Recommended Practice on Static Electricity', and/or the American Petroleum Institute (API) Recommended Practice 2003, 'Protection Against Ignitions Arising Out of Static, Lightning, and Stray Currents'.

**General Storage Information:** DO NOT USE OR STORE near heat, sparks or open flames. USE AND STORE ONLY IN WELL VENTILATED AREA. Keep container closed when not in use.

Container Warnings: Container is not designed to contain pressure. Do not use pressure to empty container or it may rupture with explosive force. Empty containers retain product residue (solid, liquid, and/or vapor) and can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose such containers to heat, flame, sparks, static electricity, or other sources of ignition. They may explode and cause injury or death. Empty containers should be completely drained, properly closed, and promptly returned to a drum reconditioner or disposed of properly.

#### SECTION 8 EXPOSURE CONTROLS/PERSONAL PROTECTION

#### **GENERAL CONSIDERATIONS:**

Consider the potential hazards of this material (see Section 3), applicable exposure limits, job activities, and other substances in the work place when designing engineering controls and selecting personal protective equipment. If engineering controls or work practices are not adequate to prevent exposure to harmful levels of this material, the personal protective equipment listed below is recommended. The user should read and understand all instructions and limitations supplied with the equipment since protection is usually provided for a limited time or under certain circumstances.

#### **ENGINEERING CONTROLS:**

Use process enclosures, local exhaust ventilation, or other engineering controls to control airborne levels

Revision Number: 3 Revision Date: 07/19/2002 3 of 8

below the recommended exposure limits.

#### PERSONAL PROTECTIVE EQUIPMENT

**Eye/Face Protection:** No special eye protection is normally required. Where splashing is possible, wear safety glasses with side shields as a good safety practice.

**Skin Protection:** Wear protective clothing to prevent skin contact. Selection of protective clothing may include gloves, apron, boots, and complete facial protection depending on operations conducted. Suggested materials for protective gloves include: Chlorinated Polyethylene (or Chlorosulfonated Polyethylene), Nitrile Rubber, Polyurethane, Viton.

Respiratory Protection: Determine if airborne concentrations are below the recommended exposure limits. If not, wear an approved respirator that provides adequate protection from measured concentrations of this material, such as: Air-Purifying Respirator for Organic Vapors.

Use a positive pressure air-supplying respirator in circumstances where air-purifying respirators may not provide adequate protection.

#### **Occupational Exposure Limits:**

Component	Limit	TWA	STEL	Ceiling	Notation
1,2,4-trimethylbenzene	ACGIH_TLV	25 ppm			
Xylene	ACGIH_TLV	100 ppm	150 ppm		
Xylene	OSHA_PEL	100 ppm	150 ppm		

#### SECTION 9 PHYSICAL AND CHEMICAL PROPERTIES

Appearance and Odor: Clear to light yellow liquid with petroleum odor.

pH: NA

Vapor Pressure: 4.6 mmHg (Estimated) @ 20 °C

Vapor Density (Air = 1): NDA

**Boiling Point: NDA** 

Solubility: Insoluble in water.

Freezing Point: NDA

Specific Gravity: 0.9149 @ 60 °F Density: 7.62 lb/gal @ 60 °F Viscosity: 16 cSt @ 40 °C

Coefficient of Therm. Expansion / °F: 0.00044

#### SECTION 10 STABILITY AND REACTIVITY

**Chemical Stability:** This material is considered stable under normal ambient and anticipated storage and handling conditions of temperature and pressure.

Conditions to Avoid: Open flames, sparks, temperatures above the material flash point.

Incompatibility With Other Materials: May react with strong oxidizing agents, such as chlorates,

nitrates, peroxides, etc.

Hazardous Polymerization: Hazardous polymerization will not occur.

#### SECTION 11 TOXICOLOGICAL INFORMATION

#### **IMMEDIATE HEALTH EFFECTS**

Eye Irritation: The eye irritation hazard is based on evaluation of data for similar materials or product

Skin Irritation: The skin irritation hazard is based on evaluation of data for similar materials or product

Revision Number: 3 Revision Date: 07/19/2002 4 of 8

components.

**Skin Sensitization:** The skin sensitization hazard is based on evaluation of data for similar materials or product components.

**Acute Dermal Toxicity:** The acute dermal toxicity hazard is based on evaluation of data for similar materials or product components.

Acute Oral Toxicity: The acute oral toxicity hazard is based on evaluation of data for similar materials or product components.

**Acute Inhalation Toxicity:** The acute inhalation toxicity hazard is based on evaluation of data for similar materials or product components.

#### ADDITIONAL TOXICOLOGY INFORMATION:

COMPONENT: Light Aromatic Solvent Naphtha (CAS 64742-95-6, also described as High-Flash Aromatic Naphtha, Type I as defined by ASTM D-3734). GENETIC TOXICITY: No evidence of genetic toxicity was observed in the following tests: Salmonella typhimurium reverse mutation assay (Ames test), in vitro Chinese Hamster Ovary (CHO) cell HGPRT mutation assay, in vitro Chinese Hamster Ovary(CHO) cell chromosomal aberration assay, in vitro Chinese Hamster Ovary (CHO) cell sister chromatid exchange assay, and in vivo rat bone marrow chromosome aberration assay. SUBCHRONIC TOXICITY: In a 13-week rat inhalation study using dose levels of 0, 100, 500, and 1500 ppm for 6 hours/day, 5days/week, no target organ toxicity including neurotoxicity was observed at any dose level. Slight general systemic toxicity (decreased body weight gain) was observed at 1500 ppm. DEVELOPMENTAL TOXICITY: In a mouse inhalation study using dose levels of 0, 100, 500, and 1500 ppm for 6 hours/day on gestation days 6-15, no signs of maternal toxicity or developmental toxicity were observed at 100 ppm. At 500 ppm, maternal toxicity (decreased body weight gain) and developmental toxicity (decreased fetalbody weight) were observed. Severe maternal toxicity (44% mortality, decreased body weight gain, clinical signs of toxicity) and developmental toxicity (decreased number of live fetuses per litter, increased postimplantation losses per dam, decreased fetal body weights, delayed ossification, cleft palate) were observed at 1500 ppm. In a rat inhalation study using dose levels of 600, 1000, and 2000 mg/m3 for 24 hours/day on gestation days 7-15, signs of maternal toxicity (decreased body weight gain) were observed at all dose levels. At 600 mg/m3, no signs of fetal or developmental toxicity were observed. Signs of fetal toxicity (decreased male fetal body weight) and developmental toxicity (delayed ossification) were observed at 1000and 2000 mg/m3. REPRODUCTIVE TOXICITY: In a rat 3-generation inhalation study using dose levels of 0, 100, 500, and 1500 ppm 6 hours/day, 5 days/week, no signs of general systemic or reproductive toxicity were observed at 100 ppm. At 500 ppm, slight parental toxicity (decreased body weight gain) and postnatal toxicity (decreased pup body weight) were observed, but reproductive parameters were not affected. Severe parental toxicity (mortality, decreased bodyweight gain, clinical signs of toxicity) and postnatal toxicity (decreased pup body weight) were observed at 1500 ppm, but reproductive parameters were not affected.

This product contains xylene.

ACUTE TOXICITY: The primary effects of exposure to xylene in animals and humans are on the central nervous system. In addition, in some individuals, xylene exposure can sensitize cardiac tissue to epinephrine which may precipitate fatal ventricular fibrillation.

DEVELOPMENTAL TOXICITY: Xylene has been reported to cause developmental toxicity in rats and mice exposed by inhalation during pregnancy. The effects noted consisted of delayed development and minor skeletal variations. In addition, when pregnant mice were exposed by ingestion to a level that killed nearly one-third of the test group, lethality (resorptions) and malformations (primarily cleft palate) occurred. Since xylene can cross the placenta, it may be appropriate to prevent exposure during pregnancy. GENETIC TOXICITY/CARCINOGENICITY: Xylene was not genotoxic in several mutagenicity testing assays including the Ames test. In a cancer study sponsored by the National Toxicology Program (NTP),technical grade xylene gave no evidence of carcinogenicity in rats or mice dosed daily for two years. HEARING: Mixed xylenes have been shown to cause measurable hearing loss in rats exposed to 800 ppm in the air for 14 hours per day for six weeks. Exposure to 1450 ppm xylene for 8 hours caused hearing loss while exposure to 1700 ppm for 4 hours did not. Although no information is available for lower concentrations, other chemicals that cause hearing loss in rats at relatively high concentrations do not

Revision Number: 3 Revision Date: 07/19/2002 5 of 8

cause hearing loss in rats at low concentrations. Worker exposure to xylenes at the permissible exposure limit (100 ppm, time-weighted average) is not expected to cause hearing loss.

#### SECTION 12 ECOLOGICAL INFORMATION

#### **ECOTOXICITY**

This material is expected to be toxic to aquatic organisms. The ecotoxicity hazard is based on data for the components.

#### **ENVIRONMENTAL FATE**

#### Ready Biodegradability:

This material is not expected to be readily biodegradable. The biodegradability of this material is based on data for the components.

#### SECTION 13 DISPOSAL CONSIDERATIONS

Use material for its intended purpose or recycle if possible. This material, if it must be discarded, may meet the criteria of a hazardous waste as defined by US EPA under RCRA (40 CFR 261) or other State and local regulations. Measurement of certain physical properties and analysis for regulated components may be necessary to make a correct determination. If this material is classified as a hazardous waste. federal law requires disposal at a licensed hazardous waste disposal facility.

#### SECTION 14 TRANSPORT INFORMATION

The description shown may not apply to all shipping situations. Consult 49CFR, or appropriate Dangerous Goods Regulations, for additional description requirements (e.g., technical name) and modespecific or quantity-specific shipping requirements.

DOT Shipping Name: FLAMMABLE LIQUID, N.O.S.

DOT Hazard Class: 3 (Flammable Liquid) **DOT Identification Number: UN1993** 

DOT Packing Group: III

IMO/IMDG Shipping Name: FLAMMABLE LIQUID, N.O.S.

IMO/IMDG Hazard Class: 3 (Flammable liquid) **IMO/IMDG Identification Number: UN1993** 

IMO/IMDG Packing Group: III

#### SECTION 15 REGULATORY INFORMATION

**SARA 311/312 CATEGORIES:** Immediate (Acute) Health Effects:

YES 2. Delayed (Chronic) Health Effects: NO

3. Fire Hazard. YES

4. Sudden Release of Pressure Hazard: NO

5. Reactivity Hazard: NO

#### **REGULATORY LISTS SEARCHED:**

The following components of this material are found on the regulatory lists indicated:

1,2,4-trimethylbenzene

15, 17, 18, 20

**Xylene** 

15, 17, 18, 20

#### CERCLA REPORTABLE QUANTITIES(RQ)/SARA 302 THRESHOLD PLANNING QUANTITIES(TPQ):

Component	Component RQ	Component TPQ	Product RQ
Xylene	100 lbs	None	7779 lbs

#### **CHEMICAL INVENTORIES:**

AUSTRALIA: All the components of this material are listed on the Australian Inventory of Chemical Substances (AICS).

PEOPLE'S REPUBLIC OF CHINA: All the components of this product are listed on the draft Inventory of Existing Chemical Substances in China.

EUROPEAN UNION: All the components of this material are in compliance with the EU Seventh Amendment Directive 92/32/EEC.

JAPAN: All the components of this product are on the Existing & New Chemical Substances (ENCS) inventory in Japan, or have an exemption from listing.

KOREA: All the components of this product are on the Existing Chemicals List (ECL) in Korea.

PHILIPPINES: All the components of this product are listed on the Philippine Inventory of Chemicals and Chemical Substances (PICCS).

SWITZERLAND: This material contains components that require notification before sale or importation into Switzerland.

UNITED STATES: All of the components of this material are on the Toxic Substances Control Act (TSCA) Chemical Inventory.

#### **EU RISK AND SAFETY PHRASES:**

R10: Flammable.

R37/38: Irritating to respiratory system and skin.

R51/53: Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

R67: Inhalation of vapor may cause vertigo and drowsiness.

S23: Do not breathe vapour.

S24: Avoid contact with skin.

S36/37: Wear suitable protective clothing and gloves.

S51: Use only in well-ventilated areas.

S56: Dispose of this material and its container at hazardous or special waste collection point.

S57: Use appropriate container to avoid environmental contamination.

S60: This material and its container must be disposed of as hazardous waste.

S61: Avoid release to the environment. Refer to special instructions/Safety data sheets.

#### WHMIS CLASSIFICATION:

Class B, Division 3: Combustible Liquids

Class D, Division 2, Subdivision B: Toxic Material -

Skin or Eye Irritation

#### SECTION 16 OTHER INFORMATION

**NFPA RATINGS:** 

Health: 1

Flammability: 2

Reactivity: 0

(0-Least, 1-Slight, 2-Moderate, 3-High, 4-Extreme, PPE:- Personal Protection Equipment Index recommendation, *- Chronic Effect Indicator). These values are obtained using the guidelines or

Revision Number: 3 Revision Date: 07/19/2002 7 of 8

published evaluations prepared by the National Fire Protection Association (NFPA) or the National Paint and Coating Association (for HMIS ratings).

#### LABEL RECOMMENDATION:

Oronite Label Code: W29.

REVISION STATEMENT: This revision updates Section 14 of the Material Safety Data Sheet.

ABBREVIATIONS THAT MAY HAVE BEEN USED IN THIS DOCUMENT:

TLV - Threshold Limit Value

TWA - Time Weighted Average

STEL - Short-term Exposure Limit

PEL - Permissible Exposure Limit
CAS - Chemical Abstract Service Number

NDA - No Data Available

Less Than or Equal To

NA - Not Applicable

>= - Greater Than or Equal To

Prepared according to the OSHA Hazard Communication Standard (29 CFR 1910.1200) and the ANSI MSDS Standard (Z400.1).

The above information is based on the data of which we are aware and is believed to be correct as of the date hereof. Since this information may be applied under conditions beyond our control and with which we may be unfamiliar and since data made available subsequent to the date hereof may suggest modifications of the information, we do not assume any responsibility for the results of its use. This information is furnished upon condition that the person receiving it shall make his own determination of the suitability of the material for his particular purpose.

#### 1 PRODUCT IDENTIFICATION

**PRODUCT NAME** 

**AQUAPEL® 566 SIZING AGENT** 

**CHEMICAL/COMMON NAME** 

water emulsion of alkylketene dimer

**CAS NUMBER** 

mixture

#### 2 COMPOSITION / INFORMATION ON INGREDIENTS

This product is not classified as hazardous under OSHA regulations, however, this MSDS contains valuable information important to the safe handling and proper use of the product. This MSDS should be retained and available for employees and other users/handlers of this product.

#### 3 HAZARDS IDENTIFICATION

#### **EMERGENCY OVERVIEW**

**CAUTION!** 

May cause skin irritation.

May cause eye irritation.

Inhalation of mist or aerosol particulates may cause respiratory tract irritation.

#### POTENTIAL HEALTH EFFECTS

Prolonged or repeated contact may cause skin irritation and may cause skin sensitization (allergic reaction) in susceptible individuals.

Refer to Section 5 for Hazardous Combustion Products, and Section 10 for Hazardous Decomposition/Hazardous Polymerization Products.

#### 4 FIRST AID MEASURES

#### SKIN

Wash thoroughly with soap and water. Remove contaminated clothing. Get medical attention if irritation develops or persists. Thoroughly wash clothing before reuse.

#### FYF

Remove contact lenses. Hold eyelids apart. Immediately flush eyes with plenty of low-pressure water for at least 15 minutes. Get medical attention if irritation persists.

#### INHALATION

Remove to fresh air. Get medical attention if nasal, throat or lung irritation develops.

#### **INGESTION**

Not an ingestion hazard under anticipated conditions of use. For accidental ingestion: Do NOT induce vomiting. Get immediate medical attention.

#### 5 FIRE FIGHTING MEASURES

#### **EXTINGUISHING MEDIA**

Water spray, dry chemical, foam, carbon dioxide or clean extinguishing agents may be used on fires involving this product.

**PRODUCT NAME** 

AQUAPEL® 566

**MSDS NUMBER** 

181 7001 0700

VERSION 07

1/4

### FIRE FIGHTING PROCEDURES

Wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH approved (or equivalent) and full protective gear when fighting fires involving this product.

### **CONDITIONS TO AVOID**

None known.

### **HAZARDOUS COMBUSTION PRODUCTS**

This material is not expected to support combustion. If heated to decomposition, the following substances may be formed: carbon monoxide, carbon dioxide, aldehydes, carboxylic acids and smoke

### 6 ACCIDENTAL RELEASE MEASURES

Ventilate area. For small spills: Add absorbent, sweep up, and dispose appropriately. For large spills: Dike to contain and pump into drums for use or disposal. In case of accidental spill or release, refer to Section 8, Personal Protective Equipment and General Hygiene Practices.

### 7 HANDLING & STORAGE

### **GENERAL MEASURES**

Store at temperatures above freezing and below 32° C (90° F). Keep container closed when not in use.

### MATERIALS OR CONDITIONS TO AVOID

Avoid storing product near incompatible materials. See MSDS Section 10. Protect from freezing.

### 8 EXPOSURE CONTROLS / PERSONAL PROTECTION

### **WORK PRACTICES & ENGINEERING CONTROLS**

Eyewash fountains and safety showers should be easily accessible.

Provide adequate ventilation.

If upper respiratory tract irritation occurs, use an approved dust/mist respirator to minimize exposure.

### **GENERAL HYGIENIC PRACTICES**

Avoid contact with eyes, skin, and clothing.

Avoid inhalation of mist or aerosol particulates.

Handle in areas with adequate ventilation.

Avoid contamination of food, beverages, or smoking materials.

Wash thoroughly after handling, and before eating, drinking or smoking.

Remove contaminated clothing promptly and clean thoroughly before reuse.

### RECOMMENDED EXPOSURE LIMITS

No exposure limit has been established. This product may irritate the upper respiratory tract if used under conditions that create dust or mist particulates.

### PERSONAL PROTECTIVE EQUIPMENT

Safety glasses

Impervious gloves

Appropriate protective clothing

Wear approved dust/mist respirator if user operations create dust/mist that causes irritation.

### PROTECTIVE MEASURES DURING REPAIR AND MAINTENANCE

Completely isolate and thoroughly clean all equipment, piping, or vessels before beginning maintenance or repairs.

### 9 PHYSICAL & CHEMICAL PROPERTIES

### 10 STABILITY & REACTIVITY

### HAZARDOUS DECOMPOSITION PRODUCTS

In aqueous solutions, biocide degrades and forms methyl isothiocyanate, carbon disulfide, formaldehyde, methylamine and hydrogen sulfide.

### **HAZARDOUS POLYMERIZATION**

Not anticipated under normal or recommended handling and storage conditions.

### **GENERAL STABILITY CONSIDERATIONS**

Stable under recommended handling and storage conditions.

### **INCOMPATIBLE MATERIALS**

Incompatible with: alkalies and amines

### 11 TOXICOLOGICAL INFORMATION

### **CARCINOGENICITY INFORMATION**

Not listed as a carcinogen by NTP. Not regulated as a carcinogen by OSHA. Not evaluated by IARC.

### REPORTED HUMAN EFFECTS

No human toxicity studies have been carried out with this product. May cause skin, eye or respiratory irritation due to pH.

COMPONENT - biocide: Reported to cause skin sensitization (allergic reaction). Decomposition products cause skin, eye, and respiratory irritation.

### REPORTED ANIMAL EFFECTS

No animal toxicity studies have been carried out with this product.

### 12 ECOLOGICAL INFORMATION

### **ECOTOXICOLOGICAL INFORMATION**

No ecological studies have been carried out on this product.

### 13 DISPOSAL CONSIDERATIONS

### **WASTE DISPOSAL**

Neutralize waste material to adjust pH to levels appropriate for discharge, and flush material with water into an acclimated biological waste treatment system permitted to handle such waste. Landfilling in a permitted solid or hazardous waste facility is a suitable alternative after solidification to remove free liquids. Treatment and disposal should be in accordance with Federal, State and local regulations.

### 14 TRANSPORT INFORMATION

### GENERAL

This product is not subject to DOT regulations. For specific information regarding transportation of this product, please call the Hercules representative at (905) 279-3338.

### 15 REGULATORY INFORMATION

### **CHEMICAL INVENTORIES**

U.S. TSCA: The components of this product are included on the TSCA Inventory.

### **SARA TITLE III - SECTIONS 302/304**

This product is not an Extremely Hazardous Substance subject to reporting under 40CFR355.

### **DISCLAIMER**

The information and recommendations contained in this Material Safety Data Sheet have been compiled from sources believed to be reliable and to represent the most reasonable current opinion on the subject when the MSDS was prepared. No warranty, guaranty or representation is made as to the correctness or sufficiency of the information. The user of this product must decide what safety measures are necessary to safely use this product, either alone or in combination with other products, and determine its environmental regulatory compliance obligations under any applicable federal or state laws.

### TETRA Technologies, Inc.

### **Material Safety Data Sheet**

This MSDS Sheet complies with the style format specified by ANSI Z400.1-1993

### SECTION 1: CHEMICAL PRODUCT - COMPANY IDENTIFICATION

TETRA Technologies, Incorporated

(281) 367-1983

25025 I-45 North

(800) 327-7817

The Woodlands, Texas 77380

(800) 424-9300 - CHEMTREC (24 Hour Emergency Response)

SUBSTANCE:

Zinc-Calcium Bromide Solution

TRADE NAMES/SYNONYMS: CHEMICAL FAMILY:

MSDS CREATION DATE:

Inorganic Salt Solution

MSDS REVISION DATE:

15 JUN 94 13 SEPT 01

### **SECTION 2: COMPOSITION, INFORMATION ON INGREDIENTS**

COMPONENTS	CAS NUMBER	RTECS NUMBER	PERCENTAGE
Zinc Bromide	7699-45-8	ZH1150000	53-56%
Calcium Bromide	7789-41-5	EV9328000	18-21%
Water	7732-18-5	ZC0110000	29-23%

PROBABLE CONTAMINANT: Zinc hydroxide, zinc oxide, calcium hydroxide.

### **SECTION 3: HAZARDS IDENTIFICATION**

NFPA RATINGS: (SCALE 0-4):

HEALTH=1, FIRE=0.

REACTIVITY=0

EMERGENCY OVERVIEW: Odorless liquid, light yellow amber color. May cause skin, eye and inhalation irritation.

Solutions containing zinc bromide are considered to be marine pollutants.

### POTENTIAL HEALTH EFFECTS:

INHALATION:

Inhalation of mist may cause irritation. Additional effects may include coughing and breathing difficulties.

SKIN CONTACT:

May cause irritation.

**EYE CONTACT:** 

May cause irritation and tearing. Additional effects may include blurred vision.

INGESTION:

May cause yellowing of the skin and eyes, nausea, vomiting, diarrhea, blood in the urine, inability to urinate, low

blood pressure, blood disorders, kidney damage, liver damage, convulsions and unconsciousness.

CARCINOGEN STATUS: OSHA: No NTP: No IARC: No

### **SECTION 4: FIRST AID MEASURES**

INHALATION: If adverse effects occur, remove to fresh air. Get medical attention immediately.

SKIN CONTACT: Remove contaminated clothing and shoes and wash affected area with soap large amounts of water until no at least 15-20 minutes. Get medical attention if irritation persists. Clean clothing before reuse.

EYE CONTACT: Flush eyes with plenty of water at least 15 minutes). Get medical attention immediately. INGESTION: Drink plenty of water. Do NOT induce vomiting. Get medical attention immediately.

NOTE TO PHYSICIAN: For ingestion, consider gastric lavage.

### TETRA Technologies, Inc.

### **Material Safety Data Sheet**

This MSDS Sheet complies with the style format specified by ANSI Z400.1-1993

Antidote: The following antidote(s) have been recommended:

Calcium disodium edetate/dextrose, intravenous

Calcium disodium edetate/procaine, intramuscular

Sodium chloride, oral, intravenous

The decision as to whether the severity of poisoning requires administration of any antidote and actual dose required should be made by qualified medical personnel. Driesbach, Handbook of Poisoning, 12th Ed.

### **SECTION 5: FIRE FIGHTING MEASURES**

FIRE AND EXPLOSION HAZARD: Negligible fire hazard when exposed to heat or flame.

**EXTINGUISHING MEDIA:** Dry chemical, carbon dioxide, water spray or regular foam. For larger fires, use water spray, fog or regular foam (1996 North American Emergency Response Guidebook, RSPA P 5800.7, Guide Number 171).

FIREFIGHTING: Move container(s) from fire area if you can without risk. Apply cooling water to sides of containers that are exposed to flames until well after fire is out. Stay away from ends of drums and/or ends of tanks. Extinguish fire using agent suitable for type of surrounding fire and/or chemicals. Do not use water directly on material. Avoid breathing corrosive vapors; keep upwind. Dike area to prevent runoff and contamination of water sources.

HAZARDOUS COMBUSTION PRODUCTS: Thermal decomposition products may include acrid smoke and furnes of zinc oxides and hydrogen bromide.

FOR FIREFIGHTING AND OTHER IMMEDIATELY DANGEROUS TO LIFE OR HEALTH

CONDITIONS: Any self-contained breathing apparatus that has a full facepiece Any supplied-air respirator that has a full facepiece and is operated in a pressure-demand or other positive-pressure mode in combination with a separate escape supply.

### **SECTION 6: ACCIDENTAL RELEASE MEASURES**

OCCUPATIONAL SPILL: Do not touch spilled material. Stop leak if you can without risk. For small spills, take up with sand or other absorbent material and place in containers for disposal. Move containers from spill area. For larger spills, dike far ahead of spill for later disposal. Deny entry to nonessential personnel and isolate hazard.

SOIL SPILL: Dig holding area such as lagoon, pond or pit for containment. Dike flow of spilled material using soil or sandbags or formed barriers such as polyurethane or concrete. Use cement powder or fly ash to absorb liquid mass. Neutralize spill with slaked lime, sodium bicarbonate or crushed limestone.

WATER SPILL: Neutralize with lime, crushed limestone, or sodium bicarbonate. Use mechanical dredges or lifts to extract immobilized masses of pollution and precipitates. Add suitable agent to neutralize spilled material to pH-7.

### **SECTION 7: HANDLING AND STORAGE**

Observe all federal, state and local regulations when storing this product. Store in a tightly closed container. Store away from incompatible materials.

### SECTION 8: EXPOSURE CONTROLS, PERSONAL PROTECTION

**EXPOSURE LIMITS:** No occupational exposure limits established by OSHA/ACGIH/NIOSH.

**VENTILATION:** Provide local exhaust ventilation system.

EYE PROTECTION: Wear safety glasses with splash shields or safety goggles/shield. Provide an emergency eye wash fountain and quick drench shower in the immediate work area.

CLOTHING: Wear appropriate chemical resistant clothing.
GLOVES: Wear appropriate chemical resistant clothing.

### SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

### TETRA Technologies, Inc.

### **Material Safety Data Sheet**

This MSDS Sheet complies with the style format specified by ANSI Z400.1-1993

**DESCRIPTION:** 

Odorless, colorless to yellow liquid.

MOLECULAR FORMULA:

ZnBr₂ for zinc bromide, CaBr₂ for calcium bromide

MOLECULAR WEIGHT:

225.19 for zinc bromide, 199.8 for calcium bromide

MELTING POINT:

BOILING POINT:

313°F (156°C) for 55% solution ZnBr₂, 19% CaBr₂, and 26% water 2.3 for solution 55% ZnBr₂, 19% CaBr₂, and 26% water at 25 °C

SPECIFIC GRAVITY: pH:

5-6 (1:10 dilution)

WATER SOLUBILITY

Miscible with water in all proportions.

SOLVENT SOLUBILITY:

Miscible with alcohol, ether, acetone, ammonium hydroxide

### SECTION 10: STABILITY AND REACTIVITY

**REACTIVITY:** Stable under normal temperatures and pressures. Can evolve hydrogen bromide and/or bromine when strongly heated. Can evolve bromine under strongly oxidizing conditions.

CONDITIONS TO AVOID:

None known.

INCOMPATIBILITIES:

Metals. Mixtures with potassium or sodium produce a strong explosion on impact.

OXIDIZING AGENTS: Yields bromine gas.

HAZARDOUS DECOMPOSITION: Products may include acrid smoke and fumes of zinc oxides and hydrogen bromide POLYMERIZATION: Hazardous polymerization has not been reported to occur under normal temperatures and pressures.

### **SECTION 11: TOXICOLOGICAL INFORMATION**

TOXICITY DATA: None established for zinc-calcium bromide. The systemic effects of bromide ion are chiefly mental: drowsiness, irritability, vertigo, confusion, mania, hallucinations and coma. Other effects include skin rashes, neurological signs, sensory disturbances, and increased spinal fluid pressures.

CARCINOGEN STATUS: None.

LOCAL EFFECTS:

Zinc-calcium is an eye, mucous membrane and skin irritant.

ACUTE TOXICITY LEVEL: Moderately toxic by ingestion, slightly toxic by dermal absorption.

TARGET EFFECTS: Sensitizer - dermal. Poisoning may also affect the kidneys, and the respiratory and digestive systems.

INHALATION:

High concentrations of zinc bromide mists may produce irritation, labored breathing and coughing.

SKIN CONTACT:

Direct contact may cause irritation, redness and pain. Repeated or prolonged exposure to zinc salts may cause dermatitis with erythematous, papular, and granulomatous reactions in susceptible individuals.

EYE CONTACT:

Direct contact may cause redness, pain, blurred vision, and conjunctivitis.

### **INGESTION:**

Ingestion of large amounts of astringent zinc salts may cause a burning sensation in the mouth and throat, nausea, vomiting, diarrhea, hemolysis, hematuria, kidney damage with anuria, liver damage with jaundice, and possibly hypotension, convulsions, and unconsciousness. Repeated or prolonged ingestion of zinc salts may cause digestive and/or renal disorders.

### **SECTION 12: ECOLOGICAL INFORMATION**

No data available.

### **SECTION 13: DISPOSAL INFORMATION**

### TETRA Technologies, Inc.

### **Material Safety Data Sheet**

This MSDS Sheet complies with the style format specified by ANSI Z400.1-1993

Observe all federal, state and local regulations when disposing of this substance.

### **SECTION 14: TRANSPORT INFORMATION**

DOT Shipping Name-ID Number: Environmentally Hazardous Substances liquid, N.O.S., Class 9, UN 3082, PG III (contains

### **SECTION 16: OTHER INFORMATION**

Individuals handling this product should be informed of the recommended safety precautions and should have access to this information.

This information relates to the specific product designated and may not be valid for such product used in combination with any other materials or in any other processes. Such information is to the best of our knowledge and belief, accurate and reliable as of the date compiled. However, no representation, warranty or guarantee is made as to its accuracy, reliability, or completeness. It is the user's responsibility to satisfy themselves as to the suitability and completeness of such information for their own particular use. We do not accept liability for any loss or damage that may occur from the use of this information nor do we offer warranty against patent infringement.

TETRA Technologies, Inc. reserves the right to refuse shipment of this product to any consumer who fails to demonstrate the ability to consistently handle and use it safely and in compliance with all applicable laws, rules and regulations. Such demonstration may require on-site inspection of any or all storage, processing, packaging and other handling systems that come in contact with it.

## 1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

PRODUCT NAME:

**3D TRASAR® 3DT191** 

**APPLICATION:** 

**COOLING WATER TREATMENT** 

**COMPANY IDENTIFICATION:** 

Nalco Company 1601 W. Diehl Road Naperville, Illinois 60563-1198

**EMERGENCY TELEPHONE NUMBER(S):** 

(800) 424-9300 (24 Hours) CHEMTREC

NFPA 704M/HMIS RATING

HEALTH: 0/1

0/1 FLAMMABILITY: 1/1

1 INSTABILITY:

0/0

OTHER:

0 = Insignificant 1 = Slight 2 = Moderate 3 = High 4 = Extreme

## 2. COMPOSITION/INFORMATION ON INGREDIENTS

Based on our hazard evaluation, none of the substances in this product are hazardous.

### 3. HAZARDS IDENTIFICATION

### **EMERGENCY OVERVIEW**

### **CAUTION**

May cause irritation with prolonged contact.

Do not get in eyes, on skin, on clothing. Do not take internally. Use with adequate ventilation. In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. After contact with skin, wash immediately with plenty of water.

Wear suitable protective clothing.

May evolve oxides of carbon (COx) under fire conditions. May evolve oxides of nitrogen (NOx) and sulfur (SOx) under fire conditions.

PRIMARY ROUTES OF EXPOSURE:

Eye, Skin

ONING

e fat ti

HUMAN HEALTH HAZARDS - ACUTE :

EYE CONTACT:

No adverse effects expected [1] [( A

SKIN CONTACT:

No adverse effects expected.

INGESTION:

Not a likely route of exposure. No adverse effects expected.

### 3D TRASAR® 3DT191

EMERGENCY TELEPHONE NUMBER(S) (800) 424-9300 (24 Hours) CHEMTREC

**INHALATION:** 

Not a likely route of exposure. No adverse effects expected.

SYMPTOMS OF EXPOSURE:

Acute:

A review of available data does not identify any symptoms from exposure not previously mentioned.

Chronic

A review of available data does not identify any symptoms from exposure not previously mentioned.

### 4. FIRST AID MEASURES

**EYE CONTACT:** 

Flush affected area with water. If symptoms develop, seek medical advice.

SKIN CONTACT:

Flush affected area with water. If symptoms develop, seek medical advice.

INGESTION:

"Get medical attention: "Do not induce vomiting without medical advice. If conscious, washout mouth and give water to drink

INHALATION:

Remove to fresh air, treat symptomatically. If symptoms develop, seek medical advice.

NOTE TO PHYSICIAN:

Based on the individual reactions of the patient, the physician's judgement should be used to control symptoms and clinical condition.

## 5. FIRE FIGHTING MEASURES

FLASH POINT:

Not applicable

EXTINGUISHING MEDIA:

This product would not be expected to burn unless all the water is boiled away. The remaining organics may be ignitable. Use extinguishing media appropriate for surrounding fire.

FIRE AND EXPLOSION HAZARD:

May evolve oxides of carbon (COx) under fire conditions. May evolve oxides of nitrogen (NOx) and sulfur (SOx) under fire conditions.

SPECIAL PROTECTIVE EQUIPMENT FOR FIRE FIGHTING:

In case of fire, wear a full face positive-pressure self contained breathing apparatus and protective suit.

**PRODUCT** 

### 3D TRASAR® 3DT191

**EMERGENCY TELEPHONE NUMBER(S)** 

(800) 424-9300 (24 Hours) CHEMTREC

## 6. ACCIDENTAL RELEASE MEASURES

### PERSONAL PRECAUTIONS:

Restrict access to area as appropriate until clean-up operations are complete. Use personal protective equipment recommended in Section 8 (Exposure Controls/Personal Protection). Stop or reduce any leaks if it is safe to do so. Ventilate spill area if possible.

### **METHODS FOR CLEANING UP:**

SMALL SPILLS: Soak up spill with absorbent material. Place residues in a suitable, covered, properly labeled container. Wash affected area. LARGE SPILLS: Contain liquid using absorbent material, by digging trenches or by diking. Reclaim into recovery or salvage drums or tank truck for proper disposal. Clean contaminated surfaces with water or aqueous cleaning agents. Contact an approved waste hauler for disposal of contaminated recovered material. Dispose of material in compliance with regulations indicated in Section 13 (Disposal Considerations).

### **ENVIRONMENTAL PRECAUTIONS:**

Do not contaminate surface water.

### 7. HANDLING AND STORAGE

#### **HANDLING:**

Do not get in eyes, on skin, on clothing. Do not take internally. Use with adequate ventilation. Do not breathe vapors/gases/dust. Keep the containers closed when not in use. Have emergency equipment (for fires, spills, leaks, etc.) readily available. Ensure all containers are labeled.

### STORAGE CONDITIONS:

Store in suitable labeled containers. Store the containers tightly closed.

### SUITABLE CONSTRUCTION MATERIAL:

Neoprene, Buna-N, Viton, Hypalon, Polyurethane, EPDM, HDPE (high density polyethylene), Epoxy phenolic resin, Polypropylene, Polyethylene, Compatibility with Plastic Materials can vary; we therefore recommend that compatibility is tested prior to use.

### **UNSUITABLE CONSTRUCTION MATERIAL:**

Brass, Stainless Steel 304, Stainless Steel 316L, 100% phenolic resin liner

### 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

### 3D TRASAR® 3DT191

**EMERGENCY TELEPHONE NUMBER(S)** 

(800) 424-9300 (24 Hours) CHEMTREC

#### **ENGINEERING MEASURES:**

General ventilation is recommended.

#### RESPIRATORY PROTECTION:

Where concentrations in air may exceed the limits given in this section, the use of a half face filter mask or air supplied breathing apparatus is recommended. A suitable filter material depends on the amount and type of chemicals being handled. Consider the use of filter type: Multi-contaminant cartridge. with a Particulate pre-filter. In event of emergency or planned entry into unknown concentrations a positive pressure, full-facepiece SCBA should be used. If respiratory protection is required, institute a complete respiratory protection program including selection, fit testing, training, maintenance and inspection.

### HAND PROTECTION:

When handling this product, the use of chemical gloves is recommended., The choice of work glove depends on work conditions and what chemicals are handled, but we have positive experience under light handling conditions using gloves made from, PVC, ., Gloves should be replaced immediately if signs of degradation are observed., Breakthrough time not determined as preparation, consult PPE manufacturers.

#### SKIN PROTECTION:

Wear standard protective clothing. See general advice.

#### **EYE PROTECTION:**

When handling this product, the use of safety glasses with side shields is recommended.

#### **HYGIENE RECOMMENDATIONS:**

Use good work and personal hygiene practices to avoid exposure. Consider the provision in the work area of a safety shower and eyewash. Always wash thoroughly after handling chemicals. When handling this product never eat, drink or smoke.

## 10. STABILITY AND REACTIVITY

STABILITY:

Stable under normal conditions.

**HAZARDOUS POLYMERIZATION:** 

Hazardous polymerization will not occur.

CONDITIONS TO AVOID:

None known

MATERIALS TO AVOID :

Contact with strong oxidizers (e.g. chlorine, peroxides, chromates, nitric acid, perchlorate, concentrated oxygen, permanganate) may generate heat, fires, explosions and/or toxic vapors.

HAZARDOUS DECOMPOSITION PRODUCTS:

Under fire conditions:

Oxides of carbon, Oxides of sulfur, Oxides of nitrogen

### 11. TOXICOLOGICAL INFORMATION

No toxicity studies have been conducted on this product.

**SENSITIZATION:** 

This product is not expected to be a sensitizer.

CARCINOGENICITY:

None of the substances in this product are listed as carcinogens by the International Agency for Research on Cancer (IARC), the National Toxicology Program (NTP) or the American Conference of Governmental Industrial Hygienists (ACGIH).

**HUMAN HAZARD CHARACTERIZATION:** 

Based on our hazard characterization, the potential human hazard is: Low

## 12. ECOLOGICAL INFORMATION

### **ECOTOXICOLOGICAL EFFECTS:**

The following results are for the product.

## **ACUTE FISH RESULTS:**

The organic portion of this preparation is expected to be poorly biodegradable.

#### **MOBILITY:**

The environmental fate was estimated using a level III fugacity model embedded in the EPI (estimation program interface) Suite TM, provided by the US EPA. The model assumes a steady state condition between the total input and output. The level III model does not require equilibrium between the defined media. The information provided is intended to give the user a general estimate of the environmental fate of this product under the defined conditions of the models. If released into the environment this material is expected to distribute to the air, water and soil/sediment in the approximate respective percentages;

Air	Water	Soil/Sediment
<5%	10 - 30%	50 - 70%

The portion in water is expected to be soluble or dispersible.

### **BIOACCUMULATION POTENTIAL**

This preparation or material is not expected to bioaccumulate.

### **ENVIRONMENTAL HAZARD AND EXPOSURE CHARACTERIZATION**

Based on our hazard characterization, the potential environmental hazard is: Low

If released into the environment, see CERCLA/SUPERFUND in Section 15.

## 13. DISPOSAL CONSIDERATIONS

If this product becomes a waste, it is not a hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA) 40 CFR 261, since it does not have the characteristics of Subpart C, nor is it listed under Subpart D.

As a non-hazardous waste, it is not subject to federal regulation. Consult state or local regulation for any additional handling, treatment or disposal requirements. For disposal, contact a properly licensed waste treatment, storage, disposal or recycling facility.

## 15. REGULATORY INFORMATION

NATIONAL REGULATIONS, USA

OSHA HAZARD COMMUNICATION RULE, 29 CFR 1910.1200:

Based on our hazard evaluation, none of the substances in this product are hazardous.

CERCLA/SUPERFUND, 40 CFR 117, 302:

Notification of spills of this product is not required.

SARA/SUPERFUND AMENDMENTS AND REAUTHORIZATION ACT OF 1986 (TITLE III) - SECTIONS 302, 311, 312, AND 313:

SECTION 302 - EXTREMELY HAZARDOUS SUBSTANCES (40 CFR 355):

This product does not contain substances listed in Appendix A and B as an Extremely Hazardous Substance.

SECTIONS 311 AND 312 MATERIAL SAFETY DATA SHEET REQUIREMENTS (40 CFR 370): Our hazard evaluation has found that this product is not hazardous under 29 CFR 1910.1200.

Under SARA 311 and 312, the EPA has established threshold quantities for the reporting of hazardous chemicals. The current thresholds are \$500 pounds or the threshold planning quantity (TPQ), whichever is lower, for extremely hazardous substances and 10,000 pounds for all other hazardous chemicals.

SECTION 313 - LIST OF TOXIC CHEMICALS (40 CFR 372):

40 Brusser

This product does not contain substances on the List of Toxic Chemicals.

## MATERIAL SAFETY DATA SHEET

## PRODUCT AND COMPANY IDENTIFICATION

### **PRODUCT**

**Product Name: Exxal 10** Product Description: Alcohol

**Product Code:** 

Intended Use: Chemical feedstock

### **COMPANY IDENTIFICATION**

Supplier:

**EXXONMOBIL CHEMICAL COMPANY** 

P.O. BOX 3272

HOUSTON, TX. 77253-3272 USA

24 Hour Health Emergency

(800) 726-2015

**Transportation Emergency Phone** 

(800) 424-9300 CHEMTREC

**Product Technical Information Supplier General Contact** 

(281) 870-6000/Health & Medical (281) 870-6884

(281) 870-6000

### SECTION 2

### COMPOSITION / INFORMATION ON INGREDIENTS

Reportable Hazardous Substance(s) or Complex Substance(s)

Name	CAS#	Concentration*
ALCOHOLS, C9-C11 -ISO, C10-RICH	68526-85-2	100%

^{*} All concentrations are percent by weight unless material is a gas. Gas concentrations are in percent by volume.

### SECTION 3

### HAZARDS IDENTIFICATION

This material is considered to be hazardous according to regulatory guidelines (see (M)SDS Section 15).

### POTENTIAL PHYSICAL / CHEMICAL EFFECTS

Material can accumulate static charges which may cause an incendiary electrical discharge.

### POTENTIAL HEALTH EFFECTS

Irritating to eyes. If swallowed, may be aspirated and cause lung damage. Excessive exposure may result in eye, skin, or respiratory irritation.

Target Organs: Eye |

NFPA Hazard ID:

Health: 2

Flammability: 1

Reactivity: 0

**HMIS Hazard ID:** 

Health: 2

Flammability: 1

Reactivity: 0

SECTION 4

Page 2 of 9

**NOTE:** This material should not be used for any other purpose than the intended use in Section 1 without expert advice. Health studies have shown that chemical exposure may cause potential human health risks which may vary from person

to person.

## FIRST AID MEASURES

### **INHALATION**

Remove from further exposure. For those providing assistance, avoid exposure to yourself or others. Use adequate respiratory protection. If respiratory irritation, dizziness, nausea, or unconsciousness occurs, seek immediate medical assistance. If breathing has stopped, assist ventilation with a mechanical device or use mouth-to-mouth resuscitation.

### **SKIN CONTACT**

Wash contact areas with soap and water.

#### **EYE CONTACT**

Flush thoroughly with water for at least 15 minutes. Get medical assistance.

#### **INGESTION**

Give one or two glasses of water if patient is alert and able to swallow. Seek immediate medical attention. Do not induce vomiting.

### **NOTE TO PHYSICIAN**

If ingested, material may be aspirated into the lungs and cause chemical pneumonitis. Treat appropriately.

## SECTION 5

### FIRE FIGHTING MEASURES

### **EXTINGUISHING MEDIA**

**Appropriate Extinguishing Media:** Use water fog, foam, dry chemical or carbon dioxide (CO2) to extinguish flames.

Inappropriate Extinguishing Media: Straight Streams of Water

## **FIRE FIGHTING**

**Fire Fighting Instructions:** Evacuate area. Prevent runoff from fire control or dilution from entering streams, sewers, or drinking water supply. Firefighters should use standard protective equipment and in enclosed spaces, self-contained breathing apparatus (SCBA). Use water spray to cool fire exposed surfaces and to protect personnel.

Hazardous Combustion Products: Incomplete combustion products, Smoke, Fume, Oxides of carbon

### **FLAMMABILITY PROPERTIES**

Flash Point [Method]: >94C (201F) [ASTM D-56]

Flammable Limits (Approximate volume % in air): LEL: N/D UEL: N/D

Autoignition Temperature: N/A

Page 3 of 9

## SECTION 6 ACCIDENTAL RELEASE MEASURES

### **NOTIFICATION PROCEDURES**

In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations. U.S. regulations require reporting releases of this material to the environment which exceed the reportable quantity or oil spills which could reach any waterway including intermittent dry creeks. The National Response Center can be reached at (800)424-8802.

### **PROTECTIVE MEASURES**

Avoid contact with spilled material. Warn or evacuate occupants in surrounding and downwind areas if required due to toxicity or flammability of the material. See Section 5 for fire fighting information. See Section 3 for Significant Hazards. See Section 4 for First Aid Advice. See Section 8 for Personal Protective Equipment.

### SPILL MANAGEMENT

Land Spill: Stop leak if you can do it without risk. Do not touch or walk through spilled material. Small Spills: Absorb with earth, sand or other non-combustible material and transfer to containers for later disposal. Recover by pumping or with suitable absorbent.

Water Spill: Stop leak if you can do it without risk. Confine the spill immediately with booms. Warn other shipping. Remove from the surface by skimming or with suitable absorbents. Seek the advice of a specialist before using dispersants.

Water spill and land spill recommendations are based on the most likely spill scenario for this material; however, geographic conditions, wind, temperature, (and in the case of a water spill) wave and current direction and speed may greatly influence the appropriate action to be taken. For this reason, local experts should be consulted. Note: Local regulations may prescribe or limit action to be taken.

### **ENVIRONMENTAL PRECAUTIONS**

Large Spills: Dike far ahead of liquid spill for later recovery and disposal. Prevent entry into waterways, sewers, basements or confined areas.

### SECTION 7 HANDLING AND STORAGE

#### **HANDLING**

Avoid all personal contact. Avoid contact with skin. Avoid contact with eyes. Prevent small spills and leakage to avoid slip hazard. DO NOT handle, store or open near an open flame, sources of heat or sources of ignition. Protect material from direct sunlight. Material can accumulate static charges which may cause an electrical spark (ignition source).

Loading/Unloading Temperature: [Ambient]

**Transport Temperature:** [Ambient] **Transport Pressure:** [Ambient]

Static Accumulator: This material is a static accumulator.

### **STORAGE**

Page 4 of 9

Do not store in open or unlabelled containers. Keep container closed. Handle containers with care. Open slowly in order to control possible pressure release. Store in a cool, well-ventilated area.

Storage Temperature: [Ambient] Storage Pressure: [Ambient]

Suitable Containers/Packing: Tank Trucks: Tank Cars: Drums

Suitable Materials and Coatings: Carbon Steel; Stainless Steel; Amine Epoxy; Epoxy Phenolic; Polypropylene;

Aluminum; Butyl Rubber; Polyethylene; Vinyl; Nitrile Rubber; Zinc Unsuitable Materials and Coatings: Rubber; Butyl Rubber; Vinyls

### SECTION 8 EXPOSURE CONTROLS / PERSONAL PROTECTION

### **EXPOSURE LIMIT VALUES**

Exposure limits/standards (Note: Exposure limits are not additive)

Source	Form	Limit / Sta	ndard	Note	Source
ALCOHOLS, C9-C11 -ISO, C10-RICH		TWA	50 ppm	N/A	ExxonMobil

NOTE: Limits/standards shown for guidance only. Follow applicable regulations.

### **ENGINEERING CONTROLS**

The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Control measures to consider:

Adequate ventilation should be provided so that exposure limits are not exceeded.

### PERSONAL PROTECTION

Personal protective equipment selections vary based on potential exposure conditions such as applications. handling practices, concentration and ventilation. Information on the selection of protective equipment for use with this material, as provided below, is based upon intended, normal usage.

Respiratory Protection: If engineering controls do not maintain airborne contaminant concentrations at a level which is adequate to protect worker health, an approved respirator may be appropriate. Respirator selection, use, and maintenance must be in accordance with regulatory requirements, if applicable. Types of respirators to be considered for this material include:

Half-face filter respirator

For high airborne concentrations, use an approved supplied-air respirator, operated in positive pressure mode. Supplied air respirators with an escape bottle may be appropriate when oxygen levels are inadequate, gas/vapor warning properties are poor, or if air purifying filter capacity/rating may be exceeded.

Hand Protection: Any specific glove information provided is based on published literature and glove manufacturer data. Work conditions can greatly effect glove durability; inspect and replace worn or damaged gloves. The types of gloves to be considered for this material include:

If prolonged or repeated contact is likely, chemical resistant gloves are recommended. If contact with

Page 5 of 9

forearms is likely, wear gauntlet style gloves.

Eye Protection: If contact is likely, safety glasses with side shields are recommended.

Skin and Body Protection: Any specific clothing information provided is based on published literature or manufacturer data. The types of clothing to be considered for this material include:

If prolonged or repeated contact is likely, chemical, and oil resistant clothing is recommended.

Specific Hygiene Measures: Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.

#### **ENVIRONMENTAL CONTROLS**

See Sections 6, 7, 12, 13.

### SECTION 9 PHYSICAL AND CHEMICAL PROPERTIES

Typical physical and chemical properties are given below. Consult the Supplier in Section 1 for additional data.

### **GENERAL INFORMATION**

Physical State: Liquid

Form: Clear Color: Colorless Odor: Alcohol Odor Threshold: N/D

### IMPORTANT HEALTH, SAFETY, AND ENVIRONMENTAL INFORMATION

Relative Density (at 20 C): 0.838

Flash Point [Method]: >94C (201F) [ ASTM D-56]

Flammable Limits (Approximate volume % in air): LEL: N/D UEL: N/D

**Autoignition Temperature: N/A** 

**Boiling Point / Range:** 217C (423F) - 224C (435F)

Vapor Density (Air = 1): > 1 at 101 kPa

Vapor Pressure: 0.002 kPa (0.02 mm Hg) at 20 C | 1.08 kPa (8.1 mm Hg) at 100C

| 0.036 kPa (0.27 mm Hg) at 50C

Evaporation Rate (n-butyl acetate = 1): < 0.01

pH: N/D

Log Pow (n-Octanol/Water Partition Coefficient): N/D

Solubility in Water: Negligible

Viscosity: 9 cSt (9 mm2/sec ) at 40 C | 21 cSt (21 mm2/sec) at 20C

Oxidizing Properties: See Sections 3, 15, 16.

### OTHER INFORMATION

Freezing Point: <-65°C (-85°F)

Melting Point: N/D Molecular Weight: 158 Hvaroscopic: No

Coefficient of Thermal Expansion: 0.00081 V/VDEGC

#### SECTION 10

### STABILITY AND REACTIVITY

Page 6 of 9

STABILITY: Material is stable under normal conditions.

CONDITIONS TO AVOID: Excessive heat. High energy sources of ignition.

MATERIALS TO AVOID: Polymerizable esters, Alkylene Oxides, Halogens, Acid Anhydrides

HAZARDOUS DECOMPOSITION PRODUCTS: Material does not decompose at ambient temperatures.

HAZARDOUS POLYMERIZATION: Will not occur.

SECTION 11	TOXICOLOGICAL INFORMATION
ACUTE TOXICITY	
Route of Exposure	Conclusion / Remarks
Inhalation	
Toxicity: Data available.	Minimally Toxic. Based on test data for the material.
Irritation: Data available.	Elevated temperatures or mechanical action may form vapors, mist, or fumes which may be irritating to the eyes, nose, throat, or lungs. Based on test data for the material.
ngestion	
Toxicity (Rat): LD50 > 4.72 g/kg	Minimally Toxic. Based on test data for the material.
Skin	
Toxicity (Rabbit): LD50 > 2.6 g/kg	Minimally Toxic. Based on test data for the material.
Irritation: Data available.	Mildly irritating to skin with prolonged exposure. Based on test data for the material.
Eye	
Irritation: Data available.	Moderately irritating to the eyes. Based on test data for the material.

### **CHRONIC/OTHER EFFECTS**

### For the product itself:

Small amounts of liquid aspirated into the lungs during ingestion or from vomiting may cause chemical pneumonitis or pulmonary edema.

Additional information is available by request.

The following ingredients are cited on the lists below: None.

-- REGULATORY LISTS SEARCHED--

1 = NTP CARC 3 = IARC 1 2 = NTP SUS 4 = IARC 2A 5 = IARC 2B

6 = OSHA CARC

SECTION 12

ECOLOGICAL INFORMATION.

Page 7 of 9

The information given is based on data available for the material, the components of the material, and similar materials.

### **ECOTOXICITY**

Material -- Expected to be harmful to aquatic organisms.

Material -- Not expected to demonstrate chronic toxicity to aquatic organisms.

### **MOBILITY**

Material - Expected to partition to water. Some partitioning to sediment and wastewater solids. Minimally volatile.

#### PERSISTENCE AND DEGRADABILITY

#### **Biodegradation:**

Material -- Expected to be readily biodegradable.

### **Hydrolysis:**

Material -- Transformation due to hydrolysis not expected to be significant.

### **Photolysis:**

Material -- Transformation due to photolysis not expected to be significant.

## **Atmospheric Oxidation:**

Material -- Expected to degrade rapidly in air

### **BIOACCUMULATION POTENTIAL**

Material -- Potential to bioaccumulate is low.

### SECTION 13

### DISPOSAL CONSIDERATIONS

Disposal recommendations based on material as supplied. Disposal must be in accordance with current applicable laws and regulations, and material characteristics at time of disposal.

#### **DISPOSAL RECOMMENDATIONS**

Suitable routes of disposal are supervised incineration, preferentially with energy recovery, or appropriate recycling methods in accordance with applicable regulations and material characteristics at the time of disposal.

#### REGULATORY DISPOSAL INFORMATION

RCRA Information: Disposal of unused product may be subject to RCRA regulations (40 CFR 261). Disposal of the used product may also be regulated due to ignitability, corrosivity, reactivity or toxicity as determined by the Toxicity Characteristic Leaching Procedure (TCLP). Potential RCRA characteristics: CORROSIVITY.

Empty Container Warning PRECAUTIONARY LABEL TEXT: Empty containers may retain residue and can be dangerous. DO NOT PRESSURIZE, CUT, WELD, BRAZE, SOLDER, DRILL, GRIND OR EXPOSE SUCH CONTAINERS TO HEAT, FLAME, SPARKS, STATIC ELECTRICITY, OR OTHER SOURCES OF IGNITION; THEY MAY EXPLODE AND CAUSE INJURY OR DEATH. Do not attempt to refill or clean container since residue is difficult to remove. Empty drums should be completely drained, properly bunged and promptly returned to a drum reconditioner. All containers should be disposed of in an environmentally safe manner and in accordance with governmental regulations.

### SECTION 14

### TRANSPORT INFORMATION

LAND (DOT): Not Regulated for Land Transport

Page 8 of 9

LAND (TDG): Not Regulated for Land Transport

SEA (IMDG): Not Regulated for Sea Transport according to IMDG-Code

AIR (IATA): Not Regulated for Air Transport

## SECTION 15 REGULATORY INFORMATION

OSHA HAZARD COMMUNICATION STANDARD: When used for its intended purpose, this material is classified as hazardous in accordance with OSHA 29CFR 1910.1200.

NATIONAL CHEMICAL INVENTORY LISTING: AICS, IECSC, DSL, EINECS, ENCS, KECI, PICCS, TSCA

**EPCRA:** This material contains no extremely hazardous substances.

SARA (311/312) REPORTABLE HAZARD CATEGORIES: Immediate Health.

SARA (313) TOXIC RELEASE INVENTORY: This material contains no chemicals subject to the supplier notification requirements of the SARA 313 Toxic Release Program.

The Following Ingredients are Cited on the Lists Below: None.

### -- REGULATORY LISTS SEARCHED--

1 = ACGIH ALL	6 = TSCA 5a2	11 = CA P65 REPRO	16 = MN RTK
2 = ACGIH A1	7 = TSCA 5e	12 = CA RTK	17 = NJ RTK
3 = ACGIH A2	8 = TSCA 6	13 = IL RTK	18 = PA RTK
4 = OSHA Z	9 = TSCA 12b	14 = LA RTK	19 = RI RTK
5 = TSCA 4	10 = CA P65 CARC	15 = MI 293	

Code key: CARC=Carcinogen; REPRO=Reproductive

## SECTION 18 OTHER INFORMATION

N/D = Not determined, N/A = Not applicable

### THIS SAFETY DATA SHEET CONTAINS THE FOLLOWING REVISIONS:

**Revision Changes: Not Applicable** 

### PRECAUTIONARY LABEL TEXT:

WARNING!

**HEALTH HAZARDS** 

Irritating to eyes. If swallowed, may be aspirated and cause lung damage.

Target Organs: Eye |

Product Name: Exxal 10 Revision Date: 05Jan2007

Page 9 of 9

PHYSICAL HAZARDS Material can accumulate static charges which may cause an incendiary electrical discharge.

#### **PRECAUTIONS**

Avoid all personal contact. Avoid contact with skin. Avoid contact with eyes.

#### **FIRST AID**

Eye: Flush thoroughly with water for at least 15 minutes. Get medical assistance.

**Oral:** Give one or two glasses of water if patient is alert and able to swallow. Seek immediate medical attention. Do not induce vomiting.

Skin: Wash contact areas with soap and water. Remove contaminated clothing. Launder contaminated clothing before

#### FIRE FIGHTING MEDIA

Use water fog, foam, dry chemical or carbon dioxide (CO2) to extinguish flames.

#### SPILL/LEAK

Land Spill: Stop leak if you can do it without risk. Recover by pumping or with suitable absorbent.

**Water Spill:** Stop leak if you can do it without risk. Confine the spill immediately with booms. Warn other shipping. Remove from the surface by skimming or with suitable absorbents. Report spills as required to appropriate authorities. Seek the advice of a specialist before using dispersants.

The information and recommendations contained herein are, to the best of ExxonMobil's knowledge and belief, accurate and reliable as of the date issued. You can contact ExxonMobil to insure that this document is the most current available from ExxonMobil. The information and recommendations are offered for the user's consideration and examination. It is the user's responsibility to satisfy itself that the product is suitable for the intended use. If buyer repackages this product, it is the user's responsibility to insure proper health, safety and other necessary information is included with and/or on the container. Appropriate warnings and safe-handling procedures should be provided to handlers and users. Alteration of this document is strictly prohibited. Except to the extent required by law, re-publication or retransmission of this document, in whole or in part, is not permitted. The term, "ExxonMobil" is used for convenience, and may include any one or more of ExxonMobil Chemical Company, Exxon Mobil Corporation, or any affiliates in which they directly or indirectly hold any interest.

## Safety data sheet Diethanolamine pure sol. 85%

Revision date: 2004/01/06

Page: 1/6

Version: 1.0

(30192864/MDS GEN US/EN)

#### 1. Substance/preparation and company identification

Company
BASF CORPORATION
100 Campus Drive
Florham Park, NJ 07932

24 Hour Emergency Response Information

CHEMTREC: (800) 424-9300 BASF HOTLINE: (800) 832-HELP

Synonyms:

Diethanolamine pure solution 85%

#### 2. Composition/information on ingredients

CAS Number 111-42-2 Content (W/W) 85.0 % Chemical name

7732-18-5

15.0 %

2,2'-iminodiethanol

water

#### 3. Hazard identification

#### **Emergency overview**

WARNING: CAUSES SKIN IRRITATION.
MAY BE HARMFUL IF SWALLOWED.
CAUSES EYE IRRITATION.
Ensure adequate ventilation.
Avoid contact with the skin, eyes and clothing.

#### Potential health effects

#### Primary routes of exposure

Routes of entry for solids and liquids include eye and skin contact, ingestion and inhalation. Routes of entry for gases include inhalation and eye contact. Skin contact may be a route of entry for liquified gases.

#### Repeated dose toxicity:

The substance may cause damage to the hematological system even after repeated ingestion of low doses, as shown in animal studies.

#### 4. First-aid measures

#### General advice:

Remove contaminated clothing. Avoid contact with the skin, eyes and clothing.

#### If inhaled:

Keep patient calm, remove to fresh air, seek medical attention.

#### If on skin:

Wash thoroughly with soap and water. Seek medical attention.

#### If in eyes:

In case of contact with the eyes, rinse immediately for at least 15 minutes with plenty of water. Seek medical attention.

## Safety data sheet Diethanolamine pure sol. 85%

Revision date: 2004/01/06

Page: 2/6

Version: 1.0

(30192864/MDS_GEN_US/EN)

if swallowed:

Rinse mouth immediately and then drink plenty of water, seek medical attention.

#### 5. Fire-fighting measures

Flash point:

No flash point - Measurement made up to the

Autoignition:

375 °C

boiling point. (DIN 51794)

Suitable extinguishing media:

water, dry extinguishing media, foam, carbon dioxide

Protective equipment for fire-fighting:

Firefighters should be equipped with self-contained breathing apparatus and turn-out gear.

**Further information:** 

Collect contaminated extinguishing water separately, do not allow to reach sewage or effluent systems.

#### 6. Accidental release measures

#### Personal precautions:

Avoid contact with the skin, eyes and clothing.

#### **Environmental precautions:**

Discharge into the environment must be avoided.

#### Cleanup:

Spills should be contained, solidified, and placed in suitable containers for disposal.

#### 7. Handling and storage

#### **Handling**

#### General advice:

No special measures necessary provided product is used correctly.

#### Storage

#### Storage incompatibility:

General: Segregate from acids and acid forming substances.

#### 8. Exposure controls and personal protection

#### Components with workplace control parameters

2,2'-iminodiethanol

**ACGIH** 

Skin Designation; TWA value 2 mg/m3;

#### Personal protective equipment

#### Respiratory protection:

Wear respiratory protection if ventilation is inadequate.

## Safety data sheet Diethanolamine pure sol. 85%

Revision date: 2004/01/06

Page: 3/6 (30192864/MDS GEN US/EN)

Version: 1.0

Hand protection:

Chemical resistant protective gloves

Eye protection:

Tightly fitting safety goggles (chemical goggles).

General safety and hygiene measures: Avoid contact with the skin, eyes and clothing.

#### 9. Physical and chemical properties

Odour:

perceptible

Colour:

colourless to yellow

pH value:

11

(100 g/l, 20 °C)

Melting point:

-6.4 °C

Boiling range:

100 - 268 °C

< 0.1 mbar

(20°C)

Vapour pressure: Density:

1.0959 g/cm3

( 15 °C)

Partitioning coefficient noctanol/water (log Pow):

-2.18

Viscosity, kinematic:

approx. 100 mm2/s

Miscibility with water:

(20 °C) miscible

#### 10. Stability and reactivity

Hazardous reactions:

Evolution of heat under influence of acids.

#### 11. Toxicological information

Oral:

Information on: diethanolamine

LD50/rat: 1,610 mg/kg

Inhalation:

Information on: diethanolamine

Inhalation-risk test (IRT): No mortality within 8 hours as shown in animal studies. The inhalation of a highly saturated vapor-air mixture represents no acute hazard.

Dermal:

Information on: diethanolamine

LD50/rabbit: 12,200 mg/kg

Skin irritation:

## Safety data sheet Diethanolamine pure sol. 85%

Revision date: 2004/01/06

Page: 4/6

Version: 1.0

(30192864/MDS_GEN_US/EN)

Information on: diethanolamine rabbit: Irritant. (BASF-Test)

#### Eye irritation:

Information on: diethanolamine rabbit: Irritant. (BASF-Test)

The European Union (EU) has classified this substance with 'Risk of serious damage to eyes' (R41)

#### Sensitization:

Information on: diethanolamine

Guinea pig maximization test/: Skin sensitizing effects were not observed in animal studies.

#### Other information:

Information on: diethanolamine

No experimental evidence available for genotoxicity in vitro (Ames test negative).

Together with nitrosating agents (f. i. nitrites, nitrogen oxides) nitrosamines may be formed under certain conditions. Nitrosamines showed a carcinogenic effect in animal experiment.

#### 12. Ecological information

Evaluation: Information on: diethanolamine

Test method:

OECD Guideline 301 F

Method of analysis:

DOC reduction

Degree of elimination:

> 90 % (28 d)

Test method: Method of analysis: OECD 301E/92/69/EEC, C.4-B

Degree of elimination:

DOC reduction > 90 % (28 d)

Test method:

OECD 301 A (new version)

Method of analysis:

DOC reduction

Degree of elimination:

> 90 % (10 d)

Evaluation:

Readily biodegradable.

Readily biodegradable. Readily biodegradable.

Information on: diethanolamine Chemical oxygen demand (COD):

1,352 mg/g

Information on: diethanolamine Biochemical oxygen demand (BOD) Incubation period 5 d: 885 mg/g

#### **Environmental toxicity**

Information on: diethanolamine Acute and prolonged toxicity to fish: Fathead minnow/LC50 (96 h): 1,460 mg/l

## Safety data sheet Diethanolamine pure sol. 85%

Revision date: 2004/01/06

Page: 5/6

Version: 1.0

(30192864/MDS_GEN_US/EN)

Information on: diethanolamine Acute toxicity to aquatic invertebrates: Daphnia magna/LC50 (48 h): 55 mg/l

Information on: diethanolamine Toxicity to aquatic plants:

DIN 38412 Part 9 green algae/EC50 (72 h): 75 mg/l

Nominal concentration

Information on: diethanolamine Toxicity to microorganisms:

DIN/EN/ISO 8192-OECD 209-88/302/EEC,P. C activated sludge/EC20 (30 h): > 1,000 mg/l

The inhibition of the degradation activity of activated sludge is not anticipated when introduced to biological treatment plants in appropriate low concentrations.

Other ecotoxicological advice:

Due to the pH-value of the product, neutralization is generally required before discharging sewage into treatment plants.

#### 13. Disposal considerations

Waste disposal of substance:

Dispose of in accordance with national, state and local regulations.

Contaminated packaging:

Dispose of in accordance with national, state and local regulations.

#### 14. Transport information

Reference Bill of Lading

#### 15. Regulatory information

Federal Regulations

Registration status:

TSCA, US

released / listed

State regulations

State RTK

CAS Number 111-42-2 Chemical name
2.2'-iminodiethanol

#### **Section 1 - Chemical Product and Company Identification**

Product/Chemical Name:

Sodium /PotassiumBisulfite Blend

Chemical Formula:

NaHSO₃ / KHSO 3

**CAS Number:** 

007631-90-5 007773-03-7

Other Designations:

Sodium Potassium Bisulfite Blend, An Aquequs Solution of Metal Bisulfite.

General Use:

Waste water dechlorinating agent, Boiler Treatment

Manufacturer:

Calabrian Corporation

409 / 727-1471

5500 Hwy. 366

Fax: 409 / 727-5803

Port Neches, Texas 77651

CHEMTREC Emergency No. 800 / 424-9300

#### Section 2 - Composition / Information on Ingredients

Composition	TWA	STEL	IDLH	CAS Number	% wt or vol
Water	*	*	*.		50 - 70 %
Sodium Bisulfite 5 mg	g/m ³ *	*	*	007631-90-5	10 - 30 %
Pottassium Bisulfite	*	*	*	007773-03-7	1 - 5%

none established.

#### Section 3 - Hazards Identification

#### **** **Emergency Overview**

Warning Statement:

None

Hazard Rating:

Health = 2.

Fire = 0.

Reactivity = 0.

PPE - Sec. 8

**Primary Entry Routes:** 

Inhalation

**Target Organs:** 

Respiratory system, eyes, skin

Acute Effects:

Acute effects to exposure of sodium bisulfite includes eye and mucous membrane irritation. Decomposition of Sodium Bisulfite Solutions may release toxic and hazardous fumes of sulfur oxides, including sulfur dioxide. Acute poisoning from sulfur dioxide is rare because the gas is easily detected. It is so irritating that contact cannot be tolerated. Symptoms include

coughing, hoarseness, sneezing, tearing, and breathing difficulty. However, workers who cannot escape exposure may suffer severe pulmonary damage

which can be fatal.

Inhalation:

Irritant Irritant

Eye: Skin:

Irritant

Ingestion:

Not likely to occur

Carcinogenicity: **Chronic Effects:**  IARC, NTP, and OSHA do not list Sodium Bisulfate as a carcinogen. Prolonged or repeated exposure may cause dermatitis, and sensitization

Medical Conditions Aggravated by Long-Term Exposure: Capable of provoking bronchospasm in

sulfite-sensitive individuals who have asthma.

MSDS No. 341.14

Page 1

#### Section 4 - First Aid Measures

**Exposure** 

Route

**Symptom** 

**Treatment** 

Inhalation:

Sore throat, shortness of breath

coughing, and congestion.

emove from exposure to fresh air. Seek

Medical attention in severe cases or if recovery

is not rapid.

**Eye Contact:** 

Irritation to eyes and mucous

membranes.

Irrigate with water until no evidence of

chemical remains. Obtain medical

attention.

**Skin Contact:** 

Irritation, itching, dermatitis

Wash with soap and drench with water.

Remove contaminated clothing and wash

before reuse.

ingestion:

Irritation to mucous membranes.

ive large quantities of water or milk

immediately. Obtain medical attention.

After first aid, get appropriate medical attention.

Note to physician:

Exposure may aggravate acute or chronic asthma, emphysema and

bronchitis.

Special Precautions/Procedures:

None indicated.

#### Section 5 - Fire-Fighting Measures

Flash Point:

Flash Point Method:

**Burning Rate:** 

Autoignition Temperature:

LEL: UEL:

Flammability Classification: Extinguishing Media:

Exaligations modes.

Unusual Fire or Explosion Hazards:

Hazardous Combustion Products:

Fire-Fighting Instructions:

**Fire-Fighting Equipment:** 

Not combustible.

Not Applicable. Not Applicable.

Not Applicable. Not Applicable.

Not Applicable. Not Flammable.

Use extinguishing agent appropriate for surrounding fire

conditions.
None indicated.

May release hazardous gas.

Do not release runoff from fire control methods to sewers or waterways.

Because fire may produce toxic thermal decomposition

products, wear a self-contained breathing apparatus (SCBA) with a full face piece operated in pressure-demand or positive-

pressure mode.

MSDS No. 341.14

Page 2

#### Section 6 - Accidental Release Measures

Spill / Leak Procedures: Wear appropriate PPE - See Section 8.

Small Spills / Leaks:

Spills can be neutralized with an alkaline material such as caustic soda. Leaks may be located by spraying the area with ammonium hydroxide solution which forms a white fume in the presence of sulfur

dioxide.

Large Spills / Leaks:

Containment:

Large spills should be handled according to a predetermined plan.

For large spills, dike far ahead of contaminated runoff for later disposal.

#### Section 7 - Handling and Storage

**Handling Precautions:** 

Avoid contact with product. Do not breath vapor.

Storage Requirements:

void heat or moisture. Store in areas, away from heat and moisture and protected from physical damage. Segregate from acids and

oxidizers.

#### Section 8 - Exposure Controls / Personal Protection

Ventilation:

Provide general or local exhaust ventilation systems to maintain airborne concentrations below OSHA limits (Sec. 2). Local exhaust ventilation is preferred because it prevents contaminant dispersion

Into the work area by controlling it at the source.

**Respiratory Protection:** 

Follow OSHA respirator regulations (29 CFR 1910.134) and, if necessary, wear a MSHA/NIOSH-approved respirator. Select respirator based on its suitability to provide adequate worker protection for given working conditions, level of airborne

contamination, and presence of sufficient oxygen. For emergency or non-routine operations (cleaning spills, reactor vessels, or storage tanks), wear a SCBA. Warning! Air-purifying respirators do not protect

workers in oxygen-deficient atmospheres.

**Protective Clothing / Equipment:** 

Wear protective gloves, boots, and clothing when necessary to prevent excessive skin contact. Wear protective eyeglasses or goggles, per OSHA eye- and face-protection regulations (29 CFR

1910.133).

**Safety Stations:** 

Make emergency eyewash stations, showers, and washing facilities

available in the work area.

**Contaminated Equipment:** 

Comments:

Remove this material from personal protective equipment as needed.

Do not eat, drink, or smoke in work areas. Practice good personal hygiene after using this material, especially before food or beverage

consumption.

MSDS No. 341.14

NA 205 °F

11 OF

Normal.

Complete

#### Section 10 - Stability & Reactivity

Stability:

Stable under normal conditions.

Polymerization: **Chemical Incompatibilities:**  Hazardous polymerization will not occur. Sodium Bisulfite Solutions may release toxic and hazardous fumes of

sulfur oxides, including sulfur dioxide. Acute poisoning from sulfur dioxide is rare because the gas is easily detected. It is so irritating that contact cannot be tolerated. Symptoms include coughing, hoarseness, sneezing, tearing, and breathing difficulty. However, workers who cannot escape high accidental exposure may suffer severe pulmonary damage which can be fatal. Contact with powdered potassium, sodium metals, alkali, and oxidizing agents produce violent reactions. Reacts with water and steam to form corrosive sulfurous acid. Reacts with

chlorates to form unstable chlorine dioxide.

**Conditions to Avoid:** 

Avoid excessive heat, or open flame.

Hazardous Decomposition Products:

May release hazardous sulfur dioxide gas.

### Section 11 - Toxicological Information

Eye Effects (rabbit):

Skin Effects (rabbit):

Carcinogenicity: **Chronic Effects:** 

Not available. Not available. Acute Inhalation Effects (rat): Not available.

Acute Oral Effects (rat): LD₅₀ = 4,112 mg/kg

IARC, NTP, and OSHA do not list Sodium Bisulfite as a carcinogen. Prolonged or repeated exposure may cause dermatitis, and sensitization reactions. Exposure to asthmatic, atopic and sulfite sensitive individuals may result in severe bronchioconstriction and reduced levels in forced expiratory volume. Decomposition of sodium bisulfite solutions may release toxic and hazardous fumes of sulfur oxides, including sulfur dioxide, which may cause permanent pulmonary impairments from acute and chronic exposure. The Immediately Dangerous to Life or Health (IDLH) level for SO₂ is 100 ppm.

**Aqutic Toxcity:** 

The toxicity threshold of Sodium Bisulfite (100 hr. at 23 degrees Celsius) to Daphnia Magna has been reported to be 102 mg/l. In the presence of additional sodium salts, this threshold may be lower. For monnows, exposed for 6 hours to sodium bisulfite solution in distilled water at 19 degrees Celsius it was 60-65 mg/l, and in hard water at 18 degrees Celsius it was 80-85 mg/l.

The 24, 48, and 96 hour LC50 value was 240 mg/l for the mosquito-fish

(Gambusia affinis in turbid water at 17 - 22 degree Celsius.

MSDS No. 341.14

Page 4

#### Section 12 - Ecological Information

**Ecotoxicity:** 

Sodium Bisulfite is a non hazardous solution commonly used as a waste water dechlorinating agent. High concentrations will contribute to elevated chemical

oxygen demand in aquatic environments.

**Environmental Transport:** 

Soluble in water.

**Environmental Degradation:** 

Rapid biological decomposition.

Soil Absorption/Mobility:

Slight.

#### Section 13 - Disposal Considerations

Disposal:

Waste determinations typically consider Sodium Bisulfite

contaminated materials to be non-hazardous.

**Disposal Regulatory Requirements: Container Cleaning and Disposal:** 

Follow applicable Federal, state and local regulations. Follow applicable Federal, state and local regulations.

## **Section 14 - Transport Information**

#### DOT Transportation Data (49 CFR 172.101):

**Shipping Name:** 

Environmentally Hazardous Subsatance, Liquid, N.O.S.

Technical Name:

Bisulfite, Sodium/Potassium Bisulfite Blend Corrosive

Shipping Symbols: **Hazard Class:** 

8 - Corrosive

**Subsidiary Hazard:** 

NA

ID No.:

UN2693

Packing Group: III

Label:

Required

Repotable Quanity:

5.000/Lbs

## Section 15 - Regulatory Information

**EPA Regulations:** 

RCRA Hazardous Waste Classification (40 CFR 261):

Not listed.

RCRA Hazardous Waste Number (40 CFR 261):

Not listed.

CERCLA Hazardous Substance (40 CFR 302.4):

Listed. 5000 pounds

**CERCLA Reportable Quantity (RQ):** 

Not listed.

SARA Title III: FIFRA:

Not regulated.

TSCA:

### Hot Resin Solution , UN Number 1866

# NAERG127 Flammable Liquids (Polar/Water-Miscible)

### POTENTIAL HAZARDS

### FIRE OR EXPLOSION

- * HIGHLY FLAMMABLE: Will be easily ignited by heat, sparks or flames.
- * Vapors may form explosive mixtures with air.
- * Vapors may travel to source of ignition and flash back.
- * Most vapors are heavier than air. They will spread along ground and collect in low or confined areas (sewers, basements, tanks).
- * Vapor explosion hazard indoors, outdoors or in sewers.
- * Those substances designated with a "P" may polymerize explosively when heated or involved in a fire.
- * Runoff to sewer may create fire or explosion hazard.
- Containers may explode when heated.
- * Many liquids are lighter than water.

### **HEALTH**

- * Inhalation or contact with material may irritate or burn skin and eyes.
- * Fire may produce irritating, corrosive and/or toxic gases.
- * Vapors may cause dizziness or suffocation.
- * Runoff from fire control may cause pollution.

### PUBLIC SAFETY

- * CALL Emergency Response Telephone Number on Shipping Paper first. If Shipping Paper not available or no answer, refer to appropriate telephone number listed on the inside back cover.
- * Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions.
- * Keep unauthorized personnel away.
- * Stay upwind.
- * Keep out of low areas.
- * Ventilate closed spaces before entering.

### PROTECTIVE CLOTHING

- * Wear positive pressure self-contained breathing apparatus (SCBA).
- * Structural firefighters' protective clothing will only provide limited protection.

### **EVACUATION**

### Large Spill

* Consider initial downwind evacuation for at least 300 meters (1000 feet).

### Fire

* If tank, rail car or tank truck is involved in a fire, ISOLATE for

NAERG 127 Hot Resin Solution , UN Number 1866

800 meters (1/2 mile) in all directions; also, consider initial evacuation for 800 meters (1/2 mile) in all directions.

### **EMERGENCY RESPONSE**

### FIRE

CAUTION: All these products have a very low flash point: Use of water spray when fighting fire may be inefficient.

### Small Fires

* Dry chemical, CO2, water spray or alcohol-resistant foam.

### Large Fires

- * Water spray, fog or alcohol-resistant foam.
- * Use water spray or fog; do not use straight streams.
- * Move containers from fire area if you can do it without risk.

### Fire involving Tanks or Car/Trailer Loads

- * Fight fire from maximum distance or use unmanned hose holders or monitor nozzles.
- * Cool containers with flooding quantities of water until well after fire is out.
- * Withdraw immediately in case of rising sound from venting safety devices or discoloration of tank.
- * ALWAYS stay away from tanks engulfed in fire.
- * For massive fire, use unmanned hose holders or monitor nozzles; if this is impossible, withdraw from area and let fire burn.

### SPILL OR LEAK

- * ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area).
- * All equipment used when handling the product must be grounded.
- * Do not touch or walk through spilled material.
- * Stop leak if you can do it without risk.
- * Prevent entry into waterways, sewers, basements or confined areas.
- * A vapor suppressing foam may be used to reduce vapors.
- * Absorb or cover with dry earth, sand or other non-combustible material and transfer to containers.
- * Use clean non-sparking tools to collect absorbed material.

### Large Spills

- * Dike far ahead of liquid spill for later disposal.
- * Water spray may reduce vapor; but may not prevent ignition in closed spaces.

### FIRST AID

- * Move victim to fresh air.
- * Call 911 or emergency medical service.
- * Apply artificial respiration if victim is not breathing.
- * Administer oxygen if breathing is difficult.
- * Remove and isolate contaminated clothing and shoes.
- * In case of contact with substance, immediately flush skin or eyes with

running water for at least 20 minutes.

- Wash skin with soap and water.
- * Keep victim warm and quiet.
- * Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

HEXION

Hexion Specialty Chemicals, Inc. 155 West A Street, Bldg. A-1 Springfield, Oregon 97477

05/16/2006

ANDREWS TRANSPORT TEMPLE DRIVE DIBOLL, TEXAS USA 75941

Dear Customer:

Enclosed please find the most current Material Safety Data Sheet (MSDS) for the product you have recently purchased or in which you have expressed an interest.

Cascophen SP-7350KS

It is Hexion Specialty Chemical's policy to communicate the health and safety information pertinent to the safe handling and use of our products. However, we cannot anticipate all the uses to which a customer or user may put our products; therefore, this information may not address all issues pertaining to your operations or use of the product. We recommend that you consult with experts of your choice to determine whether or not your safety programs and warnings are adequate in light of your operations and intended product use.

Please be aware that the hazard information contained in the MSDS must be communicated to your workers and any other users. Please forward this information to the individuals within your organization responsible for the safe handling of this product and take all appropriate steps to insure that this information is provided to your employees and customers.

Additionally, pursuant to Title III, Section 313 of the Superfund Amendments and Reauthorization Act of 1986 (Emergency Planning and Community Right-to-Know Act of 1986), we are informing you as required by Subpart C of 40 CFR Part 372 that this product may contain chemicals subject to the reporting requirements of Section 313. All chemicals in this product that are subject to Section 313 reporting requirements are clearly indicated in Section 15.1 of the MSDS. Section 15.2 provides relevant information to comply with Canadian regulations. Additional state right-to-know information can be found in Section 15.3 where applicable.

Further, be aware that we have adopted the 16 section uniform MSDS format approved by the American National Standards Institute (ANSI) as a consensus standard, ANSI Z400.1, and accepted in the United States and Canada. The use of this format is intended to create MSDSs that are easier to use and understand.

If you have any questions or require additional information, please call the phone number listed in Section 1 for additional health, safety or regulatory information. Your interest in Hexion Specialty Chemicals products is appreciated.

Very truly yours,

Sydney Batte
Regulatory Affairs & Product Stewardship

#### MATERIAL SAFETY DATA SHEET

FOR INDUSTRIAL USE ONLY

DESCRIPTION: Cascophen SP-7350KS

#### 1. Chemical Product and Company Identification

DESCRIPTION:

Cascophen SP-7350KS

PRODUCT CODE:

T350076

PRODUCT TYPE:

Liquid PF Resin

APPLICATION:

Southern Pine Plywood

CASCOPHEN® is a trademark of Borden Chemical Investments, Inc., registered in the USA.

#### Manufacturer/Supplier Information

MSDS prepared by: Hexion Specialty Chemicals, Inc. 155 West A Street, Bldg. A-1 Springfield, OR 97477

For Emergency Medical Assistance Call Health & Safety Information Services 1-866-303-6949

For additional health and safety or regulatory information, call (541)744-3256.

#### 2. Hazards Identification

#### 2.1 Emergency Overview

Appearance Odor Clear, reddish-brown liquid

Slight aromatic

#### CAUTION

Will polymerize at high temperatures with some evolution of heat.

Hazardous polymerization may occur.

Causes eye irritation.

#### HMIS Rating

HEALTH =

2 (moderate)

FLAMMABILITY

0 (minimal)

REACTIVITY

1 (slight)

CHRONIC = '

HMIS® ratings involve data interpretations that may vary from company to company. They are intended only for the rapid, general identification of the magnitude of the specific hazard. To deal adequately with the safe handling of this material, all the information contained in this MSDS must be considered.

#### 2.2 Potential Health Effects

#### **Immediate Hazards**

Cascophen SP-7350KS Version: 1.1 Current Issue: 04/13/2006

Page 2/7

INGESTION:

Not expected to be harmful under normal conditions of use.

If accidentally swallowed, burns or irritation to mucous membranes,

esophagus or GI tract can result.

INHALATION:

Not expected to be harmful under normal conditions of use. However, if

allowed to become airborne, may cause irritation of nose, throat and

lungs,

SKIN:

May cause irritation on prolonged or repeated contact.

EYES:

Causes irritation.

#### **Delayed Hazards**

#### 50-00-0

#### Formaldehyde

May cause cancer. OSHA regulates formaldehyde as a potential human carcinogen, See the OSHA Formaldehyde Workplace Standard at 29CFR 1910.1048. Rats chronically exposed to 14 ppm formaldehyde contracted nasal cancer. The National Toxicology Program (NTP) has listed formaldehyde as a probable human carcinogen. The International Agency for Research on Cancer (IARC) has concluded formaldehyde is carcinogenic to humans.

Safe handling and use instructions are provided in this MSDS and in the OSHA Formaldehyde Workplace Standard at 29CFR1910.1048. OSHA has identified 0.5 ppm as the "Action Level". Please review and understand the guidance contained in this MSDS and refer to the OSHA Formaldehyde Standard for regulatory requirements that may be applicable to your operation and use.

For further information and a review of various studies, go to www.osha.gov/SLTC/formaldehyde, www.iarc.fr and other authoritative websites. May cause allergic skin reaction. Some reports suggest that formaldehyde may cause respiratory sensitization, such as asthma, and that preexisting respiratory and skin disorders may be aggravated by exposure.

### 3. Composition, Information on Ingredients

The ingredients listed below have been associated with one or more immediate and/or delayed(*) health hazards. Risk of damage and effects depends upon duration and level of exposure. BEFORE USING, HANDLING, OR EXPOSURE TO THESE INGREDIENTS, READ AND UNDERSTAND THE MSDS.

		% by weight
	Complexing Agent #2 (Specific Identity Withheld as	1.0 - 5.0
	Trade Secret)	•
50-00-0	*Formaldehyde	0.01 - 0.1
40798-65-0	Phenol-Formaldehyde Polymer Sodium Salt	10.0 - 30.0
120712-84-7	Formaldehyde, Polymer With Phenol, Potassium	10.0 - 30.0
	Salt	

Any applicable Canadian trade secret numbers will be listed in Section 15.2.

#### 4. First Aid Measures

INGESTION:

If accidentally swallowed, do not induce vomiting. If the individual is rapidly losing consciousness, unconscious or convulsing, do not give anything by mouth. Immediately contact poison control center or hospital emergency room for any other additional treatment directions.

(NHALATION:

If inhaled, remove to fresh air. If not breathing, give artificial respiration,

Cascophen SP-7350KS Version: 1.1

Current Issue: 04/13/2006

Page 3/7

preferably mouth-to-mouth. Call a physician.

SKIN:

Flush with plenty of water. Remove contaminated clothing. Call a

physician if irritation persists.

EYES:

Immediately flush eyes with plenty of water for at least 15 minutes. Eyelids should be held apart during irrigation to ensure water contact

with entire surface of eyes and lids, Call a physician.

#### 5. Fire Fighting Measures

Suitable Extinguishing Media: In case of fire, water should be used to keep fire-exposed containers cool. Combustion products may include oxides of carbon and nitrogen.

Will not burn unless water has evaporated. Dried material may burn.

#### 6. Accidental Release Measures

Contain and/or absorb spill with inert material (e.g. sand, vermiculite), then place in a suitable container. For large spills, use water spray to disperse vapors and flush spill area. Prevent runoff from entering waterways or sewers. Use appropriate Personal Protective Equipment (PPE).

#### 7. Handling and Storage

#### 7.1 Handling

Handle in accordance with good industrial hygiene and safety practices. These practices include avoiding unnecessary exposure and removal of the material from eyes, skin and clothing. Wash thoroughly after handling. Always use appropriate Personal Protective Equipment (PPE).

INHALATION:

Avoid prolonged or repeated breathing of vapor.

SKIN:

Avoid prolonged or repeated contact with skin and clothing.

EYES:

Avoid contact with eyes.

#### 7.2 Storage

Store at 20°C (68°F) or lower. Keep tightly closed.

### 8. Exposure Controls/Personal Protection

#### 8.1 Exposure Guidelines

Complexing Agent #2 (Specific Identity Withheld as Trade Secret)

#### 8.2 Exposure Controls

ENGINEERING CONTROLS: The following exposure control techniques may be used to effectively minimize employee exposure: local exhaust ventilation, enclosed system design, process isolation and remote control in combination with appropriate use of personal protective equipment and prudent work practices. These techniques may not necessarily address all issues pertaining to your operations. We, therefore, recommend that you consult with experts of your choice to determine whether or not your programs are adequate.

If airborne contaminants are generated when the material is heated or handled, sufficient ventilation in volume and air flow patterns should be provided to keep air contaminant concentration levels below acceptable criteria.

#### 8.3 Personal Protection

Use goggles if contact is likely. Wear impervious gloves as required to prevent skin contact.

#### 9. Physical and Chemical Properties

Appearance Clear, reddish-brown liquid Odor Slight aromatic Odor threshold Not available pΗ 11.0 - 12.0 Freezing point Less than 0 °C (32 °F) Bolling point, 760 mm Hg Approx. 102 °C (216 °F) Flash point Not applicable Evaporation rate Approx. 0.4 (Butyl Acetate = 1) Lower explosion limit Not applicable Upper explosion limit Not applicable Vapor pressure Approx. 22 mm Hg @25 °C (77 °F) Vapor density Not available Specific gravity 1.2000 - 1.4000 Solubility in water Infinite Octanol/water partition coefficient Not available Autoignition temperature Not applicable Viscosity 400 - 1,000 cPs Brookfield Typical % solids Approx. 43.00 % (m)

#### 10. Stability and Reactivity

#### **Chemical Stability**

Normally stable, but will polymerize at high temperatures with some evolution of heat.

Cascophen SP-7350KS Version: 1.1 Current Issue: 04/13/2006

Page 5/7

#### Incompatible Materials

Oxidizers, acids

#### **Hazardous Decomposition Products**

CO, CO2, aldehydes (including formaldehyde), oxides of nitrogen, particulate matter and other organic compounds.

#### Possibility of Hazardous Reactions

Hazardous polymerization will occur.

#### 11. Toxicological Information

INHALATION:

A similar product was found to be non-toxic by inhalation when tested

as described in 16 CFR Part 1500.3 (c)(1) and (2).

SKIN:

A similar product was not a primary irritant (primary skin irritation index

less than 5.0/8.0) when tested as described in 16 CFR Part 1500.41.

EYES:

A similar product was severely irritating when tested as described in 16

CFR Part 1500.42.

Complexing Agent #2 (Specific Identity Withheld as Trade Secret)

#### 12. Ecological Information

No data for ecotoxicity has been found. Effects are expected to be minimal. Phenolformaldehyde polymers have a very low rate of biodegradation. Bioaccumulation is expected to be minimal. Product is initially a mobile liquid which will solidify on aging. Unreacted monomer may be leached into ground water even after normal curing has occurred.

#### 13. Disposal Considerations

Recover free liquid. Absorb residue and dispose of according to local, state/provincial, and federal requirements.

#### 14. Transport Information

#### 14.1 U.S. Department of Transportation (DOT)

The data provided in this section is for information only and may not be specific to your package size or mode of transport. You will need to apply the appropriate regulations to properly classify your shipment for transportation.

#### 15. Regulatory Information (Selected Regulations)

#### 15.1 U.S. Federal Regulations

#### OSHA Hazards Communication Standard 29CFR1910.1200

This material is a "health hazard" and/or a "physical hazard" as determined when reviewed according to the requirements of the Occupational Safety and Health Administration 29 CFR Part 1910.1200 "Hazard Communication" Standard.

#### SARA Title III: Section 311/312

Reactivity hazard Immediate health hazard Delayed health hazard

#### SARA Title III: Section 313 and 40 CFR Part 372

This product contains the following toxic chemical(s) subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986, and Subpart C-Supplier Notification Requirement of 40 CFR Part 372.

None required per SARA TITLE III SECTION 313.

#### TSCA Section 8(b) Inventory

All reportable chemical substances are listed on the TSCA Inventory. We rely on certifications of compliance from our suppliers for chemical substances not manufactured by us.

#### 15.2 Canadian Regulations

Cascophen SP-7350KS Version: 1.1 Current issue: 04/13/2006

Page 7/7

#### Workplace Hazardous Materials Information System (WHMIS)

This product has been classified in accordance with the hazard criteria of the Controlled Products Regulation (CPR) and the MSDS contains all the information required by the CPR.

Class D2B

#### **Canadian Environmental Protection Act (CEPA)**

All reportable chemical substances are listed on the Domestic Substances List (DSL) or otherwise comply with CEPA new substance notification requirements.

#### National Pollutant Release Inventory (NPRI)

This product contains the following chemical(s) subject to the reporting requirements of the Canadian Environmental Protection Act (CEPA) subsection 16(1), National Pollutant Release Inventory.

None required.

#### 16. Other Information

#### User's Responsibility

The OSHA Hazard Communication Standard 29CFR 1910.1200 and the Workplace Hazardous Materials Information System (WHMIS) require that the information contained on these sheets be made available to your workers. Educate and train your workers regarding OSHA and WHMIS precautions, Instruct your workers to handle this product properly. Consult with appropriate experts to guard against hazards associated with use of this product and its ingredients.

#### Disclaimer

SELLER MAKES NO WARRANTY, EXPRESS OR IMPLIED, CONCERNING THE PRODUCT OR THE MERCHANTABILITY OR FITNESS THEREOF FOR ANY PURPOSE, except that the product shall conform to contracted specifications, and that the product does not infringe any valid United States or Canadian patent. No claim of any kind shall be greater in amount than the purchase price of the quantity of product in respect of which damages are claimed. In no event shall Seller be liable for incidental or consequential damages, whether Buyer's claim is based on contract, breach of warranty, negligence or otherwise.

Dear Customer:

Enclosed please find the most current Material Safety Data Sheet (MSDS) for the product you have recently purchased or in which you have expressed an interest.

It is Hexion Specialty Chemical's policy to communicate the health and safety information pertinent to the safe handling and use of our products. However, we cannot anticipate all the uses to which a customer or user may put our products; therefore, this information may not address all issues pertaining to your operations or use of the product. We recommend that you consult with experts of your choice to determine whether or not your safety programs and warnings are adequate in light of your operations and intended product use.

Please be aware that the hazard information contained in the MSDS must be communicated to your workers and any other users. Please forward this information to the individuals within your organization responsible for the safe handling of this product and take all appropriate steps to insure that this information is provided to your employees and customers.

Additionally, pursuant to Title III, Section 313 of the Superfund Amendments and Reauthorization Act of 1986 (Emergency Planning and Community Right-to-Know Act of 1986), we are informing you as required by Subpart C of 40 CFR Part 372 that this product may contain chemicals subject to the reporting requirements of Section 313. All chemicals in this product that are subject to Section 313 reporting requirements are clearly indicated in Section 15 of the MSDS.

Please be advised that we are in the midst of converting to a new MSDS system. During this transition you may receive MSDSs in both the old and new format. We thank you for your patience during this transition period. If you have any questions, require additional health, safety or regulatory information or encounter problems with the enclosed MSDSs, please call the phone number listed in Section 1. Your interest in Hexion Specialty Chemicals products is appreciated.

Very truly yours,

Sydney Batte
Product Safety and Regulatory Compliance

### Formosa Plastics Corporation, Texas Material Safety Data Sheet

**MANUFACTURER** 

MSDS No:

C/A008

Formosa Plastics Corporation, Texas

Preparation Date: Supersedes Date: 02/25/2000 08/11/97

201 Formosa Drive, Point Comfort, TX 77978 Telephone: (361) 9877000 Fax: (361) 9872363 Emergency: 800-424-9300 (CHEMTREC)

1. PRODUCT IDENTIFICATION

**Product Name:** 

Sulfuric Acid

**Product Code:** 

SA01

Chemical Family:

Inorganic Acid

Chemical Name:

Sulfuric Acid

CAS No:

7664-93-9

Synonyms:

Oil of Vitriol, Sulphuric Acid

Formula:

 $H_2SO_4$ 

**Technical Information:** 

(361) 987-7453

#### 2. PRODUCT INGREDIENTS

No.	Components	CAS No.	Percent (%)	OSHA PEL
P	Sulfuric acid		60	1.0 mg/M ³ TWA
1	Water	7732-18-5	1140	Not established

#### 3. PHYSICAL/CHEMICAL PROPERTIES

Physical Form:

Oily liquid

Color:

Colorless t slight yellow

Odor:

Odorless

Molecular Weight:

98.08

**Boiling Point:** 

136°F (57.78°C)

Melting Point:

11.6°F (-11.33°C)

Freezing Point:

Not applicable

 $Solubility\ in\ Water:$ 

100%

Specific Gravity: Vapor Density:

1.7 (water = 1) 3.4 (air = 1)

**Evaporation Rate:** 

<1 (Butyl Acetate = 1)

Vapor Pressure:

<0.3 mmHg @ 25 degrees C

% Volatile:

Not established

pH:

<1

The physical data presented above are typical values and should not be construed as a specification.

#### 4. FIRE HAZARD DATA AND FIGHTING METHOD

MSDS #: 2389 Entered: 11-1-05 Flash Point:

Not applicable (Noncombustible)

Autoignition:

Not applicable Not applicable

Flammable Limits

In Air (LEL, %)

(UEL, %)

Not applicable

**Extinguishing Media:** 

Water spray/fog, carbon dioxide, foam, or dry chemical.

Special Fire Fighting Procedure:

Use NIOSH/MSHA approved self-contained breathing apparatus (SCBA) and full protective clothing. Use water spray to cool containers exposed to fire. Avoid direct

stream of water.

Unusual Fire and **Explosion Hazards:**  Flammable and explosive hydrogen gas can be generated inside metal drums and storage tanks. Concentrated acid can ignite combustible materials on contact. At high temperature, sulfuric acid and sulfur trioxide mists can be released from vented or ruptured containers. If water is added to concentrated sulfuric acid, violent spattering

can occur and considerable heat may be evolved.

#### 5. HUMAN HEALTH DATA

**Emergency Overview:** 

Severe acid burns to skin, eye, respiratory system.

Primary Route(s) of Exposure: Inhalation, Eye, Skin Contact

#### Potential Health Effects and Symptoms of Over-Exposure

Longer exposure to high level of acid fumes may cause erosion of teeth followed by jaw necrosis, bronchial irritation, and coughing.

Eye Contact:

May cause severe irritation, corneal burns and blindness.

Skin Contact:

May cause severe burns or irritation to skin.

Inhalation:

May cause irritation or corrosive burns to the upper respiratory system. Lung irritation and

pulmonary edema.

Ingestion:

May cause irritation and burns to throat, mouth and stomach.

#### Medical Conditions Aggravated by Overexposure:

Persons with a history of ailments or with a pre-existing disease involving the respiratory tract may be at increased risk from exposure.

Carcinogenicity:

NTP: No IARC: Yes OSHA: No

IARC - occupation exposures to strong inorganic acid mists containing sulfuric acid, Group 1

#### 6. FIRST AID MEASURES

**Eve Contact:** 

Immediately flush with plenty of water for at least 15 minutes. Call a physician.

Skin Contact:

Immediately wash affected area with plenty of water for at least 15 minutes. Remove

contaminated clothing. Get medical attention.

Inhalation:

Move to fresh air. Resuscitate if not breathing. Get medical attention.

Ingestion:

Drink large amounts of water. Do not induce vomiting. Get prompt medical attention.

Notes to Physician:

Treat symptomatically and supportively.

Other Instructions:

Never give anything by mouth if person is unconscious.

#### 7. EXPOSURE CONTROLS, PERSONAL PROTECTION RECOMMENDATIONS

Eye Protection:

Chemical goggles.

Skin Protection:

Rubber gloves and equivalent protective clothing.

Respiratory Protection:

NIOSH/MSHA approved air purifying respirators with acid fume/mist cartridges.

**Engineering Control:** 

Ventilation Requirements -Local Exhaust, General

Maintain air concentration below OSHA PEL, 1 mg/cu. meter.

Required Work/Hygiene

Procedure:

Emergency eye wash and safety showers for first aid treatment of potential chemical burns should be available in the vicinity of sulfuric acid process and storage areas. Avoid contact with skin and avoid breathing vapor. Do not eat, drink, or smoke in work area. Wash hands thoroughly after handling, especially before eating, drinking, smoking, chewing, or using restroom facility.

C/A008 Sulfuric Acid Page 3 of 5

**Exposure Guidelines:** 

No.	Components	OSHA-PEL	ACGIH-TLV
P	Sulfuric acid	1 mg/cu. meter TWA	1 mg/cu. meter TWA

#### 8. ACCIDENTAL RELEASE CONTROL MEASURES

Response to Spills:

Evacuate nonessential personnel. Use personal protective equipment. Stop the leak if possible. Contain spilled material with dikes, sandbags, and prevent run-off into surface waters or sewers. Clean or recover as much material as possible by using a vacuum truck. Neutralize remaining traces of material with soda ash or lime. All clean-up material should be removed and placed in approved containers, labeled and stored in a safe place prior to proper treatment or disposal.

#### 9. HANDLING AND STORAGE

Handling:

Wear proper personal protection equipment when handling this product. Keep containers away

from heat.

Storage:

Store in closed, properly labeled tanks or containers, in corrosion-proof area.

Container Use:

Do not remove or deface label or tags from the containers. Always empty and clean containers of all residues before adding product to avoid potential explosive reaction caused by product and unknown residue. Returnable containers should be shipped in accordance with supplier's recommendations and in compliance with all federal, state, and DOT regulations. All residual sulfuric acid should be removed from containers prior to disposal.

#### 10. STABILITY AND REACTIVITY

Stability:

Stable.

Conditions to Avoid:

Avoid contact with water, strong oxidizing agents, strong bases, metals, organics.

Hazardous

Sulfur trioxide mist

Decomposition:

Hazardous Polymerization:

Will not occur.

#### 11. DISPOSAL CONSIDERATIONS

Disposal Method:

It must be disposed of in accordance with Federal, State and local environmental control regulations. This substance, when discarded or disposed of in its purchased form or waste will

have the EPA Hazardous Waste Number of D002 due to its corrosivity.

Recycle/Reclaim:

Recycle to process if possible.

#### 12. TRANSPORT INFORMATION

**DOT Shipping Name:** 

Sulfuric Acid

DOT Label:

Corrosive

**DOT Hazard Class:** 

8

UN/NA Number:

UN1830

Hazard Label(s):

Corrosive

Hazard Placard(s): Packing Group:

II

Bulk Packaging:

173.242; nonbulk 173.202

## MATERIAL SAFETY DATA SHEET

#### 1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

MSDS NUMBER:

M7770

MSDS DATE:

01-01-02

PRODUCT NAME:

**#2 DIESEL FUEL** 

24 HOUR EMERGENCY PHONE: (210) 979-8346

TRANSPORTATION EMERGENCIES: CALL CHEMTREC AT 1-800-424-9300

MSDS ASSISTANCE: (210) 592-4593

MÁNUFACTURER'S NAME/ADDRESS: VALERO MARKETING & SUPPLY CO. P.O BOX 696000 San Antonio, Texas 78269-6000.

CHEMICAL NAME: Diesel Fuel, No.2

CAS NUMBER: 68476-34-6

SYNONYMS/COMMON NAMES: This Material Safety Data Sheet applies to the following product descriptions for Hazard Communication purposes only. Technical specifications and formulations vary greatly and are not reflected in this document. Consult specification sheets for technical information.

ULTRA LOW SULFUR DIESEL – Low emission diesel fuels, ≤ 15 parts per million #2 DIESEL FUEL: Low-Sulfur, High-Sulfur, On-Road, Off-Road, Tax Exempt blends #2 DISTILLATE - Low-Sulfur, High-Sulfur, On-Road, Off-Road, Tax Exempt blends #2 FUEL OIL - Low-Sulfur, High-Sulfur, On-Road, Off-Road, Tax Exempt blends PREMIUM DIESEL - Low-Sulfur, High-Sulfur, On-Road, Off-Road, Tax Exempt blends

01-01-02

MSDS Assistance (210) 592-4593

Page 1 of 8

MSDS Number: V7770

Product Name: #2 DIESEL FUEL

#### 2. COMPOSITION, INFORMATION ON INGREDIENTS

**PRODUCT USE:** This product is intended for use as a fuel in engines and heaters designed for diesel fuels, and for use in engineered processes. Use in other applications may result in higher exposures and require additional controls, such as local exhaust ventilation and personal protective equipment.

**DESCRIPTION:** Diesel fuel is a complex mixture of hydrocarbons from multiple refinery processes, blended to meet standardized product specifications. Composition varies greatly and includes C9 to C20 hydrocarbons with a boiling range of about 325-675° F. The following is a non-exhaustive list of common refinery process components, typical percentages, and exposure limits for each.

Component or		CAS	AC	CGIH Li	mits	0	SHA Exp	osure Lir	nits
Material Name	%	Number	TLV	STEL	Units	PEL	STEL	C/P	Units
Cat cracked distillate, light	0-100	64741-59-9	100*	NA	mg/m3	NA	NA	NA	NA
Hydrocracked distillate, light	0-100	64741-77-1	100*	NA	mg/m3	NA	NA	NA	NA
Hydrotreated distillate, middle	0-100	64742-46-7	100*	NA	mg/m3	NA	NA	NA	NA
Hydrotreated distillate, light	0-100	64742-47-8	100*	NA	mg/m3	NA	NA	NA	NA
Gas oil, light	0-100	64741-44-2	100*	NA	mg/m3	NA	NA	NA	NA

^{*} NIOSH recommends an exposure limit of 100 mg/m3 for kerosene, which is similar to these components. The ACGIH has proposed an exposure limit of 100 mg/m3 for Diesel Fuel products, but it has yet to be adopted and has been placed on the Notice of Intended Change list.

#### 3. HAZARDS IDENTIFICATION

#### **HEALTH HAZARD DATA:**

The major effect of exposure to this product is that it may cause giddiness, headache, central nervous system depression; possible irritation of eyes, nose, and lungs; and dermal irritation. Signs of kidney and liver damage may be delayed. Pulmonary irritation secondary to exhalation of solvent.

HAZARDS OF COMBUSTION PRODUCTS: Carbon monoxide and carbon dioxide can be found in engine exhaust and other forms of hydrocarbon combustion. Carbon Monoxide in moderate concentrations can cause symptoms of headache, nausea, vomiting, increased cardiac output, and confusion. Exposure to higher concentrations of carbon monoxide can cause loss of consciousness, heart damage, brain damage, and/or death. Exposure to high concentrations of carbon dioxide can cause simple asphyxiation by displacing available oxygen. Combustion of this and other similar materials should only be carried out in well ventilated areas.

MEDICAL CONDITION GENERALLY AGGRAVATED BY EXPOSURE: Medical conditions which have the same symptoms and effects as those outlined under the health hazard information section can be aggravated by exposure to this product.

01-01-02

MSDS Assistance (210) 592-4593

Page 2 of 8

Page 3 of 8
Product Name: #2 DIESEL FUEL

MSDS Number: V7770

#### MEDICAL LIMITATION: N/A

## ROUTES OF EXPOSURE

INHALATION: Irritation of the upper respiratory tract and eyes, with possible euphoria, dizziness, headache, discoordination, ringing in the ears, convulsions, coma, and respiratory arrest.

SKIN CONTACT: Defatting of the skin may occur with prolonged or repeated contact. Irritation and burning sensation may occur on exposure to the liquid or mists.

SKIN ABSORPTION: Not significant.

EYE CONTACT: Severe burning sensation with temporary irritation and swelling of lids.

INGESTION: Irritation of the mucous membranes of throat, esophagus and stomach which may result in nausca and vomiting; central nervous system depression may occur, if absorbed (see Inhalation above). If aspirated, chemical pneumonitis may occur with potentially fatal results. Possible kidney and liver damaged may be delayed. (See Notes To Physician in Section 5)

CARCINOGENICITY STATEMENT: #2 Diesel Fuel is not listed as carcinogenic by NTP, OSHA, ACGIH. IARC has listed Kerosene and light catalytic cracked distillates as probable human carcinogens (2A). Light paraffinic hydrotreated petroleum distillates are listed as confirmed human carcinogens by IARC (1):

#### 4. FIRST AID MEASURES

EYES: Immediately flush eyes with large amount of water for at least 15 minutes holding lids apart to ensure flushing of the entire eye surface. SEEK IMMEDIATE MEDICAL ATTENTION.

SKIN: Wash contaminated areas with plenty of soap and water. A soothing ointment may be applied to irritated skin after thoroughly cleansing. Remove contaminated clothing and footwear. SEEK IMMEDIATE MEDICAL ATTENTION.

INHALATION: Get person out of contaminated area to fresh air. If breathing has stopped resuscitate and administer oxygen if readily available. SEEK MEDICAL ATTENTION IMMEDIATELY. INGESTION: Never give anything by mouth to an unconscious person. If swallowed, do not induce vomiting. If vomiting occurs spontaneously, keep airway clear. SEEK MEDICAL ATTENTION IMMEDIATELY.

NOTES TO PHYSICIAN: Do not induce vomiting, use gastric lavage only. Aspiration of liquid into the lungs could result in Chemical Pneumonitis. Use of Adrenaline is not advised. Treat symptomatically.

#### 5. FIRE AND EXPLOSION DATA

FLASH POINT: 100°F (PM) minimum

**AUTOIGNITION TEMPERATURE: 494°F** 

FLAMMABLE LIMITS IN AIR: UEL: 5%

LEL: 0.7 %

EXTINGUISHING MEDIA: Dry chemical, carbon dioxide, foam or water spray. Water may be ineffective in fighting fires of liquids with low flash points, but water should be used to keep fire-exposed

01-01-02

MSDS Assistance (210) 592-4593

Page 3 of 8

Page 4 of 8
Product Name: #2 DIESEL FUEL

containers cool. If a leak or spill has not ignited, use water spray to disperse vapors and to protect persons attempting to stop a leak.

SPECIAL FIRE FIGHTING PROCEDURES: Pressure-demand, self contained, breathing apparatus should be provided for fire fighters in buildings or confined areas where product is stored.

UNUSUAL FIRE AND EXPLOSION HAZARD: Vapor accumulation is possible, and flashback can occur with explosive force if vapors are ignited.

#### 6. ACCIDENTAL RELEASE MEASURES

If material is spilled, steps should be taken to contain liquid and prevent discharges to streams or sewer systems and control or stop the loss of volatile materials to the atmosphere. Spills or releases should be reported, if required to the appropriate local, state and federal regulatory agencies.

SMALL SPILLS: Remove ignition sources. Absorb spilled material with non-combustible materials such as cat litter, dirt, sand, or petroleum sorbent pads/pillows. Do not use combustible materials like rags, wood chips, or saw dust. Remove contaminated materials to an appropriate disposal container.

LARGE SPILLS: Remove ignition sources. Dike spill area with sand or dirt to contain material and cover sewers/drains. Remain upwind and keep unnecessary people away. Contact trained emergency response team for cleanup. Remove liquid using grounded suction pumps, isolate hazard area and deny entry.

#### 7. HANDLING AND STORAGE INFORMATION

Store only in approved containers. Protect containers against physical damage. Outside or detached storage is preferred. Separate from oxidizing materials. Store in cool, well ventilated area of non-combustible construction away from possible sources of ignition. Keep away from incompatible materials and follow OSHA 29 CFR 1910.106 and NFPA 30 for storage requirements.

#### 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

VENTILATION REQUIREMENTS: Work in well ventilated areas using good engineering practices to process, transfer and store. Special ventilation is not required unless product is sprayed or heated. High volume use may require engineering controls.

#### . SPECIFIC PERSONAL PROTECTIVE EQUIPMENT

RESPIRATORY: Respiratory protection is not required unless exposure levels exceed 100 mg/m³. Use NIOSH approved respiratory protection following manufacturer's recommendations where spray, mists, or vapors may be generated above the applicable exposure limits. Supplied air respiratory protection is required for IDLH areas. See 29 CFR 1910.134 for OSHA Respiratory Protection regulations. EYE: Face shield and goggles or chemical goggles should be worn where mist or spray may be generated, and where splashing occurs. Shower and eyewash facilities should be accessible.

01-01-02

MSDS Assistance (210) 592-4593

Page 4 of 8

MSDS Number: V7770

Page 5 of 8
Product Name: #2 DIESEL FUEL

GLOVES: Impermeable protective gloves such as nitrile gloves should be worn during routine handling of this product. Barrier creams may also be appropriate where tactile sensitivity is required.

OTHER CLOTHING AND EQUIPMENT: Clothing contaminated with this product should be removed and laundered before reuse. Items which can not be laundered should be discarded. Allow contaminated items to air dry or hang in a well ventilated area. Spontaneous combustion or fire may result from contaminated materials being placed together before drying.

## EXPOSURE MONITORING

BIOLOGICAL: No applicable procedure, breath analysis for hydrocarbons has been suggested. PERSONAL/AREA: Based on similarity to kerosene, both active and passive monitors employing charcoal adsorption follow by gas chromatography. An average molecular weight of 170 has been suggested as the average value to convert the determined weight of hydrocarbons to ppm. Direct reading colorimetric tubes are available to evaluate short term exposure.

### 9. PHYSICAL AND CHEMICAL PROPERTIES

APPEARANCE AND ODOR: Colorless to straw or red oily liquid with characteristic kerosene-like odor.

VISCOSITY: Spec. dependent, 1.7 - 3.4 cSt @ 104° F

BOILING RANGE @ 760 mm Hg: 302-644° F

VAPOR DENSITY (Air=1): 4.5 (kerosene)

EVAPORATION RATE (BuAc=1): N/A

SPECIFIC GRAVITY (H₂O=1): 0.865

BULK DENSITY AT 60° F: 6.8-7.2 lbs.\gal.

pH: NA

SOLUBILITY IN H2O (wt. %): Insoluble

FREEZING POINT: -51° F

VAPOR PRESSURE: 0.5 mmHg @ 20 °C

% VOLATILES BY VOL.: NA

API GRAVIY: Specification dependent

#### 10. STABILITY AND REACTIVITY INFORMATION

CONDITIONS CONTRIBUTING TO INSTABILITY: Under normal conditions, the material is stable. Avoid sources of ignition such as flames, hot surfaces, sparks, and electrical equipment.

INCOMPATIBILITY: Avoid contact with strong oxidizers such as chlorine, concentrated oxygen, and sodium hypochlorite or other hypochlorites.

HAZARDOUS DECOMPOSITION PRODUCTS: Thermal decomposition products may include carbon monoxide and carbon dioxide, oxides of sulfur and nitrogen, and other toxic gasses.

HAZARDOUS POLYMERIZATION: Material is not known to polymerize.

#### 11. TOXICOLOGICAL INFORMATION

- 1. NIOSH recommends that whole diesel exhaust be regarded as a potential occupational carcinogen; follow OSHA and MSHA rules where exhaust fumes may be generated.
- 2. A life time skin painting study by the American Petroleum Institute has shown that similar naphtha products with a boiling range of 350-700° F usually produce skin tumors and/or skin cancers in laboratory mice. Only a weak to moderate response occurred. The effect to humans has not been determined.

Product Name: #2 DIESEL FUEL

3. Positive results at 2.0 ml/kg and 6.0 ml/kg noted in mutagenesis studies via in-vivo bone marrow cytogenetics assay in rats.

For more detailed information, contact MSDS Assistance at (210) 592-4593.

#### 12. ECOLOGICAL INFORMATION

For detailed information, contact MSDS Assistance at (210) 592-4593.

#### 13. DISPOSAL CONSIDERATIONS

Shipment, storage, disposal, and cleanup actions of waste materials are regulated under local, state and federal rules. Contact the appropriate agencies if uncertain of applicability. Waste product and contaminated material having a flash point below 140°F is considered a hazardous waste. DOT Hazardous Waste Number D001 applies. Consult 40 CFR 262 for EPA disposal requirements.

#### 14. TRANSPORT INFORMATION

DOT PROPER SHIPPING NAME	Combustible Liquid, n.o.s.	Diesel fuel
DOT HAZARD CLASS*	Combustible Liquid	3*
DOT PACKING GROUP (PG)	Ш	Ш
I.D. NUMBER	NA1993	NA1993
REQUIRED LABELING	None	Flammable Liquid

^{*} Since this product has a flash point >100°F and no other hazard class applies, it may be reclassed as a Combustible Liquid and NA1993 substituted for the product specific I.D. Number above. Consult 49 CFR 173.120 for specific details.

#### 15. REGULATORY INFORMATION

TSCA (Toxic Substances Control Act) Inventory

Diesel Fuel is listed in the TSCA inventory.

#### SARA (Superfund Amendments and Reauthorization Act) TITLE III

This product is reportable under SARA Title III, Sections 311 & 312 as a hazardous substance.

Hazard Categories Applicable under 40 CFR 370.2 (SARA Section 311):

	Chronic Health	Pressure	Fire	Reactive
Yes	Yes	No	Yes	No

01-01-02

MSDS Assistance (210) 592-4593

MSDS Number: V7770 Product Name: #2 DIESEL FUEL

#### Components listed under 40 CFR 372.65 (SARA Section 313):

This product does not contain chemicals identified as toxic by EPA under 40 CFR Part 372 and is not subject to the reporting requirements of this section.

#### **STATE REGULATIONS:**

California Proposition 65: This product does not contain chemicals known to the State of California to cause cancer, birth defects, or other reproductive harm.

#### **Definitions of Material Safety Data Sheet Terminology**

#### GOVERNMENT AGENCIES AND PRIVATE ASSOCIATIONS

ACGIH - American Conference of Governmental Industrial Hygienists, (private association)

DOT - United States Department of Transportation

EPA - United States Environmental Protection Agency

IARC - International Agency for Research on Cancer, (private association)

NFPA - National Fire Protection Association, (private association)

MSHA - Mine Safety and Health Administration, U.S. Department of Labor

NIOSH - National Institute of Occupational Safety and Health, U.S. Department of Health and Human Services

NTP - National Toxicology Program, (private association)

OSHA - Occupational Safety and Health Administration, U.S. Department of Labor

## HAZARD AND EXPOSURE INFORMATION

Acute Hazard - An adverse health effect which occurs rapidly as a result of short term exposure.

CAS # - American Chemical Society's Chemical Abstract service registry number which identifies the product and/or ingredients.

Ceiling - The concentration that should not be exceeded during any part of the working exposure Chronic Hazard - An adverse health effect which generally occurs as a result of long term exposure or short term exposure with delayed health effects and is of long duration

Fire Hazard - A material that poses a physical hazard by being flammable, combustible, phyrophoric or an oxidizer as defined by 29 CFR 1910.1200

Hazard Class - DOT hazard classification

Hazardous Ingredients - Names of ingredients which have been identified as health hazards

1DLH- Immediately Dangerous to Life and Health, the airborne concentration below which a person can escape without respiratory protection and exposure up to 30 minutes, and not suffer debilitating or irreversible health effects. Established by NIOSH.

mg/m³ - Milligrams of contaminant per cubic meter of air, a mass to volume ratio

N/A - Not available or no relevant information found

NA - Not applicable

PEL - OSHA permissible exposure limit; an action level of one half this value may be applicable

ppm - Pan per million (one volume of vapor or gas in one million volumes of air)

Pressure Hazard - A material that poses a physical hazard due to the potential of a sudden release of pressure such as explosive or a compressed gas as defined by 29 CFR 1910.1200

Reactive Hazard - A material that poses a physical hazard due to the potential to become unstable reactive, water reactive or that is an organic peroxide as defined by 29 CFR 1910.1200.

STEL - The ACGIH Short-Term Exposure Limit, a 15-minute Time-Weighted Average exposure which should not be exceeded at any time during a workday, even if the 8-hour TWA is less than the TLV.

TLV - ACGIH Threshold Limit Value, represented herein as an 8-hour TWA concentration.

8-hour TWA - The time weighted average concentration for a normal 8-hour workday and a 40-hour workweek, to which nearly all workers may be repeatedly exposed, day after day, without adverse effect.

W - DO NOT ADD WATER - water reactive materials may produce toxic gas, extreme heat, or chemical reaction on contact with water.

D	N-HEXANE	110-54-3	VARIABLE

THIS IS 1 OF 8 MSDS' FOR CRUDE OIL BASED ON FLASHPOINT AND SULFUR CONTENT. LABEL CODE FOR THIS MSDS IS 82000.

* THIS CHEMICAL IS A COMPLEX SUBSTANCE WHICH MAY CONTAIN CONSTITUENTS IDENTIFIED AS A, B, C, D, ABOVE, THAT ARE NOT INTENTIONALLY ADDED TO THE PRODUCT.

#### **SECTION II-B**

#### **ACUTE TOXICITY DATA**

NOT AVAILABLE

NOT AVAILABLE

NOT AVAILABLE

#### SECTION III

#### **HEALTH INFORMATION**

THE HEALTH EFFECTS NOTED BELOW ARE CONSISTENT WITH REQUIREMENTS UNDER THE OSHA HAZARD COMMUNICATION STANDARD (29 CFR 1910.1200).

EYE CONTACT: BASED ON THE PRESENCE OF LIGHT HYDROCARBONS CRUDE OIL IS PRESUMED TO BE MODERATELY IRRITATING TO THE EYES. CONTACT WITH HOT PRODUCT MAY RESULT IN THERMAL BURNS.

SKIN CONTACT: BASED ON THE PRESENCE OF LIGHT HYDROCARBONS CRUDE OIL IS PRESUMED TO BE MODERATELY IRRITATING TO THE SKIN. PROLONGED AND REPEATED CONTACT MAY CAUSE VARIOUS SKIN DISORDERS SUCH AS DERMATITIS, FOLLICULITIS, OIL ACNE OR SKIN TUMORS. CONTACT WITH HOT PRODUCT MAY RESULT IN THERMAL BURNS.

INHALATION:

WARNING. HYDROGEN SULFIDE (H2S), NATURAL GAS, AND OTHER HAZARDOUS VAPORS MAY EVOLVE AND COLLECT IN THE HEADSPACE OF STORAGE TANKS OR OTHER ENCLOSED VESSELS. HYDROGEN SULFIDE IS AN EXTREMELY FLAMMABLE, TOXIC GAS. NATURAL GAS IS EXTREMELY FLAMMABLE AND A SIMPLE ASPHYXIANT. INHALATION OF OTHER LIGHT HYDROCARBONS MAY CAUSE PULMONARY IRRITATION AND RESULT IN CNS DEPRESSION. PROLONGED AND REPEATED EXPOSURE TO BENZENE MAY CAUSE SERIOUS INJURY TO BLOOD FORMING ORGANS AND IS LINKED TO THE LATER DEVELOPMENT OF ACUTE MYELOGENOUS LEUKEMIA. PROLONGED AND REPEATED INHALATION OF N-HEXANE MAY PRODUCE PERIPHERAL NEUROPATHY.

INGESTION:

BASED ON THE PRESENCE OF LIGHT HYDROCARBONS, INGESTION OF CRUDE OIL MAY RESULT IN VOMITING; ASPIRATION (BREATHING) OF VOMITUS INTO THE LUNGS MUST BE AVOIDED AS EVEN SMALL QUANTITITES MAY RESULT IN ASPIRATION PNEUMONITIS.

SIGNS AND SYMPTOMS: IRRITATION AS NOTED ABOVE. ASPHYXIATION AND H2S TOXICITY MAY BE EVIDENCED BY SUDDEN LOSS OF CONSCIOUSNESS; DEATH MAY FOLLOW QUICKLY. EARLY TO MODERATE CNS (CENTRAL NERVOUS SYSTEM) DEPRESSION MAY BE EVIDENCED BY GIDDINESS, HEADACHE, DIZZINESS AND NAUSEA; IN EXTREME CASES, UNCONCIOUSNESS AND DEATH MAY OCCUR. ASPIRATION PNEUMONITIS MAY BE EVIDENCED BY COUGHING, LABORED BREATHING AND CYANOSIS (BLUISH SKIN); IN SEVERE CASES DEATH MAY OCCUR. DAMAGE TO BLOOD FORMING ORGANS MAY BE EVIDENCED BY EASY FATIGABILITY AND PALLOR (RBC EFFECT), DECREASED RESISTANCE TO INFECTION (WBC EFFECT) AND EXCESSIVE BRUISING AND BLEEDING (PLATELET EFFECT). PERIPHERAL NERVE DAMAGE MAY BE EVIDENCED BY MUSCULAR WEAKNESS AND LOSS OF SENSATION IN THE ARMS AND LEGS.

#### AGGRAVATED MEDICAL CONDITIONS:

PREEXISTING EYE, SKIN, AND RESPIRATORY DISORDERS OR PREEXISTING IMPAIRED BLOOD-FORMING FUNCTIONS MAY BE AGGRAVATED BY EXPOSURE TO CRUDE OIL.

#### OTHER HEALTH EFFECTS:

SEVERAL LONG TERM SKIN PAINTING STUDIES IN EXPERIMENTAL ANIMALS HAVE SHOWN CRUDE OIL TO PRODUCE SKIN CANCER. BENZENE IS LISTED BY THE NATIONAL TOXICOLOGY PROGRAM, THE INTERNATIONAL AGENCY FOR RESEARCH ON CANCER AND OSHA AS A CHEMICAL CAUSALLY ASSOCIATED WITH CANCER (ACUTE MYELOGENOUS LEUKEMIA) IN HIIMANS.

#### SECTION IV

#### OCCUPATIONAL EXPOSURE LIMITS

COM	P OSHA			ACGIH		
NO.	PEL/TWA	PEL/CEILING	TLV/TWA		TLV/STEL	OTHER
P	0.2 MG/M3*		0.2 MG/M3*			
1	10 PPM		10 PPM	15 PPM	15	PPM **
3	1 PPM		10 PPM***		5	PPM**
4	50 PPM		50 PPM			

*"EXPOSURE LIMITS FOR COAL TAR PITCH VOLATILES, AS BENZENE SOLUBLES RECOMMENDED FOR THIS PRODUCT." **OSHA PEL/STEL ***CLASSIFIED BY ACGIH AS A "SUSPECT HUMAN CARCINOGEN" (A2).

#### **SECTION V**

#### **EMERGENCY AND FIRST AID PROCEDURES**

EYE CONTACT: FLUSH EYES WITH PLENTY OF WATER FOR 15 MINUTES WHILE HOLDING

EYELIDS OPEN. GET MEDICAL ATTENTION.

SKIN CONTACT: REMOVE CONTAMINATED CLOTHING/SHOES AND WIPE EXCESS FROM SKIN.

FLUSH SKIN WITH WATER. FOLLOW BY WASHING WITH SOAP AND WATER. IF IRRITATION OCCURS, GET MEDICAL ATTENTION. DO NOT REUSE

CLOTHING UNTIL CLEANED.

INHALATION: WARNING: EFFECTS FROM OVEREXPOSURE MAY BE DELAYED. ACT OUICKLY!

> UNCONSCIOUS VICTIMS CAN DIE IF NOT REMOVED FROM CONTAMINATED AREA AS SOON AS POSSIBLE. PUT ON NIOSH APPROVED AIR-SUPPLIED PRESSURE DEMAND RESPIRATOR BEFORE ENTERING CONTAMINATED AREA. MOVE VICTIM TO FRESH AIR. GIVE ARTIFICIAL RESPIRATION IF NOT BREATHING. GET MEDICAL ATTENTION AS SOON AS POSSIBLE. KEEP VICTIM QUIET AND WARM. VAPORIZATION OF H2S THAT HAS BEEN TRAPPED IN CLOTHING CAN BE DANGEROUS TO RESCUERS. MAINTAIN RESPIRATORY

PROTECTION TO AVOID CONTAMINATION FROM VICTIM TO RESCUER.*

INGESTION: DO NOT INDUCE VOMITING. IF VOMITING OCCURS SPONTANEOUSLY, KEEP

HEAD BELOW HIPS TO PREVENT ASPIRATION OF LIQUID INTO THE LUNGS.

GET MEDICAL ATTENTION. **

NOTE TO PHYSICIAN:

*AMYL NITRITE PERLES BY INHALATION AND SODIUM NITRITE BY I.V. MAY BE EFFECTIVE ANTIDOTES. CONSULT A POISON CONTROL CENTER. **IF MORE THAN 2.0 ML PER KG HAS BEEN INGESTED AND VOMITING HAS NOT OCCURRED, EMESIS SHOULD BE INDUCED WITH SUPERVISION. KEEP VICTIM'S HEAD BELOW HIPS TO PREVENT ASPIRATION. IF SYMPTOMS SUCH AS LOSS OF GAG REFLEX,

CONVULSIONS OR UNCONSCIOUSNESS OCCUR BEFORE EMESIS, GASTRIC

LAVAGE USING A CUFFED ENDOTRACHEAL TUBE SHOULD BE CONSIDERED.

#### SECTION VI SUPPLEMENTAL HEALTH INFORMATION

CRUDE OIL MAY CONTAIN VARIABLE AMOUNTS OF BENZENE AND N-HEXANE.

ANIMAL STUDIES ON BENZENE DEMONSTRATED IMMUNOTOXICITY, TESTICULAR EFFECTS AND ALTERATIONS IN REPRODUCTIVE CYCLES, EVIDENCE OF CHROMOSOMAL DAMAGE OR OTHER CHROMOSOMAL CHANGES, AND EMBRYO/FETOTOXICITY BUT NOT TERATOGENICITY.

STUDIES ON N-HEXANE IN LABORATORY ANIMALS HAVE SHOWN MILD, TRANSITORY EFFECTS ON THE SPLEEN AND BLOOD (WHITE BLOOD CELLS), AND EVIDENCE OF LUNG DAMAGE. IN ADDITION, FETOTOXICITY HAS BEEN DEMONSTRATED AT LEVELS PRODUCING MATERNAL TOXICITY. AT HIGH LEVELS, INHALATION EXPOSURE HAS RESULTED IN TESTICULAR AND EPIDIDYMAL ATROPHY.

H2S IS IRRITATING TO THE EYES AND RESPIRATORY TRACT AT LOW CONCENTRATIONS. 0.02 PPM - ODOR THRESHOLD. 10 PPM - EYE IRRITATION. 100 PPM - HEADACHE, DIZZINESS, VOMITING, COUGHING. 200-300 PPM - EYE INFLAMMATION, RESPIRATORY TRACT IRRITATION AFTER 1 HOUR EXPOSURE. 300-700 PPM - LOSS OR CONSCIOUSNESS OR POSSIBLY DEATH IN 30 MIN. TO AN HOUR. 700-900 PPM - RAPID LOSS OF CONSCIOUSNESS; DEATH CAN RESULT. >1000 PPM - UNCONSCIOUSNESS IN SECONDS; DEATH IN MINUTES UNLESS VICTIM IS REMOVED FROM CONTAMINATED AREA AND BREATHING IS RESTORED. DO NOT DEPEND ON SENSE OF SMELL FOR WARNING. H2S CAUSES RAPID OLFACTORY FATIGUE (DEADENS SENSE OF SMELL). THERE IS NO EVIDENCE THAT H2S WILL ACCUMULATE IN THE BODY TISSUE AFTER REPEATED EXPOSURE.

#### SECTION VII

#### PHYSICAL DATA

EVAPORATION RATE (NORMAL BUTYL ACETATE = 1): NOT AVAILABLE

APPEARANCE AND ODOR: BLACK LIQUID; STRONG HYDROCARBON AND ROTTEN EGG ODOR.

PHYS/CHEM PROPERTIES: SEE ABOVE FOR DETAILS

#### **SECTION VIII**

#### FIRE AND EXPLOSION HAZARDS

FLASH POINT AND METHOD <100 DEG F (PMCC)

FLAMMABLE LIMITS/PERCENT VOLUME IN AIR: LOWER: N/AV HIGHER: N/AV

#### EXTINGUISHING MEDIA:

USE WATER FOG, FOAM, DRY CHEMICAL OR CO2. DO NOT USE A DIRECT STREAM OF WATER. PRODUCT WILL FLOAT AND CAN BE REIGNITED ON SUFACE OF WATER.

#### SPECIAL FIRE FIGHTING PROCEDURES AND PRECAUTIONS:

WARNING. FLAMMABLE. CLEAR FIRE AREA OF UNPROTECTED PERSONNEL. DO NOT ENTER CONFINED FIRE SPACE WITHOUT FULL BUNKER GEAR (HELMET WITH FACE SHIELD, BUNKER COATS, GLOVES AND RUBBER BOOTS), INCLUDING A POSITIVE PRESSURE NIOSH APPROVED SELF-CONTAINED BREATHING APPARATUS. COOL FIRE EXPOSED CONTAINERS WITH WATER.

#### UNUSUAL FIRE AND EXPLOSION HAZARDS:

CONTAINERS EXPOSED TO INTENSE HEAT FROM FIRES SHOULD BE COOLED WITH WATER TO PREVENT VAPOR PRESSURE BUILDUP WHICH COULD RESULT IN CONTAINER RUPTURE. CONTAINER AREAS EXPOSED TO DIRECT FLAME CONTACT SHOULD BE COOLED WITH LARGE OUANTITIES OF WATER AS NEEDED TO PREVENT WEAKENING OF CONTAINER STRUCTURE. SULFUR OXIDES AND HYDROGEN SULFIDE, BOTH OF WHICH ARE TOXIC, MAY BE RELEASED UPON COMBUSTION.

#### SECTION IX REACTIVITY

HAZARDOUS POLYMERIZATION WILL NOT OCCUR STABLITY:

#### CONDITIONS AND MATERIALS TO AVOID:

AVOID HEAT, SPARKS, FLAME AND CONTACT WITH STRONG OXIDIZING AGENTS.

#### HAZARDOUS DECOMPOSTION PRODUCTS:

THERMAL DECOMPOSITION PRODUCTS ARE HIGHLY DEPENDENT ON THE COMBUSTION CONDITIONS. A COMPLEX MIXTURE OF AIRBORNE SOLID, LIQUID, PARTICULATES AND GASES WILL EVOLVE WHEN THIS MATERIAL UNDERGOES PYROLYSIS OR COMBUSTION. CARBON MONOXIDE , SULFUR OXIDES AND OTHER UNIDENTIFIED ORGANIC COMPOUNDS MAY BE FORMED UPON COMBUSTION.

#### **SECTION X** EMPLOYEE PROTECTION

#### RESPIRATORY PROTECTION:

AVOID BREATHING VAPOR. USE NIOSH APPROVED RESPIRATORY PROTECTION AS REQUIRED TO PREVENT OVEREXPOSURE TO OIL MIST, VAPOR, OR FUMES AND H2S. DO NOT ENTER STORAGE COMPARTMENTS UNLESS EQUIPPED WITH A NIOSH APPROVED SELF-CONTAINED BREATHING APPARATUS WITH A FULL FACEPIECE OPERATED IN A POSITIVE PRESSURE MODE.

#### PROTECTIVE CLOTHING:

WEAR CHEMICAL RESISTANT GLOVES AND OTHER PROTECTIVE CLOTHING AS REQUIRED TO MINIMIZE SKIN CONTACT. NO SPECIAL EYE PROTECTION IS ROUTINELY NECESSARY. TEST DATA FROM PUBLISHED LITERATURE AND/OR GLOVE AND CLOTHING MANUFACTURERS INDICATE THE BEST PROTECTION IS PROVIDED BY NITRILE GLOVES.

#### ADDITIONAL PROTECTIVE MEASU RES

USE VENTILATION AS REQUIRED TO CONTROL VAPOR CONCENTRATIONS.

#### SECTION XI EMPLOYEE PROTECTION

#### SPILL OR LEAK PROCEDURES:

WARNING. FLAMMABLE. ELIMINATE ALL IGNITION SOURCES. HANDLING EQUIPMENT MUST BE GROUNDED TO PREVENT SPARKING. *** LARGE SPILLS *** EVACUATE THE HAZARD AREA OF UNPROTECTED PERSONNEL. WEAR APPROPRIATE RESPIRATOR AND PROTECTIVE CLOTHING. SHUT OFF SOURCE OF LEAK ONLY IF SAFE TO DO SO. DIKE AND CONTAIN. IF VAPOR CLOUD FORMS, WATER FOG MAY BE USED TO SUPPRESS; CONTAIN RUN-OFF. REMOVE WITH VACUUM TRUCKS OR PUMP TO STORAGE/SALVAGE VESSELS. SOAK UP RESIDUE WITH AN ABSORBENT SUCH AS CLAY, SAND OR OTHER SUITABLE MATERIAL; PLACE IN NON-LEAKING CONTAINERS FOR PROPER DISPOSAL. FLUSH AREA WITH WATER TO REMOVE TRACE RESIDUE; DISPOSE OF FLUSH SOLUTIONS AS ABOVE. *** SMALL SPILLS *** TAKE UP WITH AN ABSORBENT MATERIAL AND PLACE IN NON-LEAKING CONTAINERS; SEAL TIGHTLY FOR PROPER DISPOSAL.

#### SECTION XII

#### SPECIAL PRECAUTIONS

KEEP LIQUID AND VAPOR AWAY FROM HEAT, SPARKS AND FLAME. SURFACES THAT ARE SUFFICIENTLY HOT MAY IGNITE EVEN LIQUID PRODUCT IN THE ABSENCE OF SPARKS OR FLAME. EXTINGUISH PILOT LIGHTS, CIGARETTES AND TURN OFF OTHER SOURCES OF IGNITION PRIOR TO USE AND UNTIL ALL VAPORS ARE GONE. CONTAINERS, EVEN THOSE THAT HAVE BEEN EMPTIED, CAN CONTAIN EXPLOSIVE VAPORS. DO NOT CUT, DRILL, GRIND, WELD OR PERFORM SIMILAR OPERATIONS ON OR NEAR CONTAINERS. STATIC ELECTRICITY MAY ACCUMULATE AND CREATE A FIRE HAZARD. GROUND FIXED EQUIPMENT. BOND AND GROUND TRANSFER CONTAINERS AND EQUIPMENT. WASH WITH SOAP AND WATER BEFORE EATING, DRINKING, SMOKING OR USING TOILET FACILITIES. LAUNDER CONTAMINATED CLOTHING BEFORE REUSE.

DISPOSE OF OIL-SOAKED LEATHER ARTICLES INCLUDING SHOES WHICH CANNOT BE DECONTAMINATED.

#### SECTION XIII

#### TRANSPORTATION REQIREMENTS

#### DEPARTMENT OF TRANSPORTAION CLASSIFICATION:

CLASS 3 (FLAMMABLE LIQUID), PACKING GROUP MUST BE DETERMINED ON A CASE-BY-CASE BASIS.

DOT PROPER SHIPPING NAME: PETROLEUM CRUDE OIL

OTHER REQUIREMENTS: UN1267, GUIDE 128

#### **SECTION XIV**

#### OTHER REGULATORY CONTROLS

THIS PRODUCT IS LISTED ON THE EPA/TSCA INVENTORY OF CHEMICAL SUBSTANCES.

PROTECTION OF STRATOSPHERIC OZONE (PURSUANT TO SECTION 611 OF THE CLEAN AIR ACT AMENDMENTS OF 1990): PER 40 CFR PART 82, THIS PRODUCT DOES NOT CONTAIN NOR WAS IT DIRECTLY MANUFACTURED WITH ANY CLASS I OR CLASS II OZONE DEPLETING SUBSTANCES.

IN ACCORDANCE WITH SARA TITLE III, SECTION 313, THE ATTACHED ENVIRONMENTAL DATA SHEET (EDS) SHOULD ALWAYS BE COPIED AND SENT WITH THE MSDS.

#### **SECTION XV**

#### STATE REGULATORY INFORMATION

THE FOLLOWING CHEMICALS ARE SPECIFICALLY LISTED BY INDIVIDUAL STATES; OTHER PRODUCT SPECIFIC HEALTH AND SAFETY DATA IN OTHER SECTIONS OF THE MSDS MAY ALSO BE AP PLICABLE FOR STATE REQUIREMENTS. FOR DETAILS ON YOUR REGULATORY REQUIREMENTS YOU SHOULD CONTACT THE APPROPRIATE AGENCY IN YOUR STATE.

STATE LISTED COMPONENT	CAS NO	PERCENT	STATE CODE

#### SECTION III

#### **ENVIRONMENTAL RELEASE INFORMATION**

UNDER EPA-CWA, THIS PRODUCT IS CLASSIFIED AS AN OIL UNDER SECTION 311. SPILLS INTO OR LEADING TO SURFACE WATERS THAT CAUSE A SHEEN MUST BE REPORTED TO THE NATIONAL RESPONSE CENTER, 800-424-8802.

THIS MATERIAL IS COVERED BY CERCLA'S PETROLEUM EXCLUSION, THEREFORE, RELEASES TO AIR, LAND OR WATER ARE NOT REPORTABLE UNDER EPA-CERCLA ("SUPERFUND").

#### SECTION IV RCRA INFORMATION

UNDER EPA - RCRA (40 CFR 261.21), IF THIS PRODUCT BECOMES A WASTE MATERIAL, IT WOULD BE IGNITABLE HAZARDOUS WASTE, HAZARDOUS WASTE NUMBER D001. REFER TO LATEST EPA OR STATE REGULATIONS REGARDING PROPER DISPOSAL.

THE INFORMATION CONTAINED IN THIS DATA SHEET IS BASED ON THE DATA AVAILABLE TO US AT THIS TIME, AND IS BELIEVED TO BE ACCURATE BASED UPON THAT DATA. IT IS PROVIDED INDEPENDENTLY OF ANY SALE OF THE PRODUCT, FOR PURPOSE OF HAZARD COMMUNICATION. IT IS NOT INTENDED TO CONSTITUTE PRODUCT PERFORMANCE INFORMATION, AND NO EXPRESS OR IMPLIED WARRANTY OF ANY KIND IS MADE WITH RESPECT TO THE PRODUCT, UNDERLYING DATA OR THE INFORMATION CONTAINED HEREIN. YOU ARE URGED TO OBTAIN DATA SHEETS FOR ALL PRODUCTS YOU BUY, PROCESS USE OR DISTRIBUTE, AND ARE ENCOURAGED TO ADVISE THOSE WHO MAY COME IN CONTACT WITH SUCH PRODUCTS OF THE INFORMATION CONTAINED HEREIN.

TO DETERMINE THE APPLICABILITY OR EFFECT OF ANY LAW OR REGULATION WITH RESPECT TO THE PRODUCT, YOU SHOULD CONSULT WITH YOUR LEGAL ADVISOR OR THE APPROPRIATE GOVERNMENT AGENCY. WE WILL NOT PROVIDE ADVICE ON SUCH MATTERS, OR BE RESPONSIBLE FOR ANY INJURY FROM THE USE OF THE PRODUCT DESCRIBED HEREIN. THE UNDERLYING DATA, AND THE INFORMATION PROVIDED HEREIN AS A RESULT OF THAT DATA, IS THE PROPERTY OF EQUIVA SERVICES, LLC AND IS NOT TO BE THE SUBJECT OF SALE OR EXCHANGE WITHOUT THE EXPRESS WRITTEN CONSENT OF EQUIVA SERVICES, LLC.

## MATERIAL SAFETY DATA SHEET

#### 1. CHEMICAL PRODUCT

General Product Name: Biodiesel

Synonyms: Methyl Soyate

Product Description: Methyl esters from lipid sources

CAS Number: 67784-80-9

## 2. COMPOSITION/INFORMATION ON INGREDIENTS

This product contains no hazardous materials.

#### 3. HAZARDS IDENTIFICATION

#### INHALATION:

Negligible unless heated to produce vapors. Vapors or finely misted materials may irritate the mucous membranes and cause irritation, dizziness, and nausea. Remove to fresh air.

#### **EYE CONTACT:**

May cause irritation. Irrigate eye with water for at least 15 to 20 minutes. Seek medical attention if symptoms persist.

#### SKIN CONTACT:

Prolonged or repeated contact is not likely to cause significant skin irritation. Material sometimes encountered at elevated temperatures. Thermal burns are possible.

#### **INGESTION:**

No hazards anticipated from ingestion incidental to industrial exposure.

#### 4. FIRST AID MEASURES

#### EYES:

Irrigate eyes with a heavy stream of water for at least 15 to 20 minutes.

#### SKIN:

Wash exposed areas of the body with soap and water. Biodiesel MSDS Page 2 of 4

#### INHALATION:

Remove from area of exposure; seek medical attention if symptoms persist.

## MATERIAL SAFETY DATA SHEET

#### 1. CHEMICAL PRODUCT

General Product Name: Biodiesel

Synonyms: Methyl Soyate

Product Description: Methyl esters from lipid sources

CAS Number: 67784-80-9

### 2. COMPOSITION/INFORMATION ON INGREDIENTS

This product contains no hazardous materials.

#### 3. HAZARDS IDENTIFICATION

#### **INHALATION:**

Negligible unless heated to produce vapors. Vapors or finely misted materials may irritate the mucous membranes and cause irritation, dizziness, and nausea. Remove to fresh air.

#### **EYE CONTACT:**

May cause irritation. Irrigate eye with water for at least 15 to 20 minutes. Seek medical attention if symptoms persist.

#### SKIN CONTACT:

Prolonged or repeated contact is not likely to cause significant skin irritation. Material sometimes encountered at elevated temperatures. Thermal burns are possible.

#### **INGESTION:**

No hazards anticipated from ingestion incidental to industrial exposure.

#### 4. FIRST AID MEASURES

#### EYES:

Irrigate eyes with a heavy stream of water for at least 15 to 20 minutes.

#### SKIN:

Wash exposed areas of the body with soap and water. Biodiesel MSDS Page 2 of 4

#### INHALATION:

Remove from area of exposure; seek medical attention if symptoms persist.

THIS SHIPPING ORDER must be legibly filled in, in ink, in indelible Pencil, or in Carbon and retained by the Agent.

Page Shipper's No. 99816-1 1 OF 1 Agent's No.

RECEIVED, subject to the classifications and lawfully filed tariffs in effect on the date of the receipt by the carrier of the property described in the Original Bill of Lading

From: Georgia-Pacific Chemicals LLC (Shipper/Consigner)

CROSSETT, AR

10/12/08

The property described below has been recieved by Carrier in apparent good order, except as noted below, and is marked, consigned and destined as indicated below. Carrier agrees to carry the property to destination, if on its route, otherwise to deliver to another carrier on the route to said destination. Each carrier of, and any party at any time interested in, all or any of said property over all or any portion of said route to destination agrees to perform every service required hereby in accordance with the applicable contract(s), if any, between Georgia-Pacific and Carrier, and otherwise subject to the terms and conditions of the Uniform Domestic Straight Bill of Lading set forth (1) if this is a rail or rail-water shipment, in the Uniform Freight Classification, and (2) if this is a motor carrier shipment, in the National Motor Freight Classification.

The property described below has been recieved by Carrier in apparent good order, except as noted below, and is marked, consigned and destined as indicated below. Carrier agrees to carry the property to destination, if on its route, otherwise to deliver to another carrier on the route to said destination. Each carrier of, and any party at any time interested in, all or any of said property over all or any portion of said route to destination agrees to perform every service required hereby in accordance with the applicable contract(s), if any, between Georgia-Pacific and Carrier, and otherwise subject to the terms and conditions of the Uniform Domestic Straight Bill of Lading set forth (1) if this is a rail or rail-water shipment, in the Uniform Freight Classification, and (2) if this is a motor carrier shipment, in the National Motor Freight Classification.

The property described below, in apparent good order, except as noted (contents and condition of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the work carrier being understood throughout this contract as meaning any person or corporation in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. It is mutually agreed, as to each carrier of all or any said property, that every service to be performed hereunder shall be subject to all the terms and conditions of the Uniform Domestic Straight Bill of Lading set forth (1) in Official, Southern, Western and Illinois Freight Classification in effect on the date hereof, if this is a rail or a rail-water shipment, or (2) in the applicable motor carrier classification or tariff if this is a motor carrier shipment. Shipper hereby certifies that he is familiar with all the terms and conditions or the said bill of lading, including those on the back thereof, set forth in the classification or tariff which governs the transportation of this shipment, and the said terms and conditions are hereby agreed to by the shipper and accepted for himself and his assigns.

#### Shipper:

Pinnacle Biofuels, Inc. 117 Mac McGoogan Drive Crossett-AR 71635

#### **Consignee Information:**

Pilot Station #330 4142 Loop 337 New Braunfels, TX 78132

The property described below, in apparent good order, except as noted (contents and condition of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the work carrier being understood throughout this contract as meaning any person or corporation in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. It is mutually agreed, as to each carrier of all or any said property, that every service to be performed hereunder shall be subject to all the terms and conditions of the Uniform Domestic Straight Bill of Lading set forth (1) in Official, Southern, Western and Illinois Freight Classification in effect on the date hereof, if this is a rail or a rail-water shipment, or (2) in the applicable motor carrier classification or tariff if this is a motor carrier shipment. Shipper hereby certifies that he is familiar with all the terms and conditions or the said bill of lading, including those on the back thereof, set forth in the classification or tariff which governs the transportation of this shipment, and the said terms and conditions are hereby agreed to by the shipper and accepted for himself and his assigns.

#### MATERIAL SAFETY DATA SHEET

#### 1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

#### Product Identification

Product Name: MR-1140 (EXPO OTO MOD 18B)

Oxidized Tall Oil Chemical Name: Chemical Family: Organic Acids CAS Number: Not Applicable

Company Identification

Mobile Rosin Oil Company, Inc. P. O. Drawer 70107 Mobile, Alabama 36670 USA 251-476-4282 (For product information) 251-476-4282, Weekends 888-455-6064 (For

emergencies)

1-800-424-9300 or 1-202-483-7616 (CHEMTREC)

#### SPECIAL NOTES:

Internet Address: http://www.mobros.com.

E-mail: mobros@mobros.com.

The information contained in this Material Safety Data Sheet (MSDS) is privileged and confidential information. If the reader is not an authorized copy-holder of this MSDS, you are hereby notified that any dissemination, distribution or copy of this MSDS is strictly prohibited without the written permission of MOBILE ROSIN OIL COMPANY, INC. If you have received this MSDS in error, please immediately notify us by telephone and return the copy to us at the address above via the United States Postal Service.

#### 2. COMPOSITION/INFORMATION ON INGREDIENTS

#### COMPONENT LISTING:

Chemical Name CAS Number Amount MR-1140 (EXPO OTO MOD 18B) Not Applicable 100.0 %

(See Section 8 for exposure guidelines)

(See Section 15 for regulatory information)

#### HAZARDS DISCLOSURE

This product contains no known hazardous materials as defined by the OSHA Hazard Communication Standard 29 CFR 1910.1200.

(section 2 continued)

As defined under Sara 311 and 312, this product contains no known hazardous materials.

#### 3. HAZARDS IDENTIFICATION

**********

* The health hazards of this product should be low 
* under normal industrial and commercial uses. This 
* product will burn when exposed to heat, spark, or 
* flames. After prolonged contact with porous 
* materials, this product may spontaneously oxidize 
* (combust). 
*

#### HMIS Rating:

Health - 1, Flammability - 1, Reactivity - 0
Personal Protection Index - D

#### NFPA Rating:

Health - 1, Flammability - 1, Reactivity - 0 Special Hazards - None

NFPA/HMIS Definitions: (0-Least, 1-Slight, 2-Moderate, 3-High, 4-Extreme). These values are obtained using the guidelines or published evaluations prepared by the National Fire Protection Association (NFPA) or the National Paint and Coating Association (for HMIS ratings).

#### POTENTIAL HEALTH EFFECTS

#### EYE:

Avoid eye contact. Irritating vapors may be formed when product is processed at high temperatures. Exposure to hot material may cause thermal burns. If heated material contacts eye, seek medical attention immediately for thermal burn treatment.

#### SKIN:

Avoid skin contact. Contact with product at elevated temperatures can result in thermal burns. Frequent or prolonged contact may irritate the skin and cause a skin rash (dermatitis) in susceptible individuals. Maintain good hygiene practices.

#### INHALATION:

Irritating vapors may be formed when product is processed at high temperatures. Avoid breathing vapors or mists. Short-term inhalation of vapors may cause dizziness, nausea, and respiratory tract congestion in some individuals. Single exposure is not expected to cause acute toxicity.

(section 3 continued)

#### INGESTION:

Ingestion of large amounts is unlikely. Ingestion of small amounts is not likely to cause acute toxicity or internal damage.

#### CHRONIC EFFECTS:

Prolonged exposure to vapors or fumes generated by heating of this product may lead to respiratory irritation with throat discomfort, coughing or breathing difficulty. Repeated exposure may lead to respiratory sensitization (asthma).

#### CARCINOGENICITY INFORMATION:

No known cancer hazards.

#### 4. FIRST AID MEASURES

#### EYE CONTACT FIRST AID:

Immediately flush eyes with plenty of water for at least 15 minutes. After initial flushing, remove any contact lenses and continue flushing for at least 15 minutes. Get medical attention if irritation develops or persists. If molten product contacts eyes, flush with water for at least 15 minutes and seek medical attention.

#### SKIN CONTACT FIRST AID:

Remove contaminated clothing and shoes. Wash skin with soap and water. Do not reuse contaminated clothing without laundering. If molten product contacts skin, cool under running stream of water. Do not attempt to remove from skin. Removal could result in severe skin damage. Get medical attention.

NOTES TO PHYSICIAN: Material should not be forcibly pulled from skin. Mineral oil may be used to loosen the material, then provide treatment as required for thermal burn.

#### INHALATION FIRST AID:

Remove to fresh air. Restore breathing. Seek medical attention.

#### INGESTION FIRST AID:

Product is not considered to be toxic in small amounts. Obtain medical treatment if large amounts are swallowed.

NOTES TO PHYSICIAN: The decision whether to induce vomiting or not should be made by an attending physician. If lavage is performed, suggest endotracheal and/or esophageal control. No specific antidote. If burn is present, treat as any thermal burn. Specific treatment must be based on judgment of the physician in response to reactions of the patient.

#### 5. FIRE FIGHTING MEASURES

#### FLAMMABLE PROPERTIES

TCC Flash Point: > 190.6 C (> 375.1 F)
Autoignition Temperature: > 315.6 C (> 600.1 F)

#### FLAMMABLE LIMITS IN AIR

LEL: N/A UEL: N/A

#### EXTINGUISHING MEDIA:

Use water spray to cool fire exposed containers. Use carbon dioxide, dry chemical or water spray to extinguish fires.

#### FIRE & EXPLOSION HAZARDS:

Can burn in fire, releasing toxic vapors. No known unusual hazards in a fire/explosion situation.

#### FIRE FIGHTING INSTRUCTIONS:

As in any fire, wear self-contained breathing apparatus pressure-demand MSHA/NIOSH (approved or equivalent) and full protective gear. Evacuate area and fight fire from a safe distance.

#### COMBUSTION PRODUCTS:

When product is heated to decomposition, product will emit acrid dense smoke with carbon dioxide, carbon monoxide, trace oxides of sulfur, water and other products of combustion; possibly including formaldehyde.

#### 6. ACCIDENTAL RELEASE MEASURES

#### SAFEGUARDS (PERSONNEL):

Eliminate all sources of ignition - heat, sparks, flame, electricity, impact and friction. Protect skin and eyes from exposure. Wear appropriate personal protective equipment.

#### INITIAL CONTAINMENT:

Eliminate all sources of ignition - heat, sparks, flame, electricity, and impact. Shut off leak if safe to do so. Contain spilled material.

#### LARGE SPILLS PROCEDURE:

Contain spilled liquid with sand or earth. Absorb spill with inert material (e g, dry sand or earth), then place in disposal container. Dispose of waste material in accordance with all local, state/provincial, and national requirements.

#### SMALL SPILLS PROCEDURE:

Absorb spills with inert material. Dispose of waste material in accordance with all local, state/provincial, and national requirements.

#### 7. HANDLING AND STORAGE

#### HANDLING (PERSONNEL):

Empty drums should be completely drained, properly bunged, and promptly returned to a drum reconditioner, or properly disposed of. When sampling containers use appropriate personal protective equipment.

#### HANDLING (PHYSICAL ASPECTS):

Avoid extreme temperatures.

#### STORAGE PRECAUTIONS:

Keep container closed when not in use. Protect containers from physical damage. Control inventory by using oldest material first. Suggest stainless steel construction for bulk storage but mild steel is acceptable.

#### MISCELLANEOUS:

Maintain good housekeeping.

#### 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

#### ENGINEERING CONTROLS:

Good general ventilation should be sufficient to control airborne levels.

#### EYE / FACE PROTECTION REQUIREMENTS:

This material does not have established exposure limits. Wear safety glasses.

#### SKIN PROTECTION REQUIREMENTS:

For brief contact, normal work attire should be sufficient. When material is heated, wear gloves to protect against thermal burns.

#### RESPIRATORY PROTECTION REQUIREMENTS:

Under normal use conditions, with adequate ventilation, no special handling equipment is required.

#### **MISCELLANEOUS:**

Maintain good personal hygiene.

#### **EXPOSURE GUIDELINES:**

No Information Available.

#### 9. PHYSICAL AND CHEMICAL PROPERTIES

#### 10. STABILITY AND REACTIVITY

#### STABILITY:

Stable.

#### POLYMERIZATION:

Hazardous polymerization will not occur.

#### INCOMPATIBILITY WITH OTHER MATERIALS:

Avoid contact with strong oxidizing agents.

#### **DECOMPOSITION:**

Decomposition may produce normal products of combustion such as fumes, smoke, oxides of carbon and hydrocarbons.

#### 11. TOXICOLOGICAL INFORMATION

#### MISCELLANEOUS:

Toxicological information has been developed for some products and may be available for this product. For available information, write to the address listed in Section One of this MSDS.

#### 12. ECOLOGICAL INFORMATION

#### MISCELLANEOUS:

See Section Three.

#### 13. DISPOSAL CONSIDERATIONS

#### WASTE DISPOSAL:

Incineration is recommended. Bury in landfill in accordance with all applicable regulations as an alternative. Dispose of waste material in accordance with all local, state/provincial, and national requirements. Uncleaned empty containers should be disposed of in the same manner as the contents.

#### 14. TRANSPORTATION INFORMATION

PRODUCT LABEL .....: MR-1140 (EXPO OTO MOD 18B)

#### MATERIAL SAFETY DATA SHEET

DATE PREPARED: 02/16/2007 MSDS No: BEP S-286-1 Benchmark S-286

#### 1. PRODUCT AND COMPANY IDENTIFICATION

PRODUCT NAME: Benchmark S-286

CHEMICAL FAMILY: Anionic Polyacrylamide Copolymer in Water-in-Oil Emulsion

**MOLECULAR FORMULA:** Mixture

#### MANUFACTURER 24 HR. EMERGENCY TELEPHONE NUMBERS

Benchmark Energy Products LP 4113 W. Industrial Ave. Midland, TX 79703 Tel: 432-697-8171

CHEMTREC (US Transportation): Emergency Phone (800) 424 - 9300

#### 2. COMPOSITION / INFORMATION ON INGREDIENTS

Chemical Name Wt.% CAS# Anionic Polyacrylamide Copolymer Petroleum Distillate Ammonium Chloride <2

#### OSHA HAZARDOUS COMPONENTS (29 CFR 1910.1200):

**EXPOSURE LIMITS** 

Chemical NameOSHA PELACGIH TLVSupplierPetroleum Distillate---165 ppmAmmonium Chloride---------

**COMMENTS:** Petroleum distillate: limit based on hydrocarbon content. Ammonium chloride values are for "fumes". Fumes are not an expected source of exposure in normal industrial use, but may be formed during combustion. The OSHA recommended permissible exposure level(s) indicated above reflect the level(s) revised in 1989 or in subsequent regulatory activity. Although the 1989 levels have since been vacated by the 11th Circuit Court of Appeals, we recommend that the lower exposure levels be observed as reasonable worker protection.

#### 3. HAZARDS IDENTIFICATION

**EMERGENCY OVERVIEW** 

PHYSICAL APPEARANCE: Opaque, off-white emulsion

IMMEDIATE CONCERNS: CAUTION! May cause eye and skin irritation. Mist may be harmful if inhaled.

#### POTENTIAL HEALTH EFFECTS

EYES: Irritating, but does not injure eye tissue.

SKIN: Low order of toxicity. Irritating.

**INGESTION:** Low order of toxicity. Small amounts of the liquid aspirated into the respiratory system during ingestion, or from vomiting, may cause bronchiopneumonia or pulmonary edema.

**INHALATION:** Irritating to eyes and respiratory tract in high concentrations. Repeated and prolonged overexposure to oil mists may result in droplet deposition, oil granuloma formation, inflammation and increased incidence of infection.

**CANCER STATEMENT:** This product (or any component at a concentration of 0.1% or greater) is not listed by the NTP, IARC, OSHA or EPA as a carcinogen.

#### 4. FIRST AID MEASURES

**EYES:** Flush eyes with large amounts of water until irritation subsides. If irritation persists, get medical attention. **SKIN:** Wash with large amounts of water; use soap if available. Remove grossly contaminated clothing, including shoes, and launder before reuse. If irritation persists, seek medical attention.

**INGESTION:** First aid is normally not required. If spontaneous vomiting occurs, keep head below hips to prevent aspiration, monitor for breathing difficulty. If symptoms develop, get prompt medical attention.

**INHALATION:** In case of adverse exposure to vapors and/or aerosols, immediately remove the affected victim from exposure and get immediate medical attention. If breathing is difficult, give oxygen. If breathing stops, give artificial respiration.

#### 5. FIRE FIGHTING MEASURES

FLASHPOINT AND METHOD: > (200°F)SETA Flash CC

FLAMMABLE LIMITS: 1.3 to 8.1% @ 77 F (petroleum distillate)

**AUTOIGNITION TEMPERATURE:** Not Available

HAZARDOUS COMBUSTION PRODUCTS: None known

OTHER CONSIDERATIONS: Contact with water may form a gel which is extremely slippery and difficult to clean up.

FIRE FIGHTING PROCEDURES: Use water to cool fire-exposed surfaces and to protect personnel. Isolate "fuel" supply from fire. Use foam, dry chemical, or water spray to extinguish fire.

FIRE FIGHTING EQUIPMENT: As in any fire, wear self-contained breathing apparatus pressure-demand, (MSHA/NIOSH approved or equivalent) and full protective gear.

#### 6. ACCIDENTAL RELEASE MEASURES

#### **ENVIRONMENTAL PRECAUTIONS**

WATER SPILL: Prevent additional discharge of material, if possible to do so without hazard. If possible, try to contain and recover floating material.

LAND SPILL: Prevent additional discharge of material, if possible to do so without hazard. For small spills implement cleanup procedures; for large spills implement cleanup procedures and, if in public area, advise authorities. GENERAL PROCEDURES: Spilled product should be scooped up as much as possible and the remaining thin layer absorbed with a solid material such as sweeping compound. Washing the area with water should only be attempted after most of the polymer has been removed.

**RELEASE NOTES:** If spill was into water, it may require reporting to the National Response Center, see Section 15, Clean Water Act. Recycle or dispose of recovered material in accordance with all federal, state, and local regulations. **COMMENTS:** Spilled material is slippery. Contact with water may form a highly viscous and stringy material which is extremely slippery, difficult to clean up, and can clog small drains.

#### 7. HANDLING AND STORAGE

GENERAL PROCEDURES: Keep container closed. Both open and handle containers with care. Store in a cool, well ventilated place away from incompatible materials. Do NOT pressurize, cut, heat, or weld containers. Empty product containers may contain product residue. Do NOT reuse empty containers without commercial cleaning or reconditioning.

**HANDLING:** Mix will before using. Upon standing, product may stratify (as noted by a clear upper layer of oil). Mild agitation will restore uniformity.

**STORAGE:** Do not use aluminum, copper or mild steel tanks, pumps or piping with this product. Store in glass, stainless steel, plastic or epoxy lined containers.

STORAGE TEMPERATURE: Keep from freezing

STORAGE PRESSURE: Atmospheric

SHELF LIFE: At least six months in unopened containers.

#### 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

**ENGINEERING CONTROLS:** Ventilation should be provided to control worker exposures and prevent health risk; and as necessary to reduce, prevent and control aerosol generation.

#### PERSONAL PROTECTION

EYES AND FACE: Safety glasses with side shields.

SKIN: Where contact may occur, wear chemical resistant gloves, and long sleeves.

**RESPIRATORY:** Where concentrations in air may exceed the limits given in this section or Section 2 and engineering, work practice or other means of exposure reduction are not adequate, NIOSH/MSHA approved respirators may be necessary to prevent overexposure by inhalation.

OTHER USE PRECAUTIONS: Safety shower and eyewash station are recommended in area of use.

Pinnacle Biofuels, Inc. 117 Mac McGoogan Drive Crossett AR 71635 **Consignee Information:** 

Topia Gsrc Ada Resources 6603 Kirbyville Road Houston, TX 77033

The property described below, in apparent good order, except as noted (contents and condition of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the work carrier being understood throughout this contract as meaning any person or corporation in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. It is mutually agreed, as to each carrier of all or any said property, that every service to be performed hereunder shall be subject to all the terms and conditions of the Uniform Domestic Straight Bill of Lading set forth (1) in Official, Southern, Western and Illinois Freight Classification in effect on the date hereof, if this is a rail or a rail-water shipment, or (2) in the applicable motor carrier classification or tariff if this is a motor carrier shipment. Shipper hereby certifies that he is familiar with all the terms and conditions or the said bill of lading, including those on the back thereof, set forth in the classification or tariff which governs the transportation of this shipment, and the said terms and conditions are hereby agreed to by the shipper and accepted for himself and his assigns.

THIS MEMORANDUM is an acknowledgement that a bill of lading has been issued and is not the Original Bill of Lading, nor a copy or duplicate, covering the property named herein, and is intended solely for filing or record

Shipper's No. Page 67602-1 1 OF 1 Agent's No.

RECEIVED, subject to the classifications and lawfully	$\gamma$ filed tariffs in effect on the date of the receipt by the carrier of the property described in the Original Bill of Lading

From: Georgia-Pacific Chemicals LLC (Shipper/Consigner)

CROSSETT, AR

09/07/08

The property described below has been recieved by Carrier in apparent good order, except as noted below, and is marked, consigned and destined as indicated below. Carrier agrees to carry the property to destination, if on its route, otherwise to deliver to another carrier on the route to said destination. Each carrier of, and any party at any time interested in, all or any of said property over all or any portion of said route to destination agrees to perform every service required hereby in accordance with the applicable contract(s), if any, between Georgia-Pacific and Carrier, and otherwise subject to the terms and conditions of the Uniform Domestic Straight Bill of Lading set forth (1) if this is a rail or rail-water shipment, in the Uniform Freight Classification, and (2) if this is a motor carrier shipment, in the National Motor Freight Classification.

40

#### COMMENTS:

Ingredients listed in this section have been determined to be hazardous as defined in 29 CFR 1910.1200. Materials determined to be health hazards are listed if they comprise 1% of more of the composition. Materials identified as carcinogens are listed if they comprise 0.1% or more of the composition. Information on proprietary materials is available as provided in 29 CFR 1910.1200.

#### 3. HAZARDS IDENTIFICATION

#### **EMERGENCY OVERVIEW**

PHYSICAL APPEARANCE:

Colorless, odorless liquid

#### **IMMEDIATE CONCERNS:**

CAUTION: Avoid contact with skin and clothing. Wash with soap and water after handling. Remove and wash contaminated clothing before reuse.

#### POTENTIAL HEALTH EFFECTS

EYES:

May cause eye irritation with reddness and swelling. Avoid contact with eyes.

#### **MSDS**

Page: 3 of 7

Date-Issued: 10/03/1997

MSDS Ref. No: BIWT23003

Date-Revised: 03/29/2001

Revision No: 3

#### LiquiBrom 4000

#### **EXTINGUISHING MEDIA:**

Appropriate to surrounding fire.

#### HAZARDOUS COMBUSTION PRODUCTS:

In fires fueled by other materials, hydrogen bromide and/or bromine may be released.

#### FIRE FIGHTING EQUIPMENT:

Firefighters should wear full protective clothing and self contained breathing apparatus (SCBA). Thoroughly decontaminate fire fighting equipment including all fire fighting wearing apparel after the incident.

#### 6. ACCIDENTAL RELEASE MEASURES

#### **GENERAL PROCEDURES:**

STEP TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: Utilizing approporiate clothing and safety equipment, contain spill material. Cover the liquid with an inert absorbent. Using clean, dedicated equipment, sweep and scoop all spilled material, contaminated soil, and other contaminated material and place into clean dry plastic containers for disposal. Dispose of according to local, state and federal regulations.

#### 7. HANDLING AND STORAGE

#### **GENERAL PROCEDURES:**

Avoid contact with eyes, skin or clothing. Avoid breathing vapors.

#### HANDLING:

Use safe chemical handling procedures for the hazards presented by this material.

#### STORAGE

Keep this product dry in tightly closed original container when not in use. Store in a cool, dry, well ventilated area. Product should be stored at 0 F or above.

#### 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

#### **EXPOSURE GUIDELINES:**

OSHA HAZARDOUS COMPONENTS (29 CFR 1910.1200)

		EXPOSURE LIMITS			
		OSHA PEL	ACGIH TLV	SUPPLIER OEL	
		ppm mg/m ³	ppm mg/m ³	ppm mg/m ³

#### LiquiBrom 4000

#### POLYMERIZATION:

Hazardous polymerization will not occur under normal conditions.

#### HAZARDOUS DECOMPOSITION PRODUCTS:

If strongly overheated, may release hydrogen bromide and/or bromine.

#### **INCOMPATIBLE MATERIALS:**

Strong acids, strong oxidants.

#### 11. TOXICOLOGICAL INFORMATION

#### **ACUTE**

DERMAL LD₅₀: >20000 mg/kg of body weight in rabbits. ORAL LD₅₀: >5000 mg/kg of body weight in rats

#### **EYE EFFECTS:**

May cause eye irritation

#### SKIN EFFECTS:

Based on the toxicological information available, this product is not expected to be irritating to the skin.

#### CARCINOGENICITY:

This product is not listed as a carcinogen by IARC.

This product is not listed as a carcinogen by NTP.

This product is not listed as a carcinogen by OSHA.

#### REPRODUCTIVE EFFECTS:

A three generation reproduction study in rats fed 4800 mg/kg of sodium bromide showed a decrease in fertility, no effects were observed at lower levels according to the literature.

#### 12. ECOLOGICAL INFORMATION

#### **ECOTOXICOLOGICAL INFORMATION:**

This pesticide is toxic to fish and aquatic organisms. Do not disharge effluent containing this product into lakes, streams, ponds or estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

IN CASE OF EMERGENCY CALL CHEMTREC TOLL FREE (800) 424-9300 DAY OR NIGHT

### Elevated temperature liquid, n.o.s.; 9; UN 3257; III

#### **Emergency Response Information**

#### Potential Hazards

#### Health Hazards

Inhalation of vapor or mist may cause irritation in the eyes, nose, mouth and/or throat. Hot material can cause thermal burns on contact with skin or eyes.

#### **Emergency Action**

Keep unnecessary people away; isolate hazard area and deny entry.

Stay upwind; keep out of low areas.

Positive pressure self-contained breathing apparatus (SCBA) and structural firefighter's protective clothing will provide limited protection.

#### **Fire**

Small Fires: Dry chemical, C02, foam Large Fires: Water spray, fog, foam

### Spill or Leak

Do not touch or walk through spilled material; stop leak if you can do it without risk. **Small Spills:** Take up with sand or other non-combustible absorbent material.

Place into containers for later disposal.

Large Spills: Dike far ahead of liquid spill for later disposal.

#### First Aid:

**Inhalation:** Move victim to fresh air. Rest in half upright position. Seek medical attention, if necessary.

Eyes: Rinse eyes with running water for at least 15 minutes. Seek medical attention.

Skin: Remove contaminated clothing and shoes and isolate. Flush skin with soap and running water for

at least 15 minutes. Seek medical attention, as necessary.

rev. 12/95
